For the third line of pits the lead is 145 feet, and allowing for this increase the carriers should be two more than in the second line of pits. In the same way the number of carriers in the fourth line of pits will be two more than in the third.

4. The foregoing complete the gang requirements for all the pits in the first layer of two feet in depth. The dividing footpaths should be cleared away when the pits have been excavated to 2 feet in depth, and the pits for the second layer of 2 feet, with their footpaths, marked out in exactly the same way as in the case of the top layer.

The number of carriers per pit of the second layer will exceed that of the corresponding pit in the layer above by two to allow for the extra lift from the pit and in the spoil bank. And in the same way in each succeeding layer the number of carriers per pit will be two more than in the corresponding pit of the layer above it. The diagram shows this quite clearly.

5. The task for a digger in medium soil was originally fixed at 130 cubic feet per day. It is desirable that the length and breadth of the pits should be uniform whatever the class of soil, and if the task of 130 feet was adhered to, the depth to which it would be necessary to excavate the pit would be about $1' 3\frac{1}{2}"$. This might lead to some confusion; and to avoid any possibility of that, it is thought desirable to reduce the task to 125 cubic feet per digger. The depth to which the pit will have to be excavated to secure that quantity is 15 inches. Based on the task-tables, the number of carriers per pit of four diggers, each performing a task of 125 cubic feet, is as follows. Under normal conditions, each carrier will remove 125 cubic feet per day for a distance of 100 feet, but on relief works only $\frac{3}{4}$ ths of that quantity is expected, viz., 75 cubic feet. The quantity excavated by 4 diggers at 125 cubic feet each = 500 cubic feet, and the number of carriers required is therefore $\frac{500}{75} = 6\frac{2}{3}$, say, 7. For the first line of pits of the second layer there will, therefore, be seven carriers for each pit. For each successive line of pits the number of carriers has to be increased by two (2), as has been

shown in detail in the example worked out for soft soil. For each successive layer, however, only one more carrier will be allowed than in the corresponding pit of the layer above.

5. The task for hard soil was fixed at 85 cubic feet per digger. This represents a depth of $10\frac{1}{2}$ inches of the standard pit; and to avoid confusion, it is better to fix the depth at 10 inches. By doing so the task is reduced from 85 to 83 cubic feet. The number of carriers for the first line of pits is worked out and found to be 5, and for each successive line of pits two more carriers should be allowed as explained in previous examples. For every two layers (each of 10 inches) in depth only one additional carrier will be necessary.

6. The diagrams attached show clearly the number of carriers required in each line of pits in the several layers. They are not absolutely in accordance with the task-tables, but are sufficiently close for all practical purposes.

7. In the case of road construction the task should also be exacted from the diggers and the carriers. The task will be the same as that laid down in paragraph 2 of this note for tank excavation. On road work the lead will usually be under 50 feet and the lift (including height of bank) under 6 feet. For such conditions the number of carriers in the several soils may be taken as follows :—

Soft soil,	3	carriers per digger.	
Medium soil, 2	"	"	
Hard soil, $1\frac{1}{2}$	"	"	(that is, 5 carriers for 4 diggers).

The borrow-pits should be marked out of uniform length and breadth if circumstances permit, so as to lessen the labour of measuring up the work and to facilitate check.

8. Referring to paragraph 32 of note attached to Resolution No. 420M.P.I., dated 25th January 1897, it is found that although the typical gang of 60 workers described therein is a suitable number to place under one mate, it is too large a unit to deal with in assessing fines for short work, and also that so many as 60 do not readily accept the same headman to distribute wages amongst them. The typical gang of 60 working under one mate may therefore be conveniently subdivided into separate pit gangs who are willing to work together, and the wages and fines of each pit gang should then be separately calculated and made over for disbursement to the headman nominated by the gang. Should it be found that one muharrir cannot conveniently deal with so many gangs as 10 aggregating from 500 to 600 persons (paragraph 33 of note to above quoted Resolution), the number of gangs in his charge may be reduced at the discretion of the officer in charge.

J. G. H. GLASS,
Chief Engineer.

The 15th March 1897.

No. 687F.G., dated Bankipore, the 8th March 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith my famine report, under sections 13 and 24 of the Famine Code, for the two weeks ending 20th and 27th February. The report is a few days late, as Mr. Macpherson, the Collector of Champaran, was not set free to write his report until after the Lieutenant-Governor's departure from Bihar.

PART I.—INTRODUCTION.

2. Since my last report was written, the Lieutenant-Governor, accompanied by yourself, has made a short tour through North Bihar, with the object of personally inspecting the conduct of relief operations. I understand that the result of His Honour's observations, and any orders which he may think necessary to pass, will be separately communicated. It remains for me to chronicle the bare facts of the tour.

3. Leaving Howrah on the night of the 28th February, the Lieutenant-Governor reached Mokameh at day-light on the 1st March. There I met you, and the party proceeded by train to Bettiah, which was reached late in the afternoon. Next day, Tuesday the 2nd, His Honour drove out to Ramnagar (28 miles) accompanied by the local officers, and in the afternoon visited the relief work at the Dokraha tank, while you and I also visited the Ramnagar-Harnatar road. On the 3rd March (Wednesday) the party returned to Bettiah *via* Sathi (32 miles), visiting the Chanki and Kooria tanks *en route*. We then proceeded by train to Darbhanga, which was reached at daybreak on the 4th March, Thursday. The same morning His Honour visited the Chakka tank, while you and I also inspected that at Dhoi. In the afternoon the Lieutenant-Governor presided at a conference attended by the Hon'ble Mr. Glass, Chief Engineer, the Collectors of Champaran, Muzaffarpur and Darbhanga, the two Superintending Engineers for Relief Works, and other local officers, as well as by you and myself. On the morning of the 5th we were taken by special train to Kamtaul to inspect the Darbhanga Raj relief works near that place, and we finally left Darbhanga by the mail train for Mokameh at 12-50. After taking leave of the Lieutenant-Governor at Mokameh the same evening, I returned to my head-quarters at midnight.

PART II.—DISTRICT REPORTS.

4. *Patna*.—The report from this district continues excellent. The harvesting of the *rabi* is in full swing, and in spite of caterpillars and insects reported in some places, the Collector estimates a 12-auna crop, but it will probably be more.

5. Prices are still hard with a tendency to fall, and there is no distress.

6. The imports by rail and river amount to 45,466 maunds as against 48,470, and the exports to 45,490 maunds against 60,462, so that the balance against the district is 24 maunds only, a smaller figure than has ever been returned before: the cause is a great reduction in exports, the volume of imports remaining about the same. Three fourths of the imports (35,393 maunds) are rice, while gram and other pulses (21,795 maunds) account for nearly half the exports. As these have been exported mostly from Mokameh and Patna ghat, they doubtless represent the fresh *rabi* crops from the rich lands to the south of the railway.

7. No relief works are now open in this district, and the only kind of relief which is being given is that distributed at poor-houses and kitchens, and to a small extent by gratuitous relief. The former has my entire approval, for it meets the case of many sick and helpless persons, mostly strangers and pilgrims, who would otherwise starve; but the Collector will have to be strict about gratuitous relief in villages, since in the midst of such general agricultural prosperity as this district enjoys, it is out of the question for Government to take over the support of the whole indigent population. As noticed in previous reports, the money dole seems unnecessarily high; the Collector has been asked to explain the reason, but has not yet replied.

8. What Mr. Inglis says in his concluding paragraphs about charitable relief from the Famine Fund will be separately dealt with. It is true that in the Patna City itself, there is a very great deal of gontool poverty, but it is to be hoped that all the requirements of the City will be met from local subscriptions, and that the funds of the Central Committee will be set free for use in districts where they are more urgently required.

9. *Gaya*.—The prosperity of this district continues unabated. The *rabi* harvest is excellent, opium promises to be a full crop, prices are falling slightly with the arrival of the new *rabi* in the market, and there is no cause for anxiety anywhere.

10. Imports were 9,483 maunds in the period under review, against 5,504 in the preceding period, and exports were 1,082 maunds against 1,695. Nearly two-thirds of the imports were rice coming into Gaya itself, no doubt for despatch to Palamau. The Collector reports that 608 maunds have already been sent on to that district, but as the figures given in his forms 8 and 9 are only those for the fortnight ending 20th February, instead of the 27th, it is possible that a good deal of grain has found its way south since that date.

11. The number of people fed daily at the kitchens and poor-house on the Grand Trunk Road at Kusa and Aurangabad was 122 and 138. Figures for Madanpur have not been received.

12. At a meeting held at Gaya to raise funds in connection with the Bengal Branch of Indian Charitable Relief Fund, a sum of Rs 10,000 was raised on the spot, and the Collector has submitted to me a copy of their proposals for the distribution of relief.

13. *Shahabad*.—There is no great change in this district, except an increase in the number of persons in the receipt of gratuitous relief. The prospects of the *rabi* are good, except in the west and south of the Bhabua subdivision, as has already been reported. The harvesting of this crop is already giving employment to labourers all over the district.

14. Prices are stationary or show a tendency to fall, from the new *rabi* crops having come into the market, especially gram and peas. The Collector does not quote the price of *rahar*, which must certainly be falling; wheat, which is the staple food in the west of the district, has risen a little at Buxar and Bhabua, but is cheaper at Sasaram.

15. The food-grain traffic is about the same as in the previous fortnight, the imports being 23,702 maunds against 24,895, and the exports 9,470 against 7,999. The balance in favour of the district is thus 14,232 maunds against 16,896. Almost the whole of the imports were rice, of which more than half went to Buxar: the Collector will be asked to ascertain the subsequent disposal of this grain, since Buxar has from the first been the great importing station of the district, especially for rice. Of the exports, nearly half were gram and pulses.

16. Four relief works are now open in the Bhabua subdivision, but the number employed on them is not yet very large. The following statement gives the usual comparison of the figures of the past with the previous fortnight:—

Week ending	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 c. ft.
		Task work	Daily wage irrespective of task	Gratuitous relief, including dependents	Total		
1	2	3	4	5	6	7	8
6th February	2	645	378	9,975	11,307	Rs. 4. 65.9	Rs. 4. 15. 4
12th "	2	668	349			79	3 2 10
20th "	4	640	307			50.5	2 3 9
27th "	6	707	78			51.4	2 5 7

17. Turning first to relief works, it will be seen that the average attendance for the past fortnight was 697 male units on task work and 143 on the daily wage, making a total of 840 in all, whereas the daily average of those gratuitously relieved was 9,938. It seems likely that more relief works are required to employ the able bodied poor, and this will be looked into. The outturn per male unit is high, if the measurements are correct, and the cost per 1,000 cubic feet very low, viz., Rs. 2-3-9 and Rs. 2-5-7, respectively. One explanation is that the proportion of males was large, as Form No. 5 will show, and it is also possible that too high a task has been demanded.

18. The advance under the head of gratuitous relief is due to the development of the circle organization, and though the numbers are high as compared with the numbers on relief works, the total is only 3.8 per cent. of the population of the presently affected area. The numbers gratuitously relieved will certainly rise higher than they now are, but as more relief works

are opened, a more usual ratio will be attained. The average dole as shown by Form 7 is not excessive.

19. Poor-houses will be constructed at Bhabua and Arrah forthwith. Those along the Grand Trunk Road, the opening of which has already been reported, relieved a small number of persons daily, but the large numbers at Bhabua have been reduced, as the recipients have been drafted to their villages. The Collector's Form No. 6 shows that the daily total relieved at all these kitchens and poor-houses was 749 for the first, and 656 for the second, week of the period under report. The figures for the Dehri kitchen do not appear to be included in this form, nor do the figures in Form 6 agree with those quoted in paragraph 12 of the Collector's report.

20. The public health of the district remains good, but the Collector, in order to make his figures more complete should have quoted the average death-rate for January in the Bhabua subdivision.

21. *Saran*.—On the whole the condition of this district remains much as before, but there are internal changes which will be noticed below.

22. The promise of the *rabi* continues excellent; in Siwan it is expected that it will be a bumper crop, but the Collector speaks with less confidence of the crop in the two other subdivisions. The crop in West Gopalganj is good, while in East Gopalganj it is not so satisfactory: the crops in the Sadar are unequal. I adhere to my former estimate of an average or 16-anna crop for the whole district; I wish I could say an average crop for each part of it, but those parts which contain little *rabi* land will continue to suffer in spite of good crops in other parts of the district.

23. Grain is plentiful everywhere, and while the traffic figures show that it is still coming in, the statistics of money-orders paid in the district prove that the money to buy it is still pouring in, the amount paid out by the Postal Department in February having been Rs. 3,17,761 against Rs. 2,40,250 in the same month of 1896. The opium payments will still further augment the resources, or re-establish the credit, of the raiyats. For all these reasons, prices remain steady or show a tendency to fall as new grain enters the market.

24. The balance of food-grains in favour of the district is slightly greater than at the end of the previous fortnight, the imports by all routes being 90,491 maunds against 92,675, and the exports 7,365 maunds against 10,193. The balance in favour of the district is thus 83,126 maunds instead of 82,482. As before, most of the imports, and indeed of the exports also, consist of rice.

25. Relief works are now going on in 36 places on behalf of Government and in 10 places on behalf of the Hutwa Raj. With the sanction of the Board, an advantageous arrangement has been made by which the Raj relief works, instead of being scattered all over the estate, are confined to one part of it and are thrown open to all comers, Government works, on the other hand, being opened in Raj villages in other parts of the subdivision. Two of 36 works are under Public Works Department Agency. The following table gives the usual statistics in this connection, omitting those for Public Works Department works, as they are evidently incomplete. They can be found in Form 7:—

Week ending.	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task work.	Daily wage irrespective of task.	Gratuities relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
<i>A.—Under the Collector.</i>							
6th February ...	27	10,464	781	18,560	24,805	27	Rs. A. P.
13th " ...	27	6,917	1,029	18,068	21,014	30	2 14 3
20th "	8,408	1,141	14,315	23,864	31	2 18 10
27th " ...	34	7,599	1,141	14,434	23,174*	38	2 18 0
<i>B.—Under the Hutwa Raj.</i>							
6th February	1,808	304	604	2,711	31	3 2 8
13th "	1,777	356	646	2,779	33	2 15 8
20th "	2,963	683	668	4,314	34.3	3 4 0
27th " ...	10	3,988	1,240	668	4,846	34.3	3 5 9

* Besides these there are two major works under Public Works Department Agency with a daily average of 224 task-workers and 1,048 on daily wage irrespective of task.

26. Turning first to Government works it will be seen that including those on works under Public Works Department Agency, the daily numbers in receipt of relief of all kinds remained fairly constant during the fortnight. Task-workers fell off slightly, no doubt on account of the labour available in the harvest field. But while there has been a fall in the numbers in Siwan, there has been a rise in Gopalganj, the gross figures of attendance for each week having been as follows:—Sadar subdivision 15,492 and 15,188, Siwan, 33,395 and 21,468, Gopalganj 21,651 and 29,131. A reference to Form 7 will show that in both weeks the outturn on Civil Agency Works, and the cost per 1,000 cubic feet were constant, and very fair, viz., 31 and 38 cubic feet and Rs. 2-13-0 and Rs. 2-6-9 per 1,000 cubic feet; it should be remembered that a majority of the works in this district are tanks. During the fortnight the Public Works Department took over two works with such extraordinary results that it is impossible to accept them: the daily outturn for the last week is stated to be 102 cubic feet per male unit, and the cost 15 annas 3 pie per 1,000 cubic feet, while the daily average of those in receipt of daily wage irrespective of task is 1,048 ss against 484 male units on task-work. A reference to Form 5, Public Works Department Agency works shows that almost all the men employed have been entered as A class, while all the remaining labourers have received the daily wage irrespective of task. I suspect that a task has been taken from the diggers only, as proposed in the first issue of resolution No. 420M.P.I. of the Public Works Department. An enquiry will be made and the errors corrected; the Collector has gone up to Gopalganj for the purpose.

27. Gratuitous relief is still largely given in this district, for reasons which have often been explained; the numbers in the Sadar and Gopalganj subdivisions are much larger than those in Siwan, which is doubtless due to the better crops in the latter. The total numbers show little variation.

28. The Hutwa Raj figures give good results, though the cost per 1,000 cubic feet is large, and their works have evidently been brought more into line by the officials of the Raj. A fair task is exacted and the numbers on task work and gratuitous relief are constant. An explanation of the increase in those on daily wage irrespective of task is suggested by the Collector.

29. The inmates of the poor-houses are on the decrease, because some have been drafted to their homes, while others have escaped to join in the profits of the *rabi* harvest. In the four Hutwa poor-houses, the average daily numbers have fallen from 507 to 454, and in the Government poor-houses from 163 to 149.

30. *Champanan*.—In this district the leading features of the past fortnight have been some decrease in the numbers on task-work and in the cost of work per 1,000 cubic feet, while the outturn was better and the numbers on gratuitous relief remain steady; so far as these results connote better administration, they are matters for congratulation.

31. Mr. Macpherson has revised his estimate of distressed area and population, as explained in paragraph 3 of his report, and has raised it from 1,620 square miles with a population of 972,000, to one of 1,865 square miles with 1,110,000 souls.

32. The prospects of the winter crops are excellent on the whole, though in parts they are backward. The public health is unusually good owing to the dryness of the season, and the mortality is a good deal below the average.

33. Prices are fairly stationary, more so at Bettiah than Motihari; at Ramnagar and Bagaha they had fallen a little according to the latest advices received. It will be remembered that in a separate letter No. 575F.G. of the 26th ultimo, I pointed out to Government that for some time past there has been a steady increase in the nett imports to Bettiah, which reached 2,083 maunds in the week ending 13th February; and it is satisfactory to note that in the two weeks now under report, the nett excess of imports over exports at that terminus has been 8,138 maunds. So long as this steadily increasing flow goes on, we need have no fears for the depletion of stocks, more especially as it is reported that the local mahajans have now mastered the details of import traffic.

34. For the district as a whole that traffic has been about the same, i.e., 14,400 maunds against 14,351, but the exports have only totalled 786 maunds against 1,678; the balance in favour of the district is, therefore, 13,614 maunds against 12,673. As above stated most of this grain has gone to Bettiah.

35. As regards relief works, the process of taking over large works by the Public Works Department has been going on, but it has not been so rapid in

this district as it has been in Darbhanga, partly for want of establishment and partly from the inefficiency of the minor establishment available. Altogether 12 works are now under Public Works Department Agency, the average daily number of male units on task work for the week ending 27th February being 8,754 against 61,378 on Civil Agency Works. The number on the latter has been reduced, as works were completed and the labourers on them drafted on to the nearest major works. Twelve works were under the Executive Engineer and 54 under the Collector. I give below the usual comparative statement taken for the most part from Form 7:—

Week ending.	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
6th February	...	62,820	2,057	7,216	72,392	C. ft. 18	Rs. A. P. 4 9 10
13th "	75	67,175	2,744	16,222	86,141	19	4 6 1
20th "	...	79,653	4,058	29,395	113,106	22½	4 0 3
27th "	66	70,132	4,034	29,575	103,741	24	3 14 8

36. Treating the figures as a whole without distinction of agency, it will be seen that while the numbers on task-work rose during the first week of the fortnight to a daily average of 79,653, they fell again during the second week to a daily average of 70,132. The Collector has not stated what the cause of this variation is, but it is probably the harvesting of the *rabi* crop and perhaps, as in Darbhanga, the temporary closing of works while the Public Works Department officials were taking them over. Moreover, as subdivisional totals are not given, and Form 5 gives no class totals, it is very difficult to localize the variation: the Collector's attention will be drawn to the matter.

37. As already remarked above, the outturn of work is steadily increasing, and when it is remembered (*vide* Mr. Macpherson's 21st paragraph) that out of 66 works as many as 51 were tanks, the general outturn of 24 cubic feet per male unit is quite satisfactory, as is the rate of Rs. 3-14-8 per 1,000 cubic feet attained in the last week under review.

38. The numbers on gratuitous relief have nearly doubled themselves within the fortnight, having gone from 15,222 per diem to 29,575. Three-fourths of these were relieved in their villages, which fact, taken with the increase in numbers, shows that the circle organization is now better developed, and that the police are relieved of this duty except in the case of waifs and strays and urgent cases.

39. Poor-houses have been started at Motihari, Bettiah and Ramnagar, and kitchens were opened at several places in the Hardih thana. The average attendance at the Motihari poor-house was 79 for the fortnight, while at the Bettiah Raj institution, which was rather a kitchen than a poor-house, 650 persons daily received food and shelter. This work has now been taken over by Government, and will be managed on Famine Code lines in future.

40. A considerable number of wanderers have found their way into this district across the Gandak from the North-Western Provinces, and on the 2nd March, when the Lieutenant-Governor visited the Bettiah poor-house, out of 760 inmates 304 were from those provinces. Considering that these invaders also supply the bulk of the vagrants picked up by the police both here and along the Grand Trunk Road in the Shahabad district, it might be as well to enquire what arrangements are being made in the border districts of those provinces for the relief of their poor. The Collector will be asked to ascertain if possible what number of immigrants from the North-West Provinces are to be found in the trans-Gandak thana of Madhubuni: he was at one time afraid that relief works would have to be opened in that area solely for the benefit of these people.

41. Private relief works carried out by the Bettiah Raj and the Tettaria Factory on the piece-work system, gave employment to 1,519 male units during the last week of February.

42. *Muzaffarpur*.—The features of Mr. Hare's present report are a great increase in the numbers on gratuitous relief, but only a slight advance on those employed on relief works, in spite of the fact that the number of works available for them has been increased by 50 per cent. during the fortnight.

43. The prospects of the *rabi* remain excellent, and the weather has been most favourable. The public health is exceptionally good, the mortality for January, which is now reported, being much below that of the same month in 1896.

44. There has been some falling off in the volume of food-grain traffic. The imports being 41,837 maunds against 52,939, and the exports 2,560 maunds against 5,308, the balance in favour of the district for the past fortnight is 39,277 maunds instead of 47,631. More than half both of the imports and exports, are rice, viz., 22,056 maunds and 1,380 maunds.

45. Prices are stationary on the whole, the rise in that of rice being met by a fall in that of the earlier *rabi* crops. In Sitamarhi there is a rise in every case except gram, but it is to be remembered that the crops in this northerly subdivision being backward, the effect of the *rabi* harvest is hardly felt there yet.

46. During the last week of the fortnight under review, the Public Works Department have opened three large works, each estimated to employ 6,000 labourers for 40, 60 and 65 days, respectively. So far they do not appear to have attracted labour, and the Collector says that the system of large gangs, with undivided responsibility, laid down in Public Works Department Resolution (revised) No. 420M.P.I. of the 25th January, is not acceptable to the people. He also points out that the *rabi* harvest is taking away some labour, and he draws the inference that the labourer class is not yet urgently pressed in his district. It is too soon, however, to form any conclusion as to the attractiveness of these works and the tasks enforced.

47. Turning to relief in the district as a whole, the following statement gives the usual comparative figures:—

Week ending	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Daily outturn per male unit.	Cost per 100 cubic feet.
		Task-work.	Daily wage irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
6th February...	29	16,983	474	12,376	29,832	C. ft. 82.13	Rt. A. P. 1 1 2
13th " ...	33	16,727	630	14,189	31,146	80.58	1 1 4
20th " ...	46	16,918	1,315	20,744	38,977	69.39	1 3 11
27th " ...	48	18,660	1,067	48,230	67,963	64.15	1 5 5

48. The number on task work has advanced very slowly in spite of the fact that on the 27th February there were 48 works open as against 33 on the 13th idem. As is known to Government, the tasks demanded hitherto by Mr. Hare are in excess of those laid down in Mr. Glass' tables, and although I am certain that in many cases they could be executed by the task-workers, yet they have undoubtedly deterred the people from seeking the works when lighter tasks were available in neighbouring districts. Now, however, that the Collector has been directed to introduce Mr. Glass' tables everywhere, it may be expected that the numbers on relief works will increase, and also that the existing great disproportion of adult males to others will be reduced: for the week ending 27th ultimo there were employed on task work 76,191 adult males as against 61,081 of all others. The rate per 1,000 cubic feet was Re. 1-3-11 for the first week, but was raised in the second week to Re. 1-5-5 by the intervention of the Public Works Department with Mr. Glass' tasks. This had the effect also of reducing the average outturn per male unit from

69·39 cubic feet to 64·15, as the Public Works Department outturn was 39·15 against 66 obtained on Mr. Hare's works.

49. The numbers on daily wage irrespective of task are carefully controlled, save in the case of particular works, where there was doubtless some special cause at work.

50. The numbers on gratuitous relief have again largely increased. The present advance is said by the Collector to be due to an increase of distress; it is probably also due to the better development of circle organization, and a more careful inspection of the villages. The average dolo is still high, viz., 11 pies, for the first week, but it has been reduced in the second. The gratuitous relief entered against the Public Works Department Agency works was administered to dependents; I have desired that as far as possible these should be relogated to their villages. The figures of relief given by the Darbhanga Raj in the Parihar Circle show an average of 2,175 per diem on the works against 758 in the preceding fortnight. As before a large proportion were men, which is a necessary consequence of the Raj system of work.

51. The daily average of persons relieved in the five Government poor-houses was 409, and in the Raj poor-house at Parihar 228. Of the Government poor-houses Sitamarhi had the largest number of inmates, viz., a daily average of 140.

52. *Darbhangā*.—The Collector's report shows that the machinery of relief in this district is working smoothly, and there has been no deterioration or confusion. The only point in which improvement is desirable is in the supply of statistics from works under Public Works Department agency, for in the absence of them the district figures are necessarily incomplete.

53. The *rabi* prospects are better than before, and Mr. Carlyle is inclined to raise his estimate; it is unnecessary to do so, however, until the harvest is nearer completion. Harvest operations have begun, and they seem to have checked all increase in the number of relief workers.

54. Prices are fairly stationary with a tendency to fall in the case of the earlier *rabi* crops, such as gram and rahar. The public health remains phenomenally good.

55. Imports have again exceeded exports in the period under review, the figures being 36,965 maunds and 10,139 maunds, while during the previous fortnight they were 50,591 and 20,229; the balance in favour of the district is now 26,826 as against 30,362 when I last wrote. Rice and paddy account for more than half the imports, and "Other food-grains" (15,188 maunds) for almost all the balance: more than half the exports are "Other food-grains."

56. As regards relief works it is to be noted that 13 of these with about 13,000 workers have been taken over in this district by the Public Works Department, but it is unfortunate that the arrangements for supplying the Collector with punctual statistical information from them have failed hitherto. While I was at Darbhanga plans were matured and orders issued by Mr. Glass, which will, it is hoped, prevent a repetition of these failures.

Week ending	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Daily outturn per male unit.	Cost per 1,000 c. lt.
		Task work.	Daily wage, irrespective of task.	Gratuitous relief, including dependents.	Total.

* Beside 13 works under the Public Works Department with about 13,000 workers.

57. Taking the figures as they stand, however, and understanding clearly that they do not include any figures from works under the Public Works

Department, it appears that while the outturn of work per male unit has been maintained and the cost kept down, there has been a large falling off in the numbers of task-workers, which is partly due to considerable numbers having gone off to works under Public Works Department agency, as well as to several works having been temporarily closed for the purpose of taking

Average daily number on task works in each sub-division in the week ending		20th February.	27th February.
Sadar	57,236	32,797
Samastipur	5,535	5,509
Madhubani	65,545	28,128
Total	128,316	66,434

over. Some also have been drawn away to the harvest field, and large numbers have gone off temporarily to private works as reported by the Collector in the marginal note to his 18th paragraph. Looking a little closer into the figures, it is interesting to observe the numbers on relief works in the different subdivisions; the figures are given in the margin.

58. The cost per 1,000 cubic feet has been Rs. 2-11-7 and Rs. 2-11-3 as against Rs. 3-1-11 and Rs. 2-12-10 in the previous fortnight. Considering that a large proportion of the works undertaken are tanks, these results are remarkably good. Mr. Carlyle has given a copy of form 5 showing figures for tanks alone, from which it appears that a daily average of 72,619 task-workers in the first week and 40,253 in the last were employed on tanks, being 56.59 per cent. of the whole in the first case, and 60.59 per cent. in the second.

59. The numbers on daily wage irrespective of task are inconsiderable.

60. The figures for gratuitous relief are heavy again, and owing to the temporary decrease in the number of relief workers, the proportion was higher than ever during the last week of the period under review. The true ratios will not be apparent till complete figures are received from all relief works; but in the meantime it is satisfactory to learn from the Collector's report that a personal examination of the Circle Officers' lists has satisfied him that they are carefully and well prepared.

61. The operations of the Darbhanga Raj during the last four weeks are set forth in a separate set of tables. They show that for the week ending the 27th February the Raj had a daily average of 21,900 persons on relief works and 10,578 in receipt of gratuitous relief. Mr. Bell, the Manager, assured me at Darbhanga that he had checked many lists and had satisfied himself of their correctness.

62. Poor-houses are open at four places, and others will soon be opened elsewhere.

PART III.—CONCLUSION.

63. The features of famine relief administration during the past fortnight are the continued prosperity of the *rabi* and the general commencement of harvest operations, a consequent falling off in the numbers on relief works, an increase in those on gratuitous relief, better control over the relief-workers, and a final decision on the system on which relief works are to be conducted. In a word, a continuance of satisfactory natural conditions, and an improvement in administration.

64. Crop prospects continue good everywhere. Insect-pests are reported from a few places, but the damage is not alleged to be great. No rain has fallen, which is a cause for congratulation except for indigo. The reports of the poppy crop are satisfactory on the whole, though there are complaints of west winds in South Bihar, and some blight is reported in North Bihar. The collection of the drug is in full swing everywhere, and a full average crop is expected all round.

65. Prices are stationary with a tendency to fall in respect of those *rabi* crops which have been already cut, such as peas, gram and some of the pulses. The price of rice is steady, but that of Indian-corn is rising a little as the stock is being exhausted.

66. The result of the food-grain traffic is shown in the following statement:—

DISTRICT.	IMPORTS.		EXPORTS.		EXCESS—I. OR E.

* The figures of imports and exports for Gaya are for the fortnight ending 20th February 1897.

The Patna and Saran figures include river-borne traffic also, and the figures for the Saran district for the previous fortnight have been corrected accordingly.

67. It will be noticed that in Patna the exports and imports nearly balance each other, and that in every other district imports are in excess, very largely so in Saran as usual: in Muzaffarpur and Darbhanga there is some falling off in the balance of imports over exports. The volume of both exports and imports is smaller this fortnight than in the previous one, the totals being 3,96,989 maunds and 3,39,236 respectively. Only three of the District Officers have given details to show where the imports have come from, so that it is impossible to compare the figures for rice from Howrah, except in regard to Patna, Gaya, and Darbhanga. Patna has imported 13,201 maunds against 9,291, Gaya 752 maunds, and Darbhanga 384 against nil in each case. The figures will be obtained from other districts.

68. I give again in the margin figures to show the proportion of the population in the distressed tracts of each district who were in receipt of relief of all kinds on the last day of the fortnight under report. The Muzaffarpur figures include 2,500 on account of Darbhanga Raj relief in Parhar, the same figures having been deducted from the total of the Darbhanga district. The totals have been taken from those published in the

Calcutta Gazette.

69. Next I give below an abstract statement comparing the principal items of relief administration district by district for the past and the previous fortnight: the figures represent the mean of the two weeks in each case:—

DISTRICT.	FORTNIGHT ENDING 13th FEBRUARY 1897.									FORTNIGHT ENDING 27th FEBRUARY 1897.

Total	176,868	5,989	112,661	179,411	10,863	137,469

70. Turning first to task work, it will be seen that there has been an advance of 3,168 male units on the whole. For reasons already stated there has been a decrease in Darbhanga and Saran and an increase in other districts. There has been an increase in the average outturn of work everywhere, except in Muzaffarpur, where the introduction of Mr. Glass's scale of tasks on the Public Works Department agency works has caused the average outturn to fall from 81·3 cubic feet to 66·77 cubic feet. For Champaran the figures in columns 3 and 5 have been corrected in accordance with the revised figures given by the Collector in his present report. The cost per 1,000 cubic feet has fallen everywhere, except in Shahabad and Muzaffarpur. The average wage earned per male unit is now nearly the same everywhere, though rather high in Shahabad.

71. The numbers on daily wage irrespective of task have gone up in Saran for reasons already explained in paragraph 26 above: the proportion is also high for the same reason. The wage paid is now everywhere higher than that earned by the male unit of task-worker: it is presumed that the explanation is that nearly all the persons so paid are members of special gangs and so forth, the weakly persons and others who received this wage at first being now relieved as dependents, or entered as D class coolies, or placed on the charitable relief lists.

72. There is a considerable advance in the numbers on gratuitous relief, viz., from 112,661 adult units to 137,459. The increase is most marked in Champaran and Muzaffarpur, in both which districts an expansion was needed. The percentage of those relieved in this manner to the total relieved in all ways is now as follows in each district, taking the figures in the above statement as the basis of the calculation:—Shahabad 92·19, Saran 56·83, Champaran 27·19, Muzaffarpur 64·49, Darbhanga 37·81, whole Division 41·91. The average dole has risen in Shahabad, Muzaffarpur, and Darbhanga. The attention of District Officers has already been drawn to the variations in the dole, but their replies have not all been received.

73. The appended statement gives as usual the expenditure to date, as ascertained from the district reports, but I fear that complete accuracy cannot be claimed for these figures. When the accounts have been overhauled and a sufficient account staff organized, the fortnightly statements will be more complete, but these must always be only approximate, as they deal only with expenditure which has been recorded at head-quarters. Taking the figures as they stand, it appears that the total expenditure up to the 27th February was Rs. 10,17,353, of which Rs. 3,17,650 were expended in the fortnight under review, as compared with Rs. 2,63,870 in the previous fortnight. Of the total expenditure to date, Rs. 8,36,427, or 82·21 per cent., have been spent on relief works, and Rs. 1,67,360, or 16·45 per cent., on gratuitous relief. Allowing about 2 lakhs a week for the remainder of the present month, the expenditure at the end of the financial year on relief works and gratuitous relief (unless some quite unexpected event occurs) will probably be about 19 lakhs. If to this be added the cost of establishment, say a lakh and a half at 8 per cent., contributions, bounties and relief to people employed otherwise than on relief works, say 4 lakhs, the expenditure may aggregate 24½ lakhs, which is well within the estimate sanctioned by Government; while if the disbursements under the latter heads are not large, the gross expenditure may approximate to the 22½ lakhs estimated by me on the 19th January, though the details will vary greatly from those in my forecast.

74. During the fortnight under review, the Public Works Department continued to take over old and to open new works in all four districts of North Bihar, and it is believed that at the end of the period the number of works in each district under Public Works Department agency was as follow:—Saran 2, Champaran 12, Muzaffarpur 3, and Darbhanga 13—Total 30. Under Civil Agency the number of works open is as follows:—Shahabad 4, Saran 34, Champaran 54, Muzaffarpur 45, and Darbhanga 91—Total 228. It is clear that a great deal remains to be done before the transfer is completed.

75. Probably the most important event of the fortnight was the Lieutenant-Governor's decision, pronounced at the Darbhanga Conference, to conduct all works, whether under Public Works Department or Civil Agency, on the same lines; the system being that by which the pit is the unit with its

small party of from 15 to 20 workers, several pits being grouped into a gang for purposes of supervision. I believe that the Lieutenant-Governor was satisfied, from personal observation, that this system, which has the support of almost every officer concerned, has secured the best results so far, and is likely to prove superior to all others. When large works, such as the branch lines of railway in Champaran and Darbhanga and the canals in Champaran, have to be opened, it will be a question whether a modified piece-work system will not be the most suitable form of administration.

76. The usual statements and maps are appended.

APPENDIX A.

No. 240 F., dated Bankipore, the 2nd March 1897.

From—T. INGLIS, Esq., C.S., Collector of Patna,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit the following report, under section 24 of the Bengal Famine Code, for the two weeks ending on Saturday the 20th and the 27th February 1897.

2. SECTION 24 (1).—No change.

3. SECTION 24 (2) (a).—*General state of the affected tracts*.—There has been no change. The *rabi* harvest is in full swing and the agricultural population fully employed. Distress is increasing in the towns and is being dealt with by the Charitable Sub-Committees and Charge Superintendents. Beggars continue to come into Patna and are being located in the poor-house just opened.

4. SECTION 24 (2) (b).—*Crop prospects*.—On the whole the rain in the first half of February did more good than harm. It failed, however, to drive away what most officers called the *insect* pest, by which, I understand, they mean the ravages of caterpillars. These have attacked *marur*, *hirao*, linseed and gram. In places considerable damage has been done, especially in the tal lands; but they appear every year. The harvest is being rapidly gathered, and should be completed soon after the close of this month. Making allowance for the short area sown and the damage done by rain, blight and caterpillars, a 12-anna crop will certainly be reaped, and I feel inclined to put it at 14 annas, considering the thickness of the crops generally.

5. SECTION 24 (2) (c).—*Food-stocks*.—Sufficient. It is said that cultivators are holding out for better prices, but it is more likely that they are thinking of their house requirements, and are replacing the stocks which they sold out in October last.

6. SECTION 24 (2) (d).—*Importation and exportation of food-grains*.—The figures for the period under report which have been received from all reporting centres, and which are, I believe, complete, show the following results:—

				Mds.
Imports	45,466
Exports	45,490
Net export	24

There is nothing new to mention under this head, except the comparatively large export of rice.

7. SECTION 24 (2) (e).—*Rainfall*.—0.05 in Bihar only.

8. SECTION 24 (2) (f).—*Public health*.—Continues good. There have been a few cases of small-pox reported from the Barh subdivision and in the Silao police-station.

9. SECTION 24 (2) (g).—*Emigration or immigration of famished people*.—A few cases are reported from Patna city only. Large numbers of pilgrims to and from Baidyanath continue to pass through. They appear to me to be in good condition. The rest-houses referred to in my last report are under construction.

10. SECTION 24 (2) (h).—*Condition of cattle*.—Continues fair. There is an outbreak of rinderpest recorded in the Patna city. I am telegraphing for the services of an expert. The outbreak is reported by the Veterinary Assistant maintained by the Patna Municipality and District Board.

11. SECTION 24 (2) (i).—*Prices*.—The price of rice has slightly risen in Barh and Bihar; barley has risen in Bihar, due to the short supply in the market. The crop in the ground is excellent. The other cereals show a slight improvement. The new *rabi* is slowly coming into the market, but cultivators are not selling readily. The Burmah rice is not received favourably and is said to be too glutinous. It is not boiled before being husked. American maize has also not found favour as on being fried it is said not to burst. The import of both kinds to Patna station is said to have been discontinued.

12. SECTION 24 (3).—*Number of relief works open, &c.*—Nil.

13. SECTION 24 (4).—*Number of poor-houses open, &c.*—The Patna poor-house was opened yesterday (1st March), when 13 inmates were housed. Notices of its being opened have been sent throughout the district. The Subdivisional Officers of Barh and Bihar are still considering whether a poor-house is necessary for their subdivisions.

14. SECTION 24 (5).—*Organisation for employment of artisans, &c.*—Nil.

15. SECTION 24 (6).—*Organization for the distribution of grain doles, &c.*—No change has been made. Travellers are assisted by the police; beggars and helpless poor, where village charity is failing, by the Charge Superintendents, and the cases of respectable poor, by the Charitable Sub-Committees. The two city and sadar subdivision Sub-Committees have commenced work, but they and the other Sub-Committees are engaged in collecting information and testing reports already received. No report has been received from the Dinapore Sub-Committee. Under the Famine Code the dole is given in grain where possible, i. e., in towns; otherwise in money. In Bihar the money dole is 1 anna 3 pies per male, 1 anna per female, and 6 pies per child. In no case does it exceed Rs. 3 a month.

16. SECTION 24 (7).—*Relief in kitchens*.—Nil.

17. SECTION 24 (8).—*Loans, &c.*—Loans were advanced to four persons during the fortnight, and a loan was sanctioned for one person.

18. SECTION 24 (9).—The financial statement contains the necessary information under this head. The usual table showing the grant made by the District Board and the expenditure under the different heads is shown.

19. SECTION 24 (10) AND (11).—No remarks.

20. SECTION 27 (iii).—*Water-supply of the country.*—Is reported to be sufficient.

21. STATISTICS OF ADMISSIONS TO THE BANKIPORE JAIL.—Statistics have not been received. They will be submitted with my next report.

22. GENERAL.—The general position remains unchanged. The Charge Superintendents are gradually finding out the necessitous poor of the respectable classes. Most of the cases reported turn out on enquiry to be undeserving, but in the towns many such cases exist. In an answer to a circular received from the Central Committee, we have provided for relief under heads (1), (2) and (3) of the objects on which the famine fund is to be spent. The main charge comes under head 3, *i.e.*, the relief of respectable people in bad circumstances, and we anticipate having to relieve 1,450 cases for seven months. The total expenditure is estimated at Rs. 33,450, as follows:—

	Rs.
Under head (1) 2,000 relieved at Rs. 1 per head	... 2,000
" (2) 50 orphans at Rs. 2 for ten months	... 1,000
" (3) 1,450 persons at Rs. 3 per seven months	... 30,450
Total	... 33,450

We anticipate that a grant of Rs. 20,000 will be necessary from the fund. I hope, however, that the district will awake to a sense of its duties and will recognise the necessity of dealing with its own poor and set free the funds which have been subscribed elsewhere for expenditure in the less favoured and worse stricken districts. I know the Sub-Committees have now many cases before them, and trust that the next return will show that they have afforded a substantial measure of relief to those in need of it. The accounts of sums spent on gratuitous relief under the Code have been received to-day only too late to be corrected, and I am unable to state the amount of the dole given, as payments are made for a month in advance in outlying villages; and these advances are made at different times. I hope to get the figures correct for my next report.

FINANCIAL STATEMENT.

				Rs.	A.	P.
Receipt from District Board during the period of report for						
poor-house	2,800	0	0
Balance of previous statement	1,343	0	9
			Total	4,143	0	9
				Rs.	A.	P.
Expenditure on—						
(1) Gratuitous relief	50	7	0
(2) Poor-house (cost of utensils and rent of land, &c.)	277	10	0
			Total	328	1	0
Balance	3,814	15	9

The expenditure according to Form Nos. 6 and 7 is Rs. 48-13. The difference, Rs. 1-10, has apparently been met from the Police grants, of which the subdivisional returns take no account in their financial statement.

T. INGLIS,
Collector.

No. 2266G., dated Gaya, the 2nd March 1897.

From—H. SAVAGE, Esq., c.s., Collector of Gaya,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit Famine Report for the fortnight ending 27th February. The figures relate to the period under report, with the exception of Statements 8 and 9, which are for the two weeks ending 20th February, as information for the last week of February has not yet been received.

2. *Section 24 (1).*—No area is affected by famine.

3. *Section 24 (2).*—*Crop prospects.*—The prospects of rabi continue excellent. Harvesting of early rabi crops is in progress. The gathering of opium continues. There are some complaints of a scanty flow of drug on account of cloudy and damp weather, followed by strong west winds, but on the whole the outturn will be as large or larger than last year.

4. *Prices of food-grains.*—The subjoined table (Appendix A) shows the prices of the principal food-grains for each Subdivision. Prices are easier now than new rabi crops are coming into the market.

5. *Importation and exportation of food-grains.*—The annexed Statements 8 and 9 show the figures of import and export trade of the District. The classification given in the Government letter No. 859-62, dated 2nd December last, has been adopted. The total imports by rail during the fortnight amount to 9,483 maunds, and exports 1,082 maunds, leaving a net excess of imports of 8,401 maunds. Six hundred and sixty-eight maunds of the rice imported to Gaya have been exported to Daltonganj. The principal articles of imports are rice, gram, and pulses.

6. *Rainfall.*—There has been no rainfall, except .49 inch, in the Aurangabad Subdivision on the 16th February. The rain has done much good to the late-sown barley and to pasture lands. It has also allowed of early ploughing for the bhadoi.

7. *Public health.*—Public health continues good. The death-rate per *mille* for the month of January last was 1.4, as compared with 2.1 for the corresponding period of 1896, and 1.8 for December last.

8. No emigration or immigration of famished people has been observed. The travellers I met with along the Grand Trunk Road looked fairly well fed.

9. Condition of cattle is good.

10. *Section 24 (3) Relief works.*—Nil.

11. *Section 24 (4).*—The average daily number of people fed at the cook-house at Kusa by the Mohant of Bud Gaya, was 122, and the total quantity of edibles consumed was, rice 52 maunds, pulses 14 maunds, salt 1½ maunds and vegetables 3½ maunds.

12. The Relief Committee at Aurangabad fed 138 travellers a day on an average, at a cost of Rs. 79, during the fortnight under review.

13. No statistics with regard to the cook-shed, recently opened at Madanpore on the Grand Trunk Road, have been received.

14. Certain Marwaries of the town of Gaya have collected by subscription a small fund, out of which they spend Rs. 5 per day, Rs. 3 on distribution of cooked rice and Rs. 2 of uncooked grains to the poor and needy.

15. *Section 24 (5 to 7).*—Nil.

16. *Section 24 (8).*—In three cases only a loan of Rs. 1,300, under the Land Improvement Loans Act was made during the fortnight under report, and in 14 cases Rs. 390 were advanced under the Agriculturists' Loans Act. The total amount advanced up to date during the current year being Rs. 81,800 under the former, and Rs. 9,038 under the latter Act. The amount advanced under both the Acts in the last year (1895-96) was Rs. 50,000, and Rs. 2,500 respectively.

17. *Section 24 (9)*—Financial Statements blank.

18. I am glad to report that at a meeting held at the Halliday Hall on the 20th February 1897, for raising funds for charitable relief, a sum of Rs. 10,000 was subscribed on the spot. In consultation with the Committee which we appointed at the meeting, it was decided to establish a local Committee for each police-station and outpost, to raise and administer funds for charitable relief in the mufassal. Appendix B will show what these local Committees are expected to do.

APPENDIX A.

Comparative Statement showing the prices of food-grains for the fortnight ending 27th February 1897.

NAME OF GRAIN.	NAME OF SUBDIVISION.							
	SADAR (GAYA).		JAHANABAD.		AURANGABAD.		NAWADA.

Arhar ...	12½	13½	13½	13
Marua	13	13	12½	12½	15

APPENDIX B.

Proposals for charitable relief in the mufassal.

- I.—There will be a Committee for each thana and out-post.
- II.—This Committee will consist of one or more local zamindars (one of whom will be Chairman) and all collecting members of the chaukidari panchayats in the Elaka.
- III.—Each Committee will appoint its own Chairman, Secretary and Treasurer.
- IV.—The Committee will be requested—
 - (a) to collect local subscriptions for the fund,
 - (b) to prepare as speedily as possible, after a house-to-house enquiry, a list showing—
 - (1) all persons in their Elaka who are unable to work, and have no one to maintain them,
 - (2) all women who, by the custom of the country, do not appear in public, and who are in need of charitable relief.

V.—To persons entered in the above lists the local Committees will be authorised to pay monthly—

			Rs.
To each man	2
„ woman	2

To some respectable inhabitant of the village who will undertake to feed and care for each child—

			Rs. a.
Between the age of 7 and 14	1 8
Under the age of 7	1 0

NOTE.—If the father or mother of the child be in receipt of relief, the relief for the child may be paid to such father or mother.

VI.—In the case of *pardanashin* women, the Committee may advance 4 seers of cotton at a time, and on receipt of an equivalent in thread may, at the end of each month, pay the woman an additional sum of one rupee.

Not more than 4 seers cotton should be supplied, and not more than one rupee extra should be allowed in any one month.

The Committee will purchase the cotton in the local market, and will dispose of the thread locally, and credit the proceeds to the fund.

VII.—A copy of the list prepared by each Committee should be forwarded to the Central Committee as soon as it is prepared, and all alterations should be duly notified.

VIII.—Each local Committee should, on 1st and 15th of each month, forward to the Central Committee (through the Subdivisional Officer), if the Committee be in a sub-Division, a statement in the following form :—

Thana or out-post.	Amount collected by the Committee.	Amount received from the Central Committee.	Amount realised by sale of thread.	Total.	Number on list.	AMOUNT EXPENDED—			Amount now on hand.	Amount now asked for from Central Committee (giving full reasons for the requisition).
						Particulars.	During fort. night.	Up to end of fort. night.		
1	2	3	4	5	6	7			8	9
					Men	(a) on charitable relief.	Rs.	Ra.		
					Women	(b) for spinning done.				
					Children 7 to 14.	(c) purchase of cotton.				
					No. under 7					

IX.—It will be the duty of the treasurer of each Committee to keep an account of the sums received and expended.

X.—All payments to be made through the collecting members of the chaukidari panchayats, whose receipts the treasurer will take for all sums issued.

H. SAVAGE,
Collector.

No. 15F., dated Camp Barahpur, the 2nd March 1897.

From—J. WINDSOR, Esq., Collector of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my Report under sections 13 and 24 of the Famine Code for the second half of February 1897. The figures dealt with relate to the weeks ending 20th and 27th February 1897.

2. *Section 24 (1) Affected area.*—The area affected is the same as that given in the last fortnightly report. In that report Mr. Mariudin, referred to the condition of the country south of Akberpur and to the narrow strip of land between the river Sone and the plateau. I have not yet received a sufficiently detailed report from the Subdivisional Officer of Sasaram to be able to say whether these tracts should be added to the famine area. The Subdivisional Officer of Sasaram reports that some distress exists among the people of this part, and he has deputed the Local Board Sub-Overseer to start a test-work in the Local Board Road south of Akberpur, and has also sent a sum of Rs. 50 to the head-constable there for gratuitous relief.

3. The arrangement of Circles, as previously reported, remains unaltered. The Charge Superintendent, Mr. Percy Smith, has joined since submission of the last report, and has been placed in charge of Rangarh Charge, and Babu Harihar Charan Lal has been left in the Chand-Chainpur Charge, and Mr. Mariudin has, in his No 34-5 of the 27th ultimo requested that you will apply to the Inspector-General of Police to lend his services as Charge Superintendent. The present Subdivisional Officer, Mr. Stephenson, who joined on the 17th ultimo, has visited the north eastern portion of the Subdivision and the Rangarh Charge, and states that this Charge is not at present in any danger of immediate distress, but private charity is drying up rapidly, and the labouring and beggar classes will want looking after in the near future. This is a large Charge consisting of five Circles, looked after at present by three Circle Inspectors only. Two of these are Sub-Inspectors of Schools, but I am of opinion that it will be advisable to continue their deputation, as they have a knowledge of the country. I have directed Mr. Stephenson to fill up the other two Circles, and have sent officers for this purpose. Mr. Stephenson will shortly visit Adhouna, and will report whether he considers the Charge there should be opened.

4. *Section 24 (2).*—The general condition of the people is much the same as reported last fortnight. Cases of small pox have occurred throughout the Bhabua Subdivision, especially in the Chinari out-post.

5. The *rabi* cutting has commenced, and this provides work for a certain number of people. The crop will be a poor one to the west and south of the Durgaoti river, in the Bhabua Subdivision, but north of the river, between Mohania and Zamania, the crop has been a good one. The amount of *rabi* sown this year is less than usual. The Subdivisional Officer of Bhabua has directed Circle Officers to submit careful statements of the final *rabi* crop, and I hope to give further information under this head in my next report.

6. *Importation and exportation.*—The figures of imports and exports called for from the Traffic Superintendent are appended to this report. The total imports amount to 23,702 maunds and the total exports to 9,470 maunds, leaving a balance in favour of the district of 14,232 maunds.

7. *Prices of food-grains.*—Prices have been almost stationary, except in the case of gram and peas, in which there has been a marked fall, on account of the new grain having been brought from the interior into the market. The state of cattle generally has been good. I cannot give any further information about emigration of famished people. I am asking the Subdivisional Officer of Bhabua to deal with this specially in his next report.

8. *Section 24 (3) Relief Works.*—There are four relief works open (1) Hata Durgaoti Road (2) Bhabua-Hata Road, (3) Bhabua-Sabar Road, (4) Mullipore Jehanabad. During the fortnight under report, the total number of male units employed on the relief works during the second week was 1,608 and in the first week 3,765, while those on daily wages, irrespective of task, were 475 in the second and 1260 in the first. This decrease is due to the distribution of relief by Circle Officers in the villages. The number on the last day of the period was, men 492, women 437, and children 236, or 1,165 in all.

9. The excavation of Sabar Tank, Court of Wards' Estate, and two other tanks near Patesar, has been taken in hand by private agency as relief works. Figures for these works have not, however, been supplied. Babu Makund Saha, of Mohania, is, at his own expense, deepening the Municipal tank at Bhabua.

10. *Section 24 (4) Poor-houses.*—The poor-houses at Bhabua and Sasaram and the kitchens at Jehanabad, Mohania, and Durgaoti and at Dehri continued to distribute cooked food both to travellers and also to needy persons of neighbouring villages, who were subsequently sent to their villages to be relieved by the Circle Officers. The total numbers of persons relieved during the fortnight are given in Form No. 6, except as regards Dehri, from which no Returns have been received. A regular poor-house is about to be built at Bhabua on the plans of the District Engineer. Arrangements have been made to open a poor-house at Arrah. The number of persons who appeared for relief at the thana was too great for the police to deal with. Cooked food will be distributed at the opium godown until a poor-house has been erected, for which I have given sanction in anticipation of your approval.

11. *Section 24 (5).*—Local Committees have been formed at Sasaram and Bhabua, in connection with the Arrah District Charitable Committee, to conduct operations within those Subdivisions. I hope be able to give some account of the action taken by the Charitable Committee next fortnight.

12. *Section 24 (6).*—The police have continued to relieve stray cases of distress, by distributing grain at the police-stations. From Form No. 6 it would appear that the average number of persons receiving gratuitous relief during the fortnight was 22,931, against 8,299 in the preceding fortnight. This increase of over 250 per cent. is very extraordinary. I can hardly bring myself to accept it as correct. I am asking Mr. Stephenson to look into the Returns submitted by Circle Officers, and to instruct Charge Superintendent to do the same, and also to check the lists kept by Circle Officers.

13. *Section 24 (8) Loans.*—In the Bhabua Subdivision, 465 petitions have been received during the fortnight under review. Of these, 45 applications are for loans under the Land Improvement Act, mostly for tanks and ahars, and 420 under the Agriculturists' Loans Act. These petitions are under enquiry.

14. Want of water is complained of in the Bhabua Subdivision.

15. *Section 27 (1).*—The total number of deaths reported during the month of January for the whole district was 4,054, giving a death-rate of 20·96 per *mille* for the month, and the figures for the Bhabua subdivision are 1,139 deaths, and the death-rate 3·30 per *mille* for the month.

16. The prescribed Statements and map are appended.

J. WINDSOR,

Collector.

No. 595F.—G., dated Chapra, the 4th March 1897.

From—A. EARLE, Esq., Officiating Collector of Saran,
To—The Commissioner of the Patna Division.

IN continuation of my letter No. 326F.—G., dated the 17th ultimo, I have the honour to submit herewith my famine report for the two weeks ending the 27th ultimo.

2. SECTION 24 (1).—*Area affected during the period under report, and approximate*

	Square miles.	Population.
Gopalganj thana ...	358	275,023
Minus non-affected tracts ...	162	86,016
	196	189,007
Mirganj thana ...	435	359,007
Minus non-affected tracts ...	114	87,654
	321	271,353
Siwan subdivision ...	829	800,738
Minus non-affected tracts ...	207	200,184
	622	600,554
Sadar tracts ..	303	291,084
	1,442	1,352,598

estimate of the portion of the population affected.—There is an area of 16 square miles with an approximate population of 16,000 persons to be added to the Sadar tracts in which relief works are open. The tract in question is to the north-west of the Hardia Chaur in the Pursah thana. A better *bhadoi* had enabled the people of this quarter to hold out, and they might have continued to do so longer had not the *rabi* crop there been seriously injured by frost. The figures as they now stand are shown in the margin. A revised map is annexed.

3. SECTION 24 (1).—*Number of relief circles and of officers in charge.*—A statement appended shows the names of Charge

Superintendents and of Circle Officers. The number of Charge Superintendents remains the same. That of Circle Officers has increased from 43 to 54, more officers having been appointed in the Gopalganj and Sadar subdivisions.

4. SECTION 24 (2).—*General state of the affected tracts during the half-month under report.*—The Siwan Subdivisional Officer still continues to return an uniformly satisfactory report. The *rabi* crop will probably cut out at more than 16 annas. This means suspension of distress for at least two months; if not, as we hope, for good. The Gopalganj subdivision continues to give cause for grave anxiety, but the scene of distress is shifting from the west to the east of the subdivision. In the Meeraganj thana, where distress has hitherto been most acute, but where the *rabi* crop is good, there will be a decided alleviation when the cutting of that crop begins, and it will probably last for two months. The same may also be the case with the west of the Gopalganj thana. On the other hand in the east of the said thana, where the *rabi* and opium are poor, acute distress is supervening, and must last continuously till the close of the famine operations. This tract is now receiving my closest attention, and I hope to proceed there on tour shortly. In the Sadar subdivision the alleviation of distress alluded to in previous reports as being due to the cutting of early *rabi* crops continues, but on the other hand the rice tracts are beginning to cause more and more anxiety, and will continue to do so till the close of the operations. Moreover, the *rabi* crop in this subdivision cannot be relied upon to the same extent as it can be in the case of the Siwan subdivision.

5. SECTION 24 (2).—*Crop prospects.*—(a) In Siwan the *rabi* crop may probably be safely reckoned at 16 annas.

(b) In the Gopalganj subdivision it varies considerably, being bad in the east and good in the west. I have not received an exact estimate from the Subdivisional Officer, but I think it would be safe to estimate a 10-to 12-anna crop all round.

(c) In the Sadar subdivision I fear that the estimate of a 10-to 12-anna crop, as given by me in my last report, is too sanguine. Perhaps it would be safer to estimate only 10 annas.

(d) The poppy crop has, I regret to say, suffered considerably from blight; but, even allowing for heavy loss on this account, the crop will, if nothing further goes wrong with it, be a good one. Blight does not appear to have much injured the other *rabi* crops.

(e) My forecast as to the effect of the *rabi* crop on famine operations in this district is almost the same as that given in my last report.

6. SECTION 24 (2).—*Food-stocks.*—There seems to be no lack of grain anywhere, and private trade is everywhere active. Burma rice is obtainable in all large marts in the district, but the people say that they do not like it as much as the rice that they are accustomed to. This is probably due to their habitual dislike of anything new.

7. SECTION 24 (2).—*Importation and exportation of food-grains.*—

(a) *Railway statistics.*—The import statistics show an advance from 80,961 to 82,194 maunds, while exports have decreased from 8,971 to 6,006 maunds. Imports were chiefly from Howrah, Bhaptiahi in Bhagalpur, and Forbesganj in Purnea. Exports were chiefly to Bhatpur in Gorakhpur and Nawabganj in Gonda.

(b) *River-ganj statistics.*—Imports increased slightly, viz., from 8,643 to 8,799 maunds. These were chiefly from Bhagalpur. Exports declined from 1,708 to 1,359 maunds. These were chiefly to Azimgarh.

- (c) *Saltarghat statistics*.—Imports increased from 2,716 to 3,412 maunds. These were chiefly from Nepal, Muzaffarpur and Champaran. There were no exports.
- (d) Mr. Chapman also reports that he has heard of large imports into the tracts along the Gandak in the Sadar subdivision from Muzaffarpur and Champaran.
8. SECTION 24 (2).—*Prices*.—There is a general tendency for prices to be easier, and this is, though I cannot account for it, most marked in the Gopalganj subdivision. The drop is general in respect of gram, makai and arhar. The price-list confirms the general impression that there is no lack of grain in the country.
9. SECTION 24 (2).—*Rainfall*.—Nil.
10. SECTION 24 (2).—*Public health*—(a) Public health continues excellent.
- (b) Form 10 shows that the monthly death-rate nowhere approaches 40 per mille.
- (c) One death from starvation in village Mangalpur, in the east of the Gopalganj thana, was reported during the previous fortnight by Babu Girindro Nath Dutt, Superintendent of the Hathwa Raj. In mentioning this subject in my last report, I stated that several such cases had been reported by him, but I find that I was mistaken in so thinking owing to the imperfection of the language used by him. The single case so reported has been exhaustively enquired into by Mr. Knyvett, District Superintendent of Police, and Mr. Twidell, the Subdivisional Officer. It is clear that the man in point did not so die, because he had undertaken shortly before his death a long walk of 10 miles on some not very important private business. It is manifest that the case was incorrectly reported in order to draw attention to the state of the village which is in acute distress. Relief on an extensive scale is now being undertaken in the neighbourhood, and would have been undertaken at an earlier date, had the extent of the distress been disclosed by the local officers.
11. SECTION 24 (2).—*Emigration or immigration of famished people*.—Nil.
12. SECTION 24 (2).—*Condition of cattle*.—Good.
13. SECTION 24 (3).—*Relief works*—(a) There were 34 relief works open in the week ending the 27th ultimo, viz, 12 in the Sadar subdivisional charge, 11 in the Siwan subdivisional charge, 5 in the Gopalganj thana charge, and 6 in the east Meerganj charge. These were all Civil Agency works. Besides these, there were two Public Works Department works, connected with the clearance of silt from the Gandaki and Gongri Canals, both in the Gopalganj thana charge. I need not repeat the remarks which I made in my last report as to the unsatisfactory points about relief works in this district, but as time goes on, I become more and more convinced of the truth of what I have stated.
- (b) 8,156 individuals, or a daily average of 1,141 male units, were paid by daily wages irrespective of task during the week ending the 27th ultimo. I do not consider the number excessive.
- (c) 65,787 individuals, or a daily average of 7,599 male units, were paid for task work during the week ending the 27th ultimo.
- (d) The corresponding figures for Public Works Department works were 9,385 individuals, or a daily average of 1,047 male units (wages paid irrespective of task), and 2,935, or a daily average of 481 male units (wages paid for task work). The Subdivisional Officer writes in reference to these figures:—"As regards the figures of these works, infinite difficulty is experienced in getting any at all, and those supplied are wroughly made up. I only submit them in Form 19. It is useless to make them out in other forms. The number employed 'irrespective of task' is absurd." Needless to say, I fully endorse these remarks. I fear that Mr. Green's staff is not up to the mark, and I will invite his attention to the fact. I have already asked the Subdivisional Officer to endeavour to procure correct figures.
- (e) In the Sadar and East Meerganj charge there are still large numbers of D class people. The classification is evidently incorrect, and I am inviting the attention of the officers concerned to the fact. It is impossible to believe that so many weakly people are on the works.
- (f) The average rate of wage per male unit for task work was on the average of the two weeks Re. 0-1-5 on Civil Agency works, and Re. 0-1-6 on Public Works Department works. The cost per 1,000 cubic feet was on the average of the two weeks Rs. 2-9-10 on Civil Agency works. The cost per 1,000 cubic feet, viz. Re. 0-15-3, as reported by the Public Works Department, is impossible, or else shows what I fear may be the case that only strong people are allowed on the works.
- (g) The work done per male unit was on the average of the two weeks 34½ cubic feet, the figure for the last week being 38. The figure reported by the Public Works Department (108) is incredible, or else shows what I have suggested above may be the case.
- (h) In Siwan it appears from a remark made by the Subdivisional Officer that persons who are paid under section 70 of the Code, viz.—Sunday wages, are still shown as workers paid by task instead of as workers paid irrespective of task in Forms 5, 7 and 19; hence the outturn per male unit, and the cost per

1,000 cubic feet, as per Famine Statement E, is higher in this subdivision than in any other. I will invite the attention of the Subdivisional Officer to the subject.

(i) The statement required by Government Circular No. 34 (Fam.), dated 11th February, 1897, is herewith submitted. As I have stated at the bottom of the form, I will endeavour to have a more perspicuous return prepared in future.

(j) *Private relief works—Gopalganj subdivision, Hathwa Raj.*—Ten works were open during the week ending the 25th February, employing 24,497, or a daily average of 2,938 male units on task work, and of 1,210 such units on work done irrespective of task. The number of persons employed on work, irrespective of task, has almost doubled in the last week. I will enquire of the Manager how this has occurred. It is probably owing to large numbers being employed on baling out water from tanks after the water-level had been reached; but, inasmuch as Government has directed that task should be set for such work, this explanation is not satisfactory. The wages paid were Re. 0-1-9½ per male unit for task work and Re. 0-1-7 for work done irrespective of task. The average cost per 1,000 cubic feet was Rs. 3-4-11. The work done per male unit was 34 cubic feet.

Siwan subdivision.—The Subdivisional Officer reports that two private tanks are being excavated as relief works, but no statistics are furnished.

Sadar subdivision.—Mr. Chapman states that he has received no report as to whether Rai Tara Prosad Mukerjee Bahadur and Chainpur zamindar are continuing their private relief works.

14. SECTION 24 (4).—*Poor-houses.*—(a) There were two Government poor-houses, viz., at Siwan and Chapra, respectively. The daily average number relieved was 55 and 94, respectively. The average cost per adult unit was Re. 0-1-1 and Re. 0-1-2, respectively.

(b) The numbers have largely declined in the four Hathwa poor-houses, the daily average having been reduced from 507, as reported for the week ending the 13th February, to 454 in the week ending the 27th February. This is doubtless due to the cutting of the *rahi* crop, but I will make enquiries of the Manager. When last inspecting the Gopalganj poor-house, I directed detailed enquiries into the case of inmates and gave orders that all villagers with fixed residences should be given gratuitous relief at their homes, the poor-house being chiefly for homeless people and professional beggars. The average cost per adult unit was 11 pies.

(c) No statistics have been received from the Manjha poor-house.

15. SECTION 24 (5).—The returns are meagre, but I am not distressed on that account. I shall be satisfied if I can succeed in making circle officers find out all deserving cases.

16. SECTION 24 (6).—(a) The daily average number of men, women and children in receipt of gratuitous relief during the week ending the 27th February was 3,050, 9,879 and 3,010, respectively, or a total of 15,939. The number of adult units was 101,038, the cost of each such unit being 8 pies.

(b) I am convinced that the number in receipt of this form of relief should be larger in certain parts of the district, and that the circle officers have hitherto failed to visit the villages sufficiently. Several cases have been brought to light of people becoming emaciated to almost the point of starvation without applying for gratuitous relief or having recourse to a relief work. The reasons why so many people are unable to go on relief works in this district have been frequently given, viz., that large numbers of men are absent in East Bengal, and that in numerous cases there is only one man left to look after the family and the crops. The disinclination to apply for gratuitous relief can be understood, and this is the chief difficulty which the circle officers have to combat.

17. SECTION 24 (7).—Nil.

18. SECTION 24 (8).—*Advances.*—(a) A sum of Rs. 3,500 has been advanced during the two weeks under report under the Land Improvement Act (new rules). Local officers have been duly instructed to be careful about the security which they propose should be accepted up to date. I have retained in my own hands the actual passing of all applications and shall continue to do so until I find that local officers fully appreciate the necessity of careful scrutiny of property proposed to be pledged.

(b) I hope to see a large sum disbursed under the Agriculturists' Loans Act before long in the distressed area in East Gopalganj.

19. SECTION 24 (9).—The prescribed statement is appended.

20. SECTION 24 (10) AND (11).—Nil.

21. *Town Relief.*—(a) This is now being taken over by me as Collector, and in so doing. I am making use of the existing local committees. Sub-Committees of the Saran Branch of the Indian Famine Charitable Relief Fund Committee are working side by side with the Government organization in the towns.

(b) In Chapra, Siwan and Revilganj 930, 154 and 117 persons, respectively, are in receipt of relief.

22. (1) *Your Famine Circular No. 1 of 1897, paragraph 5.*—The Railway authorities have failed to furnish the requisite information.

(2) *Your Famine Circular No. 3 of 1897.*—The jail statistics furnished by the Civil Surgeon are herewith submitted.

23. *Meetings.*—(a) Sub-Committees of the Saran Branch of the Indian Famine Charitable Relief Fund Committee are, as indicated in paragraph 21 (a) above, already working in the towns of Chapra, Siwan and Kevilganj.

(b) Thana Committees are being appointed for the mufassal, and lists of those proposed for the Sadar subdivision are almost ready for being placed before the Committee.

24. *SECTION 27 (iv) of the Code.*—(a) During the week ending the 27th February 25 tanks were being excavated, and the gross number of individuals employed thereon was 58,787.

(b) As indicated in paragraph 18 above, a sum of Rs. 3,500 has been advanced during the two weeks under report for the excavation of tanks and wells under the new rules of the Land Improvement Act.

25. The usual money-order statement is submitted.

26. *Your letter No. 290F.—G., dated the 7th February 1897.*—The total number on (1) relief works and (2) in receipt of gratuitous relief on the last day of the period under report was 16,328 and 15,939,* respectively.

* Strictly speaking this is not correct, as gratuitous reliefs are only returned for the average of the week, and not for the last day only.

* Detailed figures not shown in subdivisional returns. Steps will be taken to obtain this in future.

Column 11.—The figures shown in this column are less than those reported in my report for the period ending the 30th January 1897. This is due to the fact that in the Siwan subdivisional return for February 1897, a sum of Rs. 320 has been transferred from this column to column 10. The Subdivisional Officer has been called on to explain this.

Grants from District Board.	Grants from private revenue.	Private subscriptions.	
1	2	3	4	5	6	7	8	9	10	11	12	13	14
(Balance of last month brought forward.) Rs. A. P. 21,197 0 0	Rs. 1,00,000	—	Rs. A. P. 1,450 5 11	Rs. A. P. 8,628 3 3	Rs. A. P. 41 10 7	Rs. A. P. 8,897 8 0	Rs. A. P. 2,135 2 9	Rs. 1,00,000	Expenditure on establishment and miscellaneous contingencies not included in this statement. The balance is, therefore, not true balance. Orders are solicited.

* Chapra poor-house figures not furnished.

Statement showing rates of wages paid on relief works (including test works) and tasks exacted.

SUB-DIVISION.	MAN.		WOMAN.		BIG CHILD.		SMALL CHILD.		ADULT UNITS.		Grain on which wage is calculated under section 104 of the Famine Code.	Retail price of the grain in column 12 (number of seers per rupee).	Rate per 1,000 cubic feet of earthwork.	REMARKS.	
	Wage.	Task.	Wage.	Task.	Wage.	Task.	Wage.	Task.	Average wage.	Average task.					
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	
Sadar	{ Maximum ... Minimum ...	A. P. 2 0 1 0	300 120	A. P. 1 9 1 0	Not set	A. P. 1 0 0 6	Not set	A. P. 0 6 0 3	Not set	A. P. ... }	...	Maka	10 seers 6 chittaks.	Rs. A. P. 2 10 7	The form cannot be filled up, because in tanks, under the new system, gangs are set tasks, and not individuals. The maximum wage also varies from 2 annas to 1 anna, so that it is practically impossible to obtain an average wage.
Siwan	{ Maximum ... Minimum ...	1 6 0 9	45 ...	1 3 0 9	35 ...	0 6 0 6	...	0 3 0 3	...	1 3 27	Marua	12 seers	3 0 9	For the tanks the task set is 216 cubic feet per kudali, and carriers are given indiscriminately according to lead and lift, i.e., one seer for every 50 feet lead, and one for every 3 feet lift.	
Gopalganj	{ Maximum ... Minimum ...	0 7 0 5	Digging 103 ...	0 6 0 5	Digging 86 ...	0 4	0 3	1 8 Digging and carrying 43	Maka	10 seers 3 chittaks.	2 5 0	The task of carriers depends on their number and the lead and lift, no task apart from diggers is now set. This statement is approximate.	

I submit the return for what it is worth. The figures are as they are submitted by the Subdivisional Officers. At different works different systems are in force. The Public Works Department system of individual tasks was just getting into working order when fresh orders came directing a return to gang tasks. I hope that future returns may be more perspicuous.

BEPIN BEHARI BORK,
Manager, Raj Hatwa.

No. 582F., dated Motihari, the 7th February 1897.

From—D. J. MACPHERSON, Esq., Collector of Champaran,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my report, under section 24 of the Famine Code, for the second fortnight of February 1897. The figures dealt with relate to the weeks ending on Saturdays, the 20th and 27th of the month.

2. The delay in submission is, as you are aware, due to the visit of His Honour the Lieutenant-Governor to this district and my having accompanied him on to Darbhanga to attend a conference of officers on some famine relief questions. I was thus engaged from the 1st instant till yesterday morning (the 6th).

3. *Section 24 (1) (a).—Area affected.*—In my last two reports I gave the area estimated to be in distress as 1,620 square miles with a population of 972,000. There has been no material alteration in the state of things then prevailing, except that certain small tracts of country in Hardih, Bagaha and Dhaka thanas, aggregating 83 square miles, have now to be included in the area at present in need of relief. I find, however, that all the estimates previously put forward of the area and population of the tracts in distress require to be increased, as the scale of the map (8 miles=1 inch) on which I worked them out was too small for accuracy. I have now re-calculated them, and beg to subjoin the result. A map of the affected areas is enclosed :—

THANA.	Area of thana.	Population of thana.	Area connecting of hill and jungle and the secure tract peopled by 1½ run.	Bed of the river Gandak and the adjoining chitra lands.	Other areas free from distress.	Area slightly affected.	Area at present in distress.	Estimated population of area slightly affected.	Estimated population of area at present in distress.
1	2	3	4	5	6	7	8	9	10
	Sq. miles.		Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.	Sq. miles.		
Bagaha	710	218,054	151	90	...	215	248	111,000	85,000
Hardih	700	300,794	240	...	50	104	372	70,000	134,000
Bettiah	537	334,057	...	30	33	100	308	100,000	192,000
Gobindganj	273	170,040	...	38	254	...	171,000
Motihari	258	160,307	55	145	110	94,000	72,000
Kesaria	209	187,673	...	25	27	39	154	27,000	128,000
Madhuban	129	104,842	9	120	9,000	100,000
Dhaka	330	200,719	15	56	265	45,000	213,000
Adapur	324	167,419	290	...	21	...	18,000
Total	3,631	1,850,405	391	195	352	728	1,865	458,000	1,110,000

4. The area thus estimated to be in present need of relief is 1,865 square miles with a population of 1,110,000. It should be borne in mind, however, that except as regards 83 square miles these figures do not represent any real extension of distress. These figures fall short by 19 per cent. in respect of area and 15 per cent. in respect of population of those estimated in my preliminary report of the 10th November as likely to be in distress by now; but the prospects of the *rabi* harvest are much better than was then anticipated, and a sufficient deduction was not then made for the area that may be said to carry no population. It will be seen from form 10 annexed that the number of persons in receipt of relief on the 27th February was 148,238 (namely, 110,905 on relief works and 37,333 in receipt of gratuitous relief). This amounts to 13·3 per cent. of the population estimated to be in actual distress at present. If the slightly affected area be included, the percentage is reduced to 9·4. These figures should, I submit, be taken in supersession of those given in paragraph 59 of your report No. 491F.G., dated the 21st February. It is not likely that there will be any great increase in the figures before the end of April. On the contrary, a falling off is shortly expected with the harvesting of the spring crops.

5. *Section 24 (1) (b).—Relief Circles.*—There has been no change in the relief charges during the fortnight. Maulvi Abdul Salek, Officiating Deputy Collector, who had been deputed by me to assist the Joint-Magistrate in Motihari thana, has been posted to judicial

work at Bettiah in place of Babu Akhay Kumar Chatterji, and Babu Bhawani Parshad, Sub-Deputy Collector, has taken his place in Motihari thana.

6. There are altogether 78 circles, but 49 of these are simply the *dehats* of indigo-planters who look after them. Two of them, namely, the towns of Motihari and Bettiah, are looked after by Sub-Deputy Collectors, and three by the Sub-Registrars of Dhaka, Kessaria Bagaha, who should get some allowance for this. The remaining 24 are manned by paid officers on Rs. 50 with horse allowance of Rs. 25 each.

7. *Section 24(2) (a).—General state of the affected tracts. Crop prospects and rainfall.*—There has been no rain during the fortnight or since its close. Crop prospects are unchanged. Harvesting of the *rabi* crops, especially peas, has begun in places, and some people have in consequence left works. The sowing of indigo began during the second week of the fortnight.

8. *Section 24(2) (b).—Food-stocks and traffic in food-grains.*—Forms 8 and 9 annexed to this report show that during the fortnight ending on the 27th February 14,400 maunds of food-grain were imported by rail into the district, and 786 maunds exported, giving an average per week of 7,200 and 393 maunds respectively, against 7,175 and 839 maunds during the preceding fortnight. The imports thus show little change, but the exports have diminished. The imports were principally rice and paddy from Howrah. The exports were chiefly wheat to Suran.

9. I annex an abstract statement showing imports and exports of food-grain during the current year from 1st October to the end of February. It shows 62,355 maunds imported and 53,990 exported, leaving a balance of only 8,365 maunds in favour of imports. Importation has, however, been going on steadily, though in moderate quantities, of late, and the smallness of the balance referred to is due to heavy exportation earlier in the season. The corresponding figures for 1895-96 have not been compiled in time for this report.

10. I have not yet been informed of the result of the inquiry into the charge for freight at the rate of 8 annas instead of 6 annas per maund on the grain imported by Mr. Hill of Turkoulia, but I understand that the lower rate applies only to grain imported from Howrah, and not to that imported from Burdwan and nearer places. Unless there is a deficiency of food-grain in Central Bengal, I think it would be advisable for the railway to lower the rate also from there. It seems an anomaly that the charge should be the heavier for the shorter distance. A good deal of grain has been imported from Burdwan.

11. The mahajans seem to be moving in the matter of importation, and express their readiness to go on importing so long as rates admit of it. Burma rice is now penetrating right into the interior. The supply of maize must soon get exhausted, as this grain does not keep long. This may account for the exports of it that have come from Nepal. A good deal of grain, especially rice, still continues to be smuggled in from there. All officers report that there is no present apprehension of stocks getting depleted, now that the mahajans are moving.

12. *Section 24(2) (c).—Prices.*—I annex a statement showing how the prices of the principal food-grains at Motihari and Bettiah have stood at the beginning, middle and end of the fortnight under report, and the average price of late years at this season is also given in it. At Bettiah there is very little alteration in prices, as was the case in the preceding fortnight also; but there has been some rise at Motihari, common rice having risen there from 9 seers 3 chittaks to 9 seers, and maize from 10 seers 11 chittaks to 10 seers 1 chittak per rupee. At Bettiah the price of rice has throughout been 9½ seers and of maize 10 seers.

Prices of *rahar*, wheat and gram have risen generally. The average price of rice at Motihari and Bettiah is now Rs. 4-5-2 per maund, against a normal price, for the last five years, of Rs. 2-7-5, or an increase of 75½ per cent. That of maize is Rs. 4 per maund against Rs. 1-11, or no less than 117 per cent. above the normal. The prices at Ramnagar and Bagaha for the week ending 27th February have not been reported, but those of the preceding week show a fall of from half a seer to a seer per rupee, as compared with the period dealt with in my last report. Nevertheless the price of common rice at Bagaha was still one seer dearer than at Bettiah, and at Ramnagar half a seer.

13. *Section 24(2) (d).—Emigration and immigration of famished people.*—A number of people, mostly bearing a famished appearance, continue to come into the Bettiah subdivisions from the Gorakhpur district. About 10 per cent. of those relieved at the large Raj kitchen at Bettiah are from the North-Western Provinces. It is reported from the east of the district that some people are beginning to come in from Nepal in search of relief.

14. In connection with the subject of emigration of the people, I beg to enclose a statement showing the number and amount of money-orders paid in the district of Champaran month by month from November 1895 to January 1897. In November 1896 the number was larger by 62, but the amount smaller by Rs. 1,168 than in November 1895. In December 1896 the number of money-orders increased by 312 and their amount by Rs. 2,108 as compared with the corresponding period of the preceding year; while in January 1887 there was a very large increase as compared with January 1896; the number of money-orders have risen by 379, and the amount by no less than Rs. 15,611. In that month the average amount of each money-order paid in the district was Rs. 22. There is little doubt that the increase represents remittances for the support of their families by those who have emigrated elsewhere.

15. *Section 24(2) (e).—Condition of cattle.*—The cattle continue in much the same condition as in ordinary years at this season, but scarcity of water for them is beginning to be felt in the south of the district where there are not many tanks.

16. *Section 24 (2) (f).—Public health.*—The following statement shows the mortality, thana by thana, for the month of January 1897 :—

THANA.	MORTALITY IN JANUARY 1897.		AVERAGE MORTALITY IN JANUARY FOR PRECEDING FIVE YEARS.	
	Number of deaths.	Death-rate per mille for the month.	Number of deaths.	Death-rate per mille for the month.
1	2	3	4	5
Bagaha	467	2 16	775	3.59
Hardi	598	2.85	967	4.13
Bettiah	807	2.78	933	3.60
Gobindganj	463	2.58	402	2.25
Motihari	482	2.70	490	2.79
Kessaria	345	1.88	444	2.42
Madhuban	258	2.35	279	2.55
Dhaka	411	1.52	497	1.84
Adapur	270	1.61	363	2.17
Total	4,101	2.37	5,050	2.72

The mortality was lower than the average of the last five years. This is largely due to a decrease in deaths from fevers; but there is also a decrease under all other heads except small-pox, 31 cases of which were reported against an average of about three only at this season. There were no cases of cholera. In thana Gobindganj there was an increase in mortality both from fevers and from all unspecified causes. Under the latter head there was an increase also in Bettiah and Madhuban thanas. In paragraph 12 of my report No. 246F., dated 11th February, I cited facts tending to show that the large mortality recorded under unspecified causes in thanas Gobindganj, Bettiah and Kessaria is due to the system of classification, and not to any real preponderance of such deaths over the rest of the district. As a matter of fact the number of deaths so classified in Gobindganj is only 14 more than in last year, and in Bettiah 32 more. In no part of the district did the January mortality approach anything like an annual rate of 40 per mille. One old woman was reported in February as having died from starvation, it being alleged at the same time that she had refused relief. The Charge Superintendent made a special inquiry, and found that it was probably merely a case of death from old age, as her son bore no signs of want of food, and there was no reason why anyone should die from this cause, relief being fully organized in the neighbourhood. I do not enter the death, therefore, as due to starvation.

17. The following statement shows the result of observations on prisoners admitted into the Motihari Jail during the fortnight, as compared with the corresponding period for 1896 :—

Health on admission.	CONVICTS.				UNDER TRIAL PRISONERS.			
	1897.		1896.		1897.		1896.	
	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.
1	2	3	4	5	6	7	8	9
Good	3	42.8	17	89.5	13	32.4	16	80.0
Indifferent	4	57.2	2	10.5	21	56.8	7	30.6
Bad	4	10.8
Total	7	100.0	19	100.0	37	100.0	23	100.0
Above standard weight	5	71.4	12	63.2	9	24.3	8	34.8
Of ditto	4	21.0	2	5.4	1	4.3
Below ditto	2	28.6	3	15.8	26	70.3	14	60.8
Total as above	7	100.0	19	100.0	37	100.0	23	100.0

The percentage of those admitted in bad health was nine as compared with none last year, and of those under standard weight 63.6 as compared with 40.5. This shows an

improvement as compared with the preceding fortnight, when the percentages were 21·6 and 70·3 respectively.

18. On the whole, I have noticed some deterioration in general health, due apparently to the frequency with which the penal wage had to be enforced for failure to perform tasks. In one part of the district also, where this was most marked, the number admitted to one large work was limited much beyond the necessities of the case.

19. *Section 24 (2) (9).—Crime.*—The number of burglaries, thefts and the like reported during the second fortnight of February was 149, as compared with only 104 in the corresponding period of 1896, and 31 of the cases were thefts of food-grain, as compared with only 16.

20. Some officers have reported that there have been several cases of incendiarism, but the return I receive from the police showing these has not come to hand.

21. *Section 24 (3) (a).—Government relief works.*—Statements D (form 5) and E (form 7) enclosed give particulars of relief works open during the weeks ending on the 20th and 27th February. As requested in your Famine circular No. 10 of 1897, figures are given separately for civil agency and for Public Works Department works, totals including both being also given.

22. I take the opportunity also of submitting revised statements D and E for the preceding fortnight, as your letter No. 536F.G., dated the 24th February, and the figures given in your report No. 491F.G., dated 21st idem, to the address of Government, indicate that there were some discrepancies between the copies of these statements submitted to you and the copies preserved in this office, due to the great hurry in which the former were prepared. At the same time some mistakes have been found even in the latter, which are now corrected.

23. Adopting the form of statement given in paragraph 34 of your last half-monthly report to Government with a supplementary column of the cost per 1,000 cubic feet of work done, I give below the figures for the two weeks now under report, as well as the revised figures for those ending the 6th and 13th February:—

Week ending.	Number of works open at close of fortnight.	Daily outturn per male unit.	Cost per 1,000 cubic feet.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
				Task work.	Daily wages irrespective of task.	Gratuitous relief including dependants.	Total.
1	2	3	4	5	6	7	8
23rd January	...	14	Rs. A. P.	74,977	1,216	4,504	80,697
30th "	61	15	5 14 8	74,284	1,746	4,790	80,790
6th February	...	18	3 11 9	62,820	2,067	7,615	72,492
13th "	76	19	4 0 10	67,176	2,714	15,222	85,112
20th "	...	22½	4 0 3	79,653	4,058	20,395	110,106
27th "	66	24	3 11 8	70,132	4,094	20,075	103,741

24. The number of works opened was reduced from 75 to 66, owing to the completion of some works and closing of one or two others on the labourers being drafted to major works in the vicinity. Of the works open, 51 were tanks, 11 roads, 2 pynes, and 2 embankments, and of these 12 were major works under the Public Works Department, namely, 4 tanks, 6 roads (one of them in two sections), and 1 embankment.

25. The statement given above shows a steady improvement in the outturn of work per male unit and the cost per 1,000 cubic feet. On civil agency works, with no less than 47 out of 51 of them, tanks with long leads and high lifts, the average outturn per male unit for the fortnight was 14 cubic feet and the cost per 1,000 cubic feet Rs. 3-15. On major works, with 4 out of 12 of them, tanks, the outturn was 19½ cubic feet and the cost Rs. 4-5-2. In accordance with your instructions, the persons paid for Sundays have now as far as possible been excluded in calculating the outturn per male unit, but Sunday payments are included in the cost per 1,000 cubic feet. The number employed on daily wages, irrespective of task, was 5·1 per cent. of the whole number of workers.

26. The scale of wages has remained the same as that given in paragraph 17 of my report No. 246F., dated the 4th February, and represents the grain equivalent of the ration at 9½ seers per rupee under section 104 of the Code.

27. *Section 24 (3) (b).—Relief works designed to assist the water-supply of the country.*—Of the 66 works open at the close of February, no less than 51 were tanks and 2 pynes, all designed to improve the water supply for irrigation and for cattle.

28. *Section 24 (3) (c).—Private Relief Works.*—I annex a statement showing relief work carried on by private agency, namely, the Bettiah Raj and Tetaria Factory. It shows a daily average of 1,519 male units employed during the last week of February. In the Tetaria Factory the works were tanks carried on by piece-work at a rate of Rs. 3-5-4 per 1,000 cubic feet. In the Bettiah Raj one work was a tank also carried on by piece-work at a cost of about Rs. 2-5 per 1,000 cubic feet. The other work was the construction of the poor-house at Bettiah by famine labour, and the cost of making the mud walls for it was very high.

29. *Section 24 (4).—Poor-houses.*—The following statement shows the numbers relieved at the Motihari poor-house during the two weeks covered by this report, and the cost incurred:—

WEEK ENDING.	DAILY AVERAGE.				Cost.	Daily cost per adult unit.
	Men.	Women.	Children.	Total.		
1	2	3	4	5	6	7
20th February	27	22	24	73	R. A. P. 35 12 7	A. P. 1 4
27th "	26	26	23	85	41 11 3	1 6

The cost per head is high, as special diet had to be given to those who were ill.

30. A poor-house has been open at Ramnagar throughout the fortnight, but returns for it have not been received.

31. The Bettiah Raj have continued to carry on a poor-house, or rather a ~~large~~ kitchen with voluntary shelter, at Bettiah, pending the completion of the Government poor-house. The latter has since been occupied. During the week ending 27th February a daily average of 650 persons were fed at a cost of about 10 pies per head. Details have not, however, been supplied.

32. *Section 24 (5).—Employment given at houses.*—It has not been found necessary to give special employment to weavers, artisans, &c. Cotton has been given out to ~~paria~~ women to be spun into thread in return for gratuitous relief, but only one Charge Superintendent notices the subject in his report, and he gives no details of the numbers who are so employed. Including the cleaning of the cotton, he finds that a woman takes about 10 days to spin a seer of cotton into thread.

33. *Section 24 (6).—Gratuitous relief given in the shape of grain and money doles.*—Three statements in form 6 are annexed showing the gratuitous relief administered during each of the two weeks covered by this report, and during the fortnight as a whole. The number of persons relieved was 37,149 in the first week and 37,410 in the second, as against 19,146 at the close of the preceding fortnight. Of these, 28,629 and 28,269 were relieved under chapter V of the Code. The increase in the number receiving gratuitous relief is due to the completion of the system of village relief and the acuteness of the distress now felt. The number of adult units relieved was 29,395 and 29,575 in each of the two weeks dealt with, and the average dole for such 8 pies and 10½ pies respectively. Much progress has been made during the fortnight in removing from the list of dependants, and putting on village relief, all except the children of relief workers. The general system in force was described in my last report.

34. *Section 24 (7).—Kitchens.*—There were several kitchens open in the Hardi charge, but no detailed returns have been received of them. It appears from the gratuitous relief statement that 291 persons were receiving gratuitous relief at these during the last week of February. The institution carried on by the Bettiah Raj, described in paragraph 31 above, is rather a kitchen than a poor-house.

35. *Section 24 (8).—Loans.*—No loans were actually given out during the period under review, but a number of cases were under inquiry, and orders were passed under the Agriculturists' Loans Act in accordance with your circular No. 9, dated the 16th February, for the grant of Rs. 4,571-8 as loans to cultivating tenants who required assistance to enable them to till their lands and conserve and purchase seed for them.

36. *Section 24 (9).—Finance.*—I annex a statement showing the expenditure incurred during the period under report, and also a revised statement for the preceding fortnight, in view of the discrepancies pointed out in your letter No. 536F.G., dated the 24th February. The latter involves no change in the figure showing total expenditure. The expenditure during the fortnight under report amounted to Rs. 1,24,171-15-4, of which Rs. 1,02,653-4-6 was on relief works and Rs. 19,961-2-11 on gratuitous relief. The grants so far made have been exhausted.

37. Monthly statements A and B (forms 10 and 11) and the statement showing task work exacted are annexed.

Statement showing the prices of food-grains at Motihari and Bettiah for the fortnight ending 27th February 1897, the last day of the preceding fortnight, and the normal prices of each.

FORM 11.

[See section 27 (u) of the Code.]

Monthly Famine Statement B for the four weeks ending Saturday evening, the 27th February 1897.

District.	Maximum number for whom employment on relief work is estimated to be required in case of serious famine.	NUMBER FOR WHOM RELIEF WAS PROVIDED IN LAST PROGRAMME OF RELIEF WORKS.		NUMBER FOR WHOM RELIEF CAN BE PROVIDED BY WORKS REMAINING ON DATE OF REPORT.		EXPENDITURE SINCE 1st APRIL 1896.			ADVANCES SINCE 1st APRIL 1896 UP TO END OF MONTH UNDER REPORT.			Revenue suspended.
		On large works.	On small works.	On large works.	On small works.	Date up to which account is made up.	On relief works.	On gratuitous relief.	Land Improvement Loan Act.	Agricultural Loans Act.	...	
1	2	3	4	5	6	7	8	9	10	11	12	13
Champaran ...	210,000 for three months.	205,500 for three months.	57,700 for three months.	About 205,000 for three months.	About 53,000 for three months.	27th February 1897.	Rs. A. P. 3,62,393 2 6	Rs. A. P. 36,583 2 6	Rs. A. P. 300 0 0	Rs. A. P. 20,442 12 0	...	Rs. Nil.

Columns 2 to 6.—These columns, both in this statement and in that for January, have been filled up strictly according to what is understood to be the instructions in Government Circular No. 173 Famine, dated 25th January 1897. The figures in every case are reduced to terms of 90 days for purpose of comparison. The maximum number on relief works at any one time is not now expected to exceed 200,000.

The figures in columns 3 to 5 include 71 miles of the proposed railway from Baranaga to Bagaha, which would give employment to about 14,120 persons for three months. But there are some 37 miles more, which do not appear to be entered on the programme, including the extension from Bithnah to Shikarpur, which would give employment to about 7,080 persons more for three months.

Columns 6 and 7.—The works so far undertaken have been mostly outside the programme: hence the large proportion still unexhausted.

Financial statement for the fortnight ending 27th February 1897.

D. J. MACPHERSON,
Collector.

No. 2061B., dated Muzaffarpur, the 3rd March 1897.

From—L. HARE, Esq., c.s., Collector of Muzaffarpur,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my half-monthly famine report for the second half of February 1897. The figures in the returns are for the week ending 20th and 27th February respectively.

2. *Section 24 (1) (a).—Area affected.*—No change.

3. *Section 24 (I) (b).—Circles.*—I am finding it very difficult to get suitable Circle Officers to fill up vacancies. I hope to be able to settle definitely with you and His Honour the Lieutenant-Governor to-morrow at Darbhanga, on the necessary measures to be taken to increase the charge and the circle staff.

4. *Section 24 (2) (a).—General state.*—Distress is increasing. The number on gratuitous relief has had to be largely increased.

The number relieved on the 13th February was 2,549, while on 27th February it was 10,913.

More works have had to be opened under civil agency to cover new areas, but the total number on these works has fallen off.

Three large works under the Public Works Department have been opened, but have not drawn much labour. On these the smaller tasks of the Public Works Department scale have been introduced, but on two of the works, the new rules as to forming large gangs jointly responsible for their task have led to men leaving the work. We must take it, I think, that this class are not yet urgently pressed, and it must be remembered too that *rabi* harvesting has begun.

5. *Section 24 (2) (b).—Crop prospects.*—In the Sadar and Hajipur *rabi* is very good. In Sitamarhi it is coming on well, but is backward. Tobacco is particularly good in Hajipur.

6. *Section 24 (2) (c).—Prices.*—At Muzaffarpur the price of rice and *rahar* has risen by half-a-seer, and that of *makai* and gram has fallen by a similar amount, while wheat and barley have been stationary.

In Hajipur there was a rise of half-a-seer in the case of rice and a fall of $\frac{1}{2}$ and $\frac{1}{4}$ a seer in the case of gram and *rahar*, wheat and *makai* being stationary. In Sitamarhi there has been a rise in every case except gram which was stationary.

7. *Section 24 (2) (d).—Food stocks.*—Food stocks continue to hold out, and I have no complaints that grain cannot be purchased. The ready money payments for the grain distributed as doles will I hope lead to increased activity among the dealers.

8. *Section 24 (2) (c).—Imports, &c.*—The required statements are appended. They show 41,837 maunds imported and 2,560 maunds exported, giving a net import of 38,277 maunds, which shows a falling off. Importations have been principally from Howrah and down country.

I cannot still give comparative statement, as the figures for last year have not been received from the Railway Departments.

9. *Section 24 (2) (f).—Rainfall.*—There has been no rain in the period under report.

10. *Section 24 (2) (g).—Public Health.*—Public health continues exceptionally good. The required statements are appended.

11. *Section 24 (2) h.—Emigration.*—There has been no emigration or immigration of famished people.

12. Section 24 (2) (i).—Cattle.—The condition of the cattle continues good.

13. *Section 24 (3) (a).—Relief works.*—Notwithstanding the opening of three large works strictly under the conditions of Government Resolution No. 420M.P.I., Public Works Department, dated 25th January 1897, the total number of labourers on relief works has fallen off.

14. *Section 24 (3) (a).—Number of relief works open, &c.*—The following works were open at the close of the fortnight:—

UNDER CIVIL AGENCY.

L. HARE,
Collector.

MUZAFFARPUR,
The March 1897.

No. G., dated Darbhanga, the 2nd March 1897.

From—R. W. CARLYLE, Esq., Collector of Darbhanga,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit herewith my eighth half-monthly report for the weeks ending 20th and 27th February.

2. *Section 24 (1).*—(a) The area affected is 2,921 square miles. So far distress is most acute in Darbhanga, Beneputti, Madhubani, and Khajauli thanas, with an area of 1,319 square miles, but there are relief works, and gratuitous relief is being distributed in Phulparas, Bahra, Rosra, and Warisnagar. There is also some distress in a portion of the Samastipore thana (296 square miles) not included in the above.

3. (b) There is very little change in the proportion of the population affected. The numbers on work fluctuate considerably, and there has been no steady increase as I expected in the number on relief works. There have unavoidably been various slight changes in system, and each time there is a change the number of workers falls off greatly for a few days, as labourers follow the mates, and other local men, such as *hasri natis*, like sheep. Of course every new check on work done is opposed by the mates, &c., as it diminishes their chance of illicit gain. I regret my figures are very incomplete, as I have not got most of the Public Works' daily returns from Beneputti. All arrangements have now been made, which will secure my getting returns from Public Works in time in future. It was unavoidable that there should be some confusion in the process of taking over charge, and the form of post-card has had to be slightly altered to enable the Public Works Department subordinates to prepare weekly abstracts, giving me the information required for Form D. The figures I have received give a total of 8,244 on relief works on Saturday, the 27th.

4. (c) There are 65 relief circles, with 65 officers in charge.

5. *Section 24 (2).*—(a) There has been very little change as compared with the previous half-month. The harvesting of the *rabi* has commenced, and though it has not greatly reduced the numbers, it has prevented any increase. There has also been a good deal of work done in preparing the early rice land.

6. (b) The rainfall of the previous half-month, though it nowhere much exceeded four-tenths, and was generally about two-tenths, had a wonderful effect in improving the barley and wheat crops, &c., while at the same time it was too light to do any harm to the *rahar* or mustard. The result is that my estimates for the *rabi* in last report were probably too low; and allowing for the reduced area under cultivation in some parts of the district, I would now estimate the *rabi* at about 6 annas in Madhubani, 12 annas in Darbhanga, and from 16 to 20 annas in Samastipore subdivision.

7. (c) I have nothing to add to previous reports, except that there appears to be little doubt my estimate of the food-stocks, as equal to three months' supply before the *bhidoi* was out was not excessive.

8. (d) I send along with this report statistics of the export and import of food-grains by rail. The imports (36,965 maunds, excluding all traffic within the district) exceeded the exports by maunds 26,826-5.

9. (c) Public health continued good. The death-rate for January was only 1·6 per cent., as compared with an average of 2·3 in January of the five previous years. The death-rate in the various thanas appears to have no connection with the amount of scarcity prevailing in them. The admission into jail, though showing some deterioration among the lowest classes in January 1897, as compared with 1896 (28·6 per cent. adult in bad or indifferent health against 20 in 1896), but compare favourably with previous months.

10. (f) There has been no emigration or immigration of starving people.

11. (g) The condition of cattle is fair.

12. *Section 24 (3).*—(a) I give in the appendix figures showing the number of relief-workers, &c. I regret that these figures are incomplete, as I have not got the Public Works returns.

13. (b) The number on Saturday last (27th February 1897) was 35,436 men, 35,680 women, 11,255 children. This does not, however, include a large number of P. W. works in the Madhubani subdivision, from which the daily post-cards have not been received.

14. (c) I give figures supplied me by the courtesy of the Manager of the Darbhanga Raj, showing the number on relief works or gratuitously relieved for the weeks ending 6th, 13th, 20th, and 27th February 1897. There were 21,900 on relief works on the 27th February, while 10,518 persons were receiving gratuitous relief that week. These numbers are not included in my statement.

15. *Section 24 (4).*—(a) Poor-houses are open at Darbhanga, Warisnagar, Madhubani, and Khajauli. They will soon be open at the head-quarters of all Charge Superintendents. Though they have very few inmates, they are required, as the fact of their existence has an excellent effect in enabling officers to deal with malingerers. The scale of food is that proscribed by the Famine Code.

16. *Section 24 (5).*—(a) The Circle Officers have now been instructed in all charges to endeavour as far as possible to get work from those relieved. Cotton is being distributed in most circles for spinning, and Mr. Blackwood is having the cotton spun made into cloth. In some cases also baskets are being made. I find that in some cases there are very few spindles, so I have authorized the Circle Officers, when I found this to be the case, to have spindles made. I cannot yet give figures showing the number employed.

17. *Section 24 (6).*—(a) Grain doles are generally distributed by the Circle Officers at fixed places once a week. In some cases it is distributed more than once a week, but I am going to stop this, as I find it leads to great confusion in the returns. In other cases money doles are given generally once a week. I am inclined to think money doles are on the whole best. It is easier to distribute money than grain, and it is less liable to abuse.
18. (b) Fifty-six thousand one hundred and twenty-nine persons were receiving gratuitous relief on the 27th February. The number will permit of some reduction when more works are opened in Bahra, Madhubani, and Phulparas thanas.
19. (c) I spent ten days lately in examining, in as many villages as possible, how gratuitous relief is distributed in Bahra. I did not find any case in which I could strike those receiving gratuitous relief off the list, till works are opened within a reasonable distance of their homes. I gave orders that as soon as works are opened within three miles, all able to work should be struck off the list (of course there may have been some cases in which relations could have helped.)
20. *Section 24 (7).*—There are no public kitchens. The Raj has opened some, regarding which I will try to get information for my next report.
21. *Section (24) (8).*—No loans have yet been given. In some cases enquiries are nearly complete.
22. I submit the usual statements along with a map.
23. I annex two tables, showing the number of persons employed on tank works.

P.S.—Since writing the above, I have visited the north-east of the district, and find that a very large number of small tanks are being excavated by private parties (exclusive of the Raj) at their own expense. From reports I have received from various parts of the district, I believe over 20,000 labourers and possibly over 30,000 are at present working on these tanks. I am issuing orders to all Circle Officers to report at once the number of tanks now being dug in their circles.

R. W. C.

R. W. CARLYLE,
Collector.

No. 116G.—S.R., dated Calcutta, the 10th March 1897.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Revenue Department.

UNDER sections 13 and 24 of the Famine Code, I have the honour to submit herewith my report for the half-month ending 28th February 1897, together with the skeleton maps showing the areas already affected and likely to be affected by scarcity in the districts of Nadia, Jessore, and Khulna, and the statements prescribed by the Code.

The report from the district of Nadia was not received by me till the 6th March, a close holiday, which accounts for the delay in the submission of my report.

2. *24-Parganas*.—The position of this district remains unchanged since the date of my last report. There is no reason to believe that there is any need for relief in any part of the district.

3. *Nadia*.—*Section 24 (1) of the Code*.—There has been no change in the area or in the estimate of the portion of the population affected. The number of relief circles has increased from four to five owing to the constitution of a new circle at Nakashipara, and a new circle officer has been appointed.

4. *Section 24 (2) of the Code*.—Owing to the harvesting of the *rabi* crops, there has been a slight temporary improvement in the condition of the affected tracts. The prospects of the crops are said to have somewhat improved on account of the rain which fell on the 16th, 17th, and 18th February. We shall watch carefully how the preparation of the land for the next *aus* crop proceeds, as upon it the attitude of the mahajans will depend. I believe that if they have reason to expect a good *aus* harvest, they will be ready to issue loans to the cultivators, as usual, and I hope that they will not be deterred by any anticipation that Government will by granting loan take the business out of their hands. It is noticed that rice is still being imported into the affected areas in considerable quantities from the *Rarh*. Public health and condition of cattle continue good.

5. *Section 24 (3) of the Code*.—There are at present 14 relief works open in the affected tracts, namely, 8 under the Public Works Department and 6 under civil officers. The average number of male units per diem on task work increased from 8,707·6 in the previous fortnight to 9,657·8 in the fortnight under report, and the number paid by daily wages from 35·3 to 289·9. The cost per thousand cubic feet for the week ending 27th February 1897 has decreased from Rs. 4-14-9 to Rs. 3-3-3. It is reported that no relief work has been opened under private agency, but the loans taken by private individuals under the Land Improvement Loans Act for tank work will employ a number of labourers.

6. *Section 24 (4) and (7) of the Code*.—No poor-houses or kitchens have yet been opened, nor is there at present any indication that they will be necessary.

7. *Section 24 (5) of the Code*.—As previously reported, thread is being distributed to a few families of weavers: women are required to twist three and-a-half seers of jute into string in return for doles of grain granted to them under section 44 of the Code. I notice that Mr. Garrett has given up the idea of issuing paddy to women for husking in their homes, as he has been unable to devise any satisfactory means of distributing the paddy and collecting the rice. The number of persons receiving gratuitous relief has increased from 3,851 to 5,669, and the cost from Rs. 1,327-10-3 to Rs. 2,352-8-0.

8. *Section 24 (6) of the Code*.—In the matter of organization for the distribution of grain doles or money doles, there is nothing new to remark.

9. *Section 24 (8) of the Code*.—The total amount actually advanced by the Collector under the Land Improvement Loans Act during the period under report was Rs. 2,700 among 15 applicants, but he sanctioned Rs. 30,411 as loans to 84 applicants. No advances under the Agriculturists' Loans Act were actually made during the period, although it appears that the Collector has granted Rs. 550 for the purpose among 27 applicants.

10. *Section 24 (9) of the Code.*—In the financial statement the receipts are shown at Rs. 25,951-10-10½, while the expenditure during the half-month was Rs. 9,255-12-3, leaving a balance of Rs. 16,695-14-7½. In this statement the expenditure on gratuitous relief is shown at Rs. 2,377-10-9, while in column 11 of famine statement E it is shown at Rs. 2,278-0-5, and in Form No. 6 at Rs. 2,352-8-0. The Collector has been directed to explain the discrepancies.

11. *Section 24 (10) of the Code.*—The Collector reports that the information required under this head as to the economic condition of the affected tracts has already been given in his previous reports. In connection with his present report I have pointed out to the Collector that of the nine thanas mentioned in paragraph 1 of his letter No. 2619G., dated the 3rd February 1897, such information has been furnished only for thanas Kaliganj, Nakashipara, Tehatta, Daulatpur, and Karimpur, and that the particulars regarding the other thanas should be given in his next report.

12. *Sections 26 and 27 of the Code.*—Columns 3 and 5 of the monthly famine statement A should show figures in thousands, and not the actual figures as returned. This has been pointed out to the Collector, and the necessary corrections made in this office.

13. I annex a copy of Mr. Garrett's report, No. 2943G., dated the 5th March 1897, and do not think it necessary to repeat what it contains.

14. With regard to paragraph 4 of his letter, I agree with Mr. Garrett in thinking that a strict adherence to the rules and orders of Government (Public Works Department), contained in No. 420M.—P.I., dated the 25th January 1897, is not necessary under the present circumstances. With regard to the difficulty which the Collector represents as arising from his being appointed as disbursing officer for the works under the Public Works Department, I have already reported to Government. It would be well if the District Engineer, who has been placed in charge of famine relief works under the Public Works Department, were made the disbursing officer, but it has been held that he cannot be, as he is not a Government servant. The difficulty is not so great when the Collector is at his head-quarters, but when he is on tour it is the source of great delay in keeping officers supplied with cash.

15. Regarding the question of the examination of the district accounts a reference has been already made to Government, but no orders have yet been received.

16. Mr. Garrett has been working most energetically, and I think that everything is now arranged to meet any increase in distress. The strength of the district staff is, however, strained to the utmost, and much necessary work is being postponed.

17. *Murshidabad.*—A report under section 10 of the Famine Code regarding the scarcity prevailing in portions of the district has been submitted to Government with my No. 113G.—S.R., dated the 4th March 1897, and I believe that it is unnecessary for me to repeat the information here. My next half-monthly report will include statements for this district.

18. *Jessore—Section 14 (1) of the Code.*—There has been no improvement in the general condition of the affected tract in thana Muhammadpur, in which there has been scarcely any rain, but the condition of the tract in thana Bongaon, for which anxiety was felt, has materially improved owing to the recent rainfall. The prices of common rice show a tendency to fall. Food-stocks are being supplemented by importation from the 24-Parganas, the Sunderbans, and the Eastern districts. Importation of Burma rice into Calcutta has stopped export from the district. Public health and the condition of cattle continue fair, with a few cases of cholera and cattle-pox here and there.

19. *Section 14 (2) and (3) of the Code.*—A test work, the excavation of a tank opened in the affected tract, attracted no labourers, although the rate of wages offered was two annas per diem. Rs. 315-8-9 were spent on gratuitous relief under sections 12 and 42 of the Famine Code among 712 persons. The rate at which relief was given has not been stated. The Collector's attention has been drawn to the orders of Government on the subject conveyed in No. 608, dated the 1st March 1897. It appears that no system of paddy husking has yet been properly organized in the district. It has been pointed out to the Collector that if the system is organized, the rate of remuneration given in the District of Rajshahi should be enforced. I do not see indications of any urgent need

of relief at present. The amounts which are being remitted to their homes by money orders by labourers who have gone in search of work must materially prevent distress.

20. *Section 14 (4) of the Code.*—In Magura 19 new applications covering Rs. 7,700 were received by the Collector under the Land Improvement Loans Act during the period under report. In Bongaon the number of such applications was three only. The amount covered by them is not stated. No new application for loans under the Agriculturists' Loans Act was received during the period either in Magura or Bongaon. Local mahajans are said to have commenced to grant loans, which is satisfactory. I believe that they will do so as usual if the prospects of the *aus* harvest appear satisfactory. The Collector has submitted only one copy of the skeleton map with his report. He has been directed to send another copy. I annex a copy of Mr. Hamilton's report, No. 3275G., dated the 2nd March 1897.

21. *Khulna.*—I annex a copy of Mr. Vincent's report, No. 147 G., dated the 2nd March 1897.

Section 24 (1) of the Code.—The area and the approximate estimate of the portion of the population affected by scarcity, as well as the number of relief circles and officers in charge, remain unchanged. The area affected is expected to increase during the next month. A circle officer has been appointed in the place of the man who resigned.

22. *Section 24 (2) of the Code.*—It is reported that the general condition of the affected area has deteriorated. The numbers on gratuitous relief have increased from 311 to 1,949. Widows and orphans show signs of emaciation. High caste people who do not own land are said to be suffering, and doubtless feel the pressure of high prices, but the failure of crops cannot have affected their incomes, which I believe are generally derived from relatives who are employed as clerks. Two deaths from starvation are reported. The Collector has been directed to report without delay the result of the enquiries which are being made into these cases. With regard to the one case of a girl noticed in Government No. 200Agri. (Fam.), dated the 27th January 1897, the Collector has since reported that the girl died from the effects of eating crabs, an indigestible kind of food which she had eaten on account of insufficient rice. There has been slight rain during the period. No attempt is being made by private landholders to repair the *theris* and *bunds*, and the gantidars under them, who are really equally responsible, are doing little. The Collector reports that they would do more, if he had more money for granting loans under the Land Improvement Loans Act, but I do not understand this, and have asked for a statement showing what has been already granted in loans. I think that there is some mistake about it, and shall certainly take care that money is not stinted for the very necessary work of repairing embankments. In the estimate of expenditure on relief works approved by Government, Rs. 50,000 have been allotted for this district for each of the years 1896-97 and 1897-98 on account of advances for village works under the modified rules of the Land Improvement Loans Act. The Board of Revenue have sanctioned Rs. 10,000 for the present out of this allotment, and the orders have been communicated to the Collector with this office No. 102G.—S.R. of the 2nd March 1897. The stock of grain in the district is reported to be sufficient. The price varies, being higher in places to which grain cannot be imported in boats than in those to which there is access by water. There is said to be more export from the district than import. Public health is fair. Some cases of cholera are reported from Kaliganj. People are emigrating from the affected areas to the eastern part of the district. The condition of cattle is fair, but poorer cultivators are reported to have sold them in large numbers to *beparis* from Calcutta.

23. *Section 24 (3) of the Code.*—Four relief works are now open under the Collector, the number of workers on the last day of the half-month being 583. The task exacted is that reported by Mr. Bell in his last fortnightly report. It has already been pointed out, as directed by Government, Public Works Department, to the Collector that Mr. Glass' tables must be adopted, and that no alteration need be made in them. The changes made in the classification of labourers from A, B, C, and D to B and D only may be allowed with reference to the rules of the Public Works Department, but it seems useless to make any

change in the classification of children. The Collector says that children under seven years of age are exempted from work, thus swelling the names on the list of gratuitous relief, although their parents want their help as carriers. The Collector's attention has been drawn to section 62, clause 5 of the Code, from which he will see that small children of eight years of age and under may be allowed to help in the work by carrying loads of earth on their head, and may be counted in the muster roll and receive a small wage. A holiday is given not on Sunday, but on a hāt day, for the sake of convenience. This is against the provisions of section 70 of the Code, and the Collector's attention has been drawn to it. No relief works under private agency have yet been opened. The present number of relief works are said to be inadequate, and arrangements are being made to open four more works immediately. The Collector has been directed to report whether the cutting of the Asasuni khal is being carried on as a relief work to the extent of Rs. 1,000, as sanctioned by Government.

24. *Section 24 (4) and (7) of the Code.*—No poor-houses or kitchens have been opened yet. The Collector expects to open two poor-houses during the current month as a test for those who apply for gratuitous relief.

25. *Section 24 (5) of the Code.*—Besides paddy husking and jute twisting, some experiments in weaving were made, and the result seems to be promising for the future. As to paddy husking, the Collector's attention has been drawn to the orders of Government, contained in paragraph 5 of letter No. 608, dated the 1st March 1897, and he has been directed to report whether the rate of remuneration in force in Rajshahi, viz, 2½ seers of rice per maund of paddy, besides bran and husk, will not be sufficient.

26. *Section 24 (b) of the Code.*—Grain doles are distributed once a week at one centre for each circle. This having been found insufficient, an additional centre has been selected in each circle. The number of adult units on the list of gratuitous relief is 1,653, including 211, who husk paddy or twist jute. As the work which these 211 persons do is not gratuitous, their names should, I think, be removed from the list and shown separately as workers under Chapter X, "Other measures."

27. *Section 24 (8) of the Code.*—Six applications covering Rs. 1,000 have been sanctioned during the fortnight under the Land Improvement Loans Act, out of Rs. 37,200 allotted to the district for the purpose. The total amount advanced under the said Act in the affected area is Rs. 13,890. No advances were made during the period under the Agriculturists' Loans Act.

28. *Section 24 (9) and (10) and (11) of the Code.*—Detailed information is given. No remarks appear necessary.

29. *Section 26 (i to v) of the Code.*—From the statement of gratuitous relief, Form 6, it appears that money doles are given in almost all circles, which I think objectionable, especially when grain contractors have been appointed for each circle. The Collector's attention has been drawn to section 43(A) of the Code, which points out that grain doles are more advisable than money, and that money doles should only be given under very exceptional circumstances.

30. *Section 27 (i and ii) of the Code.*—In monthly famine statement A, one death is noted as being due to starvation, while the report notes two. The cause of death in one case is said to be doubtful. The Collector has been directed to report accurately as to these deaths. In statements A and B, the numbers of relief works and the expenditure shown therein do not include works under the Public Works Department. The Collector's attention has been drawn with a view to the omission being supplied in the statements to be submitted with the next report.

31. The Collector has been directed to explain how Rs. 11,024-14 1½ have been shown in the financial statement No. VIII as grant from Government on account of expenditure on famine relief, while no grant from provincial revenues appears to have been yet sanctioned.

No. 2943G., dated Krishnagar, the 5th March 1897.

From—J. H. E. GARRETT, Esq., Offg. Collector of Nadia,
To—The Commissioner of the Presidency Division.

I HAVE the honour to submit herewith my report under section 24 of the Famine Code for the latter half of February. The figures given in the statements attached to this report refer to the weeks ending on the 20th and 27th February.

2. About a month ago I issued detailed instructions for the preparation of the statements: had these instructions been carried out carefully the statements should have reached me in camp on the morning of the 2nd instant, and my report could have been submitted to you on the 3rd. Owing, however, to many mistakes having been made by various officers in the district, I only received a few of the statements on the afternoon of the 3rd instant. I found that even these were incorrect. So I was compelled to return to Krishnagar on the morning of the 4th to attend personally to them. On checking the revised returns this morning I found further numerous mistakes which took some time to rectify. In consequence of this I was not able to commence my report (which is of course based upon the statements) until this afternoon. I much regret the delay which has occurred, but I considered it better that there should be two or three days' delay than that I should submit on the due date a report based upon incorrectly prepared statements. I am issuing further instructions in the hope of avoiding delay in the future.

3. During the period under report I visited all the relief works and inspected the work of both Superintendents and all the circle officers, except the circle officer of Nakashipara, who joined his post after I had left that part of the district. The system of gratuitous relief is now in full swing, doles of grain being granted both to those who are incapable of work and to women who either have no male relatives to support them or whose male relatives are relief workers: the women are required to twist $3\frac{1}{2}$ seers of jute into strings in return for the doles of grain granted to them. I am unable as yet to report the financial results, as my enquiries as to the most profitable method of disposing of the string are not completed. I have been compelled to give up the idea of issuing paddy to women for husking in their houses, as I have been unable to devise any satisfactory means of distributing the paddy and collecting the rice, a fair task for a week for one woman being $3\frac{1}{2}$ maunds of paddy. Gratuitous relief is afforded entirely by doles of clean rice, which are distributed once a week by the circle officers. I have appointed contractors in each circle for the supply of grain and have arranged to pay them at the market rate, they bearing the cost of the carriage of the grain to the centres from which it is distributed: the contractors are required to produce at the fixed centres a quantity of grain somewhat in excess of the probable requirements: the circle officers then distribute to the recipients, and the contractors take away the balance, receiving payment for the amount actually distributed. Under this system it is not necessary for circle officers to keep any stock, and they are thus relieved of the difficulty of storing and accounting for grain. I may add here that the contractors employed are local grain-merchants.

4. In connection with the relief works, I beg to bring to your notice that there are several points in the Government orders on the subject, a strict adherence to which I do not consider necessary or advisable for this district under present circumstances. In the first place, the relief workers on every work return to their homes at night, and there are consequently no camps. One result of this is that it is very difficult to keep the gangs constant, especially as the workers are not all very regular in attendance. Under the circumstances, I am of opinion that the size of the gangs should be reduced, and that they should not, as a rule, contain more than 30 or at the outside 40 persons. The people themselves work much more willingly in smaller gangs, and very little extra work is entailed on the staff. For the same reason (viz., that there are no camps) I have not considered it necessary to take any steps towards the construction of hospitals or making arrangements for the disposal of corpses: any relief worker who is taken ill either remains at his home or else is taken there from the works by his friends and relatives. The arrangements prescribed for payment of wages are being carried out, and I have ordered that payment be made daily on the works. I beg, however, to point out that so long as I remain the disbursing officer for the works under the Public Works Department, it will be extremely difficult to ensure that officers in charge of works shall not run out of funds, while at the same time preventing the cash balances in their hands from becoming excessive.

5. The accounts of the expenditure made up to date have not yet been satisfactorily adjusted. The matter is receiving my careful attention, but I fear that I shall be compelled to ask for the temporary services of a skilled accountant from the office of the Accountant-General, Bengal, to assist my office in carrying out the orders on the subject. In this connection I would suggest that it is desirable to appoint an auditor of famine accounts, who shall go about from district to district in the same manner as is now being done by the Deputy Collector, who is examining into the tauzi accounts.

6. I now proceed to report on the points mentioned in section 24 of the Code:—

(1) There has been no change in the area affected since the submission of my last report. Recently, however, I received a somewhat alarming account of the state of affairs near Jibannagar from a gentleman who had been touring in the neighbourhood. I am inclined to think that the account is exaggerated, but I have sent out the Joint-Magistrate to make careful enquiries, pending the result of which I still retain that portion of the district as unaffected. I think that something ought to be done to help chaukidars whose pay is less

than Rs. 4 per month, as it is impossible for them to live on their pay with the price of rice what it is. I beg, therefore, for instructions as to the course which I should adopt in this matter. Since my last report the circle officer of Nakashipara has taken over charge of his post. There are now five circles, viz., Barnia, Kaliganj, and Nakashipara under the Superintendent of Mirah, and Karimpur and Daulatpur under the Superintendent of Sikarpur. I may note here that owing to the constitution of the new circle at Nakashipara, I have found it necessary to revise the southern boundary of the Barnia circle; I shall also remove the head-quarters of the Superintendent from Mirah, to Bikrampur, as the former place is no longer sufficiently central for him.

(2) There has been a slight amelioration in the condition of the affected tract during the period under report; this is due entirely to the harvesting of the *rabi* crop, which has on the one hand given work to labourers, and on the other brought in a small extra supply of food grains. The improvement is thus only temporary, and it must be followed by steady deterioration which will last at any rate until the prospects of the *aus* crop are assured. Grain, linseed, wheat, and arhar are being harvested; gram has certainly not yielded more than a three-anna crop even on the limited area on which it germinated; linseed is perhaps a little better; wheat is very poor; arhar fairly good. The prolonging of the land for the *aus* crop has commenced everywhere, but it has been much retarded in the heavier soils by lack of moisture. There was a little rain on the 16th, 17th, and 18th in the eastern and southern portions of the district. Late gram benefited by it to some extent; the prospects of the mulberry crop in Kuliganj thana were however very much improved. I have nothing special to report under the head of food-stocks which have not been much affected during the period under report. Rice and paddy are still being imported in considerable quantities from the Barh, in which there must have been a very large surplus stock. The public health still continues fair, and strange to say, the death-rate in January in the affected tracts was very much lower than that in the non-affected tracts, which again is itself below the normal.

There was an outbreak of cholera in Nabadwip as the result of the last *mela* there, but fortunately it has not extended as much as I feared. I have received no reports as to the emigration or immigration of famished people. The Executive Engineer of Rajbari, Eastern Bengal State Railway, has furnished me with some figures, from which it appears that 3,311 men of this district from the marginally noted thanas are at present employed by him on earthwork in Faridpur. I have asked him to inform me what wages they are earning, and how long the work is likely to last: the four first-mentioned thanas are in

the affected area, and the last five in the non-affected area. I think that the fact that so few men have gone from Kumarkhali thana, which is only a few miles from the work, may be taken as an indication of the comparative prosperity of its inhabitants. The condition of the cattle continues good, but the rapid drying up of the grass owing to the practically continuous drought is a matter for some anxiety in those tracts where there is not an ample supply of paddy straw.

(3) There are at present 14 relief works open in the affected tracts. They are as follows:—

		Centres.
Public Works Department.	Mirah to Meherpur road	2
	Tehatta to Kutwa road	3
	Bhairamara to Karimpur road	3
Civil Agency	Daulatpur tank	1
	Meherpur to Gopalpur road	1
	Krishnagar to Meherpur road	1
	Gachha tank	1
	Mirah tank	1
	Gobindapur tank	1
Total		14

The statements attached hereto will give all the requisite information as to the members attending, etc. I have entered the corresponding figures for the previous fortnight in italics for the purpose of easy comparison. Explanatory notes have also been recorded on the statements. So it does not appear necessary to record any further remarks on the subject in the body of this report. No relief works have been opened under private agency.

(4) No poor-houses have yet been opened, nor is there yet any indication that they will be necessary.

(5) There has been no increase in the distress among artisans, as reported last week. The Superintendent at Mirah is advancing thread to a few families of weavers. I have already remarked on the organization for employing women in their own homes. Details will be found in the attached statements.

(6) I have nothing to add to previous remarks on this subject: so far as I can tell, this work is being carried out in as thorough and satisfactory a manner as possible, and with the least possible difficulties to the recipients of the relief.

(7) No kitchen have been established, and so far as I can tell at present we shall be able to do without them.

(8) Necessary figures under this head are given in the appended statements. We are being overwhelmed with applications for loans under the Agriculturists' Loans Act, and I see no prospect of our being able to enquire into them all within the time during which an advance of money will be of any use. I am doing my best to get the applicants from one village to submit a joint application for the total amount of the sums required by each, but I find it very difficult to get them to do so. In previous reports I have described fully the system on which the advances are given.

(9) The necessary figures will be found in the appended statement.

(10) The information required under this head has already been furnished.

(11) I have nothing special to record under this head.

7. In accordance with the instructions given in section 27 (i), I beg to report that the numbers of deaths in the non-affected and affected areas during the month of January were 1,947 and 1,073 respectively; these figures give death-rates per mille per annum of 27.8 and 16.9 respectively; these rates are both low. No deaths from starvation were reported, nor do I believe that any occurred.

8. In accordance with section 27 (iii), I beg to report that the re-excavation of the Daulatpur tank is being carried out as a civil agency work. I have also started the re-excavation of the Government tank at Gachha (thana Nakashipara) as a test work, and I shall shortly undertake the re-excavation of the other Government tanks in the jurisdiction of the Superintendent of Miruh. I further propose to commence as soon as possible the excavation of the khal to connect the Mathabhangra and the Bhairab near Sikarpur, as this will be of immense benefit to the inhabitants of a large area in the Meherpur subdivision. The appended statement will show the amount of loans advanced under the Land Improvement Act: the whole of this sum is to be expended on the excavation or re-excavation of tanks or the sinking of wells.

9 I beg to attach herewith the statements and map prescribed by sections 26 and 27 of the Code.

FORM No. 10.

[See section 27 (i) of the Code.]

Monthly Famine Statement A for the four weeks ending Saturday evening, the 6th, 13th, 20th, and 27th February 1897.

DISTRICT.	Area.	Population in thousands.	Affected area.	Estimated population in thousands of area in column 4.	Number of relief works on last day of month.					Numbers on average in relief. FORM No. 11.

[See section 27 (ii) of the Code.]

Monthly Famine Statement B for the first to fourth week ending Saturday evening, the 27th February 1897.

DISTRICT.	Maximum number for whom employment on relief works is estimated to be required in case of serious famine.	Number for whom relief was provided in last programme of relief works.		Number for whom relief can be provided by works remaining on programme on date of report.		Expenditure since November 1896.			Advances since 1st April 1896 up to end of month under—		Revenue suspended.
		On large works.	On small works.	On large works.	On small works.	Date up to which account is made up.	On relief works.	On gratuitous relief.	Land Improvement Loans Act.	Agriculturists' Loans Act.	
1	2	3	4	5	6	7	8	9	10	11	12
adia	22,661.02	9,004.52	11,446.00	9,004.52	11,446.00	27th February 1897.	Rs. A. P. 31,397 8 6	Rs. A. P. 5,786 3 6	In affected areas Rs. 2,400. In non-affected areas Rs. 4,280.	Paid nothing.	Nil.

N. B.—None of the works entered in the last programme have yet been taken in hand. The present relief works are on roads and tanks which are not in the last programme. The four large works opened under the Public Works Department are capable of giving employment to 1,575 persons for three months, and the other additional works considered quite sufficient for meeting the emergency of a famine. The Government have also been considering the possibility of opening up the Daulatpur tank for irrigation purposes.

Statement showing rates of wages paid on relief works (including test work) and tasks exacted.

NAME OF WORK.	RATES OF DAILY WAGES AND TASKS.										Grain on which wages calculated under section 104 of the Famine Code.	Retail price of the grain in column 12 (number of seers for a rupee).	Rates per 1,000 cubic feet of earthwork.	REMARKS.

1. Bheramara to Karimpur road, Public Works Department.	0 3 3	65	0 1 6	45	0 1 3	32½	0 0 9	15	Varies between— 0 1 6 and 0 1 10 9	Varies between— 30 20 and 31 75	Coarse rice.	84 seers per rupee.	Varies between— 3 8 4½ and 4 1 0	Average lead 100 feet. Average lift 6 feet.
2. Tehatta to Kalwa and Palsapara to Mirah, Public Works Department.	0 3 0	65	0 1 6	45	0 1 0	32½	0 0 6	15			Ditto	94 seers per rupee.		
3. Meherpur to Gopalpur road, Civil Agency.	0 3 3	65	0 1 6	45	0 1 3	32½	0 0 9	15	Varies between— 0 1 5½ and 0 1 9½	Varies between— 47 7 and 47 4 55 9	Ditto	84 seers per rupee.	Varies between— 1 13 9 and 2 8 8 2 0 1	Average lead 5 c. ft. Lint 3 feet. Ditto.
4. Krishnagar to Meherpur, Civil Agency.	0 3 0	65	0 1 6	45	0 1 0	32½	0 0 6	15			Ditto	94 seers per rupee.		
5. Daulatpur tank	0 3 3	40	0 1 0	26	0 1 3	20	0 0 9	12	0 2 8 2	32 0	Ditto	84 seers per rupee.	5 1 8 4	Average lead 200 feet and average lift 20 feet.
6. Tank in thana Kaliganj.	0 2 0	60	0 1 6	45	0 1 0	30	0 0 6	15	0 2 4 3	51 2	Ditto	94 seers per rupee.	2 14 12	Leads vary between 100 and 150 feet, and lift 15 feet. Soil good.

N.B.—On two of the Public Works Department roads, which are in Kalauter, more than two thousand of the workmen are children, women, and D class men who do only nominal work, such as breaking clods and beating the road surface. The average rate of earthwork on these roads is therefore very high. Most of the able-bodied coolies have migrated to places where heavy earthwork is being done on the railway and private tanks, leaving behind their children and women and D class men who only come for employment on relief works. They are employed although they cannot do full task, as otherwise they need gratuitous relief. On Daulatpur tank the rate of wage of male unit and that of earthwork are high owing to payment during fortnight of arrears pay of establishment, and the rate of wage in case of tank works in Kaliganj thana has exceeded the maximum rate of wage owing to preparatory contingent expenses incurred in these works.

Financial Statement for the half-month ending 27th February 1897.

RELIEF WORKS UNDER CIVIL AGENCY.

[See section 26 (i) of the Code]

FAMINE STATEMENT D.

District Nadia.

For the half-month ending 28th February 1897.

[illegible]

• Not paid pending check of list by Circle clerk.

No. 3275G., dated Jessore, the 2nd March 1897.

From—F. S. HAMILTON, Esq., Collector of Jessore,
To—The Commissioner of the Presidency Division.

IN continuation of this office No 3098G., dated 18th February 1897, I have the honour to submit the following second half-monthly report for the half-month ending the 28th of February, under section 13 of the Famine Code.

1. (a) *General condition during the half-month of the tracts for which anxiety is felt.*—There has been no improvement in the general condition of the affected tract in thana Muhammadpur during the half-month under report. The means of subsistence of the people in this tract are gradually becoming more and more limited. The mahajans are still holding back and are advancing loans very sparingly. There were 23 and 11 inch of rainfall on the 16th and 18th respectively in Magura; but there was practically no rain in the affected tract. Only a few drops of rain fell in thana Muhammadpur, and hence there has been not only no improvement in the general condition, but there has been, I fear, some deterioration, as the resources of the people are gradually being exhausted.

I am, however, at the same time glad to be able to report that the condition of the tract in Bangaon thana, regarding which anxiety used to be felt, has materially improved. The rains last month have done much good. The manufacture of *goor* continues, and will do so during the whole of the next fortnight. The *rabi* crops have been harvested, but their outturn has been small. The late rains, however, have put heart into the people, and the ploughing for jute and *aus* crops is going on. The Subdivisional Officer reports that the mahajans are now advancing loans for the purchase of seeds, cattle, and ploughs. I am, however, afraid that this is an exaggerated view of the real state of things. While I am prepared to accept that the mahajans are advancing seed grains, and money for the purchase of the same, the improvement in the prospects has not been so great as would induce the mahajans to advance such large amounts as would be required for the purchase of ploughs and cattle.

(b) *Prospects of crops.*—In Magura subdivision the *rabi* crops grown have nearly all been cut. Their average outturn has been about 6 annas, but, taking the Magura subdivision as a whole, the outturn would be only a fractional part of an anna. Only in Magura thana and in the southern part of Muhammadpur thana was some *rabi* cultivated. The people had entertained much hopes about the mango crop, but the prospects do not look very promising. The season of *khejur* juice is nearly over, and it will hold on till the middle of March at the most. The ploughing for *aus* and *aman* has begun.

In Bangaon the prospects have improved in so far as the ploughing for *aus* and jute crops has been facilitated by the rainfall, 1.5 inches last month.

(c) *Prices*—The prices of common rice show a tendency to fall. It is now being sold at 9½ to 11½ seers per rupee, as against 9 to 10 seers per rupee of the previous report.

(d) *Food-stock*—Food-stocks are being steadily supplemented by importations from the Sunderbans and the eastern districts. The importations of Burma rice into Calcutta have also stopped exports to an appreciable extent. The consequence is that the *hats* and bazars are now well stocked and prices have gone down.

(e) *Importation and exportation of grains.*—The subjoined statement shows the quantities of food-grains and pulses imported into this district from outside districts, and exported from this district to outside districts during the half-month under report:—

	Imports.	Exports.
By railway and steamer	... 2,591	4,765
By country boats	... 12,660	2,009
	<u>15,251</u>	<u>6,774</u>

From the above statement, it would appear that importations are steadily going on in excess of exportation, and that about 8,500 maunds of food-grains and pulses were imported in excess from other districts. There is therefore no fear of depletion of food-stock so long this state of things continues.

(f) *Rainfall.*—The subjoined statement shows the rainfall recorded in the several

	Sadar.	Bangaon.	Jhenida.	Magura.	Narail.
16th	0.34	0.22	0.33	0.23	0.35
17th	0.02	0.03	0.01
18th	0.11	...
	<u>0.40</u>	<u>0.25</u>	<u>0.33</u>	<u>0.34</u>	<u>0.36</u>

subdivisions on the 16th, 17th, and the 18th February 1897. 0.34 inches represents all the rain that fell in Magura during the whole month of February. Of these, however, the affected tract in Muhammadpur received very little, as only a few drops of rain fell there. This has done no practical good to the affected tract. They have, however, done some good to the *china* crops at places where they have been grown. The state of Bangaon, however, is altogether difficult. Besides 0.25 inches, Bangaon received 1.32 inches of rain during the month of February. The total rainfall in Bangaon comes to 1.57. The tract on the west of Bangaon thana, regarding which anxiety was felt, received much of this rain, and consequently there has been a material improvement in the prospects. Mahajans have also been emboldened to advance loans for seed-grains.

(g) *Public health.*—Public health continues to be generally fair, with a few sporadic cases of cholera here and there. Scarcity of water is, however, being felt at some places. Money is, however, being paid for sinking wells wherever scarcity of water is keenly felt.

(h) *Emigration and immigration* of famished people is not reported. The Sub-divisional Officer of Magura reports that "emigration of able-bodied cultivators and labourers continues from the subdivisions in search of employment elsewhere. Large batches of labourers also are passing daily through the subdivision from the Nadia district in search of employment. Some of them are employed in this subdivision to dig tanks by private individuals, who pay full rates of earthwork." The labourers who have gone abroad in search of employment continue to send small remittances home by money-orders. The Postmaster General has been requested to furnish us with complete statistics. The Sub-divisional Officer of Magura made enquiries about money-orders received from some post offices in his subdivision, and he gives the annexed comparative statement as results of his enquiry:—

Month.		Number.	Amount.	Number.	Amount.
			Rs.		Rs.
January	...	476	6,275	624	7,244
February	...	418	6,763	613	7,841
Total	...	894	13,038	1,237	15,585

The above statement shows that about 350 more money-orders for an increased amount of about Rs. 2,500 were received in the four post offices to which the Subdivisional Officer's enquiries were confined during the months of January and February 1897.

In Bangaon also emigration and immigration of famished people is unknown. Some Beharis are reported to be employed on the railway.

(1) *Condition of Cattle*.—The condition of cattle continues to be fairly good with a few sporadic cases of cattle-ox here and there.

(2) *Number and nature of public works open in or near the tract*.—(a) *Under the District Board*.—A test work was opened on the 25th February last in the shape of excavation of a tank in thana Muhammadpur. Due publicity of the intended opening of the work had been given beforehand, but, as I anticipated, it has up to date proved a failure. From Magura Subdivisional Officer's report, dated the 26th, it appears that no one came to the work on that date. I have, however, given him orders to "stop at the work for three or four days more, and if no one appears at the work, to close it and resume his other duties." The expenses on the relief works has been as follows:—

				Rs.	A.	P.
Earthwork	0	6	0
For nicking the lines	0	6	0
Drum beater	0	2	0
Conveyance charge of 100 kodalis from Jessore to Magura.				3	8	0
Total	...			4	6	0

The above report shows that there is not yet such pronounced distress in that tract as to drive the people to relief works, and I expect the work started will have to be shortly closed for the present.

A statement proscribed by Circular No. 1, of 6th January 1897, is enclosed herewith:—

Statement showing the rates of wages paid on relief works (including test-works) and tasks exacted.

RATES OF DAILY WAGES AND TASK.															Grain on which wages calculated under section 104 of the Famine Code.	Retail price of the grain in column 12 (number of seers per rupee).	Rate per 1,000 cubic feet of earth-work.	REMARKS.

For Collector.

exacted. The task exacted is that reported by Mr. Bell in his last fortnightly report, i.e., for medium soil 50 feet lead, B class :—

M.	W.	B. C.	S. C.
78	60	40	15

and these tasks will be continued. Separate tables are now being prepared for soft soil and for greater lift and lead, as the tank work necessitates this. In one work—Khesra—men were classed as A labourers. After making a local enquiry I have had them classed B. This is in accordance with the new rules of Government, in which the classification is reduced to B and D. The rates of wages continue the same as before. Two annas per man maximum, annas 1-6 minimum, B. C. ten and 9 pies, S. C. six pies maximum and minimum. These are calculated according to the price of grain, estimated to be ten seers per rupee. No women came to our relief works, and it is therefore absolutely useless proscribing tasks for them. The following are the points on which we have rules differing slightly from the Code :—

(1) Children 7 to 10 are worked. They are in the habit of doing so, and the tasks given them are small and they are well able to do them. They are most useful as carriers, and if their parents be deprived of their help, less work will be done. In the new rules forwarded with Government No. 420 M.I.P., dated 25th January 1897, there are, I think, four classes of children. In practice, on a relief work, it is impossible to classify so much. Here we have three classes—under seven exempted and sent for gratuitous relief; 7 to 12 S. C.; 12 to 15 B. C. I may add that no complaints are made of this, and if our classification is altered so as to exempt children under seven, our gratuitous relief test, which is now large and unwieldy, will be very largely increased.

(2) We have not as yet found it necessary to give a wage to labourers the first time they come on the works. If we did so, we should have numbers coming, taking the wage and disappearing. I am now considering if it is necessary to arrange for providing food for those labourers who come from a distance.

(3) We do not give a holiday on Sunday, but on separate days according to the *hâts*. This is for obvious reasons advantageous. There is no point in a Sunday holiday more than a holiday any other day for non-Christians; secondly, grain and produce are always to be bought cheaper at *hâts* than in shops; thirdly, *hât* days are our gratuitous relief distribution days, and workers are enabled to carry home jute and dhan for their wives and female members of their families admitted on our list on condition of doing some work. We have no information of relief works opened under private agency, but it is known that some zamindars are doing what they can. One large zamindar had taken a loan to open a work, and another zamindar proposes to do the same. The Hon'ble Chandra Madhab Ghosh, High Court Judge, is said to be giving work to his raiyats; but as a rule absentee landlords do not take trouble about their raiyats. I hope they may suffer in consequence, and I think they will in part, owing to desertion of raiyats. The present number of relief works is inadequate. Arrangements are being made to open at least four more immediately. The Assasuni khal, now being done by the Public Works Department, employs many men who will be without work in another ten days at latest.

(4) There are no poor-houses open. I anticipate it will be advisable to open two by the 10th of March, or certainly at the end of the month. I should use it in great measure as a test for those who wish to get gratuitous relief and to house beggaring. The number of boggars is very large, and they get little or nothing from people round. There are no private poor-houses.

(5) Paddy-husking is done by women on receipt of gratuitous relief, and will be treated under that head. It is extremely difficult to find any work but jute-twisting and paddy-husking for women. The only two possible forms of other employment are weaving and mat-making.

We have made experiments in weaving, giving out 20 seers of cotton to eleven men and two women of the Jugi caste. They returned within 10 days material valued at Rs. 25 (or Rs. 26). The cost of the cotton was Rs. 21, the wages paid were Rs. 4-11, so that the loss was not large. No buyers for the clothes at a fair price can, however, be found at present. The scheme is viewed with mistrust by the richer weavers, who think that Government wish to take their trade from them. The real facts have been explained to them. We hope to have more extensive working in this in future. No experiments have been made in mat-making as yet.

Paddy-husking.—The same amount of paddy as was reported last time is given, i.e., 1½ maunds, from which we got 39 seers 11 chitaks of rice. Jute we give out five seers and get back four seers 12 chitaks of string. These are weekly tasks.

(6) *Organization of distribution of grain doles.*—The arrangements at present are that doles are distributed once a week at one centre for each circle. This is found not sufficient. The recipients of the doles are, many of them, very old women, widows, and others deserted by their wage earning relatives, and in many cases possessing none. The circles are large and the head-quarters have to be fixed in places where there are *hâts* and conveniences, and are not always central; consequently many have to come from great distances. They are weak and unable to move about much, and suffer a great deal. Two centres have therefore now been chosen for each circle. On fixed days of the week, being *hât* days, those entitled to receive gratuitous relief attend at these centres and get their doles. Many are only allowed

a dole on the condition that they spin jute or husk paddy, and they receive their amount of jute or paddy at the same time, and also bring back the rice or string. It is noticeable that though all will husk paddy very few are willing to spin jute, and only consent to do it under pressure.

The numbers on gratuitous relief are 1,076·5. The great increase was to be expected, as none of the women in the district can do earthwork. If they would, our difficulties would be much less. This is, I believe, recognized by Government.

Those who husk paddy or spin jute cannot, moreover, really be said to be receiving gratuitous relief at all, as they work. The number who do this work is 211. In addition to these arrangements, Indian Famine Charitable Relief Fund circles are being formed in each circle to assist the Circle Officer in relieving the destitute, especially those the Circle Officer cannot reach, who are many. This is urgently necessary too, as circle officers are now so busy with distribution work that they have little time for enquiry into loans and visits to villages. All panchayats and chaukidars are constantly sending in and bringing in applicants for gratuitous relief. It is for these persons particularly that poor-houses are necessary as a test to see whether they are really in want, and also to enable circle officers to make full enquiries into those cases. Many of them are, however, from their appearance, clearly in want of food.

(7) *Relief in kitchens*.—N.J., and I do not propose any.

(8) We have advanced in all Rs. 19,890 in the affected area under Land Improvement Loans Act. This money has been advanced under the new rules, and mostly to zamindars and gantidars. The question of security is most important in the case of the latter: it is impracticable and causes too much delay to attempt to get the consent of the landlords to the creation of the encumbrance; yet we know that this year there will be numerous rent suits against these men, and that they will be sold up and their tenures bought in free of encumbrances. To avoid the loss consequent on this, the consent of zamindar has, when possible, been taken. Joint personal security has also been taken in many cases, and every effort will be made to protect the interest of Government as mortgagee; but the difficulties are great. The details of persons and amounts advanced this fortnight will be found in the table appended.

There is no cultivation going on now for which agriculturists loans can well be given. Applications are now being enquired into, but the granting of these loans will chiefly be confined to the sowing and cultivating season. It is impossible for Government to take the place of the mahajans of the subdivision, nor is there any reason for it. Those who can offer security can always get loans from local bankers, and those who cannot, cannot get loans from Government without security. The amount advanced this fortnight has been noted in the statement sent herewith.

In his No 72G.—S R., dated the 20th February 1897, the Commissioner noted the following defects in our last report for January:—

(1) The number of daily labourers and the rates at which they were paid was not entered, nor were they distinguished according to the departments which are in charge of work.

In reply, I beg to report that no works under Famine Code are being done by Public Works Department here. All the works are in charge of the Collector, who has overseers working under him. This applies equally to January and February. The number of workers paid by daily wage for January 1897 was 71·5. The number for February 1897 is 439.

(2) A sum of Rs. 275 only was advanced under the Land Improvement Act, and the system under which the loans were granted was not stated. The Commissioner also wants an explanation why so small a sum was advanced. The reply to the first portion of the question is as follows:—Applications are received by Charge Superintendent and sent to Circle Officer for inquiry. On receipt of the report orders are passed and the Forms B drawn up in duplicate. The applicant is told to attend at Sutkhira on a particular date, and his form which is to be cashed is sent to Treasury Officer for endorsement. It is forwarded by him to Sutkhira and paid by Sub-Treasury Officer there to applicant. Loans are made payable in two instalments, the last being paid when half the work is done. Loans are granted in the affected area under the new rules, i.e., no interest is charged, and it is agreed that if the work be performed to the satisfaction of the Collector and in accordance with the condition laid down in the order of Government, one-third of principal will be remitted. The manner in which security has been taken has been dealt with in the body of the report. The sums advanced were small, because we had such a small staff, who had at the same time to prepare their village gratuitous relief register. Up to date Rs. 19,890 have been advanced, which is all that has been allotted to the subdivision, and is indeed practically all allotted to the district. I have sent an urgent application for more money, and until those applications are granted few more advances can be made.

(4) Financial statement shows Rs. 1,000 received from district fund and Rs. 400 from subscriptions. Of these amounts, Rs. 1,000 has been considered an advance from District Board, and has been recouped in full to that body. Rupees 400 will similarly be refunded to the Nadia Famine Charitable Relief Fund, being treated as an advance. The explanation of discrepancy pointed out is as follows. The Rs. 375 expended for the purchase of jute and paddy was taken from the Rs. 400 raised by private subscription. The balance under that head was therefore correct.

The items marked A in the statement were paid, not out of the Subdivisional Officer's fund at all, but by District Engineer from an advance he held for payment of relief workers before Mr. Bell had arranged for work.

Out of this Rs. 1,000, only Rs. 196-9-9, i.e., Rs. 120-2-3 on gratuitous relief and Rs. 76-7-6 on account of contingencies, was paid; but Rs. 135-11 4½ has been spent previously to the period under report. If these figures are checked it will be found they are correct, and indeed the explanation is given in full in the financial statement of Mr. Bell.

(5) The Commissioner complains that no information has been given on the condition of other parts of the district. I have been myself over part of Paikgacha, Fakirhat, Mollahat, Bagerhat, and the Sadar in the last month. One Deputy Collector has been over the whole of Paikgacha, a Sub-Deputy Collector has been over Dumria, the Subdivisional Officer of Satkhira has been in Satkhira and Kalaroa, and the Subdivisional Officer of Bagerhat has been over portion of his subdivision. Generally, I may say there is no distress in the Bagerhat subdivision at all. People are suffering on account of high prices, but the crops have been fair and the landlords are collecting their rents. Prices are slightly lower than in the Sadar. In Morellganj there was fear of distress, but I do not think there is any cause for alarm at present. Mollahat will be free from danger if there is a reasonable *boro* crop. In the Sadar the poorer classes, and especially those who have no lands and the poor but respectable people, will suffer to a certain extent. The crops have, however, been fair, and there are sufficient people fairly prosperous to help those in want. I do not think any relief operations will be necessary at all. In Satkhira portions of the thana will have to be included later on in the affected area. Thana Kalaroa is safe, and there are also some winter crops. In Dumria there is also no cause of alarm at present, nor in the portions of Paikgacha and Magura not included in our area.

Water-supply.—Water is very scarce, not only in the affected area, but also throughout the district. The programme of relief works which have been compiled includes 31 tanks, new and old, which will be taken up as fast as possible. The lands in these cases will be either made over to District Board by deed of gift or leased, or, where necessary, acquired. We have at present started one tank in a village called Khazra Durgapur. These tanks will be of no use this year, however, and there is no doubt that there is at present a great scarcity of water which will become greater in a short time.

The defects in our statements for January have been noted, and will be rectified in this month. Government Circular No. 173 Fam., dated the 25th January 1897, was not received here till after the despatch of our last monthly report, and so our returns were not in accordance with it.

FORM 7.

STATEMENT VII.

[See section 26 (iii) of the Code.]

FAMINE STATEMENT E.

KHULNA DISTRICT.

Abstract Statement of relief works and gratuitous relief for the half-month ending 24th February 1897.

	Rs.	Rs. A. P.	Rs.	Rs. A. P.	Rs. A. P.			Rs. A. P.		Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs.	
Balance in hand, week ending 17th February 1897	...	14,021 14 4	25	
Week ending 24th February 1897	16 11 0	117 3	299 11 0	
Week ending 24th February 1897	18 10 6	260 11 0	550 8 5	...	1,172 3 2	28 11 0	...	1,528 5 11½	25	
Total	...	14,021 14 4	25	35 8 6	407 14	850 3 5 (a)	..	1,172 3 2 (b)	28 11 0	...	(c)		

Grants total = 2,454 8 10.

(a) Out of Rs. 850-3-5 distributed in money and grain doles, Rs. 244-11 represents the price of rice from paddy-husking from paddy purchased from private subscription fund, and the balance, Rs. 605-4-4, represents the grain and money doles from Government money.
(b) The total price of paddy and paddy husked and paid for during the period under report was Rs. 1,344-3-2. From this amount a deduction has been made of Rs. 211-15, being the price of rice from paddy-husking from paddy purchased with Government money and distributed in grain doles, and the balance, Rs. 1,132-3-2, has been shown under the head.
(c) The total expenditure during the fortnight was Rs. 2,454-8-10. Out of this, Rs. 244-11 represents the price of rice from paddy-husking from paddy purchased from private subscription fund, and the balance, Rs. 2,209-9-11, was paid from the Government. To this amount should be added Rs. 25-1-0, being the expenditure on gratuitous relief in three circles up to the 27th January 1897, which was not included in the previous financial statement, thus making a total of Rs. 2,495-8-5, and leaving balance of Rs. 1,528-5-11½, which has been shown under this head. The pay of the officers engaged is not included in this.

STATEMENT I.

W. H. H. VINCENT,
Offg. Collector.

No 113G.—S.R., dated Calcutta, the 4th March 1897.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Revenue Department.

UNDER section 9 of the Bengal Famine Code, I have the honour to submit herewith a copy of a letter No. 2102G., dated the 1st March 1897, and of its enclosures, from the Collector of Murshidabad, being his report regarding the scarcity prevailing in portions of his district. The report contains full information on all points, except clause (d) "the condition of grain stocks," in the district. I am awaiting a separate report on this subject. I may add, however, as regards the district generally, that from recent enquiries which I have made in the district, I believe that in the greater part of it raiyats who hold land have retained enough in hand to feed themselves and their families until they gather another harvest, and that dealers have probably enough grain in hand, principally from the good harvest reaped in the *Rark* country, to supply the demand until the middle of April, after which persons, whom I believe to be well qualified to judge, have told me that they believe that grain must be imported from Calcutta.

No. 2102G., dated Camp Dadpur, the 1st March 1897.

From—E. V. LIVINGE, Esq., Collector of Murshidabad,
To—The Commissioner of the Presidency Division.

I HAVE the honour to submit the following report under section 10 of the Famine Code regarding the scarcity prevailing in portions of this district. As matters at present stand, the only part of the district where distress has actually appeared and relief operations are necessary, is a tract covering about 80 square miles in the Burua thana of the Sadar subdivision, and in the Rangamati and Saktipur outposts of the Gokarna and Bharatpur thanas of the Kandi subdivision. The tract likely to be affected comprises also portions of the Daulatabad Hariharpara, Nouda, Gowas, Jalangi and Bhagwangola thanas in the Sadar subdivision, and the total area of this tract, including the 80 square miles above referred to, may be estimated at 280 square miles with a population of 160,000 as shown in list A here to annexed.

2 The river Bhagirathi divides the district into two parts, that on the west being known as the *Rark*, and that on the east being known as the *Bagri*. Rice is the staple food of the district, and is grown on more than three-fourths of the whole area under cultivation. The principal crop is the *aman*, or the winter rice, which is grown in the *Rark* and also in low lands in the *Bagri* tract, especially in the south-eastern portion of the district known as the *Kallontar*; *aus dhan* is grown in the *Bagri*, being sown in April or May, and reaped by the end of August or the beginning of September, after which the lands are prepared for the winter or *rabi* crops. Good rain in September and October is required for the winter rice and for the cultivation of the *rabi*. The *Rark* is the chief source of the food-supply of the district, and in ordinary years the rice grown in this tract would be more than sufficient to meet the requirements of the population. About one-fourth of the cultivated area of the district is under mulberry, jute, indigo, oil-seeds, &c.

3. (a) The grounds of my belief that scarcity will prevail are as follows:—

- (i) There was a partial failure of the rice crop in 1895-96, the outturn of the *aman* and *aus* crops being 8 and 9 annas respectively. Owing to the early cessation of the rains in September last, the outturn of the *aman* crop may be estimated at 9 annas only for the whole district. The *aus* crop has been estimated at only 8 annas, and the *rabi* in the affected area was a very poor crop, and in many places, especially in the Burua thana, it was a complete failure. The outturn of wheat, which, however, is not largely grown for the whole district, may be set down at 3 annas, and of other *rabi* crops at 6 annas.
- (ii) The export of grain from *Rark* to other districts, Calcutta and the North-Western Provinces, has been unprecedented, and there is reason to apprehend that the stocks in hand will not be sufficient to meet the requirements of the district up to September next. The price of common rice has averaged 10 seers per rupee since December last as compared with 16 seers in the preceding year, and it is probable that there will be a still further rise. Those who have land and a surplus crop, have been able to profit by the high prices; but for the smaller cultivators whose crops have failed, and the landless classes, the high prices must entail a certain amount of distress.
- (iii) The number of beggars who are coming into Berhampore and other places where wealthy persons dispense charity is largely increasing. In ordinary years these beggars are supported in their villages, but this year this source of charity has dried up.

- (iv) Already 1,035 joint applications for loans under the Agriculturists' Loans Act aggregating Rs. 1,76,187 have been received. In the last few years not a single application was received. People represent that they are unable to obtain loans from the mahajans as in ordinary years.
- (v) Similarly, 193 applications under the Land Improvement Loans Act aggregating Rs. 73,380 have been received. These are nearly all for the excavation of tanks. I am daily receiving large numbers of petitions from villages in the Sadar subdivision, asking for the re-excavation of tanks partly to relieve the existing want of water and partly to supply the villagers with work.
- (vi) At the time of the cutting of the winter rice, a large number of labourers went to the eastern districts, but returned without having obtained employment. Very recently about 400 labourers from a few villages in the south-east corner of the Burua thana went to the Hooghly district for work attracted by the high rates said to prevail there.

(b) *The area and population likely to be affected.*—I have already referred to this in paragraph 1. In the 80 square miles in the Burua, Rangamati and Saktipur jurisdictions where immediate relief is required, the population may be roughly estimated at Rs. 42,000.

(c) *Character of communications in the affected area.*—There are good roads throughout the affected area, and the bulk of the traffic is carried on carts and pack-bullocks. The river Bhagirathi and the Bhyrub, which passes through the eastern portion of the district, are lower than they have ever been known to be before at this period of the year, and both are fordable in many places. There is little traffic on them now. The only railway in the district is the short branch line from Nalhati on the East Indian Railway to Azimganj.

(d) *The condition of the grain stocks.*—Such figures as I have collected are absolutely unreliable, and I can place no confidence on them. I am attempting to obtain more accurate statistics, but the information is still incomplete, and I do not delay this report on this account. All substantial cultivators have, I believe, a sufficient stock in hand for their own requirements. I have already reported on this point in my letter No. 1899G., dated the 3rd February 1897, and I still adhere to the opinion therein expressed that grain will have to be imported before many months are over, in order to supply the local *hats* and to satisfy the requirements of the population up to the time that the next *bhadoi* crop is reaped. I think, however, that local trade will be able to meet the deficit, and that no interference on the part of the Government will be required.

(e) *Sources from which supplies of food may be obtained.*—In ordinary years the supplies of food-grains from the affected area are obtained from the *Rark* and from the neighbouring districts of Rajshahi, Malda, Dinajpur and Rangpur. No imports from these districts can be expected this year, and the only source of supply to make good any deficit that may occur will be Calcutta. The poorer people depend on the local *hats* which get their supplies from the *Rark*, and for the present at least I have not heard that the supply is insufficient.

(f) *Proposed measure of relief.*—

- (i) Gratuitous relief under Chapter IV, section 31 and following sections of the Famine Code.
- (ii) Gratuitous relief under section 45 of the Famine Code, especially paddy-husking, spinning thread from raw cotton, and preparing string from jute.
- (iii) Loans under the Agriculturists' Loans Act.
- (iv) Loans under the Land Improvement Loans Act for the excavation of tanks.
This form of relief I look upon as most suitable, provided I can get substantial men of position to take loans as it will not only give work to a large number of persons in the neighbourhood of their villages, but will help to remove the serious want of water, which is at present being experienced over a large portion of the affected area.
- (v) Relief works as defined in section 52 of the Famine Code, viz., the construction and repair of roads and embankments and the re-excavation of tanks.

(g) *Estimate of the expenditure likely to be incurred and the local sources from which it can be met.*—

- (i) Assuming that 10 per mille of the population will require to be gratuitously relieved under section 31 of the Code, the number of persons to be thus relieved for the seven months up to September next in the affected area will be 1,600. Taking Rs. 2 per mensem as the average cost per head for relieving these persons, the total expenditure will amount to Rs. 22,400. About half of this amount may be required for gratuitous relief under section 45. As distress is not likely to be felt over the whole of the affected area for the full period of seven months, I would take Rs. 30,000 in round numbers as the amount which will be required to be expended in gratuitous relief. Of this amount, Rs. 25,000 have been promised at the public meeting held in Berhampore on the 30th of January, and the greater portion of this has already been collected. It is probable that the remaining Rs. 5,000 will also be raised by private subscriptions within the district, and that it will not be necessary to apply for an additional grant for this purpose.

- (ii) I estimate that at least a lakh of rupees will be required for loans under the Agriculturists' Loans Act, and half a lakh for loans under the Land Improvement Loans Act. The amounts already allotted to this district are Rs. 7,000 and Rs. 4,000 only respectively.
- (iii) The District Board have sanctioned Rs. 35,000 for relief works from April to September 1897, and about Rs. 15,000 is available for the current year. It is not easy to estimate at this stage what the total amount required for the expenditure on relief works will be, but the amount will suffice for some time to come. A lakh of rupees is to be expended by the Public Works Department on the Bhagwangola retired line of embankment, and this work can be turned into a relief work at any time that may be required.

4. As I have already stated, the only part of the district where relief operations are at once required, comprises an area of 80 square miles, in portions of the Burua thana in the Sadar subdivision and of the Gokarna thana and Bharatpur thanas of the Kandi subdivision. In Gokarna and Bharatpur the affected area is a strip from 3 to 5 miles wide along the west bank of the Bhagirathi river. In this area *aus dhan* and *rabi* are grown, and mulberry is also extensively cultivated. Both the *aus dhan* and *rabi* are failed, and the mulberry has suffered from want of rain, so that the prospects of the March bund are very gloomy. In Burua the affected area comprises the tract along the east bank of the Bhagirathi and the south-east portion of the thana. Here, too, the *aus dhan*, *rabi* and mulberry have been more or less failures. There is a large number of silk filatures on both sides of the river, and the majority of these have just closed, and will not open again for some months. These filatures must have been giving employment to over 4,000 persons. The majority of the applications for loans have come from the Burua thana, and I have a Deputy Collector and a kanungo solely employed in enquiring into these applications. Two test-works were recently opened in the Burua thana, and one near Chandpora in the Rangamati outpost of the Gokarna thana. The number of persons employed on the two former yesterday was 641 and on the latter 89. The numbers are gradually increasing daily, and are likely to still further increase, and I have to-day started a new test-work near Saktipur, in the Bharatpur thana. The works are under the charge of District Board overseers under the supervision of the District Engineer. I may mention that in the beginning of January last, relief works were opened in the Nadia district, only three miles from our affected area, and have been open ever since. No gratuitous relief has yet been given, but with the consent of the Central Committee of the Munshidabad Famine Fund, I have made over Rs. 100 to Mr. Keogh, of Sujapur Factory, and same amount to Mr. Malcolm, of Ramnagar Factory, as also Rs. 25 to each officer in charge of the Burua thana and the Saktipur and Rangamati outposts for the purpose of gratuitous relief in case it may be required.

5. I have just received your No. 92G.—S.R., deputing two officers with powers of a kanungo to this district for relief operations. I propose to divide the area immediately affected into two circles, one comprising the portions of the Gokarna and Bharatpur thanas, on the west bank of the Bhagirathi, and the other the portions of the Burua thana, on the east of the Bhagirathi. A kanungo will be placed in charge of one circle, and the Sub-Deputy Collector in charge of the other. The Assistant Magistrate, Mr. Panton, will be in charge generally of relief operations in the district. Besides these, I have two other kanungos who, with a Deputy Collector, will be employed in enquiring into loan applications received from other parts of the Sadar subdivision. This staff is sufficient for present purposes.

ENCLOSURE A.

Statement showing the tracts where severe distress of famine is apprehended in the district of Murshidabad.

N. H.—The maximum wage of 6 pice a day for a full task of 66 cubic feet of earth work is being strictly enforced. No gratuitous relief has been given as yet.

E. V. LEVINGE, .
Collector.

No. 710T.—M.R., dated Camp Hazaribagh, the 6th March 1897.

From—A. FORBES, Esq., c.s.i., Offg. Commissioner of the Chota Nagpur Division,
To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of this office No. 575T.—M.R., dated the 23rd ultimo, I have the honour to submit the following report under sections 13 and 25 of the Bengal Famine Code for the weeks ending the 20th and 27th ultimo.

PALAMAU.

2. I forward the Deputy Commissioner's report with marginal notes by myself, together with the statements prescribed by sections 26 and 27 of the Code and Circular order No. 385Agri. (Fam.), dated 11th February 1897, besides certain statements called for by myself, showing the action taken in making advances under the Land Improvement and Agriculturists' Loans Acts and for improvements in Government estates. The imports of Burma rice under the bounty system lately sanctioned by Government are also shown in a separate statement. Duplicate copies of the map required by section 27 are also appended.

3. The present report is so far satisfactory that it does not show anything like so rapid an increase in the numbers on the relief works as the Deputy Commissioner at first anticipated. I observe that Statement D annexed to the Deputy Commissioner's report shows, apparently, the total daily numbers on the works for the two weeks ending the 20th and 27th ultimo, instead of only the average daily numbers; and the figures shown have consequently to be divided by 6. This done, it will be seen that the daily average number (taking men, women and children) on the works during the first of the two weeks under review was 2,352 and during the second week 3,115. This comparatively slow increase is no doubt partly due to works of improvement, which are being carried out in Government, as well as in private estates, and also partly to the fact that the Deputy Commissioner has not yet been able, for want of establishment, to open all the works he proposes; but even allowing for this, it must be admitted that, so far, no signs of any "rush" are visible. As regards an increase in establishment for the purpose of starting new works, I am addressing you separately in my No. 694T.—M.R. of to-day's date.

4. I am glad also to find that there has not been any rapid increase in the numbers on gratuitous relief, the total number for the first of the two weeks under review being only 450 and for the second week 514. The statement (Famine Form 6), submitted by the Deputy Commissioner, does not distinguish between persons relieved under Chapter V of the Code and children and other "dependents" coming under section 84, as prescribed by column 1 of the form printed at page 60, Famine Code; but I infer from the fact that no "dependents" are shown in columns 26 to 29 of Statement D, and, with reference to the remarks on this subject in paragraph 25 of the Deputy Commissioner's report, that such "dependents" are included in the above figures. If so, the results are certainly reassuring, for the procedure adopted by Mr. Kenney for the preparation of village lists (see paragraph 25 of his report) appears to me to meet all requirements.

5. An interesting feature in the report is the result, so far, of the offer of 8 annas per maund bounty on imports of Burma rice. As yet only one trader (of Gaya) has taken advantage of this concession, and has been paid Rs. 329 bounty on 658 maunds. That this has had little or no effect in lowering prices seems due to the fact that competition has not yet set in, no one else having tried the experiment, with the result that the one trader in question appears to be following the lead of the Daltonganj dealers in keeping up prices. It is to be hoped that this game will soon be interrupted. There has been a slight revival of exports from Lohardaga during the past month, the returns showing that 1,648 bullocks came away with rice from the Lohardaga and Chainpur marts during February, against 794 that had to leave

empty. Prices, however, throughout the Palamau district continue very high, as will be seen from the following figures for the last three weeks:—

	Week ending 31st January.	Week ending 13th February.	Week ending 27th February.
1	2	3	4
Number of <i>hats</i> at which rice was selling at under 8 seers per rupee.	7	15	14
Number of <i>hats</i> at which rice was selling at 8 seers and under 9 seers.	36	22	42
Number of <i>hats</i> at which rice was selling at 9 seers and under 10 seers.	28	57	27
Number of <i>hats</i> at which rice was selling at 10 seers and over.	5
Total number of <i>hats</i> from which returns were received.	76	91	83

MANBHUM.

6. The Deputy Commissioner's report and statements required by sections 26 and 27 of the Code, and by Circular No. 385 Agri. (Fam.), dated 11th February 1897, are appended, together with duplicate copies of the map required by section 27 of the Famine Code, from which it will be seen that the seriously affected tracts are still reported to lie in the Gobindpur, Tundi and Nirsha thanas, and the less affected in thana Chas. The maps do not show the thana boundaries, and I am uncertain whether the above tracts include the whole of the thana jurisdictions named or not. I am asking the Deputy Commissioner to supply this omission in his next maps. In all eleven test works have been opened, viz., seven within the affected tracts and four in other places, at piece-work rates varying from Re. 1-4 to Re. 1-9, and in two cases (Pokheria tanks) to Rs. 2 3 per thousand cubic feet. According to the last returns (25th ultimo and later dates, see copy of annexed statement marked K), 3,454 persons (3,309 male units) were employed on nine of these works (returns from the other two not having been received). The numbers have gone up considerably during the last 10 days, excepting at the two last mentioned works where the piece-work wage was highest. The explanation of this apparent anomaly is that these two works were, as noticed in my last report, at first much mismanaged and measurements not strictly made. Since then Mr. Luson has corrected this mistake.

7. For gratuitous relief centres have been opened, under Chapter V of the Code, at Pokheria in the Tundi thana and at the subdivisional head-quarters, Gobindpur. Form 6 shows that there were 453 recipients during the week ending the 20th, and 1,023 during the week ending the 27th ultimo, at the Pokheria centre alone, returns from the Gobindpur centre not having been received. There were also 1,343 "dependents" at the two Pokheria relief works in receipt of gratuitous relief during the first of the above weeks, and 1,182 during the second week. The reduction is owing to the checking of abuses in this respect by Mr. Luson. In all, the Deputy Commissioner estimates, there were some 5,000 persons on the gratuitous relief lists on the date of his report, not counting casual relief given through the police under sections 12 and 166 at a cost of Rs. 68 and Rs. 330 during the two weeks respectively. It appears to me that action under Chapter V of the Code will soon have to be considerably extended, and I am asking the Deputy Commissioner to take necessary measures.

8. In paragraph 12 of my No. 474T.—M.R., dated 12th ultimo, I asked that the Public Works Department might be instructed to send the Deputy Commissioner four subordinates as noted in the margin without delay. I trust that the necessary orders have issued. I have appointed, at Mr. Luson's request, three kanungos

2 Overseers. 1 2 Sub-overseers.

on Rs. 40 per mensem each to supervise the preparation of village (gratuitous relief) lists, and two clerks on Rs. 15 each (to assist at Gobindpur and Pokheria in the distribution of gratuitous relief), and request the sanction of Government to these appointments.

9. I observe that in column 9 of Form E, the Deputy Commissioner has only shown "dependents" on gratuitous relief under section 84 of the Code, and has not included persons receiving gratuitous relief under Chapter V. I beg to be informed if this is correct. I also notice that Mr. Luxon has omitted to give in the body of his report the particulars regarding death-rate required by section 27(i) of the Code. His attention will be invited to this matter. The death-rates shown in columns 15 and 16 of Form 10 are very low, and I am asking the Deputy Commissioner to verify them.

HAZARIBAGH.

10. The Deputy Commissioner's report is annexed. It contains but little new matter. But I am satisfied that the time is approaching for arrangements to be made for the opening of some relief works, and especially for the extension of gratuitous relief, and I am about to confer with Mr. Herald, who has just returned from tour, on the subject.

LOHARDAGA.

11. I regret to state that the Deputy Commissioner's report has again not arrived in time. I can only say that his report for the first half of February (received after submission of my last report) was of a satisfactory character. Speaking generally, there were then no signs of distress in any part of the district, while the price of rice showed a slight down tendency, averaging $9\frac{2}{3}$ pukka seers per rupee as compared with an average of $9\frac{1}{3}$ seers at the end of January. I should add that the reason of the delay in the submission by Mr. Streatfeild of his report is apparently due to his being in camp to the south of the district at a considerable distance from his head-quarters.

SINGHBHUM.

12. Mr. Bompas continues to speak with assurance of the satisfactory prospects of his district. Rice is still plentiful, though prices appear to have risen slightly (average now is 10 to 12 seers per rupee) owing to the continuance of exports (4,838 maunds during first fortnight of February, and 4,855 maunds during second fortnight), chiefly to North Bihar and Hazaribagh. The Deputy Commissioner remarks that about one-half of these exports come from Mayerbhanj, the rest being taken from his own district.

GENERAL.

13. The general inference to be drawn from the reports for the past fortnight is that while the position in Manbhum is somewhat intensifying, the distress in Palamau is turning out to be less acute than was at first apprehended. In Hazaribagh no marked distress has as yet shown itself, but signs of its gradual approach are beginning to appear. In Lohardaga there seems, so far, no need for any apprehension, while in Singhbhum matters continue to be altogether reassuring.

14. The rain during the last two fortnights was fairly general, and has been of decided benefit to the *rabi* without, at the same time, doing any material harm to the *mahua*. I am glad to say that the latter now gives promise everywhere of at least a full average outturn, provided the weather continues favourable.

15. The reports from the different Tributary States go to show that the prevailing scarcity is making itself felt there also, though not, so far as I can judge, very acutely; and, considering the very sparse population and the recourse the inhabitants have to forest edible products, I do not think that we need entertain any serious apprehension regarding them. From returns received from Sirguja and Jashpur I learn that rice is selling there at about 14 pukka seers, and *makai* at 15 and 18 seers per rupee, which compare favourably with the prices in the adjoining British districts. The Chief of the small

State of Korea complains, however, that many of his raiyats are leaving their homes for British territory, especially for Assam; that he has done all he can for them and is now at the end of his resources. I am asking the Deputy Commissioner of Palamau if he can give work to any of these people on the relief works at Ranka and Utari. The Maharaja of Sirguja also reports that large numbers of destitute persons have been and still are coming into his State from the Bagholkhand Agency, and he suggests that this should be prevented. I sometime ago informed the Political Agent of Bhagholkhand of this complaint, and requested that he would let it be widely known that the scarcity extended to these parts also, and that it was useless for people to come here for assistance. I have told the Maharaja, however, that I expect he should arrange that these destitute people be properly relieved before being turned back, and I have no doubt that he will do so. The Raja of Jashpur has sent me a list of two roads and two tanks on which he is starting work at an estimated cost of Rs. 2,050, besides repairing certain houses and temples at a cost of Rs. 3,500 as relief measures. I am informing the other Political Chiefs of this, and asking them to follow his good example.

STATEMENT K.

Test works in the Manbhum District. Reports received by Deputy Commissioner on 2nd March 1897.

H. LUSON,
Deputy Commissioner, Manbhum.

No. 1595R., dated Purulia, the 2nd March 1897.

From—H. LUSON, Esq., I.C.S., Deputy Commissioner of Manbhum,
To—The Commissioner of the Chota Nagpur Division.

I HAVE the honour to submit my half-monthly report under section 24 of the Bengal Famine Code for the period 16th—28th February 1897.

2. (1) *Area affected.*—The same as reported in my half-monthly report No. 1555F., dated the 19th ultimo, for the period 1st to 15th February 1897. No regular relief circles have yet been formed; but the Revd. A. Campbell is in charge of the administration of gratuitous relief within a radius of about 5 miles from Pukheria on the borders of the Tundi and Nirsha thanas, and the Sub-Registrar of Gobindpur is in charge of the distribution of gratuitous relief in the Gobindpur thana. Gratuitous relief is being given in the Tundi thana by the tahsildar of the Tundi Encumbered Estate, and by the Sub-Inspector of Police. In the other affected thanas, Nirsha and Chas, gratuitous relief is also being distributed by the officers in charge of the thanas. At all police-stations and outposts the officers in charge have small sums for the relief of urgent cases.

3. (2) *General state of the affected tracts.*—The reports received under sections 1 and 161 of the Code show that distress was felt chiefly amongst the helpless and beggars who usually depend upon charity, and that these are being suitably relieved. There is a general complaint of want of labour,* but the timely rain which fell just before the beginning of the period under report softened the soil and afforded employment to many labourers for a short

* Work?
A. F.

time. In the affected tracts, except the Chas thana where there is some *rabi* there are scarcely any crops on the ground. In these tracts, however, there are many *mahua* trees, the crop on which is already in blossom, and promises to be an abundant one. As to food-stocks, these are doubtless sufficient for the present. Considerable quantities of food-grains are being imported every week into the affected thanas from the stations on the Jheria extension of the East Indian Railway and from Barakar. The rainfall during the period has been nil. Rain just now would injure the *mahua* crop; that which fell a fortnight ago benefited it. The public health throughout the areas in question is generally reported to be good. In some parts of the affected areas people are emigrating in somewhat larger numbers to Assam; but this is not an unmixed blessing, as I have come across a number of the families of such emigrants on the registers of gratuitous relief, the workers having abandoned their dependents. The reports show that a considerable number of people from up-country are wandering through this district in search of work and food. I have come across some beggars of this class in very poor condition. Cattle-disease prevails in thana Chas of the affected thanas and in several other thanas of the district which are not included in the affected areas. The disease, which the people call cow-pox, is a form of rinderpest, and seems unconnected with the scarcity. The same form of disease prevailed three years ago.

4. (3) *Relief Works*.—There are nine test-works open under the District Road Committee besides two, for which I have not received the returns, under the Tundi Encumbered Estate and the Negarkhani Ward's Estates respectively. The two works at Pukheria on which 2,000 persons were employed last week have been conducted practically as relief works. They are, however, being continued as test works. Altogether there were nearly 3,500 persons employed on works on Saturday, the 27th ultimo. Practically all these persons are paid not daily wages, but according to the amount of work done. Four of the works above mentioned are in tracts adjoining the affected tracts, and the remaining seven are within those tracts. From Statement E it will be seen that excluding the small work at Katras where the workers did an insufficient outturn of work, the wage earned by each male unit per diem varied from 1 anna 4 pies to 2 annas and $\frac{1}{2}$ pie, the average being a little over 1 anna 6 pies or 6 pice. The price of rice is between 9 and 10 seers a rupce, being nearer 9 than 10, so that the wage earned per male unit has been sufficient to procure a trifle under the full ration* (vide sections 98 and 103 of the Code). I have given attention to the question of the rates, and have fixed them in consultation with the District Engineer.

*i.e. Three-fourths seer rice, 2 chitaks pulse, $\frac{1}{2}$ chitak salt, $\frac{1}{4}$ chitak ghi or oil, $\frac{1}{4}$ chitak condiments and vegetables.

The various test-works have not attracted so many workers as I expected. After the rain on the 14th, there was a very considerable falling off in the attendance on the works at Pukheria for some days. From these facts I conclude that the reports about the destitution among the labouring classes were somewhat exaggerated.

The test-work first opened after those at Pukheria, which were mismanaged at the commencement, was that in the Jhalda thana, the Khatgaon bund; it has ceased to draw workers at Re. 1-9 per 1,000 cubic feet.

5. Small works such as bunds and tanks are being carried out by private individuals here and there throughout the district, as the recent rain has made the soil suitable to be worked, and before the *mahua* harvest labour is always cheapest in the district. Early in the half-month I addressed a letter to each of the persons of property and substance in the district, suggesting that they would be doing much good to their poorer neighbours if they would take such works in hand now. I had gathered that some persons of this class were holding their lands in the expectation that Government might do something on a very extensive scale.

6. (4) *Poor-houses*.—Nil. Not required yet.

7. (5) *Organisation for the employment of artisans, women, &c., at their homes*.—Nil. I scarcely think any such organisation is required at present. Nearly all the people in distress are those dependent upon charity and those dependent upon unskilled labourers. The artisans have not yet come to the end of their tether. The persons who feel distress as much as any one in some places are the chaukidars who in this district are generally miserably and irregularly paid; the villagers have almost entirely stopped paying them now in the affected thanas. During the famine of 1874 the chaukidars received doles regularly, and it may be a matter of consideration later on whether such a method will have to be adopted this year.

8. (6) *Organisation of grain doles and money doles*.—Doles are almost invariably made in grain. The organisation for their distribution is described in paragraph 2 above. This district is singularly unfortunate in not possessing a sprinkling of people of the upper and better middle classes among the population. The zamindars are generally either under the Encumbered Estates Act, or qualifying to come under it, and scarcely anywhere throughout the affected thanas are there persons to whom I should care to entrust the distribution of gratuitous relief in the first instance. The police is not a good agency for this purpose, but it is in many places the only agency available to begin with. I have, however, got together a number of names for a sub-committee in the Gobindpur subdivision, and I hope before long to put the administration of gratuitous relief into the hands of still smaller committees formed by two or three of these persons.

9. (7) *Relief in kitchens*.—Nil.

10. (8) *Number of persons to whom loans under the Land Improvement Act or under the Agriculturists' Loans Act have been made*.—In my last report I mentioned that I was husbanding the amounts I had available for these purposes to see where they could be best

applied. I have now made allotments to different parganas, and I have appointed kanungos to make the necessary investigations, which can be summary and at the same time effective, if properly done. A number of such investigations has been already made by the Sub-Deputy Collector, and money will shortly be in the hands of the persons who have applied for it.

11. (9) *Financial Statement for the fortnight.*—

		Rs.	A.	P.
A.—Receipts from the District Road-Cess Fund	...	2,900	0	0
B.— expenditure—				
(a) Works	1,607	7	10
(b) Relief by doles	1,224	12	3½

12. (10) *General.*—I have myself visited the centre of the district, the east of the district, and again Pokheria and the Tundi and Nirsha thanas during the fortnight. At the different centres of the distribution of gratuitous relief, I have with medical assistance, whenever available, examined the recipients. The labouring classes I think show very little, if any, signs of emaciation; amongst those who take gratuitous doles only a small portion appear to me to be really much reduced for want of food, though there are doubtless some who are much reduced. At some centres a number of able-bodied persons had found their way on to the registers under Chapter V of the Code. As soon as I discovered this, I issued instructions that no distributing officer should give any gratuitous relief to an able-bodied person not defined in section 42 of the Code, unless he certified in his own hand that he had ascertained after proper enquiry that such person would otherwise die of starvation. I think a considerable amount of gratuitous relief in this district is necessary, but it was being overdone in some places.

13. I annex the statements prescribed by sections 25 and 26 of the Code, as well as a map in triplicate. The statements contain all the information at my disposal to-day. In the map I have coloured the thanas of Tundi, Nirsha and Gobindpur brown (seriously affected), but have kept thana Ohas blue (slightly affected).

FORM No. 5.

FAMINE STATEMENT D.

DISTRICT MANBHAM.

For the half-month ending 28th February 1897.

[illegible]

FORM No. 6.

[See section 26 (ii) of the Code.]

DISTRICT MANEHUM.

Statement of Gratuitous Relief for the week ending 20th February 1897.

NAME OF CIRCLE AND HEADS OF GRATUITOUS RELIEF.	NUMBER OF PERSONS RECEIVING GRATUITOUS RELIEF.				Money expended.
	Men.	Women.	Children.	Total.	
1	2	3	4	5	6
Pokhuria—					
(1) Under Chapter V ...	70	161	222	453	Rs. 139 15 10½
(2) Cash equivalent of grain allowance to non-working children and dependants on test works.	2	21	1,320	1,343	245 6 6
(3) Relief of starving wanderers and casual relief.	Not available.	68 6 6
<i>For week ending 27th February 1897.</i>					
Pokhuria—					
(1) Under Chapter V ...	149	384	540	1,023	248 13 10½
(2) Cash equivalent of grain allowance to non-working children and dependants on test works.	5	22	1,156	1,182	192 8 0
(3) Relief of starving wanderers and casual relief.	Not available.	329 9 6½

N.B.—Detailed figures for other circles for week ending 20th not yet received from different circles. No figures yet received from other circles for week ending 27th instant.

The figures in column 6 represent the cash equivalent of grain (rice), calculated at 9 seers to the rupee. The doles given out were ½ seer an adult and ¼ seer a child, irrespective of age. The dole to children irrespective of age was contrary to sections 84 and 89 of the Code, under which small children should have received only ¼ seer a day. I have asked the distributing officer, the Revd. A. Campbell, to pay for the excess doles he has been giving out. A large portion of the relief under head (3) for the week ending the 27th instant was in my opinion unnecessary, but it was given under directions of the Subdivisional Officer. Gratuitous relief in the Pokhuria Circle has been on a much too extravagant scale, and after visiting the place I have taken means to reduce it within reasonable limits. The figures for the current and succeeding weeks will, I have no doubt, show very considerable decreases.

FORM No. 7.

[See section 26 (iii) of the Code.]

FAMINE STATEMENT E.
DISTRICT MANBIUM.*Abstract statement of Relief Works and Gratuitous Relief for the half-month ending 27th February 1897.*

WEEK.	A, B, C AND D WORKERS PAID BY TASK WORK.				WORKERS PAID BY DAILY WAGES IN RE-PAID OF TASK.		Total amount disbursed on task work and daily labour.	GRATUITOUS RELIEF.		
	Average number of male units per diem.	Work done per diem by each male unit.	Wage earned by each male unit per diem.	Cost per 1,000 cubic feet	Average number of male units per diem.	Wage earned by each male unit per diem.		Number of male units in receipt of gratuitous relief.	Average d. la.	Amount expended.
1	2	3	4	5	6	7	8	9	10	11
		C. ft.	Rs. A. P.	Rs. A. P.		Rs. A. P.	Rs. A. P.			Rs. A. P.
<i>For week ending 20th February 1897.</i>										
Pokhuria east and west tanks	1,103	42½	0 1 0½ (Add 7 pies, value of rice, total daily wage = As 1-7½).	1 9 0	...			678	Nearly one acre.	246 6 6
<i>For week ending 27th February 1897.</i>										
Pokhuria east and west tanks	1,437	29½	0 1 0 Almost exactly (Add 4 pies, value of rice, then total daily wage = As 1-1).	2 3 0				610	Ditto ...	192 8 0
Gourangda road work	154	82	0 1 8½							
Chas road work	119	97	0 2 0½							
Chelama road work	331	75	0 1 6½							
Chonpina road work	204	78	0 1 7½	Average 1 4 10	...					
Niraha road work	113	67	0 1 1½							
Katras road work	55	63	0 1 1							
Khatgaon bund ...	20	74	0 1 6½							

N. B.—It will be noticed that the number of dependants on the workers on the Pokhuria works largely exceeds the 10 per cent. mentioned in section 84 of the Code. The Sub-divisional Officer had taken a number of workers and placed them among dependants, and had allowed too many children to be admitted as dependants. Hence I kept the rate for 1,000 cubic feet at Rs. 1-9. The amount of work done is small, but this is due to the very hard soil chiefly; the decrease in the outturn for the week ending 27th February is due mainly to the increase of lint and lead.

FORM No. 8.

II. LUSON,

No. 1950R., dated Daltonganj, the 2nd March 1897.

I HAVE the honour to submit herewith my fortnightly report under section 13 of the Famine Code, for the fortnight ending 28th February 1897.

DISTRICT PALAMAU.

Preliminary.

2. During the half-month under report, I have visited the jurisdictions of thanas Daltonganj and Patan with outposts Lesliganj, Panki and Manatu, and have carefully inspected the relief works at Shahpur, Lesliganj, Panki and Nawajipur and the working of the committees for administration of gratuitous relief at Lesliganj, Panki, Manatu and Patan.

3. Mr. Sunder, Superintendent of famine relief operations, entered on his famine duties on the 14th instant, and was posted by me to the western circle, comprising the jurisdictions of thanas Garhiwa, Hussenabad and Banka with their respective outposts of Untari, Bhowanathpur and Bhandaria; but at the special request of the Commissioner of the Division I have transferred him to the eastern circle, comprising the jurisdiction of thanas Lateyhar, Balumath and Mahuadand with their respective outposts of Ker, Chandwa and Garoo. I have under the same request placed outposts of Lesliganj and Panki under Mr Sunder. I am afraid, however, that the jurisdiction is far too large, and that Panki and Lesliganj will have to be withdrawn and placed under the officer in charge of the central circle, when such officer arrives. To the western circle Maulvi Mahomed Yasufali, Deputy Magistrate and Deputy Collector, newly posted to this district for famine works, has been posted as Superintendent. He joined here on the 24th ultimo.

4. The whole area of the district is more or less affected, for in 63 markets out of 90 in the district rice is selling at below nine seers, in 17 at nine seers, and in 10 at below ten seers per rupee. The worst affected tracts are the jurisdictions of thanas Gurhwa, Daltonganj, Balamath, Latoyuhar and Putan with outposts Untari, Lesliganj, Panki, Chandwa, Ker and Manatu, the area being 2,563 square miles and the population 383,440 souls; of the population the portion affected may be set down at about 10,000 souls.

5. There are nine relief circles with nine circle officers in charge. The circles are far apart, hence an officer to each circle.

The permission granted to the Deputy Commissioner to stylo the works now being carried on as "relief works" instead of "test works" is accompanied with the provisions that (1) no change is to be made in existing rates without my sanction, and (2) that rule 67 (1) of the Famine Code is for the present suspended. In other words, all the work is to be done on the piece-work system until further orders. For the rates allowed, reference is invited to paragraph 6 of my last report (No. 675T.M. R., dated 23rd-24th ultimo).

A. FORBES. — 4-8-97

(1) Area affected during the period under report, and approximate estimate of the population affected; number of relief crates and officers in charge.

General state of affected tracts during the half-month under report: prospects, food-stocks, importation or exportation of food-grains, ill, public health, emigration or immigration of famished people, condition of cattle.

6. No change to report since last report. The number on relief works is going up daily, whilst the price of rice and of food grains generally has risen. There is still food in the country, and the late rain has replenished the supply of edible jungle products. In the parts visited by me I found the *rabi* crop a poor one, the *mohua* crop very backward owing to the prevailing abnormal cold weather, and no mango prospects anywhere. The *mohua* trees are in heavy leaf, whereas they should be bare of leaf or almost so.

7. Mr. Sunder happily reports in favourable terms of the parts visited by him. He says the *rabi* crop is excellent and a 16-anna yield is looked forward to, and that the *mohua* is dropping its leaves and beginning to blossom. Mr. Fullerton, District Superintendent of Police, writing of the *rabi* crops from Chattarpur thana, says that they are not good, but that the *mohua* promises to be a bumper one.

8. The food-stock, judging from the high prices prevailing and the fact that the stocks exposed for sale at every market were bought up or nearly so is, I should judge, very low.

9. During the half-month under report a Gaya merchant, by name Ghansham Das, sent for sale to Daltonganj about 600 maunds of country rice. One of his agents here offered it for sale at 16 seers kutchu (9 seers pucka) per rupee immediately on arrival, and 80 maunds were disposed of there and then. By next morning, however, another agent appeared and raised the price to 14 seers kutchu (7 seers 14 chitaks pucka). The prevailing market rate for the description of rice offered for sale on this sale ceased. The price has since been lowered to 15 kutchu seers (8 seers 7 chitaks), but without attracting many purchasers.

10. On the 25th ultimo 312 maunds and on the 26th idem 316 maunds—total 628 maunds—of Burma rice have been imported into Daltonganj under the bounty system by the said Ghansham Das. At first it was offered for sale at 15 seers kutchu (8 seers 7 chitaks pucka) per rupee, and the sales were slack in consequence; last evening, however, I received a telegram from Ghansham Das, asking me to inform his agent that the Burma rice was to be sold at 16 seers kutchu (9 seers pucka) per rupee. I am informed that up to date 214 maunds of this Burma rice has been disposed of.

11. Immediately I received official intimation that the Government of India had sanctioned the payment of a "bounty" of 8 annas a maund to anyone importing Burma rice into Palamau, I sent post-card notices to every market, police-station and outpost, intimating the general public of the fact, and intimating that such Burma rice was actually on its way to Daltonganj and would soon be available for purchase here. I attribute the slow sales to the high price demanded, for I am afraid that after all Palamau has gone through during the past long period of high prices and scarcity, very few of her people can afford to pay for rice at 9 seers per rupee. Considering the handsome "bounty" being paid by Government, I consider it would pay importers over and over again to lower the price to 17 seers kutchu (9 seers 9 chitaks pucka) per rupee. At this rate, bounty included, the profit would be 1 seer 10 chitaks per maund.

12. Mr. Sunder reports that he saw 484 pack-bullocks taking paddy to Singrawlee in the Mirzapur district, North-Western Provinces. This was from Untari. He also reports exports to Bhabhua in the Shahabad (Arrah) district.

13. I fancy what Mr. Sunder saw was exportation of paddy from the golahs of the Bhaiya Saheb of Untari. It has been no secret that this zamindar was in possession of a large stock of paddy, and not improbably, finding that the prospects of the *rabi* are good in his large estate, he is parting with his surplus stock of paddy whilst prices are high. Both that part of Mirzapore district bordering on Palamau and Bhabhua in Shahabad (Arrah) are said by common report to be very famine-stricken indeed.

14. I have to report that about 61 bullock-loads of rice, weighing about 122 "pucka" maunds, are said to have found their way into the Churhwa market on last Thursday, the 25th ultimo. I have written to enquire how this came about. It will be grand news indeed for Palamau if Singuja has opened her doors to export again. The reasons I attribute to Untari may also have influenced Singuja. I hope such is the case.

15. During the half-month under report there was no rain. The first week was generally cloudy, but the last week has been bright. The weather is, however, abnormally cold for this season of the year, especially in the eastern parts, where there was frost two nights ago; this cool weather has retarded the *mohua* blossoming.

16. The public health is good; a few cases of small-pox and chicken-pox have been reported. Mr. Sunder reports that he found 84 men, women and children, who had come from Singrawlee in Mirzapur, North-Western Provinces, and Bhabhua in Shahabad (Arrah), on the relief works at Untari; he adds that they were weak from want of sufficient food.

17. There is the usual flow and ebb of labourers from the east part of the district to the tea-gardens in the Western Duars.

18. The condition of the cattle up to date is good: the late rain has both improved and increased the fodder and water-supply. Some cases of cattle-disease were reported in the early part of the half-month from Balumath.

19. The number of relief works open in the affected tracts is nine. All are paid for task work, and the rate of wages for them is only one rate current here, i.e. Rs. 2-3 per 1,000 cubic feet of earthwork. The payments are made partly in rice and partly in cash.

20. Figures as to numbers employed, &c., are given in Appendix D annexed.

The time has come, I consider, when the Public Works Department should be called into requisition and some of the works being carried on here placed under the supervision of that Department—vide paragraph 2, Agricultural circular No. 41, dated 13th February 1897.

Mr. Benny reports later (by telegram) that this rice came from Singuja in Shahabad.

A. FORBES—6-3-96.

From the concluding remarks in a paragraph Mr. Benny apparently means to say that this rice came from the Singuja estate. In a later telegram he informs me that he finds inquiry that it was smuggled from Singuja in glue "cooperas."

A. FORBES.—6-3-96.

(*) Number of relief works open or near the affected tracts, &c.

These works are far and away beyond the capacity of any officer of the Engineering Department Palamau can boast of. The District Engineer is merely of the upper subordinate class of the district public work, and overseers and sub-overseers selected by Government and sent to me as such are, I am afraid, all unpractised or otherwise unfitted for the work on which they have been deputed. I am addressing the Commissioner officially on this subject.

21. Besides the Government, relief works have been opened by several well-to-do zamindars of the district. I have not exact figures before me, but the number so relieved cannot be far short of 2,000. Several zamindars and well-to-do land-owners and others have quite lately received advances under the Land Improvement Loans Act, under the terms offered in Government Notification No. 69 of 5th January 1897. The first instalments advanced amount to Rs. 3,333-5-4. The work for making these advances is progressing now that I have more officers' services placed at my disposal.

22. The zamindars doing work otherwise than under advances are paying at the rate of Re. 1-6 per 1,000 cubic feet; the labourers also receive a meal during the day. These works are more popular than our works, because there is no strict supervision and time is not taken into account: the labourer commences work when he likes, leaves off work when he likes, and works when he likes.

23. Besides the above there are a large number of persons doing works of improvement in Government estates for which funds have been placed at my disposal by the Board of Revenue. Taking all in all, I fancy the number of persons being relieved in the Palamau district is not far short of 8,000 souls.

24. A Charitable Relief Committee for the administration of private relief has been formed here during the half-month under report, and has commenced work.

25. No poor-houses have been opened. As reported in a former report, all poor are being relieved at their homes. Dependants of relief workers are being similarly relieved. This is the procedure followed here. A local committee of respectable persons has been formed at each thana and outpost head-quarters, and to those at thana Rs. 50 and to those at outposts Rs. 30 have been given as permanent advances. Each committee has made a house-to-house enquiry, and at the villages where they have found persons entitled to gratuitous relief they have appointed a panchayat of three or more respectable residents of the village, and to this panch they have advanced out of the permanent advance a sum sufficient for the support of all persons selected for gratuitous relief for 20 days. The panch pay each recipient daily. At the end of a fortnight the local committee make enquiries to ascertain that all is going right, thus by local enquiry by one or more members, and they recoup the expenditure incurred during the past fortnight to the village panch. Circle officers have been directed to refer all dependants on workers in their charge to the local committees for administering gratuitous relief, with a ticket stating who they are, and superintendents and circle officers have been instructed to take advantage of every opportunity of satisfying themselves that all is going right both in regard to local committees and village panchayats. All payments are made in money; a man receives 5 pice, a woman 4 pice, a big child 3 pice, and a small child 2 pice per diem under section 103 (first) of the Famine Code. The one pice extra has been allowed, as the price of rice has fallen permanently below 10 seers per rupee. Food-grain and not cash is distributed at Daltonganj head-quarters. No private poor-houses.

26. Nothing done under this head. No necessity has yet arisen.

27. See paragraph 25 against (4). Nothing further done.

28. None. No necessity.

Number of persons to whom loans were granted during the fortnight	Amount applied for.	Amount sanctioned.	Amount as paid in first instalment
1	2	3	4
6	Rs. 10,000	Rs. 10,000	Rs. 3,333 5 4

29. No loans under the Agriculturists' Loans Act have been granted, as the Commissioner is opposed to this.

30. All loans granted up to date under the Land Improvement Loans Act have been granted on security of landed property. The applications for such loans are tested on the spot by officers of Government who make all necessary inspections and enquiries and then report to me. In my office the security is tested before the loan is sanctioned; about 113

(4) Number of poor houses opened and the scale of food distributed

I am not sure whether this was the intention of the Code, but I think that Mr. Ronny's system is a convenient one as tending to keep non working dependants entirely separate from the workers and away from the works.

A. FORBES—6-3-97.

(5) Organisation for employment of artisans

(6) Organisation for the distribution of grain doles or money doles.

(7) Relief kitchens.

(8) Number of persons to whom loans under the Land Improvement Act have been made

I have allowed loans, under certain conditions to provide against fraud, for the purchase of plough cattle, and I have refused to allow advances for seed until the time for sowing approaches. What I have disallowed are loans to cultivators generally, to enable them to avoid having to go to the relief works.

A. F.—6-3-97

of the amount asked for and recommended is advanced as a first instalment to each applicant. The total amount lent under this head up to date is Rs. 3,338-6-4, as reported above. The work of granting such loans has been much retarded for want of officers to examine and report on the applications. Now that some officers have arrived the work is being pushed forward.

31. Statements called for are annexed.

32. Please refer to former reports, especially my report No. 1521R., dated 5th December 1896.

33. No change anywhere yet, either for better or worse, to require notice here.

R. H. Renny,
Deputy Commissioner, Palamau.

Financial Statement.

A.—Receipt from District Road Fund, Rs. 20,000.*

B.—Expenditure from the beginning of famine work up to 27th February 1897.

	Rs.	A.	P.
(a) (1) On task work—			
1. Wages given in cash ...	3,045	7	5
2. Wages given in grain, viz. 448 maunds 30 seers and 12 chitaks, value of which at 9 seers a rupee ...	1,994	7	0
[N.B.—The price of this grain has not been paid yet.]			
3. Wages given partly in cash and partly in grain at Lateyahar work (separate figures not yet available) ...	595	12	2
4. Miscellaneous expenditure on relief works ...	580	10	10
Total ...	6,404	2	6
(2) On daily wages ...	32	2	6
Total ...	6,436	5	0
(b) (1) On gratuitous relief by grain and money doles ...	915	6	1
(2) Miscellaneous expenditure ...	0	10	0
Total ...	916	0	1
(c) Advance to land-holders for relief works ...	3,333	5	4
(d) Bounty for Burmah rice ...	329	0	0
Total of a, b, c, d ...	11,015	10	5

Besides this, 100 maunds of reserve grain has been purchased by Government for Rs. 460-8-10 only.

R. H. RENNY,

Deputy Commissioner of Palamau.

No. 1689R., dated the 4th March 1897.

Fortnightly Famine Report of the District of Hazaribagh under sections 13 and 24 for the fortnight ending 28th February 1897.

FIGURES RELATE TO WEEKS ENDING 20TH AND 27TH FEBRUARY 1897.

1. *General condition.*—The fortnight has brought to light a further number of isolated cases of distress, but so far there is no general call for assistance in the district. I have been on tour throughout the south of the district, and found people able to get on without assistance at all places I visited, except at Gumeah, which contains a population of 6,000 in an area of about 10 square miles. Owing to the dense population there is not there the same assistance from jungle products, and the place being 19 miles from a main road, other sources of income outside the village areas are not available. There were 300 to 400 persons who seemed to need some assistance. Earthwork has been started.* Cotton-making and a kitchen have also been arranged for. In all other parts the 35 road-less works have failed to attract more than the ordinary number of labourers, and cannot therefore be considered as relief works.

2. *Prospects of crops.*—The late rains have much improved the prospects of *rabi* crops. *Mahua* promises to be a full crop should there be no rain.

3. *Prices.*—Statements showing names of *hats* and the selling price (per rupee) of rice, marua, makai, and mahua for the last two weeks of January and of February are submitted herewith.

4. *Importation by rail.*—Statements 8 and 9 are submitted herewith.

5. *Statistics of traffic on the Grand Trunk Road (Dumra).*—A statement of statistics of import and of export traffic down the Grand Trunk Road for the period from 20th January 1897 to 18th February 1897 is annexed.

6. *Rainfall.*—At Sadar, 1·02. At Giridih, 3·2.

7. *Public health.*—Very good.

8. *Emigration.*—Two thousand two hundred and twenty persons emigrated from this district during the month of February 1897, against 688 persons in February 1896. This

* Some particulars about this work should have been given.

A. FORMS—C-3-97.

The statement is in too great detail, and is not, therefore, submitted. A statement in the form used by the Deputy Commissioner of Palamau will in future be called for.

A. FORMS—C-3-97.

is emigration through depôts and irrespective of free emigration to the Duars, of which no figures are kept.

9. *Number and nature of public works opened in the district.*—A comparative statement showing the particulars required is submitted herewith.

10. *Test-works.*—The works shown in the above statement against Road Cess are to be treated as test-works.

11. *Relief under section 12 additional.*—During the fortnight under report Rs. 110 were sent to the thana and outpost officers for giving gratuitous relief, as directed in section 12 of the Famine Code. The total amount paid for this purpose amounts to Rs. 340. About half has been spent.

12. *Loans.*—Four applications for loan of Rs. 950 were received during the fortnight under report. These are loans under special terms for construction of earth-works. They are being enquired into. The offers of loans free of interest, though widely circulated, have failed so far to attract applicants to any considerable extent.

13. *Contagion of cattle.*—Very little disease reported.

14. *Rates of wages.*—The rate given on ordinary works is Re. 1-9 per 1,000 cubic feet for municipal estates and road cess, or 2a. 6p. per *laggi* (of 10 × 10 ft). Public Works Department rates remain unchanged.

15. *Organisation for employment of artisans, women, &c.*—Lists of *bhadralok* and other persons unable to work at earth-work, referred to in the previous report, are being received. The system of making thread from cotton, introduced into the town of Hazaribagh, has received large extension during the fortnight. It is being introduced at Giridih and at Gumeah, where there are persons of good caste in want. It will be further extended to Muffassal during the present fortnight.

16. *Relief in kitchen.*—Particulars are given in statement 6 annexed.

Statements in forms 7, 10, and 11 are annexed.

J. L. HERALD,

Deputy Commissioner, Hazaribagh.

FORM No. 8.

[See Section 26 (v) of the Code.]

DISTRICT HAZARIBAGH.

Statement of imports of food-grains in maunds by rail during the half-month ending 28th February 1897.

Ditto	Lucknow and Banhia	180	1,996
Ditto	Bokharah, Banhia and Lucknow
Moheshmunda	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
	Total	9,327	180	1,996

FORM No. 9.

[See Section 26 (v) of the Code.]

DISTRICT HAZARIBAGH.

Statement of exports of food-grains in maunds by rail during the half-month ending 28th February 1897.

Station from which exported.	Station to which consigned.	Rice.	Paddy.	Wheat.	Barley.	Indian-corn.	Other food-grains.
1	2	3	4	5	6	7	8
Giridih	Kargunze, Bardwan, Panna, and Howrah.	Mds.	Mds.	Mds. ..	Mds.	Mds. ..	Mds. 267
Moheshmunda	Nil.	Nil.	Nil.	Nil.	Nil.	Nil.
	Total	267

IMPORT.

TRAFFIC ON GRAND TRUNK ROAD.

Statistics taken between 20th January and 18th February 1897 (30 days).

		No.
1. Travellers in search of employment	...	4,059
Daily average (mostly without sufficient funds)	...	135
2. Pilgrims	...	224
Daily average (nearly all in distress)	...	7.5
3. Ordinary travellers (excluding villagers)	...	288
Daily average	...	9.6
4. Merchants, cartmen, bullock drivers	...	604
Daily average (these went back to similar extent, see exports)	...	20
5. Number of pack-bullocks	...	306
Daily average (rather fewer than average daily leaving district)	...	10.2
6. Number of carts	...	382
Daily average (rather fewer than average daily leaving district)	...	12.7
7. Importations of food-supplies during above period:—		
	Mds.	Mds.
(1) Rice	504 =	daily 16.8
(2) Dhan	64 =	" 2.1
(3) Rahar	227 =	" 7.6
(4) Potatoes	38 =	" 1.1
(5) Wheat	149 =	" 5.
(6) Khosary	173 =	" 5.8
(7) Gram	441 =	" 14.7
(8) Makai	100 =	" 3.3
(9) Oats and barley	83 =	" 2.8
(10) Other grains	120 =	" 4.0
(11) Gur	531 =	" 17.7

Daily average = 81.9 of all foods.

EXPORT TRAFFIC.

1. Number of passengers (excluding villagers of neighbourhood)	...	640
Daily average (balances number of merchants entering district)	...	21.3
2. Number of pack-bullocks	...	378
Daily average	...	12.6
3. Number of carts	...	470
Daily average	...	15.7
4. Exports:—		
	Mds.	Mds.
(1) Mahua	2,822 =	daily 94
(2) Timber	3,250 =	" 108
(3) Lac	2,170 =	" 72
(4) Marua	36 =	" 1.2
(5) Sabé grass	230 =	" 7.6

(The export of mahua is much greater than in ordinary years.)

The figures show that the importation of food from Gaya district, 82 maunds daily, is more than counterbalanced by the exportation of 94 maunds daily of old mahua.

There is a fair trade in the export of timber and lac (including shellac) from the district. No food-grains, except a small quantity of marua, were exported.

The exportation of mahua is due to an increased demand outside the district, and large stocks left over on account of decrease in outturn of country spirits. The excessive quantities drawn from this district probably show that people in Bihar are using this cheap food to a larger extent this year.

J. I. HERALD,
Deputy Commissioner, Hazaribagh

No. 740(Fam.), dated Calcutta, the 13th March 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal,
To—The Commissioner of the Bhagalpur Division.

I AM directed to acknowledge the receipt of your communications noted on the margin, relating to distress in the districts of Bhagalpur and Sonthal Parganas, and in reply to convey the following observations and orders of the Lieutenant-Governor.

- (1) Letter No. 314Fct, dated the 4th March 1897 with enclosures.
- (2) Letter No. 313F., dated the 6th March 1897, with enclosures.
- (3) Letter No. 307F, dated the 5th March 1897, with map.
- (4) Memorandum No. 309F, dated the 5th March 1897, with enclosure.

2. *Bhagalpur*.—The Lieutenant-Governor agrees generally with the views expressed by you. His Honour notices that the Subdivisional Officer of Supaul has not been able to submit his report in due time. It is hoped that the instructions which you propose to issue will ensure greater punctuality in future.

As regards the establishment required for the Madhipurā subdivision, I am to invite your attention to Government order No. 629Agri. (Fam.), in which sanction was accorded to the temporary employment of a kanungo on Rs. 50 a month. I am now to convey the Lieutenant-Governor's sanction to the entertainment of the additional establishment noted on the margin, and to the appointment of Mr. H. D. Christian to be Superintendent of Charge for thana Bongong, on a salary of Rs. 200, with a horse allowance of Rs. 100 per mensem.

- (1) One temporary kanungo for pargana Kab-khand on Rs. 50 a month.
- (2) One temporary kanungo for pargana Uttar-khand on Rs. 50 a month.
- (3) One extra clerk for the subdivisional office on Rs. 30 a month.

3. *Sonthal Parganas*.—The Lieutenant-Governor agrees generally with your views as to the utilisation of the existing staff of Deputy and Sub-Deputy Collectors in this district. The report of the Deputy Commissioner, No. 5213R., dated the 3rd March 1897, submitted to Government with your letter No. 313F., dated the 6th idem, leaves no room for doubt that there is distress in parts of the Jamtara subdivision, and the tract will be classed among the affected tracts of the Province. The Charge Superintendent required for this tract should, as you have directed, be provided by employing on this duty one of the Deputy or Sub-Deputy Collectors of the existing district staff, and the employment of such ministerial and subordinate staff as may be found necessary, may be sanctioned by you.

To meet expenditure on famine relief in the Jamtara subdivision during the current financial year, the Deputy Commissioner has applied for a Government grant of Rs. 5,000 to supplement what is available from the District Road Fund. The Lieutenant-Governor sanctions the grant applied for, the money being provided by transferring Rs. 5,000 to head (a), Relief works and gratuitous relief, from the sum of Rs. 10,000 provided for the Sonthal Parganas for 1896-97 under head (b), Advances for village works, in the estimate communicated to you with Government Circular No. 45Fam., dated the 16th February 1897. Care must be taken that all works are carried on strictly on the principles as to task laid down in the Code and the Government circulars.

No. 318Fct., dated Camp Rajmahal, the 4th March 1897.

From—W. B. OLDHAM, Esq., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my half-monthly report No. 309Fct., dated Sirsi in Malda, the 22nd February 1897, I have the honour to forward in original the report under section 24 of the Famine Code for the period from 16th to 28th February for the Bhagalpur district and the second half-monthly report for February 1897 under section 13 for the Sonthal Parganas, both of which reached me after my arrival at Rajmahal to-day. There is no change in the condition or prospects of any of the other three districts of the Division. In them the Collectors and District Boards are still postponing expenditure and keeping back work while watching how matters turn out and waiting to see what the demands may be. Their ordinary expenditure and works of the kind which would afford relief (whether it is wanted or not) need no longer be kept back, as the season has so far advanced, but if the dearness of food has cheapened the supply of labour, efforts ought to be made to carry out work at the lowest rate which the circumstances make possible, without going so low as the standards prescribed for test works and famine relief works. These remarks of course do not apply to tracts declared to be effected.

2. *Bhagalpur*.—Though Mr. McIntosh's report is incomplete, it is very satisfactory. I know of no good reason for the statements for the Supaul subdivision not having been sent, as the Subdivisional Officer has lately been given a competent colleague to relieve him of his sub-treasury and much routine duty, and a great deal of his judicial work. It will be impressed on him that he must attend to the strict orders which regulate the case instead of diverging to irregular methods of his own, however philanthropic, which seem to interfere with his carrying out those orders punctually. Next week I will examine with Mr. McIntosh the tract which he thinks to be threatened in the south of his district. Meanwhile I support his proposals for establishment, and have sent a separate application for sanction to the temporary kanungo whom I have already given him, but who is included in the proposals now submitted. In my last report I prepared Government for the nomination of Mr. H. D. Christian as charge Superintendent. He is member of the well known Moughyr family of his name and is an indigo-planter in the Bongong thana. My predecessor, Mr. Quinn, took advantage of his status and abilities to get him appointed to be Manager of the Lagma Ward's Estate, without interference with his private business, and the arrangement has proved to be very satisfactory. Mr. Christian is also a most serviceable Honorary Magistrate, and altogether it is fortunate that he is at our disposal for the duties for which he is nominated. The statements for Bhagalpur will follow as soon as they are received.

3. *The Sonthal Parganas*.—Mr. Carstairs is still far more oppressed by the anxieties and uncertainties of the position than by any actual needs, and I have only to notice at present what he says in his 20th and 21st paragraphs on the subject of his staff, and wish to make what I write on the subject as distinct as possible. I have satisfied myself that while the Deputy Commissioner has had too much to do, and has been unable to get through his work punctually and to clear his arrears, his numerous subordinates, with the single exception of Mr. E. M'L. Smith, the Subdivisional Officer of Pakour, have not been and are not as fully employed as the other officers of their class elsewhere in the division. A plain instance is the fact, only recently discovered by me, that in January last the Subdivisional Officer of Rajmahal was absent from his subdivision, though with Mr. Carstairs, for 25 consecutive days. No other district could, in ordinary times, afford such a length of absence by one of its Subdivisional Officers, and that under notice occurred just at the time when the Deputy Commissioner was complaining of the drafts from his staff. Mr. Carstairs, who has been now for nearly 11 years in the Sonthal Parganas, does not realize how these subordinate officers have to work elsewhere, and I have insisted that if the Sonthal Parganas subordinates are not to do as much as they used to, they must at least be as fully employed as their colleagues in other districts

are. I have satisfied myself here at Rajmahal to-day that at least the Sub-Deputy Collector can be spared for greater exigencies elsewhere. Now that the premature alarm raised in Godda has subsided, I am fully aware that there is not sufficient work there for the three officers stationed there at present. The Sub-Deputy Collector at Deoghur, who is enjoying an extension of service, is said to have broken down, and I have called for a report on the subject in order that he may retire at once; but apart from this personal accident, the officer is in reserve. The Subdivisional Officer of Deoghur has a very capable and responsible indigneous agency at his call, in the resident Ghatwal talukdars, who are or can be linked to him by the Regular Police, and who should be specially used, as they have been used, and have proved useful, in past emergencies of different kinds. Moreover, the Manager of the Wards' estates in that subdivision is a most trustworthy and competent agent, who served with me throughout both the Bihar and Madras famines, and can command subordinate agents. Finally, there is the Forest Officer at Dumka, whose duties are never heavy, and in a year like the present are reduced to a minimum. In the last Bengal Administration Report, I remember that he was mentioned as virtually filling the place of Superintendent of the Damin-i-koh, and Mr. Carstairs has still to make proposals for employing him in the present exigency in this virtual capacity, and, so far, setting other officers free. What chiefly oppresses the Deputy Commissioner and seems to prevent his organizing and resorting to the resources at his disposal is the weight of his judicial work. Some of this must be dealt with more slowly, and Mr. Carstairs cannot hope in a time like this to keep up to the standard of disposals which he has attained and on which he can justly pride himself, as it is a great contrast to the delays which marked the administration of civil justice in the Sonthal Parganas till ten years ago. With the consent of Government I myself am to go to Dumka and will in my capacity of High Court for the Sonthal Parganas try the Sessions cases which Mr. Carstairs estimated would take up sixteen days of his time. Meanwhile, as stated in my last report, I can still spare one Deputy Collector and two Sub-Deputy Collectors for the Sonthal Parganas when the actual demands for them there are as great as those which now employ them elsewhere. I have informed Mr. Carstairs that he can post his own Sub-Deputy Collectors, of whom he still has seven, wherever, he finds that their services are most needed.

No. 2681G., dated Bhagalpur, the 3rd March 1897.

From—H. J. McINTOSH, Esq., c.s., Collector of Bhagalpur,
To—The Commissioner of the Bhagalpur Division

IN continuation of my letter No. 2507G., dated the 17th ultimo, I have the honour to submit the following report under section 24 of the Bengal Famine Code. The figures of this report relate to the week ending 28th February 1897.

2. Regarding South Bhagalpur, I have nothing to add to what I said in my last fortnightly report. No test work has been opened in South Bhagalpur.

3. In North Bhagalpur, I was on tour from the 17th to the 26th of the month. The present report is based on what I saw there and on the statements in Form No. 19, which have been submitted to me by the District Engineer. The Subdivisional Officer of Madhipura has submitted a report under section 24, but again, I regret to say, no report has been received from the Subdivisional Officer of Supaul, although a special reminder was sent to him to be punctual with his report.

4. In Madhipura, the area affected is the same as in my last report, viz., thana Bongong, pargana Kabkhand, where the rice crop failed is badly affected, whereas pargana Uttarkhand of this thana is only very slightly affected at present.

5. As in my last report, two relief works were open in thana Bongong during the period under review—one in pargana Kabkhand and one in pargana Uttarkhand. There has been a very marked increase in the number of persons seeking employment on the work in pargana Kabkhand. The maximum number of workers on any one day was 7,293 with 306 non-working children on the 25th February, while the actual number on the 27th February (the last working day of the period) was 5,828 with 295 non-working children.

6. The relief work in pargana Kabkhand is a road running east to west through the centre of the affected tract, so situated as to be within reasonable reach of the greater part of the pargana. So far it has afforded sufficient employment for those who sought it. It is true that the falling off in numbers between the 25th and 27th of the month is ascribed to the fact that the work has proceeded eastwards to a considerable distance, and that consequently the inhabitants of a number of villages to the west ceased to attend the work, but I do not attribute much importance to this. I found by personal inquiry while inspecting the work that so long as work was progressing in, or close to, a large village, many

people turned out from that village to earn a few days' wages. They would not, however, take the trouble to walk half-a-mile or so when the work moved on. In their case, they were willing to take work if provided at their very door, but they were not in such urgent need of employment as to exert themselves to obtain it.

7. In order to ensure sufficient employment for all who really require it, I have now directed that the road in question be worked in two sections, and I have instructed the District Engineer to commence operations on three tanks at selected central sites. By this arrangement every village in the pargana will be within reasonable reach of a relief work.

8. I made a very careful inspection of all the people on the work, and saw not the slightest sign of physical deterioration. All looked exceedingly well. The fact is that what is wanted in this locality is work. The people are not reduced, but they have exhausted their slender stock. They want employment, and as they cannot obtain it in the ordinary way, they are willing to take it at Famine Code wages.

9. No gratuitous relief (beyond the payment of allowances for non-working children) has yet been given, nor has any been required. The sources of private charity are not dried up, and the beggar classes are not yet reduced to extremities. The Subdivisional Officer has, however, taken steps to administer gratuitous relief whenever necessary. He has divided the affected tract into five circles and made organized inquiries in every village in that tract. The agency employed is a Sub-Deputy Collector, a temporary kanungo, a khas mahal patwari, two circle officers of the Banaili-Srinagar estates, and three zamindars who are Honorary Magistrates of the Bongong Bench. With this agency the Subdivisional Officer is in a position to give gratuitous relief whenever required. The only fear is that he will do too much and give relief where not really wanted, but this I have warned him against.

10. In pargana Uttarkhand, or the eastern half of thana Bongong, the only work open is still being conducted as a test work. The number of persons attending the test work on the 27th February was 375. In this locality there is some *rabi*, and until that is cut it is not likely that distress will develop.

11. To sum up my remarks about the Madhipura subdivision, I may say that the area affected continues to be the same, that it is only in pargana Kabhand or the western half of thana Bongong that active operations are necessary, and that these operations are confined to the provision of labour for those who can find no employment. No gratuitous relief is yet required, but the Subdivisional Officer is fully prepared to give it when necessary. A sum of money has been placed at the disposal of the Subdivisional Officer for distribution as advances under the modified rules under the Land Improvement Act, but he has not been able to place this money advantageously. In my letter No. 2452G., dated 16th February 1897, I have asked your sanction to utilize part of the grant for distribution as ordinary loans under the Agriculturists' Loans Act.

I have addressed the Board of Revenue about this.

W. B. O.—4-3-97.

12. I now beg to submit definite proposals for establishment in the Madhipura subdivision. Excluding the Sub-Deputy Collector, who is in charge of the Sub-Treasury and the office during the absence of the Subdivisional Officer from head-quarters, the only extra establishment which I have allowed the Subdivisional Officer is one temporary kanungo and a young apprentice, whom I have appointed in anticipation of sanction on Rs. 30 a month. I also, at the close of the month as a temporary measure, when the numbers on the works increased to over 7,000, sent up the Sadar Sub-Deputy Collector to assist the Subdivisional Officer. I now recommend the following establishment:—

- (1) A Charge Superintendent for the whole of the Bongong thana. For this post, I recommend the appointment of Mr. H. D. Christian, Manager of the Lugma Ward's Estate, on Rs. 200 a month with Rs. 100 horse allowance. Mr. Christian, whose head-quarters are at Bongong, is a man of great energy with a most intimate knowledge of the whole thana, and I am sure no better officer could be found for the work.
- (2) Two temporary Kanungos, each to be placed in charge of one circle in pargana Kabkhand. This will give them an area of about 45 square miles each. Pay Rs. 50 each. You have already sent me one, and I have another suitable candidate whom I can appoint at once.
In anticipation of the sanction of Government.
W. B. O.—4-3-97.
- (3) One temporary kanungo for pargana Uttarkhand on Rs. 50 a month. For this appointment I would recommend the apprentice whom I have already sent up. He is active and can ride, and is qualified for the post.
- (4) One extra clerk for the subdivisional office on Rs. 30 to deal with the now greatly increased correspondence and returns which it is beyond the power of the existing staff to deal with efficiently.

In addition to the above, the District Board will provide the necessary staff of overseers and sub-overseers for the actual conduct of the works. The circle officers I propose will perform the duties assigned to them by the Code, and be in charge each of one tank, while the work on the other roads and tanks will be conducted by the District Engineer and his staff.

13. In Supaul there is no marked development. The area affected remains the same. Two works continue to be open here. On the work to the south of Supaul, the numbers

have gone down to 276 on the 27th February. The decrease is due to the fact that two private relief works were opened by zamindars in the neighbourhood and of course proved more attractive than a work conducted strictly according to the Famine Code. On the work to the north west of Supaul, the numbers have increased steadily although not rapidly. On the 27th February there were 1,317 labourers and 34 non-working children. Arrangements have been made to open more works when necessary. Meanwhile in this locality the lands are being ploughed and dug in all directions, and the rabi crop will shortly be cut. Until these operations are over, there should be no increase on the works, nor should any be invited.

14. Up till the present time there has been no organized system of gratuitous relief at Supaul, nor has any been required. The Subdivisional Officer has, however, with the aid of private subscriptions, improvised an irregular system of gratuitous relief. There is no objection to private individuals giving charity to any extent they choose, but in the existing circumstances it would have been wiser if the Subdivisional Officer had held aloof from active co-operation in the scheme. My instructions to him are to be prepared to start gratuitous relief according to the Code when necessary, and to base his operations upon a carefully prepared Register 13. But so far there has been no urgent necessity for gratuitous relief.

15. As in the Madhipura subdivision, the Subdivisional Officer of Supaul has not been able to suitably place advances under the modified rules under the Lands Improvement Act. I have asked that these advances may be given under the Agriculturists Loans Act.

16. The Subdivisional Officer has a Sub-Deputy Collector and a Kanungo. No proposals for further establishment are made at present. The District Board Officers are in charge of the conduct of the two works now open.

17. The prescribed statements which should accompany this report will be submitted as soon as the report of the Subdivisional Officer of Supaul is received. Meanwhile I beg to forward a map showing the areas at present considered to be affected.

No. 5146R., dated Dumka, the 1st March 1897.

From—R. CARSTAIRS, Esq., Deputy Commissioner, Sonthal Parganas,
To—The Commissioner of the Bhagalpur Division and Sonthal Parganas.

I HAVE the honour to submit my fortnightly report on the state of my district.

2. The last report submitted by me was from Godda (my No. 4549R. of the 5th February last), and I also sent an emergent report for Jamtara (my No. 118Ret. of 16th February last). At that time I added that fears were entertained for Deoghar and parts of Dumka.

3. I have since received a report under section 10 for Deoghar. I shall note what I have to say regarding each subdivision separately.

4. For Godda I have received revised forecast of the crop outturn based on the improved prospects of the rabi crop. Mr. Piffard now estimates the produce of the season's crops, exclusive of old stock and mahua at 18,00,000 maunds, or about enough to feed the population for nearly 11 months. This, as contrasted with the outturn estimated in my No. 4549R. of 5th February last (12,84,000 maunds), is a very great improvement, and I agree with Mr. Piffard that most of the subdivision, with the help of private employment, will be able to do without formal famine relief. The weak spot is still Porasia and Belbathan. A test was opened at Ghangrabandh in this area, but no one came to work, and I think the great pressure for relief, if it comes at all, will not come till after the mahua crop has been consumed.

5. I have received no formal report from Jamtara or Deoghar. I hear from Jamtara that test works were opened and frequented. There has been no great rush to these, and one test work at Jamtara, where nearly 200 people had gone for work, was closed because they would not work on the terms. This work was opened on the 5th and people began coming from the 6th. The numbers increased up to 81 on the 14th and there were 200 later on. It has now been closed.

6. Another test work in Jamtara, at Majladih, near Karmatar, opened on the 5th, drew 21 the first day, 41 on the 10th, and had fallen to 36 on the 14th.

7. One reason why our test works ceased to attract was no doubt the private employment which has been given somewhat freely. I expect to see the Subdivisional Officer to-morrow, and shall try to get more exact information in future than I have so far obtained. It seems that the pressure in Jamtara, though nearer than in Godda, has not yet become great. I shall, however, have clearer information soon.

8. *Deoghar*.—The Subdivisional Officer of Deoghar has sent in a famine report under section 10 of the Code. He has not yet opened test works, and I await their result before saying anything further. The report is what my own estimate of stocks led me to expect, and I feel anxious about this subdivision. I hope to see Mr. Heard on the 5th and discuss matters personally with him.

9. The prices of food-grains are almost stationary, but, if anything, easier. The fact that no great distress is showing itself, though prices are so high, seems to show that the raiyats are very largely holding up their stocks. I have not paid very great attention to the movement of stocks, as I do not see much benefit that we locally can derive from the study of this subject. We have railways on both sides of the district and roads easy to traverse up to the rainy season, and so far have had no reason to doubt the ability of trade to supply effective demand. No signs of general distress have yet appeared, though there are scattered

cases, especially the wives and families of men who have gone off to the tea-gardens or elsewhere to look for work.

10. There has been no rain, and public health has been on the whole good.

11. The areas I have so far reported as affected are—

		Area.	Population.
		Sq. miles.	
Godda	...	381	102,800
Jamtara	.	350	93,000
Total		681	195,800

12. Deoghar must shortly be reported, but not yet I am looking forward to the early opening of the Deoghar-Bowri Railway as an excellent relief to the north of Deoghar, north-west of Dumka, and south-west of Godda, in all of which there has been failure of crop.

13. The amount of loans sanctioned so far is—

		Rs
Jamtara	...	2,850
Deoghar	...	2,850

I hear from Godda that there are many applications which are being sifted. Many applications in addition are expected.

14. The amount available for agricultural and estate improvements in the Government estate for the remainder of 1896-97 was about Rs. 10,000, and works are being done out of this in all the parts where failure has been greatest.

15. The amount of balance in the district road account is now Rs. 5,372.

We have been spending money out of this fund in opening test works, and laying in stocks of tools, baskets, &c. The cost of these will probably take up most of our available balance.

16. The principal relief works likely to be opened are an irrigation work at Hahajore in Godda, another at Pabia in Jamtara, and road works in Kundahit, where the Raja of Hetampore has expressed a wish to do something.

17. Charitable relief meetings have been held and the district meeting will be held on the 8th March. The subscriptions promised up to date amount to something like Rs. 15,000.

18. Many small private works are being opened.

19. As regards funds, you have asked me by wire if I have any modifications to propose of the Government allotment made in its circular No. 45(Fam.) of the 16th February last, sent with your No. 241F. of the 18th February. I believe my own estimates were not excessive, but I cannot at present make out any very strong objection to the allotment as it stands.

20. As regards staff, I have read your No. 270F. of the 25th February, forwarding my last report to Government. You say that I have, as reserves, in the district the Second Deputy Collector at Rajmahal, the Second Deputy Collector at Godda, and the Sub-Deputy Collector at Deoghur, who are not yet fully employed.

21. I am unable to argue the question now, and it would be wrong of me to do so, but I would point out that the strength of staff in these three subdivisions is only what was fixed by Government as necessary in ordinary times, and in Godda and Rajmahal we shall for sometime to come have a great deal of extra work in inspecting and looking after our raiyats, and getting in our rents, even if we escape the threatened distress. Deoghar is already threatened with famine, and cannot be weakened. In my opinion the Subdivisional Officer of Jamtara needs help, and probably the best way would be to post Maulvi Ekram Hossain, now on special duty in Pakaur, to Dumka, and send Mr. Robertson, Sub-Deputy Collector, temporarily to Jamtara.

22. I have written this in haste, as I have pressure of work, and leave for Jamtara to-morrow. The information on most heads is vague, but I hope soon to have more accurate information to send. The general feeling I have is that the pressure will not come heavy till April, and by that time the edge of it will have been taken off by the mahua crop. I am collecting statistics about mahua, which I hope to give when ready.

No. 313F., dated Bhagalpur, the 6th March 1897.

From—W. B. OLIPHAM, Esq., C.I.E., Commissioner of the Bhagalpur Division and Sonthal Parganas,

To—The Secretary to the Government of Bengal, Revenue Department.

IN continuation of my No. 318F.Ct., dated Rajmahal, 4th March 1897, I have the honour to submit an intermediate report for the Jamtara subdivision, submitted by the Deputy Commissioner, Sonthal Parganas, with his No. 5213R., dated 4th March 1897, and to ask for the grant of the Rs. 5,000 referred to in its 15th paragraph. I also send a copy of my order No. 312F., dated 6th March 1897, on the report.

No. 312F., dated Bhagalpur, the 6th March 1897.

Order by—W. B. OLIPHAM, Esq., C.I.E., Commissioner of the Bhagalpur Division and Sonthal Parganas.

WITH reference to the Deputy Commissioner of the Sonthal Parganas' No. 5213R., dated 3rd March 1897, submitting an intermediate report for the Jamtara subdivision in connection with the famine.

Order.

Your No. 5213R., dated 3rd March 1897.

The report is being forwarded in original to Government with an application for the grant of the Rs. 5,000 asked for in its 15th paragraph. As Charge Superintendent you should for the present employ either one of your other six Sub-Deputy Collectors (besides the Sub-Deputy Collector now at Jamtara) or the second Deputy Collector at Godda, who is not fully employed. The case should for the future be dealt with in half-monthly reports under section 24 of the Famine Code. Your attention is again drawn to Chapter VII about relief wages and to the necessity for appending complete statements. The establishments entertained under the general sanction conveyed by Government order No. 366Agri., dated 9th February 1897, are to be reported separately as routine cases.

No. 5213R., dated Dumka, the 3rd March 1897.

From—R. CARSTAIRS, Esq., C.S., Deputy Commissioner of the Sonthal Parganas,

To—The Commissioner of the Bhagalpur Division and Sonthal Parganas.

I HAVE the honour to submit the result of a conference held by me with Mr. Stark, Sub-divisional Officer of Jamtara, at Angutia yesterday.

The object of this conference was to ascertain the exact state of things in the Jamtara subdivision—

- (1) As to prospects of distress.
- (2) As to preparation to meet it.

I take these points in order.

2. *Prospects of distress.*—Mr. Stark handed me his No. 669R., of the 1st instant, which did not reach me in time to incorporate with my fortnightly report. Appended to it was a Statement D in Form 5 for the three weeks ending 26th February 1897.

It shows the attendance, work done and payments made at the three test works, Pindari, Jamtara and Morro.

The statement, which was prepared by the kanungo, a new man, does not show any classes of workers, or distinguish between grown-up persons and children. It shows simply men and women—total for the week.

3. The particulars, work by work, are as follows:—

		Pindari.	Jamtara.	Morro.
How long open	3 weeks	3 weeks	2 weeks.
How many attended	664	1,707	1,174
Total work done in cubic feet	30,253	78,850	41,775
		Rs. A. P.	Rs. A. P.	Rs. A. P.
Total paid (uniform rate Re. 1-4 per 1,000 cubic feet)	36 10 0	98 5 0	54 11 0
Average task done	53 c.ft.	46 c.ft.	35 c.ft.
Average earnings	1 anna	11 pies	9 pies

The works were—

Pindari.—Road embankment, average height 2½ feet and width 20 feet at top.

Jamtara.—Road embankment, 2 feet high and 20 feet wide at the top; soil harder.

Morro.—Widening an embankment to carry a road, average height 12 feet and width 22 feet at top. Soil softer, but lead longer and lift higher than at Jamtara.

4. The method of payment is to pay for a completed *chouka* of 100 cubic feet at the rate of Re. 1-4 per 1,000 cubic feet, or 2 annas per 100 cubic feet. The payment is generally made in the evening, but if a *chouka* is completed the next morning, payment is made then. The attendance of workers was generally given from 9 to 5. The persons in charge were:—

- (1) *Pindari*.—Ghatwal's muharir, supervised by the kanungo, with the help of Mr. Hills, an ex-platelayer of the East Indian Railway now living near there.
- (2) *Jamtara*.—Kunja Das, circle sadar, supervised by the Subdivisional Officer and the sub-overseer.
- (3) *Morro*.—Bhagwan Das, a temporary muharir, employed by the Narainpur Ward's Estate munshi; Paru Majhi, headman of Murgadi, making the payments.

The returns are not full, but it appears that a full task for very moderate payment made is exacted, and has not discouraged the workers from coming.

The task for which Re. 1-4 is paid includes cutting and carrying, but not trimming and levelling the earth.

The average earnings are not sufficient to feed the workers fully at present prices.

5. Besides these test works, other works have been opened at Dhasonia, about 8 miles south of Angutia, on which 100 persons are said to be working, and at Pabia, where 500 persons are said to be attending.

An attempt was made to introduce the gang system at Jamtara, but resulted in all the workers, about 200 in number, leaving. They are said to have got private employment.

With this exception, there has been an increasing attendance at every test work opened.

Pabia is the place in greatest distress. The Subdivisional Officer held back his test work there, because a loan had been taken by one Sibu Dube of Rs. 400 to dig a tank. The money, however, has not been used by him for that purpose. A loan taken by Paru Majhi of Domohani, near Dhasonia, of Rs. 400 to dig a tank, has been duly expended for that purpose, and enabled the test work at Dhasonia to be held back till now.

A good deal of private employment has been given.

6. My conclusion is that distress has begun to press on the people, and that we must declare famine in the Jamtara subdivision throughout the area already reported as in need (see paragraph 5 of my No. 118R.Ot. of the 16th ultimo).

This is only in accordance with what I expected, and the distress will be all the greater, because two staple employments, namely, coal-mining and stone-breaking, have this year been practically closed, there being no demand for either coal or stone.

Unless relief is given now, people will eat their seed-grain, and will starve.

7. *Preparations to meet distress*.—Government, in its No. 36GAgri.—(Fam.) of the 9th ultimo, sanctioned my proposals for organization, and these I will state here for easy reference. The leading points are—

- (1) Division of the subdivision into charges.
- (2) Division of charges into circles.
- (3) Appointment of a Charge Superintendent for each charge, and of a circle committee for each circle.
- (4) The appointment for the Superintendent of a clerk on Rs. 25.
One or more sub-overseers on Rs. 50.
An orderly Rs. 6.
- (5) The payment in each circle where relief goes on of Rs. 10 a month to cover all expenses.
- (6) The appointment of a subdivisional famine clerk and one for the district office on Rs. 25 and Rs. 30, respectively. This is the provision for machinery.

8. Being aware of the urgent necessity for preparation, I anticipated the sanction of Government, and directed officers to depute their kanungos, as proposed in section 8 of my report, to organize the charges and circles. Unfortunately this arrangement in Jamtara was thrown out by the transfer of the kanungo to Darbhanga. He was not replaced till after an interval, and his successor is a lad without experience. The work of organization is thus not yet completed for Jamtara, and Mr. Stark has had to content himself with making arrangements where and when there was immediate need.

9. I have instructed him, with a view to lessening the work, so far to modify the instructions as to take advantage of the division of his subdivision into 24 police circles, of an average area of about 30 square miles, and to make his circles coincide with these. The circle committee will comprise the Ghatwal or his representative where there is one, or the sardar, respectable residents and representative headmen. Mr. Stark thought of dividing each circle into two, but that involves a good deal of boundary work.

10. The affected area is to be reckoned as one charge. The work is to be mapped out circle by circle showing for each circle—

- (1) Population.
- (2) Number likely to need relief.
- (3) Time for which it will be needed.
- (4) Relief works according to programme, and number they will maintain. (In case they are insufficient, further works must be selected).
- (5) Relief expected from private employment out of private funds or public loans.

11. It is evident that, owing to the increasing applications for relief and to the delay in preparation caused by the kanungo's transfer, a Charge Superintendent is urgently needed at Jamtara. In my No. 5146R. of the 1st instant, I have already submitted a proposal for the appointment of Mr. Robertson, who may be replaced at head-quarters by Maulvi Ekram Hossain on his special work being closed. Should this not be approved, some other arrangement should be made. If it is approved, I will send Mr. Robertson without waiting for Maulvi Ekram Hossain to join.

12. The supplementary establishment should be appointed at once. The clerks should be in addition to the present staff. The sub-overseer may for the present be the Road Fund sub-overseer now posted at Jamtara.

13. Mr. Stark will have the work done in the manner prescribed in Mr. Glass's pamphlet. A later circular has been received, and is being considered.

14. As regards funds, I find that, as will be seen from the accompanying statement, the balance available from the Road Fund is only Rs. 4,847, if we reduce the balance considerably. I was reckoning on the grant of Rs. 6,000 for this year's needs which I estimated we should require.

In Government's No. 447Agri.—(Fam.) of the 16th ultimo, received with your No. 241F. of the 18th idem, and received by me on the 25th idem, my estimate has been revised by the omission of that sum.

In a telegram received on the 25th from the Commissioner, I was asked if I considered any changes necessary in the Government estimate, and replied (No. 5089R. of 27th ultimo) that I saw no reason to alter my original estimate, but should deal with the matter in my fortnightly report.

On the 1st I wrote that, without having received the Jamtara report. The money was originally wanted for Godda, and it was by no means certain that we should need anything beyond what we had till the end of March. I was therefore unwilling to ask for a revision of the orders of Government.

15. I am, however, satisfied that a grant of Rs. 5,000 in addition to the amount to our credit in the Road Fund will probably be wanted for Jamtara within March, not to speak of the possible needs of Deoghar and Godda, in both of which famine threatens. The case of Jamtara is more urgent than that of Godda and Deoghar, as its test works have been attended for some three weeks in some cases and fill wherever opened, while neither Godda nor Deoghar has as yet had a test work.

16. I do not take credit for the Estate Improvement and Agricultural Improvement Funds, the whole of which are needed for the Government Estates. As for the working balance of the Road Fund, amounting to Rs. 6,225, I shall have to draw on this latter, if necessary.

17. I request now that famine may be declared for this district in respect of the affected area of the Jamtara subdivision, and that sanction may at once be given to the appointment of a Charge Superintendent and the necessary ministerial and subordinate staff.

18. I have discussed with Mr. Stark many practical points of detail, which need not find a place here. He has been working very hard to keep things going, but is feeling the strain and needs help. I have told him for the present to stop all civil case work and avoidable work of all kinds, merely taking in plaints and petitions to save limitation. He can resume the work when he gets his Charge Superintendent. The Superintendent is needed both for laying out and supervising relief works, for looking after gratuitous relief, and for inspecting works being done out of public loans, of which we expect a good many will be undertaken.

Statement of Balances of District Road Account.

			Rs.	Rs.
Amount made available by stopping works	5,372	
Balance on 1st April 1897, as estimated in the Budget Estimate for 1896-97	6,225	
		Total	11,597
Working balance on 1st April 1897 necessary to meet, for two months, establishment pay, &c., in round numbers	3,000	
Amount already advanced for relief works	3,750	
		Total	6,750
Amount available at present	4,847

A. H. CUMING,
for Deputy Commissioner.

No. 466R., dated Cuttack, the 10th March 1897.

From—H. G. COOKE, Esq., Commissioner of the Orissa Division,

To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to submit the monthly report on the condition of this Division with respect to scarcity.

2. *Angul*.—All information received continues to be of a reassuring character. The rain that fell in the middle of the month gave increased occupation to day labourers and benefited standing crops: prices stationary.

3. *Balasore*.—Reports no change except for the better. Standing crops having benefited by the rain which has fallen, prices remain stationary—12 seers for the rupee at Balasore and 13 seers at Bhadrak.

4. The Settlement Department has submitted the reports of eight Assistant Settlement Officers engaged in as many camps in the interior of the Balasore district and a statement showing the price of coarse rice in their respective parganas, which I give below:—

NAME OF OFFICER.	Pargana.	Outturn of paddy in annas.	Price of common rice.	REMARKS.
1	2	3	4	5
Babu Kunia Behary Goswami	Soso	4-8	14 per rupee (80 tolas).	
Brigopal Bhattacharjee	Bisalkhand	8	12½	(90 ..)
Jagowari Biswas	Bisalkhand	8	13	(80 ..)
Dolendra Nath Posa	Arakura	8	12½	(80 ..)
Alhoy Prasad Das	Dumungar	6-0	10-11	(105 ..)
Bari Krishna Mahanty	Funout		13-14	(80 ..)
Jagabandun Ghose	Bayana	12	14	(80 ..)
Issan Chandra Das	Bandhas	8	15	(80 ..)
Ramesh Chandra Das	Randus-Argara	6-9	10 13	(90 ..)

5 With one exception, all the Assistant Settlement Officers' reports are most encouraging, and show an entire absence of distress. The Assistant Settlement Officer of the Bayang Circle complains that fodder is to be had with much difficulty. "Many men have already left home for employment elsewhere. Apparently there is no general cry about famine. No beggars or famished people have I come across yet; but that the future is gloomy is almost certain." The last remark seems speculative—at least it is not supported by facts, the reverse being rather the case. As for many men leaving home for employment, as much may be said of Orissa generally in the most favourable years. It is a matter of notoriety that thousands of Uriyas go to Calcutta every year for employment.

6. *Cuttack*.—The Cuttack report, copy of which I enclose, which was received late yesterday, explains the delay that has attended the submission of the divisional report. The report is, I think, reassuring. The officer referred to as the Assistant Settlement Officer of Dalijora is in fact the Assistant Settlement Officer of Jaipur, whose letter was written from Dalijora. His report is noticed below.

7. *Kendrapara*.—The area between the Kendrapara and Taldanda Canals includes some or all of the Balubisi Settlement Circle, and the Assistant Settlement Officer does not report unfavourably of what he sees there.

8. *Jajpur*.—The Kalamatia, Alas and Ahyas Circles are all in this subdivision, and the Assistant Settlement Officers of these circles reported unfavourably, and the first two tracts are marked brown in the Collector's map. The Assistant Settlement Officer of Ahyas refers to the extensive dalua cultivation due to irrigation.

9. The Kujang-Kanika Ward's Estates and the Banki Government Estate are not under settlement, but are happily exceptionally well provided with means of famine relief.

10. The steps taken by the Collector appear adequate to meet the case at present.

11. I support Mr. Growse's request that his staff should be strengthened in the manner proposed by an additional Sub-Deputy Collector being allotted to each of the three subdivisions. The difficulty about the removal of Maulvi

Tajmal Ali and his replacement by a Sub-Deputy ignorant of Uriya and English has already been removed by Government.

12. Twelve Assistant Settlement Officers' reports are before me. Of these officers, three on the last occasion reported unfavourably viz., those of Kalamatia, Jaipur and Ahyas. The first two report no change, but the Jaipur officer has since, on the 2nd March, reported that immediate relief measures are called for in his circle, and the Collector is taking action to ascertain what is necessary. The Kalamatia officer reported on the 17th January that on the 17th February "the condition of the people who would give rise to anxious solicitude." The condition remained unchanged on 2nd February.

The Ahyas officer, who mentioned in his last report that people had given up work on the railway, dissatisfied with their earnings, now reports extensive dalua cultivation by means of canal water. In one village almost half the cultivated land is thus planted with dalua rice.

In another part of the circle, apparently near Balarampur, he describes "the condition of the people as bad. Most of the families being poor are supporting themselves by selling their little ornaments and brass and bell-metal utensils, and some have gone to Calcutta" for employment. Prices are stationary.

13. Of the remaining nine, eight report no change since their last reports, which were not unfavourable. One, the Circle Officer of Olas, says rice sells at 13 seers to the rupee, Cuttack measure, or nearly 15 standard seers, which does not seem high rates as compared with other places. He also mentions a lack of drinking water. These reports will be sent on to the District Officer who is probably fully informed. His report has been delayed owing to Mr. Growse having been ill.

14. I give the table of prices-current in each Settlement Circle of Cuttack:—

NAME OF OFFICER.	Pargana.	Outturn of paddy in annas.	Price of common rice.	REMARKS.
1	2	3	4	5
Babu S. C. Bose ...	Titkan	8	12 seers per rupee (105 tolas).	
" H. C. Roy ...	Balubia	12½ " " (80 ").	
" P. N. Mukerjee ...	Borin	3-4	11 " " (105 ").	
" J. N. Mitter ...	Assureswar	No change reported.		
" K. C. Sutar ...	Jhankad	8-12	10 seers per rupee.	
" S. C. Dutt ...	Ahyas	2 (portion as in previous report).	12 " " (80 tolas).	
" J. M. Das ...	Jaipur	10	13 " " (105 ").	
" M. M. Choudhury ...	Jorin	7-8	12 " " (105 ").	
Babu Murali Mishra ...	Kalamatia	12	12 " " (105 ").	
" G. V. Das Gupta ...	Olas	...	13 " " (105 ").	
" D. P. Rai ...	Sargara	12	11 " " (105 ").	
" Harashwya Lal ...	Dolegram	6-8	9 " " (105 ").	

15. *Puri*.—Considering that this is the worst district in the Division, the information received appears meagre.

The first four reports, dated 30th January 1897, 3rd February 1897, 6th February 1897, and 13th February 1897, simply state that rain has not fallen: if it did fall, it would do good, and that there is a great scarcity of grain in the Chilka tracts, and efforts are being made to bring grain there and that prices remain stationary. The report of 3rd February was submitted direct to Government and is fuller than the others.

16. The report of the 20th February mentions heavy rain in Puri, 4·25, light rain, ·062, in Khurda, the rain being badly distributed, and more of it is said to be required.

The report of the 18th, which was sent to Government, shows a falling off of labourers on the railway works, and an increase from 1,050 to 8,885 on District Board and famine works.

The report of the 27th gives further information as to the rainfall which is said to have benefited standing crops and given employment to labourers.

The maximum rainfall was at Satpara on the Chilka Lake, where it reached 5·12, Banpur 3·70, and Pipli ·30.

17. I have received a separate report, dated 2nd March, stating that a road was commenced in the Parikud-Malood area on 22nd January as a relief

work, and that 500,000 cubic feet of earthwork had been done up to 2nd March. There is nothing to show whether the work provided was sufficient to supply with occupation all who required relief, or even how many labourers were engaged on the work: all but two miles of the road was, on the date of the report, completed; but nothing is said as to what other works are contemplated when this one is finished. I learnt verbally, on my visit to the Chilka Lake last month, that the restoration of protective embankments to keep out salt water would supply work of a very useful kind in this neighbourhood, and it may be assumed that these will be taken in hand when the road is finished.

I also learnt that Mr. Beale was preparing plans for a protective embankment in Chhabiskud, but I have heard nothing further as to this, which I referred to in my No. 329R., dated 19th February 1897.

It was under contemplation to make a similar embankment at Satpara, as a relief work, out of funds provided chiefly by the Khurda Estate Improvement allotment.

18. As to the other affected areas, I have no information, and I presume that no scarcity at present exists anywhere except around the Chilka. I have not yet received the particulars required for the report under section 9, Chapter II of the Famine Code.

19. The Settlement Officers' reports are brought up only to the 1st February, except that of Mr. H. McPherson, which is dated 13th February. I give the statement of prices-current as received with these reports:—

NAME OF OFFICER.	Pargana.	Outturn of paddy in annas.	Price of common rice.	REMARKS
1	2	3	4	5
Babu Akhoy Kumar Sen	Lemba	8	10—10 per rupee (105 tolas)	
.. Prasanna Kumar Banerjee	Kotdesh	8	10 (105 ..)	
.. Ram Kanta Pal	Purbodai	8	10—15 (107 ..)	
.. Jagendra Mohan Senghe	Damarkland	4	8 (105 ..)	
.. Syamsu Charan Sen	Atais	8	8 (105 ..)	
.. Jagdish Chandra Lahuri	Kodhar	8	10 (105 ..)	
.. Amrita Lall Gupta	Chhabiskud	2—16	12 (105 ..)	
.. Ajay Chandra Das	Rahang	10	8 (105 ..)	
.. Balmukund Kanungo	Kotdesh	8	10 (105 ..)	
.. Sudersan Das	Ditto	8	10 (105 ..)	

20. Mr. McPherson's report I give *in extenso*, as it contains reliable information with reference to a large area. The Assistant Settlement Officer of Delang reports prices rising; *tabi* crops withering for want of rain this was before the rain of mid-February fell); the people find employment on railway works; "the condition of the people is by degrees becoming worse, but at present their condition is not so bad as to cause anxiety."

The Assistant Settlement Officer of the Antrodh Circle reports inadequate grain-supply, but that labour is forthcoming on railway works and otherwise, though he thinks that relief works will be necessary.

The Assistant Settlement Officer, Purba Dohai, reports no relief necessary. The Assistant Settlement Officer, Atais, reports that there is scarcity prevailing in his neighbourhood, and that the inhabitants of the western part of Atais and Matgutpatra are in the greatest distress. He thinks that *relief works will urgently be needed* in the course of another month.

The Kotdesh Assistant Settlement Officer reports no change beyond an improvement in the condition of standing crops.

The Assistant Settlement Officer, Kodhar, reports standing crops not doing well; prices rising: inadequate supply of grain in the market; the people seeking work on the railway, and living by selling their household utensils. He recommends the erection of protective embankments.

The Assistant Settlement Officer, Chhabiskud, reports reassuringly as to that area, though a portion of it is so bad that relief works on a large scale are proposed by the Collector. In the Rahang Circle prices are reported as high as 6 seers to the rupee, and no adequate supply at that price. He recommends the opening of test works in the worst villages, *e.g.*, Dhankera and Andarsing.

The second Assistant Settlement Officer of Kotdesh Circle reports no change.

The third Assistant Settlement Officer, Kotdesh, thinks "no relief operations will be necessary, if the mahajans and zamindars are a little generous towards the poor."

The Settlement Office reports from Khurda are separately submitted. I append price-current lists, from which it appears that the highest price attained is about 13 standard seers per rupee:—

NAME OF OFFICER.	Pargana.	Outturn of paddy in annas.	Price of common rice	REMARKS.
1	2	3	4	5
Babu Nadia Chand Dutt	Bomswar ..	8-10	14 seers per rupee (105 tola-).	
" Jagannath Dutt	Cuttack	8-10	11-12 " " (105 ")	
" Kahuochan Sen	Banpur	8-10	8½-10 " " (105 ")	

Of the three reports, two are favourable, and one, which refers to Banpur, a mountainous tract, is not favourable. "Several thousands of people will require employment here soon. A test relief work should be started without delay for the sake of the stricken villages." He recommends the re-excavation of old tanks and roads from Sonakhala to Aitapur and to the Mals.

The above report will be sent to the Collector. Sometimes the Assistant Settlement Officers take an unnecessarily desponding view of the situation. I have before me a case in which raiyats were declared to be in want of immediate relief in the Cuttack district. An inquiry was held by Mr. Desgratoulet, District Engineer, who reported that no foundation existed for the statement. The most alarming of the above reports are those from parganas Atais, Rahang, Banpur and Kodhar.

Rahang has been dealt with by the Collector together with Chhabiskud. The state of Banpur was mentioned when I visited the Chilka last month. Much of the population consists of forest tribes that can manage very well without rice. Prices are not by any means high, being 8½ to 10 Cuttack seers per rupee, equal to 11·15 to 13 standard seers.

Pargana Kodhar is included in the area marked brown in the Collector's map, together with Astrang and Marichpur, and pargana Atais identical with pargana Athaisie, which is similarly situated to the group of parganas just referred to. Though the Collector's map does not show that any scarcity whatever was apprehended there when the map was prepared, the same remark applies to Banpur, which is uncoloured in the map. The Settlement Office reports will be sent to the Collector of Puri, whose attention has, I know, been attracted to Banpur, and he should now direct it to parganas Khodar, Athaisie, and killa Mari-chpur, if he is not already camping in that direction, which I think highly probable.

I should have liked to be in a position to report what progress has been made in opening grain stores at Satpara, Malood and in Chhabiskud; but nothing has been reported on this point. I have already, as previously reported, given detailed instruction on most points here noticed, as well as others, to the Collector of Puri. A copy of this section of the present report will be sent to the Collector, and it is to be hoped that his next report will be more full.

21. Since writing the above, I have received a report, dated 6th March, from the Collector of Puri, stating that standing crops have been saved by timely rain, which has given field labour to labourers. Also that the general aspect of the tract adjoining the Chilka Lake has slightly improved.

No. 697G., dated Cuttack, the 8th March 1897.

From—E. F. Growse, Esq., Collector of Cuttack,
To—The Commissioner of the Orissa Division.

In continuation of my No. 224G., dated the 24th January, I have the honour to submit the following report on the condition, during the month of February, of those parts of the Cuttack district for which anxiety is felt.

2. *The Sadar subdivision.*—Speaking generally, the condition of the affected tracts remains unaltered, but has improved in so far that there was rain, which enabled the raiyats to make first ploughings of the land for the "biali" and later rice-crops. It also did much good to the "dalua" and "grey mung" and "china" and "bringals" and other

vegetable, crops, which, though cultivated in comparatively small quantities, all tend to increase the food-supply of the people. Prices have remained practically stationary during the month, but there seems to be a tendency towards larger supplies of grain coming into the market since the rain. Public health is generally good. The rainfall at Cuttack was '64 only; but this was the smallest fall registered at any of the reporting stations. There is no emigration or immigration of famished people, but considerable movement of labour towards the railway from the eastern portions of the Sadar subdivision. The condition of cattle is normal. As I am writing this, I have received a report from the Assistant Settlement Officer of the Dalijora Circle, in which he gives rather an alarming account of the condition of the Kukunda-Jaipur pargana to the north of the Pattamundai Canal and bordering on the Jajpur subdivision. This has been long known to be a tract in which distress must occur owing to practical loss of crops for four years and total loss last year. I am preparing to start a test work in the shape of a tank at once, and also to appoint a circle officer and organise gratuitous relief, should it prove necessary, as seems probable.

3. *In Banki*, where the number of poor is large, and where I anticipated some trouble by the end of March, no sign of distress has yet appeared, and the late rain (1'06 was registered at Banki) has saved the "dalua" which was beginning to wither, and, as elsewhere, allowed the raiyats to plough the land for the "hiali" and "sarad" rice crops, and also done good to the "grey mung" and other small food-crops. Rice appears to be coming in freely from Khurda, and to be freely exported also to Cuttack, and the local price has fallen from 14 seers 13 chitaks to 15 seers 12 chitaks (standard weight).

4. *Kendrapara subdivision*.—The affected tracts remain the same as previously reported. The worst parganas are Balubisi, Suknai, Pania, all lying between the Kendrapara and Taldanda Canals, and Neulbisi and Athpaula, which lie between the Kendrapara and Gobri Extension Canals.

As elsewhere, there are some villages in these and other parganas whose condition is worse than others.

Speaking generally, the villages furthest removed from the river banks and situated in the centre of the basins have suffered most. The Subdivisional Officer at my direction made a careful tour through several villages in parganas Balubisi and Suknai and Asureswar; but although he found signs of great poverty among many of the lower classes, especially those who have none to maintain them, and although they were living chiefly on "kutthi" meal, and got very little rice, still he found no cases of starvation and no person who had been compelled to pass a day without food. This however, is one of the tracts in which, I think, it will soon be necessary to organise some form of gratuitous relief.

The price of rice has ranged during the month in the affected tracts from 13 seers 2 chitaks to 15 seers 12 chitaks per rupee, but at the end of the month it seems that rice was rather more easily obtainable than before, although the price seems to have remained almost the same.

Food-stocks.—As previously reported, a large deficiency is feared, and the Subdivisional Officer says he found some "amars" of zamindars and mahajans practically empty. He believes, however, that the well-to-do raiyats and mahajans have still enough for their own consumption. The tendency for rice to become more easily obtainable after the late rain is, moreover, noticeable, and seems to show that there may be more rice in the country than we thought.

Exportation and Importation.—Exports have, the Subdivisional Officer believes, decreased, and this is borne out by the statistics of export from Chandbally. There are no imports, except that those in the affected tracts fetch rice from their more fortunate neighbours in the protected areas, and petty dealers are also doing some inter-village business of this kind, it is said. The Subdivisional Officer apprehends much tightness of the market during the cultivating season, and advocates importation of rice from outside. This cannot be done at the present prices. There should be no difficulty in getting Burma rice from Calcutta or Rangoon *via* Chandbally, if necessary, even in the monsoon.

Rainfall.—This subdivision has had the heaviest rainfall of all. There were moderate showers in some parts in the early part of the month which did good to the standing crops and allowed the soil to receive its first ploughing for the rice crops. On the 17th February 4'11 inches were registered at Kendrapara, and the Subdivisional Officer reports that the rain was general. There is no doubt that besides the good done to the standing crops it has done much to restore confidence and allay anxiety.

Condition of cattle is generally good.

Public Works.—The Jambu Canal repairs are the largest work in progress in this subdivision, and have attracted some adult males only from the affected tract. Some 50 more are said to have gone to work on the Bhara embankment.

5. *Jajpur subdivision*.—The Subdivisional Officer says that conditions are generally the same, but the late rain has made matters rather more hopeful. The most interesting fact in connection with this subdivision is the extension of the cultivation of "dalua" rice in Ahyas and Kalumatia and some of the other flooded parganas, due to canal and river water being let down by the Irrigation authorities through old channels and jores to the "pats" in which "dalua" can be grown. The estimated outturn for the "dalua" in the Jajpur subdivision is a 16-anna crop for 9,000 acres.

The price of rice is practically stationary—at about 14'7 standard seers the rupee. The mango crop here, as elsewhere, will unfortunately be the worst for many a year.

6. *The Kanika Estate.*—The Manager reports that the raiyats have grown “*dalua*” and “*mung*” and “*birhi*” and “*kutthi*” and in some places even wheat, and hopes that the outturn from these crops will go to make up 2 annas of the deficiency of the rice crop. It is a very noticeable fact, too, that out of a total demand of Rs. 60,330 for the 8-anna kist in January no less a sum than Rs. 51,882 was collected, and this without much difficulty. It is true that the assessment is a light one, but it shows that the raiyats must be better off than was expected. Anxiety, too, has been allayed on the ground of failure of stocks by the estate purchasing rice to store against the evil days expected after May, and for sale and distribution otherwise to the raiyats. A sum of Rs. 15,000 is being spent in this way with my approval, and I have applied for sanction of the higher authorities.

The rainfall in the estate was 3·13 inches.

Prices remain almost stationary—at 12 to 13 seers standard weight.

Owing probably to the neighbourhood of Chandbally prices are generally higher here than elsewhere in the Kendrapara subdivision. Owing to the rainfall and to the rush away from the works to start ploughing, the average daily number of mules on the ordinary estate work fell from 709 on the 14th February to 286 on the 27th February.

7. *Kujang Estate.*—Here, as elsewhere, the rain has been of much benefit. The condition of the people is generally good. Prices are stationary—at 10 Cuttack = 13·2 standard seers higher than elsewhere except Kanika. It is believed that stocks are deficient, and the Manager and Sub-Manager are buying rice and paddy as a reserve against the evil days to come with my complete approval. Sanction has been asked for. It is estimated that some 500 or 600 persons of the estate are working on the Jamba Canal repairs, and some 410 persons, almost entirely men, on ordinary works undertaken by the estate.

8. *General summary.*—The condition of the people generally is better than I had hoped for at this season, and, except in isolated tracts, I anticipate little trouble before May, and even then see no reason to fear anything like a widespread calamity. The general feeling seems to be that it is during the rains that most distress will occur. No relief operations have yet been undertaken, but a test relief work and tentative organization of gratuitous relief will be started as early as possible in pargana Kuhunda-Jaipur, of which the area is about 27 square miles. This tract has lost the greater part of its rice crop for four years, and suffered a total loss last year. The *rabi* crop is insufficient to feed the population. The test-work and organization of gratuitous relief will all be done at the expense of the District Board. I have also supplied, from the funds of the District Board, a sum of Rs. 25 to each of the offices of nine thanas and outposts (as provided in section 12 of the Famine Code) for the relief of destitute wanderers. I have also ordered the preparation by kanungos, under the supervision of the Subdivisional Officers and the Sub-Deputy Collector of Banki and the managers of estates, and of a Deputy Collector at the Sadar, of “village lists” of persons who come within the category of section 42 of the Famine Code. These should, if carefully prepared, be of much use hereafter should it be necessary to organize gratuitous relief in any quarters. A rough scheme of circles is also under preparation.

In pargana Balubiso, on the borders of the Sadar and Kendrapara subdivisions, I have ordered a tank to be taken up as an ordinary work, and hope to get a local contractor, who will employ local labour. I have ordered two other tanks to be started as ordinary works in parganas Kate and Bardialla in the Sadar subdivision for the purpose of giving local relief. It is a noticeable fact that the railway could employ double the labour which it now gets on its embankment between Ba-ang and the Katjuri river, and although the number of local coolies who are now employed on the work may be larger than would be attracted to it in ordinary years, I am surprised that it is not still larger. I append a statement showing the daily average number of local coolies employed throughout the district, as far as is known, during February, and also a statement showing the estimated outturn of the *dalua* rice crop and both *rabi* crops. It is most satisfactory to note that this is reported to be a 14-anna crop for the whole district, and I think we may say that it will be nearer 16 annas. An area of 4,000 acres over the normal has been cultivated in Jajpurs for reason given above. I do not understand why each year in Kendrapara and Banki the cultivated area is reported to be so much less than the normal, but it is useless to alter the figures till we get figures from the Settlement Officer.

9. I would earnestly submit that the time has now come to strengthen the hands of the Subdivisional Officers and myself. I have already asked for a lakh of rupees to be advanced under the Agriculturists Loans Act, and I want hands to make the distribution. It certainly cannot be entrusted to the local kanungos, although they may assist; and the Subdivisional Officers cannot be expected to undertake this troublesome and tedious work, which requires great care and much time, in addition to their ordinary duties. Moreover, although I do not anticipate much serious distress, I am practically convinced that gratuitous relief must be organized in May, and possibly earlier, and the supervision of the kanungos’ village lists is very necessary, and cannot be well done by the overworked Subdivisional Officer.

What I want is a smart and active Sub-Deputy Collector to be posted by the 1st April at the head-quarters of each subdivision, when application for tuccavi advances will probably pour in, and another at the Sadar. The only Sub-Deputy Collector I have is one of the old school, who is now in Orissa, and knows no Uriya and little English, and is near his time for retirement. He will be of no use to me in a tight place. My staff of Deputies is strong enough, but I fear Mr. Thomson’s health will not permit him to remain here

much longer, and in that case I beg you will press Government to give me another Joint-Magistrate. One of the Deputy Collectors will; from this time be employed almost entirely on work connected with scarcity, and I am sending him to start a test-work and supervise the organization of gratuitous relief at Kuhunda-Jaipur, and without a Joint-Magistrate I shall be much handicapped in the supervision of all this extraordinary work. I presume some of the Settlement Officers will be available in June, but I want men before that.

In conclusion, I beg to apologise for the delay in submitting this report; but the pressure of current work and indisposition during the last four or five days must be my excuse.

Statement of local labour employed February, 1897.

Name of railway, irrigation divisions, and other places.		Daily average number of coolies employed.

No. 405, dated Pipli, the 13th February 1897.

From—H. MACPHERSON, Esq., Assistant Settlement Officer in charge,
To—The Settlement Officer of the Orissa Division.

I HAVE little to add this fortnight to my former reports on the subject of famine relief.

There has been a further rise of prices, and coarse rice, I find, now sells on the average at 9 Cuttack seers to the rupee. In some out-of-the-way places, which were seriously affected by flood, the price is higher. Babu Ajoy Chandra Das of Circle Rahang reports that near Demirsina the price is as high as 7 seers to the rupee.

2. This place, I may note, is near that part of Serai and Chhabiskud, where Babu Amrit Lal Gupta reported that certain villages had suffered a total loss of crop. When I was on tour there at the end of last month, I was told that the Deputy Collector in charge of Puri khas mahals had been making enquiries into the condition of this locality. I was also told that there was some proposal to give relief work in the shape of repairs to the Chilka bundh, which protects villages on the north of the lake from the incursions of salt water. So far as I have observed on tour, this part of the district is the place where most immediate and particular attention requires to be given to the situation.

3. Since my last report I have been touring in parganas Lombai, Rahang, Chhabiskud, Kotdesh, Purbaduar, Banchas, Athaisal, Damarkhand and Antrodh, and have not yet seen a single case of emaciation. On the contrary, the persons in attendance at the Settlement camps seemed to be well fed and had a cheerful look about them, which was anything but suggestive of approaching scarcity or famine. None of the Assistant Settlement Officers have as yet reported cases of actual distress.

4. In my last report I suggested that it might be necessary to start test relief works in some parts of the district, notably the north of the Chilka and the sea coast parganas. I still think it is advisable to do something by the end of the month in the region north of the Chilka, but for other parts of the district it does not appear likely that succour will be called for before the end of next month.

5. The variations in the price of rice shown by the circle reports seem to prove the necessity of measures being taken at the time of opening relief works or ensuring a sufficient supply of grain in some of the distressed areas. Means of communications are so scanty in Chhabiskud and some of the sea coast parganas, that a departure from the ordinary course appears to be justifiable. The Collector of Puri, whom I met at Pipli on the 2nd instant, tells me that such a departure has already been made in Parikud and Mahud portions of the district, which have suffered worse than any, and which are least accessible to ordinary traders.

(Enclosure to Cuttack Collector's No. 697 G., dated the 8th March 1897.)

CUTTACK COLLECTORATE;
The 9th March 1897.

W. B. THOMSON,
For Collector.

**RESOLUTION ON THE SURVEY AND SETTLEMENT REPORTS FOR
THE YEAR ENDING 30TH SEPTEMBER 1896.**

REVENUE DEPARTMENT—LAND REVENUE.

Calcutta, the 18th March 1897.

RESOLUTION—No. 1207.

READ—

Letter No. 85A., dated the 16th January 1897, from the Board of Revenue, submitting the reports of the Director of the Department of Land Records and Agriculture on Settlements and Land Records, and the Superintendent of Settlement-Surveys on Surveys, in Bengal, for the year ending the 30th September 1896.

The report of the Director of Land Records was submitted to the Board of Revenue with commendable punctuality by the Officiating Director, Mr. Lyon, two days only after the due date, that is, on the 17th instead of on the 15th December, while that of the Superintendent of Settlement-Surveys was not received till the 30th December (15 days after time), and then without maps. The delay in submission is attributed by the Superintendent to inaccuracies requiring further reference. Both the reports give a full and complete account of the operations conducted during the year.

2. Colonel W. H. Wilkins officiated as Director of Surveys in Bengal up to the 19th October 1895, on which date Captain R. T. Crichton, I.S.C., took charge, and continued as Superintendent of Settlement-Surveys throughout the rest of the year. He was absent from head-quarters on tour for 147 days in the year. Mr. W. C. Macpherson, I.C.S., was in charge of the office of Director of Land Records and Agriculture up to the 22nd February 1896, when he went on furlough, and Mr. P. C. Lyon, I.C.S., acted for him for the remainder of the year. Mr. Macpherson spent 47 and Mr. Lyon 111 days on tour. Mr. Macpherson was detained in Calcutta for some time during the cold weather in connection with an Agricultural Conference. Mr. Lyon was on tour during every month from March to September, except May, and visited every settlement of importance under his charge.

3. In view of the necessity of expediting the completion of the settlement of Orissa, and of the heavy demand for officers entailed by the rapid pace at which survey and settlement work was being carried on in Bihar, Sir Alexander Mackenzie decided to employ only two survey parties instead of four in North Bihar, and thus to reduce the programme area of survey and initial record-writing from 2,000 square miles to 1,000. The outturn of survey work during the year ending 30th September 1896 was (1) traverse survey, 2,131 square miles, (2) skeleton boundary survey, 187 square miles; (3) cadastral survey, 2,429 square miles; (4) record-writing, 2,478 square miles. The Lieutenant-Governor notices with pleasure that the whole of the survey programme of the season was completed. Settlement work under the control of the Director of Land Records was in progress in the following areas:—(1) for revision of land revenue in temporarily-settled estates and Government estates, 8,741 square miles; (2) for survey and record of rights in private estates other than wards' estates,

inclusive of Bihar, 9,580 square miles; and (3) for survey and records of rights in wards' estates, 821 square miles,—making a grand total of 19,142 square miles, as compared with 18,445 square miles in the preceding year. The following statement shows the general outturn and cost of survey-settlement work during the year under report and during the preceding three years:—

YEAR.	Traverse survey.	Skeleton boundary survey.	Topographical survey.	Cadastral survey.	Record-writing.	Cost of survey.	Cost of settlement.	Total cost.
1	2	3	4	5	6	7	8	9
1892-93	Sq. M.	Sq. M.	Sq. M.	Sq. M.	Sq. M.	Rs.	Rs.	Rs.
1893-94	5,324	1,247	...	3,078	2,380	7,84,400	5,00,001	12,84,401
1894-95	3,485	176	...	3,764	3,677	6,00,125	4,63,228	10,63,353
1895-96	8,001	23	1,026	2,786	3,120	6,94,314	4,07,136	11,01,450
1896-96	2,131	187	...	2,420	2,478	4,29,001	10,00,017	14,29,018
Total	14,031	1,633	1,026	12,047	12,165	25,11,820	27,51,341	52,63,170

The Superintendent of Settlement-Surveys has explained* in detail the reasons for the variation in cost rates of the survey operations of this year in different districts and for the same district in successive years.

4. The following table shows the survey work done in each district in Bihar season by season from the commencement of the operations in 1891:—

Bihar Survey.

(* Including Saran.)

† Includes 28 square miles of Muzaffar Ward's Estate, and excludes 11 square miles of river areas actually surveyed, but which, owing to the midstream boundary belong to the North-Western Provinces.

The statement given below shows the total survey work done up to the 30th September 1896, and remaining to be done on that date in each district:—

DISTRICT.	Total area of district.	AREAS COMPLETED.			AREAS REMAINING.		
		Traverse survey	Cadastral survey.	Record-writing.	Traverse survey.	Cadastral survey.	Record-writing.
1	2	3	4	5	6	7	8
Muzaffarpur ..	3,070	3,059	3,062	3,063	Nil	Nil	Nil
Champaran ...	3,575	3,298	3,280	3,280	Nil(a)	Nil(a)	Nil(a)
Saran ...	2,622	2,394	1,194	1,194	228	1,428	1,428
Darbhanga ...	3,238	1,697	16	16	1,636	3,217	3,217
Total ...	12,500	10,448	7,552	7,563	1,764	4,645	4,645

(a) The jungly area, approximately 290 square miles, to the north of the district is not for survey.

The Superintendent reports that, as in previous years, the voluntary attendance of the raiyats was indifferent, but he attributes this in the majority of cases to the action of the petty landlords, who, according to Captain Crichton, endeavoured to keep the raiyats from coming forward to claim possession of lands to which these petty maliks prefer fraudulent claims themselves. (Once the raiyats were induced to attend, they took a keen interest in the proceedings and were anxious to obtain their *parchas*.)

The survey operations in the Muzaffarpur and Champaran districts have now been completed, with the exception of an approximate area of 290 square miles in the north of the latter district, which has been excluded from the survey operations. The total expenditure from 1891-92 in these two districts has been as follows:—

	Traverse survey.	Cadastral.	Record-writing.	Other heads.	City survey.	TOTAL
1	2	3	4	5	6	7
Muzaffarpur ...	Rs. 92,441	Rs. 2,02,865	Rs. 2,63,678	Rs. 2,118	Rs. 4,060	Rs. 5,65,138
Champaran ...	1,11,230	2,13,043	1,76,521	3,472	160	5,04,633

The cost rate of the entire operations per square mile is shown in the statement below:—

DISTRICT.	Traverse, including stone embedding.	Cadastral survey, including, completion of records, &c.	Total cost per acre.
Muzaffarpur ...	Rs. 30.21	Rs. 12.33	4½ annas.
Champaran ...	33.72	13.76	4 annas nearly.

In the Saran district there were 52 square miles traversed, leaving 228 square miles remaining, or 240, including 12 square miles in the Gandak diara, and 645 square miles were cadastrally surveyed, leaving 1,425 square miles still to be done. In the Darbhanga district 1,179 square miles were traversed and 16 square miles were cadastrally surveyed during the year. Of the 1,536 square miles still left for traverse survey, about 640 were surveyed by Mr. Finucane, I.C.S., in 1878-79, but the records then made have not been kept corrected up to date. The Darbhanga Raj, however, has asked for a complete resurvey

of all these villages; and the Director, in anticipation of the Board's orders, requested the Superintendent of Settlement-Surveys to arrange for the traverse of all the Darbhanga Raj villages in areas not dealt with during the present survey operations, and to prepare new maps for all villages in which Mr. Finucane's maps have not up to date been revised. The Board have submitted a report to Government regarding these proposals, which have been approved.

5. The following statement shows the work done in each district from the commencement of the settlement proceedings:—
Bihar Settlement.

6. Mr. P. C. Lyn was in charge of the operations in Muzaffarpur up to the 15th February, and Mr. C. J. Stevenson-Moore from that date to the 7th July. After Mr. Stevenson-Moore's departure on special leave, Mr. R. B. Hughes, the Assistant Settlement Officer, was in charge. Mr. Hughes corresponded directly with the Director. The Director has brought to notice that the bulk of the work of direction and supervision fell upon his officer. In all, 21 Settlement and Assistant Settlement Officers were deputed for various periods during the year. The programme of the year was the supervision of record-writing and disposal of boundary disputes in an area of 415 square miles, the attestation of the records of 1,664 villages covering an area of 1,341 square miles, the disposal of petitions, the completion of the records after the disposal of case work, and the initiation of proceedings for the computation and recovery of costs. The progress made during the year was satisfactory. All the boundary disputes which arose on nearly 8,000 of the 22,000 disputes entered by the amins on their dispute lists, were disposed of. The survey and initial record-writing were completed, and attestation will be finished in the present season. It is satisfactory that 1,633 villages out of 1,649 taken up were attested, and the Lieutenant-Governor is pleased to notice the success with which this heavy work was accomplished. The villages covered an area of 1,319 square miles, and included more than two million plots and over four hundred thousand holdings. The records of all villages attested in previous years, and of 1,460, out of the 1,633 attested during the year under report, were published in draft, and 1,161 records were finally pushed in the course of the year. There were 2,307 applications made under section 104 of the Tenancy Act for the settlement of fair rents, and 1,859 of these were disposed of. The rents of 3,862 tenants

were settled, their rents being raised from Rs. 29,276 to Rs. 31,826, giving an increase of 8·7 per cent. on the previous rentals of these particular tenants. This enhancement was due to the assessment of new cultivation. There were 4,128 objections under section 105 pending at the close of the year, but it is reported that they are being actively disposed of. It is also stated that special officers are now engaged to deal with the arrears of cases under section 106. The general principles of computation and recovery of the costs of the survey and record of rights were approved by the Board and by Government in the course of the year, and the Lieutenant-Governor notices with much pleasure the satisfactory results of the beginnings made in the recovery of costs in this district. He agrees with the Director that the promptitude with which the landlords and raiyats have paid the sums due from them is evidence that they attach value to the extracts relating to their estates and holdings that have been furnished to them. Out of Rs. 21,443 due from landlords, Rs. 17,766 were paid voluntarily and Rs. 1,548 were realised by certificates, leaving a balance of Rs. 2,129; while out of Rs. 15,062 due from tenants, Rs. 14,654 were paid voluntarily and only Rs. 84 were realised by certificates, leaving a balance of Rs. 324 outstanding at the close of the year. As regards the realization of the cost, the settlement officer writes :—

“The procedure is simple: convenient centres are chosen, and notices are served in all the surrounding villages fixing days for their attendance; at the same time a schedule is sent to each village, setting forth the amount due from every payee in it. When the Assistant Settlement Officer goes to the centre, he erects a bamboo enclosure and sits in the middle of it surrounded by his tahsildars, who collect the money, give the receipts and the certified copies of the khatians. At the close of each day they hand in their money and accounts to the cashier, who counts the money and deposits it in the treasure chest that night, and writes up his account next day.

Babu Siva Sanker Singh had collected in the thanas of Hajipur and Mahuwa, by the end of May, almost entirely without the adoption of coercive measures, Rs. 31,802-8-9 out of a demand of Rs. 36,504-10-11. He thus left a balance of Rs. 4,702-2-2 to be collected from head-quarters, and Babu Rai Krishna Bahadur, the Assistant Settlement Officer at head-quarters, was vested with powers under the Certificate Act for the purpose. The balance at the end of the year is Rs. 2,453-13-2, or rather more than 7 per cent. of the total demand. We have thus succeeded in collecting more than the 85 per cent. mentioned in my letter to Director of Land Records and Agriculture, No. 84B of 5th July 1896. The principal difficulty has been to obtain payments from the numerous petty maliks whose shares are often not more than a few annas. They show the same apathy in payment to us as they do in payment of Road and Public Works cesses in the Collectorate. On the other hand, no difficulty has been found in obtaining payment of the occupier's share, only Rs. 109-3-6 in Hajipur and Rs. 215-4 in Mahuwa being still outstanding. The smallness of the arrears afford a most striking proof of the popularity of the record. Other proofs are not wanting. The Subdivisional Magistrate of Hajipur has informed Mr. Hughes that the certified copies of the record which have been thus distributed are frequently filed before him, and Mr. Hughes has himself received several complaints from raiyats that, though the raiyats of neighbouring villages had obtained their khatians, they had not been so fortunate. Several enquiries have been made at head-quarters lately also, by proprietors and others, as to whether their certified copies were obtainable at head-quarters on payment.”

It appears that rent rates run high, but His Honour agrees with the Director and the Board that the full discussion of them must be postponed until complete figures for each thana are available. On the question of the rates in this district, the Settlement Officer observes :—

“Turning to the rates of rent, we find, as might be expected, that the rent of raiyats at fixed rates is lowest, viz., Rs. 3-8, including the rent of cultivated and uncultivated land. Next come occupancy raiyats with a rent rate of Rs. 4-3-2 for all lands held by them. Non-occupancy raiyats pay at the rate of Rs. 5-1-3, and under-raiyats a still higher rent of Rs. 5-3-11.”

Whatever may be the cause, there can be no question of the fact that these, all-round rates are very high.

As the Board, in their letter to Government, have stated, the crop statistics are manifestly incorrect, for it is clearly impossible that 454,114 acres, or 32 per cent. of the cultivated area of the district, should be sown with indigo. A tenth of that area would probably be nearer the truth. The Settlement Officer has accepted these figures, and the officiating Director has passed them without question. In the report on the indigo crops for the year 1896 the average of the current and preceding year's crops is shown as 65,500 acres. The Lieutenant-Governor would draw the Director's special attention to these discrepant figures,

and request him to submit an explanation of them. The Board remark that the entry of 68 acres under coffee is probably a mistake; but the Settlement Officer states it is said to be cultivated in Muhammadan villages entirely for home consumption. Rice is shown as occupying 40 per cent. of the cropped area, and after rice and indigo, "other food-grains" come next, followed by marua and maize. It is worthy of note that out of a total area of 3,035 square miles there are, excluding current fallow and mango groves, only 141 square miles available for fresh cultivation. On the effect of partitions in running up rents, the Settlement Officer remarks:—

"Four statements were submitted—the first containing extracts from the village notes written by 14 different Assistant Settlement Officers at the time of attestation; the second a statement showing the rent rates obtaining in estates which had undergone *butwara*; the third was a comparative statement for estates surveyed *ymali* in 1885 by Mr. Collin, and now revised after partitions had been given effect to; while the fourth showed for certain estates which are pending partition in the Muzaffarpur *Butwara* office, and the records of which had been prepared *ymali* by us, comparative figures of areas held by proprietors and raiyats, and of raiyat's rent as entered in the landlord's *jamasandi* filed in the *batwara* office, as found by the Deputy Collector's rate statement and as attested.

"Commenting on these four statements, the conclusion was irresistible that *batwaras* are the cause of very considerable enhancements of rent, and of dispossession of raiyats of their lands to some extent. From the information derived from the village notes, it appears that, after *batwara*, enhancements varying from 2 annas in the rupee to more than double the former rates invariably take place. At the same time the rates in estates in which *batwara* had taken place were found to be 3 to 22 per cent. higher than the total rates for 50 villages taken at random in each *thana*."

From the beginning of the operations only 17 appeals were preferred to the Special Judge against the decisions of Settlement Officers in settling rents. In 11 their decisions were upheld, in four reversed, and in two modified.

7. Mr. P. C. Lyon was in charge in this district and of Saran till 7th November; Mr. E. G. Colvin from that date till 8th March, when Mr. C. J. Stevenson-Moore became Settlement Officer of these districts as well as of Muzaffarpur. As in Muzaffarpur, after Mr. Stevenson-Moore's departure on special leave, the Assistant in charge corresponded directly with the Director. Eighteen Settlement and Assistant Settlement Officers were employed in the Champaran district for various periods during the year. The programme was similar to that in Muzaffarpur, but it is noted that the attestation work was simpler and the settlement of fair rents more onerous than in the former district. The survey and initial record-writing have been completed. There were 513 boundary disputes dealt with during the year. The records of 1,075 villages covering 1,162 square miles and containing over 1,300,000 plots were attested. The following statement shows the amount of work done in the settlement of fair rents from the beginning of operations according to the area attested in each year:—

YEAR.			Number of tenants for whom fair rents were settled.	Former rental.	Fair rent settled.	Enhancement	Percentage of enhancement.
1			2	3	4	5	6
1893-94	22,151	Rs. 1,44,556	Rs. 1,62,636	Rs. 18,080	12.50
1894-95	12,850	1,09,276	1,20,028	10,752	9.83
1895-96	84,633	3,69,366	3,98,762	29,396	7.9
Total			69,634	6,23,198	6,81,426	58,228	9.3

The Director states that practically the whole of the enhancement was due to the assessment of new cultivation, and was obtained by compromise. All such compromises were, it is said, carefully scrutinised by the Assistant Settlement Officers before being decreed. The work of publication of the records

was delayed on account of the large number of applications for the settlement of fair rents; 632 records were published in draft, and 372 finally, in the course of the year. Disposal of objections and cases under sections 105 and 106 was also delayed with the delay in draft publication: 3,971 objections and 322 disputes were dealt with during the year out of 4,829 and 401 for disposal. Owing to the necessity for adjusting the accounts of the season 1892-93, when advances were made by landlords to patwaris then working as amins, it was only possible to recover costs from raiyats, and not from landlords, during the year under report. It is satisfactory to find that the raiyats paid Rs. 36,452 voluntarily out of a total demand made from them of Rs. 38,125. The Lieutenant-Governor is pleased to learn that Mr. J. J. Macleod, C.I.E., has undertaken to bear the whole of the tenants' share of the costs in his villages. His Honour refrains from commenting on the statistics of status and rents of tenants until more complete figures are available. Statistics under these heads have so far been compiled for 931 villages, and crop statistics for 1,439 villages. Of the total cropped area in these villages, 49 per cent. is under rice. It is a remarkable fact that it is only in Champaran, where the raiyats are poorer and occupancy rights less widespread than elsewhere, that it is found that the tenants' lands are passing into the hands of money-lenders to any appreciable extent. In this district no less than nearly 9 per cent. of the tenants' holdings have been sold or mortgaged within the last 10 years, 40 per cent. of the transferees being money-lenders, while in Muzaffarpur only a very small percentage of the holdings was transferred by sale in the same period, and the transferees were for the most part raiyats.

8. Six Assistant Settlement Officers were employed in this district for various periods during the year. The Director remarks that through neglect of the scheme of work prepared by the Superintendent of Settlement-Surveys, only slight progress was made in initial record-writing until the season was far advanced, and the work had to be hurried at the end. In all 1,235 villages, covering 668 square miles, were dealt with, and all the boundary disputes instituted (765 in number) were disposed of. The draft records of 867 villages were published, but there was no final publication of the records of the villages attested in 1894-95. The rents of 21,729 tenants were settled, giving an increase of rent from Rs. 2,25,414 to Rs. 2,54,415, or 12.86 per cent. Practically the whole of this enhancement was, it is reported, due to assessment of new cultivation, and was obtained by compromise. The large number of objections under section 105 instituted by the Hatwa Raj is an unsatisfactory feature of the year's proceedings; three-fourths of these objections were rejected, and the Officiating Director states that many of them were patently frivolous. Now that these estates are under the management of the Court of Wards, it may be hoped that these frivolous objections will cease to be made. There were in all 9,487 such cases filed during the year; 7,143 were dealt with and 2,748 were pending at the close of the year. Apparently 176 appeals have been preferred to the Special Judge against the Settlement Officer's decisions, but none of them has been yet disposed of. The statistics of status and rents of raiyats, and of cultivation and crops, are not yet sufficiently advanced for any definite conclusions to be drawn from them.

9. The expenditure on the operations in North Bihar was as follows:—

	SURVEY.		SETTLEMENT.		TOTAL.	
	During the year.	To end of September 1896.	During the year.	To end of September 1896.	During the year.	To end of September 1896.
1	2	3	4	5	6	7
	Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Muzaffarpur (a) ...	1,02,317	5,65,138	1,80,037	3,66,477	2,68,374	9,31,615
Champaran ...	1,32,541	5,04,033	1,21,102	2,48,916	2,54,613	7,62,940
Saran ...	97,130	2,59,021	62,155	98,505	1,69,365	3,67,616
Parbhanga ...	29,022	45,363	29,022	45,363
Total ...	3,61,010	13,73,554	3,63,294	7,13,968	7,24,304	20,87,542

(a) Including the cost of survey of Muzaffarpur town and Hajipur Municipality.

The recoveries made in the Muzaffarpur and Champaran districts have been noted in former paragraphs.

10. In paragraph 16 of the Resolution on the Survey and Settlement Reports for 1894-95, Sir Charles Elliott recorded the opinion that the operations should be extended to South Bihar and into the Bhagalpur Division. Sir Alexander Mackenzie, in January 1896, requested the Board to consider this question and submit a special report after consulting the Director of Land Records, the Commissioners of the Patna and Bhagalpur Divisions, and the local officers. The reply of the Board has not yet been received, but the Officiating Director reports that the recommendation of the Department is that the proceedings should not at present be extended beyond that portion of Monghyr district that lies north of the Ganges.

11. At the commencement of the year the settlement operations in Balasore were held as a distinct charge from those in Orissa Settlement. Cuttack and Puri; but with effect from 1st February 1896, Mr. S. L. Maddox was appointed Settlement Officer of Orissa, with Mr. J. E. Webster, Mr. D. H. Kingsford and Mr. W. B. Thomson as Assistant Settlement Officers in charge, respectively, of Cuttack, Puri and Balasore. The programme for the year in Orissa included (1) the revision of the maps and records of the Khurda settlement of 1875-76, (2) the settlement of boundary disputes, (3) attestation and re-attestation work, and (4) the settlement of rents.

(1) The whole work of revision of the Khurda survey and settlement records was completed, the records of 1,342 villages, covering 913 square miles, being dealt with. The records will be attested and rents settled in the course of the present year.

(2) There were 64 pending boundary disputes and 205 were instituted during the year, all being concerned with the Balasore district. Two hundred and ten cases were disposed of, and in five out of seven appeals decided, the Revenue Officer's decision was upheld.

(3) Nineteen officers in all were employed in attestation work during the year. The following statement shows the progress made under this head:—

				Outturn in 1895-96.			Balance at close of 1895-96.	
1				2	3	4	5	6
				Villages.	Plots.	Area.	Villages.	Area.
Cuttack	1,028	1,022,925	495.2	19	4.71
Balasore	636	233,765	235.84
Puri	{	Ekrajat	...	78	28,543	75.93	40	14.96
		Khurda	...	48	22,938	18.01	1,294	895.46

The Director states that all the arrears will be disposed of during the present season, the attestation in Khurda being done together with the settlement of rents. Re-attestation forms a large item of work which must be done before rents can be settled; and although the Director cannot give exact figures, he is of opinion that 11 lakhs of plots in Puri and 9 lakhs in Cuttack will require to be re-attested. During the year under report this work was completed for 861 villages containing over 650,000 plots. In future an effort will be made to complete re-attestation in the camps of officers deputed to settle rents, and rules for the procedure to be adopted have been drawn up by Mr. Maddox.

(4) The settlement of rents constitutes the bulk of the work now remaining to be done before revenue can be assessed. On this subject the Officiating Director remarks as follows:—

"Mr. Stevens and I left Calcutta on the morning of the 14th March, and returned on the 2nd April, after visiting Cuttack, Khurda, Bhadrak and Balasore. During our stay

in Orissa a series of draft rules were framed, based mainly on the suggestions made by Mr. Finucane in his note of December 1893, on Mr. Nathan's proposals for the Kotdesh pargana. This note had also formed the basis of Mr. Maddox's work in Balasore, which was followed to a great extent in the draft rules. The main principles on which they were drawn up have been thus summarised by Government:—

- (a) That in the case of the *pahi* raiyats of Orissa (whose rents the zamindars were empowered to enhance, and did enhance during the past 60 years), the existing rents should be taken as fair rents, unless applications be made by the zamindar for enhancement or by the raiyats for reduction.
- (b) That in the case of *thani* raiyats, whose rents have not been altered during the term of the last settlement, rents should be proposed to them which would be somewhat lower than the competition rents paid by *pahi* raiyats; that the rents so proposed, if accepted by the raiyats, should be recorded as the fair rents with their consent; and that, if the rents proposed be not accepted, then the fair rents should be settled in accordance with the provisions of Chapter X of the Tenancy Act, following the Civil Procedure Code and Tenancy Act Rules, enhancements being mainly based on the great rise in prices that has taken place since the existing rents were fixed 60 years ago.
- (c) That in the case of *baziaftidars* and similar privileged tenants, rent should be proposed in a similar manner, which would be somewhat lower than those fixed for non-privileged tenants, and be, if accepted, recorded as fair. If not accepted, rents are to be settled strictly in accordance with the procedure laid down in Chapter X of the Tenancy Act and the Government rules made under it."

* * * * *

"The results of the work done up to the close of the year have been fully analysed in the instructive statistical statements that have been submitted by the Settlement Officer with his report. The progress made may be summarised as follows:—

Number of villages in which rents have been settled	...	1,410
„ of tenants for whom „ „ „	...	177,183
„ of „ whose existing rents have been settled as the fair-rents	91,808
„ of „ newly assessed	8,131
„ of „ whose rents have been enhanced for excess area	29,519
„ of „ whose rents have been reduced for decrease in area	3,842
„ of „ whose rents have been enhanced for other reasons	43,888
„ of new rentals accepted by the tenants	16,323
„ of „ contested „ „	865

"It was only in two circles that there was any opposition to our procedure, and in one of these the tenants were notorious litigants, who had for long been on bad terms with their landlord. But in both these circles the opposition soon quieted down when our methods of settlement began to be understood. The statistics showing the amount of enhancement in the case of each class of tenant do not show the working of our present rules quite accurately, as some of the work was done under Mr. Maddox's original scheme, and some classes have been affected by recent modifications in the rules."

The operation of the rules led to an enhancement of not less than 12 or more than 20 per cent.

Since the close of the year Sir Alexander Mackenzie, accompanied by the Senior Member of the Board of Revenue and the Director, Mr. Macpherson, has visited Orissa, and, after holding a conference with the local officers, His Honour made some modifications in the details of the rules based on the principles described by the Officiating Director.

12. The question of the maintenance of the records of rights in Orissa is now under the consideration of the Lieutenant-Governor. The Board have addressed Government on the subject very recently, submitting a scheme prepared by Mr. Maddox,

which follows the lines approved by the Conference which assembled in Calcutta in December 1893. Mr. Lyon, in his letter forwarding the scheme to the Board, questioned whether the very heavy expenditure to be incurred in keeping up the records would be attended by such corresponding advantages as to justify it. The Board consulted Mr. Macpherson, who stated as his opinion that "it is right that rent-rolls should be continuously maintained in village offices as an education to the people and as a protection of the weak against the strong." The Board have also forwarded the notes containing the views held by Mr. Toynbee and Mr. Stevenson, who were consulted by them. The Hon'ble Mr. Stevens, Senior Member of the Board, "is inclined to question whether commensurate results, as regards either the maintenance of the record or the general assistance in the executive administration, will be found to justify the very heavy additional expenditure. To have short periods of settlement, and to correct the records on the expiry of each of these periods, would certainly be simpler and less harassing to the people, and it does not seem probable that the changes in the meanwhile would be so great as to make it difficult to trace them."

Sir Alexander Mackenzie is disposed to think that the advantages of keeping the records corrected from year to year will more than counterbalance the expense, and he will now submit the scheme for the consideration and orders of the Government of India, together with proposals relating to the percentage of the assets to be taken as revenue and the period of settlement.

13. The expenditure incurred on settlement operations in Orissa during the year amounted to Rs. 90,099 in Balasore and Rs. 2,19,862 in Cuttack and Puri, making a total of Rs. 3,09,962, as against Rs. 1,93,409 (revised figures) in the preceding year. The amount expended on the survey-settlement operations in Orissa, from the commencement of proceedings up to 30th September 1896, has been Rs. 10,35,291 on survey and Rs. 11,11,674 on settlement, giving a total of Rs. 21,46,965.

14. Mr. C. G. H. Allen took over charge of the post of Settlement Officer in November 1895, and remained in charge for the rest of the year. Steady progress was made in the work of assessment, and the subsidiary work of publication of records, hearing of objections and trial of disputes were also carried on. The whole area of the district is 2,492 square miles, of which 1,910 square miles, containing 1,039 villages, are under settlement. Of these villages, assessment has now been completed for 695, and the draft records of 610 and the final records of 507 villages have been published. During the year 4,017 objections and 37 disputes were dealt with. Assessment of the rents of 106,719 tenants had been made in preceding years, and that of 71,067 tenants was made during the year under report. Existing rates of rent have been maintained, unless proved to be collusively unfair. Rents of raiyats have been increased as a rule on account of excess area only. The rents of talukdars and ijaradars have been so determined as to leave them 30 per cent. of the assets. Mr. Allen states that there have been practically no appeals to the Special Judge on the ground of excessive enhancements. The general result has been to raise the Government revenue by Rs. 1,40,342, representing an increase of 47 per cent. on the previous revenue of Rs. 2,98,378. If this rate be maintained in the remaining assessments, the total enhancements due to resettlement may be expected to reach Rs. 1,81,000. Though the increase of revenue is large, the Director states that he has learned that the new revenue is being collected without opposition or difficulty, than which there can be no better proof of the moderation of the assessment. The whole validity of the settlement proceedings was contested in the Rajakul case. The Special Judge found for Government on all points, and it appears that no appeal has yet been made against this decision. Having regard to the great complications of tenures in Chittagong, and consequent difficulty of making a workable settlement, the results, though necessarily expensive, appear to the Lieutenant-Governor to be very satisfactory.

15. The following statement shows in a convenient form the progress of work in the Chittagong district up to the close of the year 1895-96 :—

	RECORD-WRITING.		ATTESTATION.				MAHAL MILAN.	SETTLEMENT OF FAIR RENTS.			
	Khasra-writing in the field, number of villages.	Khatia-writing and completion of records in office, number of villages.	Villages.	Square miles.	Tenants.	Picla.	Number of villages.	Number of tenants.	Former rental.	New rental.	Percentage of increase.

* The total number of villages in which records were finally published previous to 1895-96 is stated in the present report to be 255.

16. In accordance with the orders of Government such portions of the external boundaries of the *khalsa mauzas* of the Palamau Government estate as had not been surveyed in previous seasons were traversed during the year. The Lieutenant-Governor agrees with the Board that the Commissioner should notice every year in his Land Revenue Administration Report that the six feet clearing along the old revenue survey boundaries has been attended to. There were 141 square miles traversed in the course of the year. The assessment has been conducted under the provisions of Act VIII (B.C.) of 1879. The settlement work of the year consisted of the assessment of the new revenue. The general result is to fix a rental of Rs. 74,433, giving an enhancement of Rs. 17,767 or 31.35 per cent. over the attested existing rental, and of Rs. 33,591 or 82 per cent. over the rental of the last settlement. The Lieutenant-Governor, in approving the rate report, directed that the assessment should be applied with moderation, and that the tenants should be treated with consideration and

leniency. This settlement has been made for 15 years, and it has been decided to abandon the old thikadari system and to hold the estate khas. An additional assessment of Rs. 3,444 has been made on *mohua* trees, and a temporary settlement for one year of Rs. 10,440 on *palas* and *kusum* trees.

17. The 946 estates or jotes for resettlement in the Darjeeling Terai were surveyed in 1894-95. During the year under report the records were attested, and a rate report was submitted to Government, which has been approved by the Lieutenant-Governor since the close of the year. The proposals involve an increase of 25 per cent. on the revenue.

18. The traverse survey only of this estate is being conducted by the Superintendent of Settlement-Surveys, the cadastral survey being undertaken by the Settlement Officer, Mr. Craven. The entire area was originally estimated to be about 1,423 square miles, but this is reported by the Superintendent to be incorrect, as 1,175 square miles were traversed in 1894-95, and the work was completed this year by the traversing of 229 square miles. The true area cannot be ascertained, however, till the detail survey has been completed. The total expenditure in 1894-95 was Rs. 35,954, and during the year under report Rs. 11,253. The cost rate for the year (Rs. 43.8 per square mile) was not excessive, considering the smallness of the programme and difficult country. As the settlement is not under the Director of Land Records, no mention is made of it in his report. In paragraph 26 of the Resolution on the Survey and Settlement Reports for 1894-95, Sir Charles Elliott, however, desired that the Director should give a short paragraph, stating the history of the work done during the year.

Private estates other than those of North Bihar.

19. The estates of the Maharaja of Hill Tippera, in Tippera and Noakhali, cover an area of 555 square miles, and are contained in 1,511 villages. Mr. J. G. Cumming was Settlement Officer during the year, and he was assisted by five Assistant Settlement Officers. Six boundary disputes were disposed of. No appeal has yet been lodged against the decision in any boundary dispute decided in the course of this settlement. The records for 535 villages were attested, in 112 villages the records were wholly draft published, and in 118 the raiyats' khatians only, while the records of 97 villages were finally published. The rents of 1,694 raiyats and 190 tenure-holders were settled, resulting in an enhancement of raiyats' rents from Rs. 18,576 to Rs. 22,813, and of tenure-holders' rents from Rs. 3,150 to Rs. 5,716. The average outturn of attestation was 12,542 plots for each officer per mensem. The Director considers that this is fair progress having regard to the obstructive and litigious character of the tenantry. Applications were put in by the Raj for enhancement of rents in 42 per cent. of the villages held khas, with the results that the rents of these raiyats were raised by 22 per cent. The enhancements were made chiefly on the ground of excess area, but also on the general ground of a rise in the price of food-grains. The Lieutenant-Governor agrees with the Officiating Director in regretting that no progress could be made by the Special Judge in the decision of the appeals that have been made to him, and with the Settlement Officer's contention that there is no hope of the parties coming to terms until the Special Judge has decided two or three important issues which are similar in nearly all the cases. The delay in disposing of the appeals is the more to be regretted, in that the enhancements being heavy, it is very desirable that it should be decided by the Appellate Court as soon as possible whether they are justified by law. The statistics tabulated show that out of 80,000 tenants over 70,000 are settled or occupancy raiyats paying an average rent of Rs. 3-11-2 per acre.

20. The survey and record-writing of the Tikari ward's estate were completed during the year under report. The following statement shows the area surveyed and the cost year by year since the commencement of proceedings in 1892-93:—

YEAR.	AREA IN SQUARE MILES.					Cost.					
	New work 18"=1 mile.			Revision 32"=1 mile.		Traverse survey.	Cadastral survey.	Record-writing.	Boundary skeleton survey.	City survey.	Total.
	Traverse survey.	Cadastral survey.	Record-writing.	Cadastral survey.	Record-writing.						
1	2	3	4	5	6	7	8	9	10	11	12
1892-93	...	232(a)	Rs. 17,084 (b)	Rs. ...	Rs. ...	Rs. ...	Rs. ...	Rs. 17,084
1893-94	...	331	408	342	63	27	14,210	30,013	21,045	1,589	73,617
1894-95	...	289	11	68	2	5	2,043	8,340	13,800	88	25,272
1895-96	...	8	13	17	32	62	883	6,810	6,601 (c)	...	14,324
Total	...	862	431	40,	97	93	34,889	51,979	41,466	1,677	1,30,997

(a) Exclusive of 39 square miles not belonging to the estate, but situated among the scattered villages of the estate.
(b) Inclusive of Rs. 1,827 expended on training of local annas.
(c) Ditto 386 ditto arrears of previous season.

The cost of the survey per square mile was—(1) for traverse survey about Rs. 58; (2) for cadastral survey Rs. 98; and (3) for record-writing Rs. 82-12.

In Government estates in the Gaya district, traverse survey of 11 villages contained in 15 square miles, together with cadastral survey and record-writing of the same area, were accomplished during the year. The total survey cost was Rs. 1,982. In the Bulkhara mahal, which is partly the property of Government and partly of the Tikari ward, considerable trouble was caused during the record-writing by the agents of Mr. Salano, the present landlord. The work on boundary disputes was heavy. All the records and traces have been completed and sent to the Settlement Officer. The Director has considered the settlement work done in the Tikari estate and the Government estates together, as the same staff of officers was in charge. The attestation of 109 Government villages and 107 Tikari estate villages was finished. The Settlement Officer notices that the apathy of the tenants rendered the preliminary examination of the records difficult. The work was also complicated by the fact that in several villages owned by Government jointly with other landlords, while Government rent is paid in money, the other landlords receive their share in kind. In 12 villages of the Tikari estate applications for enhancement were made regarding 69 tenants, and the rent was enhanced by 4.1 per cent. The principles to be followed in settling rents in Government villages were determined during the year. It was decided that in addition to the enhancement in rent demandable on account of increase in area, Government should demand an enhancement of two annas in the rupee on the ground of a rise in the price of staple food-crops, discretion being given to the Settlement Officer to reduce this rate when it was found necessary. Rents were settled for 2,853 tenants in 88 villages, and were raised from Rs. 44,412 to Rs. 48,423, giving an enhancement of 9 per cent. In 12 villages produce rents were commuted into cash rents. The records of 478 villages in the Tikari estate were finally published during the year, but draft publication in Government villages was postponed. The total expenditure on settlement during the year in the Gaya district was Rs. 24,852.

21. The following statement shows the progress of operations and the cost incurred in the smaller surveys and settlements dealt with by the Superintendent of Settlement—
Smaller settlements.

Surveys and by the Director of Land Records and Agriculture during the year:—

* Cost of settlement during 18 15-96 included in Tikari and Balkhora.

22. *Pataspur.*—Progress of work was again delayed in this estate owing

to the illness of the Settlement Officer in charge, and the Director does not think that the operations can be concluded before the end of April next. Record-writing and attestation had been completed in previous years and the settlement of fair rents was finished during the year. The draft records of 95 out of 96 villages were published before the close of the year. The rents of 10,124 tenants were settled and over 1,000 miscellaneous objections were dealt with. In 19 villages remissions of rent were given, while in the remaining 77 villages fair rents were settled resulting in an increase of nearly Rs. 10,000 over a former rental of Rs. 42,000, that is, an increase of about 23.75 per cent., of which 16.73 per cent is due to enhancements on account of excess area, and 7.02 to enhancements under other sections. There has not been a single appeal against the decisions under section 104, Tenancy Act.

Jaipur Government Estates in Bogra.—The preparation and approval of a rate report was the only work done in connection with the settlement of these estates, the reason for the delay in completing this settlement being the incompetence of the late Settlement Officer, who has been removed and punished departmentally.

Estates in Backergunge.—Satisfactory progress was made in the settlement of these estates.

Estates in Shahabad.—Practically nothing was done in the work of settlement of these estates, owing, as in Bogra, to the incompetence of the Settlement Officer.

23. *Chaurasi Estates in the 24-Parganas.*—Here again the Director has had

to notice unnecessary delay in various stages of the settlement operations. Attestation and the settlement of rents have now been completed and the operations should be soon concluded.

Tantibunia Estate in Khulna.—The survey and initial record-writing were completed in 1894-95, and the records were completed and finally published during the year under report. The Director states that the final report will be submitted as soon as orders regarding the apportionment and realisation of costs have been received. The cost of the settlement proceedings during the year was Rs. 4,141.

No special remarks are required regarding the work in the other private estates in which settlement proceedings were in progress during the year 1895-96.

24. *Burdwan Raj khas mahals.*—This settlement has been completed, the expenditure during the year being Rs. 10,575, and the total cost of the settlement, exclusive of survey, from the beginning being Rs. 51,641. The Board state that they are now awaiting the final report.

Dakshin Shabazpur Estate.—The final report has been submitted by the Collector, and the Board are now awaiting the Director's review of the settlement. The total expenditure amounted to Rs. 99,480, including the cost of apportionment and recovery, of which Rs. 77,962 were recoverable under section 114, Tenancy Act. Of this amount Rs. 60,448 have been realized, and certificates have been issued for the balance.

Srirampur Estate.—This settlement is now concluded, and the final report is awaited by the Board.

Narhan Estate.—Sixty-two villages contained in an area of 58 square miles were traversed, 66 villages were cadastrally surveyed, covering an area of 53.75 square miles, and the initial record-writing of 60 villages was completed. Two villages were therefore unnecessarily traversed and six unnecessarily surveyed in detail. This was owing to the difficulty of ascertaining the villages in which the estate held an eight-anna share or more, and to the defective character of the records supplied to the Survey Department. The expenditure was Rs. 2,322 for traverse, Rs. 8,196 for cadastral survey, and Rs. 5,397 for record-writing, or a total of Rs. 15,915. The rate was high, due to the small programme, detached work, and considerable difficulties and delays in ascertaining the true extent of the estate lands. Attestation will be carried on in the present season. Some boundary and other disputes were decided, and the cost to the Settlement Department was Rs. 2,144.

25. The question of the maintenance of the records in Orissa has been considered in a preceding paragraph. Act III (B.C.) of 1895 was brought into operation in the thanas of Hajipur in Muzaffarpur and Bettiah in Champaran, and the Sub-Registrars of these thanas have been appointed as Registrars of Mutations. The Act has also been extended to the Sujamutha portion of the Burdwan Raj Estate. It is premature to offer any opinion on the working of this Act. Half-yearly returns of mutations of tenant right in large Government and Wards' estates have been submitted to the Director, who has discussed these returns fully in his report.

26.—AMENDMENT OF THE TENANCY ACT.—On the subject of the amendment of the Tenancy Act the Officiating Director, Mr. Lyon, writes:—

“In consequence of the constant complaints received from Settlement Officers and others as to the difficulties found in working those provisions of the Bengal Tenancy Act which apply to settlement operations, Sir Charles Elliott drew up, before leaving India, a minute on the subject, suggesting certain reforms in procedure which would require a modification of the law. Mr. Macpherson subsequently emphasised the difficulties under which work was being done in a letter to Government, No. 4818., dated 14th February 1896, in which he proposed that we should return to the provisions of Act VIII (B.C.) of 1879 for the purposes of the settlement of Orissa. The whole subject was taken up at a Conference summoned by His Honour the Lieutenant-Governor at Belvedere on February 16th and 21st, 1896, at which the Members of the Board of Revenue, with the Secretary to the Board, the Revenue Secretary to the Government of Bengal, Mr. Macpherson, Mr. Maude, and myself were present. In accordance with the results of the discussions at that Conference, a note was subsequently submitted by me, in which I endeavoured to summarise the difficulties felt by the officers who were entrusted with the conduct of settlement operations in Bengal, and the Board of Revenue submitted a draft Bill to amend the settlement provisions of the Bengal Tenancy Act. His Honour the Lieutenant-Governor then prepared a minute dealing with the whole question, and forwarded it to the Government of India with proposals for

legislation. The orders of the Government of India, approving of legislation, subject to the sanction of Her Majesty's Secretary of State for India, and a copy of the Despatch in which that sanction has been solicited, have been received since the close of the year."

27. The Lieutenant-Governor desires to thank the Director, Mr. Macpherson, the Officiating Director, Mr. Lyon, and the Superintendent of Settlement-Surveys, Captain Crichton, for the zeal and enthusiasm they have displayed and for the excellent work which they have done during the year. Regarding the services of other officers and gentlemen the Officiating Director writes:—

"The following Settlement and Assistant Settlement Officers rendered good service in the year under report:—Messrs. Allon, Colvin, Cumming, Gauntlett, Hughes, Kerr, Kingsford, Maddox, Roe,

Services of officers.
Stevenson-Moore, Thomson, and Webster, Mr. J. Taylor, Babu Sri Gopal Bhattacharya, Babu Haris Chandra Rai, Babu Prasanna Kumar Banerji, Babu Hara Krishna Mahanti, Babu Jogendra Narayan Mitra, Babu Durga Charan Ghose, Babu Girish Chandra Dutt, Babu Sasi Bhusan Dutt, Babu Siva Sunker Singh, Babu Bhupendra Nath Gupta, Babu Rai Krishna Bahadur, Pandit Rama Ballabh Misra, Maulvi Gholam Ghaus.

"It would be difficult for me to speak too highly of the admirable work that is being done by Mr. Maddox in Orissa. Mr. Stevenson-Moore has acquired a complete grasp of the needs of the settlement operations in North Bihar, and has submitted some admirable reports in connection with them in the course of the year. Mr. Cumming's thorough and careful work in Tippera is deserving of special notice, and Mr. Hughes has distinguished himself in Muzaffarpur by his indefatigable and intelligent supervision of a large staff of subordinates. Mr. Gauntlett in the supervision of khunapuri work in Saran, Mr. Kerr as Assistant Settlement Officer in charge in Motihari, Babu Prasanna Kumar Banerji in assessment work in Balasore, Babu Girish Chandra Dutt in his conduct of the operations in the Pataspur estate, Babu Siva Sunker Singh in recovery work in North Bihar, and Maulvi Gholam Ghaus in case-work in Saran, also rendered services of especial note.

"Mr. W. R. Bright continued to help the department with his careful supervision of settlement work in Midnapore, and Mr. Savage assisted us materially in Gaya. Captain Crichton, Superintendent of Settlement Surveys in Bengal, has, as in previous years, kept himself in touch with all the requirements of good record-writing, and has cordially co-operated with the Director of Land Records in all matters affecting his own department. Mr. E. Macnaghten has continued to give us valuable assistance as Secretary to the Bihar Indigo Planters' Association and has much facilitated the progress of the work."

His Honour also cordially endorses the praise bestowed by the Officiating Director on the officers mentioned in the extract above quoted, a copy of which will be communicated to the Appointment Department.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Government of Bengal.

RESOLUTION ON THE REPORT ON THE ADMINISTRATION OF THE OPIUM DEPARTMENT FOR THE YEAR 1895-96.

REVENUE DEPARTMENT—OPIUM.

Calcutta, the 22nd March 1897.

RESOLUTION—No. 1274.

Read—

The Report on the Administration of the Opium Department for the year 1895-96 (1st September 1895 to 31st August 1896).

The Lieutenant-Governor is pleased to notice that the Board's report was received by Government on the due date (1st February). The Board state that they received the Benares report on the 3rd December and the Bihar report on the 10th December, the due date being the 1st December. The submission of the Bihar report was delayed owing to difficulty felt in compiling the factory returns.

2. In their Resolution on the Opium Administration Report for the year 1891-95 (Resolution No. 2439S.R., dated the 8th June 1896), the Government of India laid down the principle to be followed in future in determining the extent of poppy cultivation, and ruled that the area of cultivation should, so far as possible, be fixed so as to produce 54,000 chests of provision opium annually in addition to 7,000 or 8,000 maunds of 90° consistence of excise opium. The Government of India were of opinion that no absolute quantity need be settled as the reserve of provision opium to be maintained, but that

the area of cultivation being fixed, the amount of the reserve will depend upon the produce of any year from that area, being added to or drawn from according as that produce is greater or less than the quantity fixed for sale in the year following. The Government of India then considered the average outturn of opium during the past 22 years from 1873-74 to 1894-95, and came to the conclusion that the area actually cultivated in 1895-96 was sufficient for normal requirements. They therefore directed that the efforts of the officers of the Opium Department in the Benares Agency should be devoted, during the settlements of 1896-97, mainly to securing good cultivation, while maintaining approximately the area under poppy as in 1895-96; on the other hand as the area cultivated in the Bihar Agency was much below the average of previous years, an extension might be made there, if the cultivators found it more profitable to grow poppy than other crops. The Board, in forwarding these instructions, directed the Opium Agents to carry out in the settlements for 1896-97 the policy laid down by the Government of India. The results of the action taken cannot be fully judged till the report for next year is received; but the Board state that the final figures show that, while in the Benares Agency there is an increased area of 43,514 bighas engaged for over that of last year, in the Bihar Agency the area is 9,971 bighas less than in the season now under report. Thus the instructions of the Supreme Government were not fully given effect to in either case. In Bihar the decrease in cultivation was due to the disinclination of the raiyats to cultivate more land with opium.

3. The following statement shows the area engaged for, the area sown, the net cultivation, and the produce in each Agency in the seasons 1893-94, 1894-95 and 1895-96:—

Season.	Area engaged for.	Area sown.	Net cultivation excluding failures.	Produce at 70° consistence.	Number of chests of provision opium actually manufactured.
1	2	3	4	5	6
<i>Bihar.</i>	<i>Bighas.</i>	<i>Bighas.</i>	<i>Bighas.</i>	<i>Maunds.</i>	<i>Chests.</i>
1893-94 ...	405,236	391,272	379,714	26,116	16,785
1894-95 ...	388,615	382,311	370,342	32,109	18,538
1895-96 ...	382,597	378,694	355,973	35,107	22,741
<i>Benares.</i>					
1893-94 ...	347,028	358,126	353,409	35,236	16,543
1894-95 ...	438,588	461,886	449,668	36,949	17,415
1895-96 ...	535,049	545,624	475,451	52,174	22,300

NOTE.—Out of the quantities shown in column 5 under Benares Agency, the following quantities were transferred to Patna, in order to equalise, so far as possible, the number of chests of provision opium manufactured in each Agency:—

					Mds.
1893-94	3,733
1894-95	3,900
1895-96	9,144

From this statement it appears that the raising of the price paid for crude opium to cultivators from Rs. 5 to Rs. 6 per seer from the year 1894-95 has not hitherto had the result of increasing the area of cultivation in the Bihar Agency, and that, in spite of the higher price paid, the area is still declining. On the other hand, the result in the Benares Agency has been to largely increase the cultivation, so that no further additional area is required. This difference in results is, no doubt, largely due to the fact that the profits of cultivation of ordinary crops are higher in the districts comprised in the Bihar Agency than in those of the Benares Agency. The Lieutenant-Governor would, however, draw the special attention of the Board to the decline in the area of

poppy cultivation in Bihar, and, having regard to the last Resolution of the Government of India, desires that strenuous efforts may be made to prevent further decline, and if possible to increase this area. The subject of the competition of other crops with poppy was discussed in last year's Resolution. There can be no question that sugarcane, potatoes, oil-seeds and other crops do compete with opium, and that the bad seasons of several years up to 1894-95 accentuated this competition. Both Agents are of opinion that a good season, with the enhanced price now paid for the drug, is sure to restore to poppy cultivation the popularity it formerly enjoyed. It must be noted however that there cannot always be good seasons, and that if on an average a cultivator finds other crops pay better than opium, he will cultivate them even if there be a bumper poppy season now and then.

The settlements of 1895-96 in Bihar resulted in a decrease of area in every Sub-Agency except Muzaffarpur, Hajipur, and Monghyr. As nearly 16,000 bighas were struck off the Muzaffarpur area in the preceding year, the increase of 690 bighas makes up only a small portion of the loss; while in Hajipur it appears that for a long time past cultivation that has never existed has been shown on paper, advances have been taken, and systematic deception practised. The Lieutenant-Governor awaits a full and complete report from the Board regarding this subject. The survey and settlement records should in future, if properly utilised, make such frauds impossible. In Monghyr the increase was one of 116 bighas only. In addition to the failure of the poppy crops of late years which, as previously noted, has accentuated the competition of other crops, the insecurity of land tenure is mentioned by the Bihar Agent as a cause of the decrease of cultivation. This statement is based upon the remarks of Mr. J. Christian, Sub-Deputy Opium Agent of Shahabad, that the Kooris are losing their occupancy-rights. The Lieutenant-Governor considers that even if this be the fact—and upon this point he would be glad to receive a further report from the Board,—it is not sufficient warrant for alleging the land tenure in Bihar to be insecure as compared with Benares. Now that a survey has been made and a record of rights prepared in Bihar, tenures there are at least as secure and probably more valuable than in the Benares Agency.

In the Benares Agency there was an increase of area in every Sub-Agency except Fyzabad, where the decrease was only nominal, owing to previous mismanagement and showing of false figures. This district is receiving the Agent's special attention. Mr. Wright personally supervised the work of settlement, and the results are exceedingly creditable both to him and to the officers of the department in the Benares Agency.

The Board refer again to the check-measurement work done in the several Sub-Agencies by gazetted officers. The figures for the year under report show some improvement on the whole, but the number of plots of which check-measurement was made and the number of cases detected in which opium had not been grown still vary very widely in different Sub-Agencies. There can be little doubt that this important duty is not properly executed by some officers. The Board should consider how the new survey maps and records can be utilised for the purpose of facilitating the settlements, and the checking of the measurements, and submit a report to Government on the subject. It is a matter for consideration whether the areas of plots under opium cannot in future to a large extent, at any rate, be taken from the survey maps and records without fresh measurements and checks.

4. The produce of 1895-96 showed an improvement over that of the previous year, the average per bigha being in Bihar 3 seers 15 chitaks, against 3 seers 7 chitaks

Outturn and sales. 2 kancha in 1894-95, and in Benares 4 seers 6 chitaks 1 kancha, against 3 seers 4 chitaks 2 kancha in the preceding year. These results are, however, below the average for the last 22 years in each case. In both Agencies the weather was somewhat unfavourable, but better than in the previous season. The worst results were in the districts north of the Ganges in the Bihar Agency, which suffered most from want of rain and where irrigation is defective, and in the trans-Gogra districts of the Benares Agency, which depend more upon rainfall than other districts, as there is less artificial irrigation. The best results were for

Bihar in the Shahabad and Tehta Sub-Agencies, and in the Mirzapur and Mainpuri divisions in Benares. In a season like that of 1895-96, it is specially noticeable how much greater the produce is from irrigated than from unirrigated lands, and this largely explains the differences of outturn in different districts. In 1895-96 there were in all 45,041 chests of provision opium manufactured as against 25,953 chests in 1894-95, giving an increase of 9,088 chests. After deducting the amount that was required to make up the deficiency of the previous year, it appears that, in order to obtain the 39,000 chests of opium to be sold in 1897, it will be necessary to indent on next season's crop of Benares opium for 1,511 chests, while the Bihar outturn will leave a surplus of 1,848 chests. It is satisfactory that the quantity of Nepal opium delivered rose from 97 maunds to 248 maunds, and it is anticipated that if the season be favourable a far larger quantity will be brought in next year.

Owing to the dry seasons the opium obtained at both Agencies was of exceptionally high consistence, the average being 77·87° in Bihar and 73·96° in Benares. This involved considerable loss to Government—firstly, through the higher payments made to cultivators, and secondly, on account of the smaller outturn of cakes manufactured. The Board report that, on the suggestion of Mr. Tytler, the Bihar Agent is consulting the Factory Superintendent, Patna, on the point whether the consistence of the drug supplied cannot be regulated. There were 766 lbs. of medical opium in cakes and 167 lbs. in powder manufactured during the year at the Patna Factory, and 33 lbs. of morphia acetate were turned out at Ghazipur. During the year Government sanction was accorded to the improvements required to the Laboratory at the Ghazipur Factory, and the Government of India approved of the proposal to send the alkaloids to London for sale instead of selling them to a Bombay firm. The details of the arrangements to be made are now being considered by Government.

5. The purchase of Malwa opium was continued in 1895-96, 4,112 maunds being bought, of which 1,408 maunds were of special quality, as free from oil as practicable. It is reported that efforts are being made to remove oil from the ordinary Malwa drug, and that Malwa and factory opium are now being mixed together in equal proportions for the manufacture of excise opium. The Board expect that the objection to the Malwa cake will disappear when this blended opium gets to consumers. The purchase of Malwa opium involves a loss of revenue to Government, and the Government of India have stated that it is not intended to continue this system longer than is absolutely necessary.

6. The expenditure of the year in the Bihar Agency amounted to Rs. 92,76,235, against Rs. 85,68,522 in the previous year, while in the Benares Agency the expenditure was Rs. 1,37,88,793, against Rs. 1,00,86,889 in 1894-95. The increase, therefore, was Rs. 7,07,713 in Bihar and Rs. 37,01,904 in Benares, making a total increase of over 44 lakhs of rupees. This increase was chiefly due to the larger outturn of opium during the year. The average cost per maund of opium on the net expenditure was Rs. 264-3-7 in the Bihar and Rs. 264-4-7 in the Benares Agency, as compared with Rs. 266-13-8 and Rs. 272-15-11 respectively in 1894-95. The average cost per chest of opium was Rs. 461-14 in Bihar as against Rs. 456-1-9 in 1894-95, and Rs. 480-12-4 in Benares as against Rs. 484-15-2 in the preceding year.

7. It is reported that out of a total cultivation of 355,973 bighas, exclusive of failures, in the Bihar Agency, 281,904 were irrigated and 74,069 unirrigated; and out of a total area of 475,451 bighas in the Benares Agency, 460,301 were irrigated and 15,150 were unirrigated. In Bihar there was a noticeable increase of irrigated lands in Tehta and a decrease in Aliganj, while there was a heavy fall in the unirrigated area in Hajipur, the reason for which is not given by the Agent. In the Benares Agency there are only four divisions with unirrigated tracts, and nearly half of this area lies in the Gorakhpur division. There was a heavy increase in unirrigated lands in Gonda and Sitalpur, the causes of which are not explained. There were Rs. 38,805 advanced for wells in Bihar in 1895-96, against Rs. 17,923 in 1894-95, the increase being due to the

dry season. It is stated that 349 pukka and 3,943 kutcha wells were constructed, and 134 pukka wells repaired with the help of these advances. In Benares there were Rs. 13,063 advanced, against Rs. 8,202 in the preceding year, insufficient rainfall being the cause of the increase as in Bihar. There were 61 pukka and 1,671 kutcha wells constructed, and 177 pukka and 75 kutcha wells repaired. In both agencies the sums advanced for construction of wells were small. The Benares Agent mentions that in the Oudh division zamindars object to wells being sunk on their lands, as statutory tenants cannot be ejected without compensation for improvements. The Lieutenant-Governor would reiterate the remark made in last year's Resolution that the construction of pukka wells should be encouraged, as they form permanent improvements and are probably cheaper in the long run, and he would be glad to see larger amounts of money advanced annually for this purpose. The law, in the North-Western Provinces allows tenants at fixed rents and occupancy tenants and in Oudh and Bengal, all tenants to make wells without the consent of their landlords, where the landlords are unwilling to make them themselves, and this being so the objections of the landlords need not interfere with the extension of wells if the law is properly explained to the tenants.

8. There were 36,613 provision chests and 5,247 abkari chests made at the Patna Mill during the year, giving a total of 41,860, against 39,427 in the preceding year. All the provision chests were made out of mango wood, the cost being Rs. 2-5-3 per chest, as compared with Rs. 2-6-11 in 1894-95.

9. The following statement shows the figures relating to the breach of the opium law during the past two years:—

Branches of Opium laws.

	Cases investi- gated.		PERSONS—						FINES—				Rewards to informers.	
			Tried.		Convicted.		Acquitted.		Imposed.		Realized.			
	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.	1894-95.	1895-96.
1	2	3	4	5	6	7	8	9	10	11	12	13	14	15
									Rs.	Rs.	Rs.	Rs.	Rs.	Rs.
Bengal	1,065	833	1,149	976	1,115	848	187	191	23,567	26,457	17,211	17,252	21,017	20,695
North-Western Provinces ...	586	519	610	600	490	462	150	178	9,842	8,314	5,075	4,580	4,506	4,274

* Seven persons pending trial.

There were fewer cases investigated in both Agencies in 1895-96 than in 1894-95. The figures regarding fines show that, whereas the average fine per person convicted was Rs. 31 in Bengal, it was only Rs. 18 in the North-Western Provinces and Oudh, and that the realisations of fines were much worse in the latter than in the former province. The Bihar Agent mentions an important case in which three men attempted to smuggle over a maund of an extract of opium from Nepal into the Panjab. They were convicted and sentenced—two men to one year's rigorous imprisonment and Rs. 100 fine each, and the third man to Rs. 100 fine. The Benares Agent mentions several cases of importance in which persons were convicted of illicit possession of opium, and also gives in detail an account of a case of opium smuggling from a Native State in which the accused was sentenced to nine months' rigorous imprisonment.

10. The asamiwar system was introduced experimentally into the three kothis of Barhi, Adapur, and Phulwari in Bihar during the year under report, under the supervision of Mr. A. G. Tytler, C.I.E. The result of this trial has been to show that, except in Barhi, the cultivators do not care for the Benares system in its integrity. An alternative scheme has been drawn up by Mr. Tytler, and the Lieutenant-Governor has sanctioned the trial of this scheme from the 1st September 1896 in the three kothis of Aliganj.

11. The thanks of the Lieutenant-Governor are tendered to Mr. Lyall (whose services the Government was sorry to lose) Merits of officers. and to Mr. Grimley for their careful supervision of this important Department, and to Messrs. Wright and Grierson, the Agents, for their efficient management of their respective Agencies. Among the officers named as having done specially good service during the year are Messrs. Tytler, Drummond, Blair, Currie, Christian, Graham in the Bihar Agency, and Dr. Sedgefield, Messrs. Gregory, Levett-Yeatts, Pigot and Rai Gunga Charan Roy Bahadur in the Benares Agency.

12. Sir Alexander Mackenzie is glad to be in a position to announce that the prospects of promotion, pay and travelling allowances of the officers of the department will be considerably improved under a scheme recently sanctioned by the Government of India. New rules for admission to the Department are under consideration, and it is hoped that the field of recruitment will soon be considerably enlarged.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

IDENTIFICATION OF OLD OFFENDERS BY ANTHROPOMETRY AND FINGER IMPRESSIONS.

No. 1753J (Police).—The 23rd March 1897.—The following is published for general information.

C. W. BOLTON,
Chief Secretary to the Government of Bengal.

No. 2471, dated Calcutta, the 13th March 1897.

From—E. K. HENRY, Esq., C.S., Inspector-General of Police, L.P.,
To—The Chief Secretary to the Government of Bengal.

In continuation of previous reports (the numbers and dates of which are given in the margin), I have the honour to submit information regarding the working in this Province, during 1896, of the anthropometric system, and also regarding the progress made in elaborating a system of classifying impressions with a view to substituting identification by finger prints for anthropometry.

II. During the year, 2,101 persons were on arrest, treated as unidentified. By sustained enquiry, the local Police succeeded subsequently in recognizing 1,270 of them, leaving a balance of 831 persons unidentified, with whom Anthropometry had to deal.

The following table, which gives statistics for three years, shows that the success achieved has been progressive, and that the figures compare favourably with those submitted for Provincial France by Monsr. A. Bertillon, to the Fourth International Congress of Criminal Anthropology held at Geneva in August 1896:—

YEAR.	Total number of cases in which identity established by Anthropometry.	Number in column 2 referred by Bengal districts.	Total number of persons in Bengal districts whose identity local Police failed to ascertain.	Percentage of success from Bengal districts (column 4 to column 5).	Percentage of success, with females, juveniles, and non-British subjects excluded from total of column 4.	Number of cases identified by the Paris Bureau on reference from French Provinces	REMARKS
1	2	3	4	5	6	7	8
1894 - ...	143	112	536	21	27	158	
1895	207	168	641	25	31.4	151	
1896	334	252	831	28	42.3	..	

The figures in column 2 for 1896 include 69 cases identified for the Calcutta Police, 27 for Assam, 1 for Burma, and 1 for the North-Western Provinces.

The figures of column 6 are arrived at by deducting females and juveniles who are not liable to measurement, and non-British subjects belonging to States where anthropometry has not been introduced, from the totals of column 4 for the purpose of calculating the percentage. In 1896, there were 14 females, 53 juveniles, and 103 non-British subjects.

III. These statistics may be relied upon, as much care is taken at the Central Office to guard against bogus identifications. In three cases—one from Mymensingh and two from Nadia—references were made to the Central Office regarding men actually residents of these districts, the explanation offered being that, although the identity of the suspects was known, it was thought, as they were of wandering habits, that they might have been convicted in distant places, intimation not having been sent to their native districts. Of the 334 persons identified, 109 were ascertained to have given correct names and addresses. As pointed out last year, such information, until tested, is of no value, as criminals, to defeat enquiries, occasionally give the names and addresses of persons other than themselves. This information might have been verified by calling witnesses, a tedious and expensive process, which was rendered unnecessary by the testimony afforded by the anthropometric data. When the cases came to trial, the evidence required by law as to the fact of

previous criminality and identity had of course to be produced by the local Police, who, from the information supplied by the Central Office, knew where to seek for it.

IV. This outturn justifies the opinion that the anthropometric system is being worked on sound lines and effectively, since, by means of it, 4 out of every possible 10 cases were identified, some of the identifications being from areas not in any way under the departmental control of the Bengal Police Office, as Assam, the North-Western Provinces, Burma, the Calcutta Police.

V. Satisfactory as are these results, longer experience has convinced me that it is possible to substitute, with gain of power and saving of expense, labour and time, a system of identification by finger impressions only, not supplemented by measurements. The difficulties experienced during the last two years in devising an effective system of classifying have at length been overcome. A statement in parallel columns of the strong and weak points of either system will illustrate the advantages claimed.

Anthropometry.

1st.—Instruments are costly, liable to get out of order, and not easily replaced.

2nd.—Measurers have to be put through a somewhat lengthy course of instruction and must be possessed of sufficient education to understand the significance of the figures of the decimal scale.

3rd.—The “Personal Equation” error, due to negligence or want of skill on the part of the measurer in taking, reading or transcribing figured results, must always remain a probable source of failure.

4th.—Recording measurements occupies much time, as each measurement is taken three several times and the mean only accepted. Marks and scars are noted, and this necessitates the body being exposed. High caste measurers express repugnance at having to touch the feet of low caste men, and the persons measured object to the uncomfortable positions into which they are forced.

5th.—Search in the almirahs is particularly onerous, because allowance must be made for the “Personal Equation” error. For instance, when a card with Length of Head 18.4 is received, it is necessary to assume that the measurer may have gone wrong within 2 millimetres either in excess or defect, and search accordingly is made between 18.6 and 18.2, but the former comes under limit “Long” and the latter under limit “Medium”; i.e., different pigeon-holes have to be examined. Similar allowance has to be made in respect of the other five measurements, with the result that on an average, nine pigeon-holes must be searched, the process, now that our Criminal Record consists of about 30,000 cards, occupying over one hour.

6th.—The strongest feature is the excellence of the system of primary classification, whereby roll-cards are distributed amongst 729 pigeon-holes. In this country, owing to there being little variation in the pigmentation of the iris of the eye, or in the colour of the hair, secondary classification upon the data we possess presents many difficulties.

Identification by finger prints.

1st.—Accessories needed, a piece of tin and some printer’s ink, are inexpensive and procurable everywhere.

2nd.—Any person, whether educated or not, after half an hour’s practice, can take legible finger impressions.

3rd.—As impressions are self-signatures free from all possible errors of observation and transcription, the “Personal Equation” error may be wholly left out of account.

4th.—The impressions of the ten digits can be taken in one quarter of the time needed for measuring. No record of marks and scars is needed, consequently the subject has not to divest himself of his clothes. High caste men do not object to taking finger impressions; even *pardanishin* ladies now give a thumb impression when admitting before a Registrar, the execution of deeds.

5th.—Search is comparatively rapid. By the aid of rigid definitions transitional cases have been wholly eliminated, and search consequently has to be made under one classification number only, and not under several. With criminal records of similar volume, search amongst finger impressions would be manyfold more rapid and, according to my experience, more certain.

6th.—An arrangement similar in principle to the Bertillon system, only more exhaustive, has been devised, whereby finger impressions are, in primary classification, rapidly subdivided amongst 1,024 pigeon-holes, and wherever there is accumulation, effective means of secondary classification have been worked out.

Anthropometry.

7th.—It has been claimed that the probability of all six measurements of two different persons agreeing is so small, that a fraction with a denominator of five figures would be required to express it arithmetically. The assertion would be correct if no allowance had to be made for the "Personal Equation" error, but in practice such allowance (i.e., from 4 to 6 millimetres) is and must be made, and, as coincidences in measurement have occurred, no positive deductions from measurements as to identity can be deemed safe.

Identification by finger prints.

7th.—Each of the ten impressions taken has its own individual "minute peculiarities," which can be observed and described. If for purposes of establishing identity, a couple of minute peculiarities in each impression on a card under search, are selected, sought for, and found in a duplicate, the probability that the impressions on the card under search, and on the duplicate, are those of the same person, is of a higher degree than that which, to most minds, ordinarily represents certainty.

VI. We have ready classified over 8,000 sets of finger impressions with about 600 duplicates, so the materials for subjecting the system to severe tests are ample. If it answers these tests, there will remain no room for doubt that identification by finger impressions must, owing to its inherent advantages, supersede anthropometry everywhere in this country, and also in Europe, and the subject consequently is of more than provincial interest. I venture, therefore, to ask that the Government of India be moved to appoint a small independent Committee to enquire into and report upon the system. Since the beginning of the present year, anthropometric data are no longer taken for permanent record in Bengal. Unidentified persons are being measured as before, so that the existing anthropometric criminal record may be utilized, but the finger impressions only, and not the measurements of new convicts, are being taken.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No. 694 State.—The following is published for general information.

M. FINUCANE,
Secy. to the Govt. of Bengal.

M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICAL DEPARTMENT,
The 23rd March 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA
IN FOOD-GRAINS.

No. 699 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 23rd March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 14th March 1896 and 1897 is shown in the following statement:—

1	8TH TO 14TH MARCH			
	1896		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Imports.</i>				
From Foreign Ports ...	84,887	1,15,540	243,264	3,31,109
„ Indian „ ...				
Total ..	84,887	1,15,540	243,264	3,31,109
<i>Exports.</i>				
To Foreign Ports ...	216,358	2,94,487	65,074	88,573
„ Indian „ ...	84,752	1,15,357	5,678	7,728
Total ...	301,110	4,09,841	70,752	96,301

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period last year:—

1	8TH TO 14TH MARCH			
	1896.		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice ...	54,549	74,247	197,640	2,69,010
Paddy ...	23,616	32,144	32,454	44,173
Wheat
Gram and pulses ...	6,722	9,149	9,183	12,499
Other food-grains, such as jowar, barley, oats, &c.	3,987	5,427
Total ...	84,887	1,15,540	243,264	3,31,109

During the week under report, rice continued to be imported in large quantities from Burma, namely, 171,214 cwts., against 188,209 cwts. in the week ending 7th March 1897. The only other ports from which rice was imported into Calcutta were Balasore and Chandbali, but the shipments from those places showed a heavy falling off in comparison with those in the corresponding period of last year. Rangoon supplied 9,548 cwts. of paddy, which accounts for the increase shown under this head. The improvement under gram and pulses and miscellaneous food-grains was due to larger despatches from the Madras ports and from Rangoon.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the second week of March 1897 is compared with the figures for the corresponding period of 1896.—

1	8TH TO 14TH MARCH			
	1896.		1897.	
	2	3	4	5
<i>Food-grains.</i>	Cwts.	Mds.	Cwts.	Mds.
Rice	278,302	3,78,800	64,572	87,889
Paddy	2,889	3,932
Wheat	488	664	265	361
Gram and pulses	19,431	26,448	4,945	6,731
Other food-grains, such as jowar, barley, oats, &c.	970	1,320
Total	301,110	4,09,844	70,752	96,301

The total quantity of rice exported to foreign ports fell off from 203,024 cwts. in the corresponding period of last year to 63,894 cwts. during the week under report. The exports in the preceding week were 120,039 cwts. There was a heavy decline in the quantities sent to Ceylon, namely, 7,412 cwts., against 110,055 cwts. in the preceding year; the increase in exports to Muscat and Persia amounted to 24,822 cwts. and 8,676 cwts. respectively, while Natal received 11,232 cwts. against nil in 1896. To the United Kingdom, Germany and Aden, to which large exports were made during the corresponding period of 1896, there were no exports at all. The decrease under gram and pulses was due to the cessation of exports to the United Kingdom.

With the coast ports there was practically no trade in food-grains. The consignments of rice fell off from 75,278 cwts. to a merely nominal figure (678 cwts.), and those of gram and pulses from 7,056 cwts. to 3,839 cwts. in comparison with the corresponding week of 1896.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 14th March 1896 and 1897.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 693 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 13th March 1897, both days inclusive, to have been 23,47,137 maunds. The destination of 21,86,269 maunds is specified. About seven-tenths of this quantity (15,17,677) was carried to the North-Western Provinces and Oudh, a little more than one-seventh (3,36,917 maunds) to stations in Bengal, and the rest (3,31,675 maunds) to other provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 23rd March 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks and Port Trust Railway) by the East Indian Railway from 1st January to 13th March 1897.

WEATHER AND CROP REPORT.

For the week ending the 22nd March 1897.

Burdwan.—No rain. Weather cloudy. *Rabi* harvest nearly over. Sugarcane still being pressed. Rain wanted for ploughing. Fodder sufficient. Water getting scarce in some villages. Condition of cattle good. Common rice selling as follows:—

			Srs. c.	Srs. c.	
Sadar	10 0	to 12 0	} per rupee.
Kalna	11 0	
Katwa	10 15	to 11 2	
Raniganj	10 2	

Birbhum.—75 rain registered at Sadar on the night of 21st instant. Weather hot. Price of common rice at Sadar 9½ seers, and at Rampur Hât 10½ seers per rupee.

Bankura.—Rainfall at Bankura 1·07. Weather cloudy from the 20th instant with occasional storms. The rain has facilitated ploughing. Harvesting of wheat going on. Pressing of sugarcane continues in places. Water insufficient in a few places. Fodder everywhere sufficient. Common rice selling at Bankura 11 seers, and Vishnupur 11½ seer per rupee.

Midnapore.—No rain. Weather rather unsettled. Prospect of indigo not good. Plantation of sugarcane going on. Wheat and barley are being cut in Garhbeta. *Boro* is being sown in Binpur and Gopiballavpur. *Til* is still being sown. Cattle-disease reported from Keshpur, Binpur, Dantun, Benapura, Ramnagar, and Chandrakona. Fodder sufficient except in Chandrakona and water except in Garhbeta. Common rice selling as follows:—

			Srs.		
Sadar	11	} per rupee.
Contai	12	to 14	
Tamluk	11½	
Ghatal	11½	to 12½	

Hooghly.—A shower of rain on the night of 21st instant. *Boro* doing well in some places. Common rice sells from 9 to 11 seers per rupee.

Howrah.—Rainfall nil. Weather hot and cloudy. Prospect of *rabi* not good. Fodder and water sufficient. Common rice sells at 8½ to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar ·06. Weather warmer with cloud. Prospects of crops poor. Ploughing is going on, but more rain is wanted. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

			Srs. c.		
Sadar	9 to 11	0	} per rupee.
Barasat	10	0	
Basirhat	10	8	
Diamond Harbour	10	10	

Nadia.—Rainfall nil. Rain urgently needed for ploughing of lands for *aus*. Harvesting of *rabi* crops almost over. Water-supply generally deficient. Fodder insufficient in places. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9 seers per rupee. Numbers on relief on Saturday, 20th March—

			Men.	Women.	Children.	Total.
Relief-workers	5,416	844	597	6,857
Dependants	15	59	1,665	1,739
Otherwise relieved	1,015	4,403	1,329	6,807
Test-workers	406	Nil	8	414
			Total	15,817

Murshidabad.—No rain. Weather hot and at times cloudy. Harvesting of *rabi* still continues. Pressing of sugarcane going on. Indigo doing fairly well, but mulberry has suffered greatly from want of rain. Fodder sufficient. Common rice sells as follows:—

			Srs.		
Sadar	10		} per rupee.
Kandi	10½		
Jangipur	10		

Numbers on relief on Saturday, 20th instant, Sadar and Kandi subdivisions—

			Men.	Women.	Children.	Total.
Test-workers	2,646	10	152	2,808

Jessore.—Weather hot, comparatively dry, and cloudy for three days. Storm on night of 21st, with a shower of rain lasting for a few minutes. Rainfall at Jessore 21, Jhenida 01. This will do some good to cultivation, but more is urgently wanted for *till*. *Boro* doing well. Fodder available except in Chowgacha and Keshabpur thanas. Water scarce in places. Cattle-disease reported from Banga. Common rice sells as follows:—

				Srs.	
Jessore	10 to 10½	} per rupee.
Jhenida	9½	
Magura	10 to 10½	
Narail	10 to 10½	
Bangaon	10 to 11	

Khulna.—No rain. Weather hot. Prospect of *boro* fair, but rain needed urgently. Common rice sells as follows:—

				Srs.	
Khulna	10 to 12	} per rupee.
Bagerhat	12	
Satkhira	9½	

Relief wages calculated at 10 seers per rupee. Fodder available. Water scarce. Numbers employed on fourteen relief-works—

			Men.	Women.	Children.	Total.
Relief-workers	1,292	Nil	122	1,414
Otherwise relieved	569	1,956	1,176	3,701
Total						5,115

Rajshahi.—No rain. Transplantation of *boro* paddy over. Sowing of jute and *bhadoi* going on slowly. *Till* has commenced to be sown in some places. Fodder available. Scarcity of drinking-water reported from Nauhatta outpost. Price of common rice ranges between 9 and 11 seers per rupee. Three test-relief works open. Numbers on Saturday, 20th March—

			Men.	Women.	Children.	Total.
Test-workers	899	Nil	18	917

Price of rice at relief-works, 8 to 9½ seers per rupee.

Dinajpur.—Rainfall nil. Weather seasonable. Lands are being prepared for *bhadoi* rice and jute. Condition of cattle good. Fodder and water sufficient. Price of common rice 10 seers per rupee.

Jalpaiguri.—Weather seasonable. *Betri* plants are withering for want of rain, and its cultivation is retarded in many places for want of moisture. A few showers of rain have fallen to-day (22nd), which may do some good to the crop. Drinking-water drying up in places. Fodder-supply fair. Average price of common rice, 8½ seers per rupee.

Darjeeling.—No rain. Weather seasonable. Hills—Wheat and barley coming to perfection; *phaphur* and potatoes being harvested; *bhutta* being planted. Terai—Ploughing for *bhadoi dhan*, and jute going on. Price of coarse rice:—

				Srs.	
Hills	7 to 8	} per rupee.
Terai	9 to 10	

Bhutta, 13 to 16 seers per rupee.

Rangpur.—No rain. Sowing of *aus* going on. Lands mostly prepared for *aus* and jute. Rain wanted. Cutting of tobacco commenced. Common rice selling at 9 to 10 seers per rupee. Fodder and water sufficient except in the Kurigram subdivision.

Bogra.—No rain. Weather warm and cloudy. Sowing of jute and *aus* in progress. Fodder and water sufficient. Price of common rice at head-quarters 10½ seers, and in the interior from 9 to 11½ seers per rupee.

Pabna.—Rainfall at Sadar 34. Weather hot and partially cloudy. No change in prospects of standing crops. Common rice sells at 9 to 10 seers per rupee. Fodder plentiful. Numbers on relief on Saturday, 20th March—

			Men.	Women.	Children.	Total.
Test-workers	170	Nil	38	208

Dacca.—Rainfall nil. Weather hot. Prospects of standing crops fair. Fodder available. No cattle-disease. Want of drinking-water in some parts. Price of common rice 10 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 40. Weather cloudy with stormy wind. *Aus* and *jute* sowings commencing. The recent rain will improve *boro* crop. Cattle-disease reported from Sadar and Netrokona. Price of common rice 9 to 10 seers per rupee.

Faridpur.—No rain. Weather hot. Rain wanted very badly. Price of common rice 9 to 11 seers per rupee. No cattle-disease. Fodder sufficient, but want of water beginning to be felt.

Backergunge.—Rainfall at Sadar .55. Weather seasonable. Prospects of crops poor. Common *aman* rice selling at 9 to 12 seers per rupee.

Tippera.—Rainfall at Sadar .07, Brahmanbaria .1. Occasional clouds with wind. Nights still cool. Prospects of *rabi* crops good in north of district. Want of water reported from many places in Chandpur. Price of rice—

	Srs. c.	Srs. c.
Sadar	...	9 8 to 11 0
Brahmanbaria	...	10 0 to 12 0
Chandpur	...	10 0 to 11 8

} per rupee.

Noakhali.—Rainfall this morning (22nd) at Sadar .62. State of standing crops not good. Fodder and water not sufficient. Price of common rice 8 to 10 seers per rupee.

Chittagong.—Rainfall .44. Weather warm and occasionally cloudy. Prospects not good. More rain wanted. Water and fodder sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease continues.

Patna.—No rain. *Rabi* crops being harvested and threshed. Tobacco, poppy plants, and *rahar* being cut and dried. Sugarcane and millets doing well. Fodder and water for sufficient. Prices rising slightly in Barh. Price of common rice at Patna 10½ seers per rupee. Numbers on relief on Saturday, 20th March—

	Men.	Women.	Children.	Total.
Relieved in poor-houses	40	15	12	67
Otherwise relieved	3	3	Nil	6
Total	73

Gaya.—No rain. Harvesting of *rabi* nearly finished. Outturn very good. Price of common rice at Sadar, 9 seers per rupee.

◆ **Shahabad.**—No rain. Sugarcane plantation finished. *Rabi* harvest in progress. Collection of opium nearly over. Fodder for cattle in Bhabua not sufficient. Price of common rice 8½ seers per rupee at Bhabua and 9½ seers at Arrah. Numbers on relief on Saturday, 20th March—

	Men.	Women.	Children.	Total.

Otherwise relieved	41	83	1	125
Total				16,255

Cuttack.—

Puri.—

Balasore.—No rain. Ploughing going on in parts. *Sarad* rice being threshed. Harvesting of *datura* crop commenced. Sugarcane being pressed. Price of rice varies from 12 to 16 seers per rupee in the interior. Rice sells at 12 and 14 seers per rupee at Balasore and Bhadrak respectively. Fodder and water sufficient.

Angul.—No rain. Weather seasonable. Fodder scarce, and anthrax, fever and pox among cattle continue. Matters in Khoudmala satisfactory. Price of coarse rice 15 to 16 seers per rupee in both subdivisions. No special demand for labour.

Hazaribagh.—Rainfall at Sadar 40. The cloudy weather and rainfall have seriously affected the prospect of *mahun*. It may recover with bright sunshine. *Rabi* has done well.

Poppy is a good crop. Sugarcane promising. Price of rice 8 to 19½ seers per rupee. Numbers on relief on Saturday, 20th March—

	Men.	Women.	Children.	Total.
Test-workers	924	742	520	2,186
Fed at kitchens	80	60	100	240
Cotton workers	600
Total	3,026

Lohardaga.—Rainfall 31. Ploughing continues. State of *tauca dhan* and prospect of *mahua* continue favourable. Rice sells at Ranchi 8 seers, and in the interior from 8 to 12 seers per rupee. No report of cattle-disease. Fodder and water sufficient. Grain in stock sufficient for the present.

Palamau.—Weather clear and bright up to Saturday afternoon; since then very stormy and wet. Weather seriously damaging to *rabi* and *mahua*. The extent of damage not yet ascertained, but the general impression is that more than half *mahua* is lost. Prices slightly improved. Rice getting scarce in the district; only 339½ maunds of bounty Burma rice imported. Cattle-disease reported from some places. Numbers on relief—

	Men.	Women.	Children.	Total.
Relief-workers	832	502	237	1,571
Otherwise relieved	386	630	190	1,206
Total	2,777

Manbhum.—Rainfall 24 on 22nd. Weather cool. *Mahua* being gathered, and being somewhat injured by wet weather. Rinderpest reported from thanas Purulia, Baghmuthpur, and Chandil. Fodder and water sufficient at present. Common rice sells at Sadar 10 seers, and at Gobindpur 9 seers per rupee. Supply sufficient at present—

	Men.	Women.	Children.	Total.
Test-workers	1,395	979	237	2,611
Dependants	40	66	66	172
Gratuitous relief	748	1,615	1,326	3,689
Total	6,472

Singhbhum.—Rain on Saturday night. Rice plentiful. Price of rice 9 to 12 seers per rupee.

General Summary.—There were scattered, and in some places heavy, showers, accompanied by high winds, in many districts on the 21st and 22nd instant. These showers have done good to the spring crops, and have facilitated the ploughing and sowing of the autumn crops. It is said to have done some damage to the *mahua* crop in Chota Nagpur. The harvesting of the *rabi* crops is in active progress, and the collection of opium is nearly finished. The pressing of sugarcane still continues. The supply of fodder is still generally sufficient, but water is getting scanty in many parts of Bengal Proper. Prices show but little change during the week. In the distressed districts the prices of the staple food-grain on which the famine wage is based are—Nadia (common rice) 9 seers, Khairia (common rice) 10 seers, Rajshahi (common rice) 8 to 9½ seers, Patna (common rice) 9 to 10 seers, Patna (common rice) 10½ seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (barley) 13 seers, Champaran (Indian-corn) not reported, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) seers, Bhagalpur (common rice) 10 and 10½ seers.

The numbers on relief on Saturday, 20th March, were —

Nadia	15,817

STATISTICAL DEPARTMENT,
The 19th March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of February and the first fortnight of March in 1897, as compared with the corresponding fortnights of February and March in 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, the 23rd March 1897.

Quantity obtainable for a rupee.

				Inches.
The total fall of rain from 14th to 20th March 1897	Nil
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.18
The total fall from 1st January to 20th March 1897	1.63
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2.46

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground. The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office. The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula. The directions and the movement of the wind are taken from the trace of a Beckley's anemograph. The mouth of the rain-gauge is one foot above the ground.

☁ dew, = fog, o overcast.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,
Calcutta, the 22nd March 1897.

J. H. GILLILAND,

REORGANIZATION OF THE SUPERIOR SERVICE OF THE EDUCATION DEPARTMENT.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 26th March 1897.

RESOLUTION—No. 1244.

READ—

- (1) Resolution No. ^{Education}~~304-87~~, dated the 23rd July 1896, from the Government of India in the Home Department.
- (2) Letter No. 959T., dated the 27th October 1896, from the Offg. Director of Public Instruction.
- (3) Letter No. 987T., dated the 30th October 1896, from the Offg. Director of Public Instruction.
- (4) Sir Alfred Croft's note, dated 15th February 1897.

1. Sir Alexander Mackenzie regrets the delay which has taken place in settling this difficult question. This delay was due to the serious illness of Sir Alfred Croft whose mature advice regarding the many problems involved was much to be desired.

2. The provisions of the scheme, as sanctioned by the Right Hon'ble the Secretary of State, are the following:—

The Department of Education is to be divided broadly into (A) the Superior Service and (B) the Subordinate Service. The former will consist of two branches, one including all posts to be filled by persons appointed in England, which will be called "The Indian Educational Service," and the other, including all posts to be filled by recruitment in India, which will be known as "The Provincial Educational Service."

The Indian Educational Service is to consist of 27 officers, including the Director of Public Instruction, Assam, the Inspector of European School-, and the Superintendent of the School of Art.

The appointments to be included in this service are—

5 Inspectors of Schools (including the Director of Public Instruction, Assam, and the Inspector of European Schools).

5 Principals of Colleges, viz., those of—

The Presidency College.
The Sibpur Civil Engineering College.
The Patna College.
The Dacca College.
The Calcutta Madrasah.

13 Professors, viz.—

8 in the Presidency College.
2 in the Sibpur Civil Engineering College,
2 in the Patna College,
1 in the Dacca College.

1 Superintendent of the School of Art.

3 officers to fill vacancies.

Total ... 27 officers.

The Provincial Educational Service is to consist of 104 officers, as follows:—

5 Inspectors of Schools.
10 Assistant Inspectors
7 Principals and
51 Professors of Colleges.
24 Head-masters of Collegiate and Training Schools.
7 Others, including the (1) Assistant Superintendent and the (2) Head-master of the School of Art, (3) the Personal Assistant to the Director of Public Instruction, and (4) supernumerary appointments (Professorships) to be filled by Indian gentlemen with degrees from the Universities of England, Scotland and Ireland, or by Promchand Roychand students.

Total ... 104

That is, the Superior Service is ultimately to consist of—

				Officers.
Indian Educational Service	27
Provincial ditto	104
Total				131

The inclusion in the Provincial Service, on personal grounds, of nine other officers has received the sanction of the Secretary of State, and the number in that service was in this way to be brought up temporarily to 113. Of these nine officers, two have been absorbed by appointment to posts which bring them *by right* into the Provincial Service, and one has retired. The Provincial Service should, therefore, apparently consist now of 110 officers; but as the Indian Service numbers now three men more than the sanctioned number, the number in the Provincial Service must be temporarily reduced to 107: thus the Superior Service will at present consist of—

				Officers..
Indian Service	30
Provincial „	107
Total				137

By the 1st of May next, *i.e.*, after the retirements of Messrs. Ewbank and Stack, the service will consist of—

				Officers.
Indian Service	28
Provincial „	109
Total				137

The Director of Public Instruction will be instructed, when this can be done without impairing the efficiency of the department, to reduce the Superior Service to the proper number of 131 officers by the appointment of officers who are now placed in the service on personal grounds, to posts which properly belong to the Provincial Service.

3. It may be noted, in passing, that of the six Professors sanctioned for the Civil Engineering College, one is referred to in statement G attached to Sir Alfred Croft's No. 1414T., dated 28th June 1895, as "lately indented for from England." The Secretary of State has supplied for the post Mr. Tate, whom he appointed under covenant for five years on Rs. 500 a month, and has directed that this officer is to be reckoned as an officer of the Indian Service after his period of probation. For the present Mr. Tate is given a place in the Provincial Service in square brackets to show that, though not regularly belonging to the service, he nevertheless fills up one of the 104 posts included in the cadre of that service. On the termination of Mr. Tate's period of probationary service the Superior Service will consist of—

				Officers.
Indian Service	28
Provincial „	103
Total				131

This follows from the fact that the 27 officers originally provided for have all got posts assigned to them, and that Mr. Tate thus becomes an additional officer in the service.

INDIAN EDUCATIONAL SERVICE.

4. The names of the 30 officers who now form the "Indian Educational Service" (under which term is included here and in subsequent paragraphs of the Resolution the former graded Superior Service) are given below. To each

officer the choice of the old and the new service was given, in accordance with the orders of the Secretary of State, and the choice of each is recorded after his name:—

NAME OF OFFICER.	Service for which he has elected.
1	2
A. L. V. Ewbank	Old.
A. Pedler	Old.
F. J. Rowe	Old.
J. Willson	Old.
J. S. Slater	Old.
W. Booth	Old.
G. A. Stack	Old.
J. H. Gilliland	Old.
A. C. Edwards	Indian Educational Service.
J. Mann	Ditto ditto.
P. K. Ray	Old.
S. Robson	Indian Educational Service.
A. Macdonell	Old.
E. F. Mondy	Indian Educational Service.
M. E. DuS. Prothoro	Old.
H. M. Percival	Old.
A. F. R. Hornlo	Indian Educational Service.
S. C. Hill	Ditto ditto.
P. B. Mukerji	Old.
G. W. Kuchler	Indian Educational Service.
C. Little	Ditto ditto.
J. C. Bose	Old.
C. R. Wilson	Indian Educational Service.
N. L. Hallward	No choice.
H. R. James	Ditto.
W. B. Livingstone	Indian Educational Service.
B. Heaton	Question undecided.
C. W. Poake	Indian Educational Service (no choice given).
H. A. Bamford	Ditto.
E. B. Havell	Ditto.

5. At the time when a choice was given several factors of the scheme were unknown [notably (a) the number of staff allowances which will be allowed to the service, (b) the principle which will regulate promotions, and (c) the date from which effect will be given to the scheme], and Sir Alexander Mackenzie thinks that it is only proper that these officers should be given an opportunity of reconsidering their choice.

6. On the subject of staff allowances, the orders contained in the Government of India Resolution No. ^{4-Education} 204-15, dated 23rd July 1896, are as follows:—

The plan suggested by the Secretary of State in 1892 of attaching personal allowances to the office of Principal and senior Inspector of Schools has been adopted. There will be two grades of allowances of Rs. 250—50—500 and Rs. 200—10—250 a month, respectively, so as to correspond to some extent with the higher rates of pay in the graded list, which will be supplanted by the new system. The allowances will be strictly *personal*, within the meaning of the Civil Service Regulations, i.e., they will be held continuously by officers whether on duty or on leave (subject to the provisions of the leave rules in regard to allowances during leave), and will not be given to those who act for them during their absence. The following is the scale of allowances allotted to the several provinces:—

* * * * *

Bengal.—(a) Two allowances of Rs. 250—50—500 a month, and (b) three allowances of Rs. 200—10—250 a month. The allowances will be open to the two senior Professors only at the Presidency College, Calcutta, and to Principals of Colleges and Inspectors of Schools generally, the rule being that they should be given to the senior, or most deserving, men, and should not be treated as staff allowances attached to certain offices.

7. In connection with these orders, Sir Alfred Croft has noted:—

An unfortunate mistake has crept into the Proposition Statement, showing the new sanctioned scale. In paragraph 5 of the Government of India's letter No. 210, dated the 18th August

1894, it is stated:—"The Lieutenant-Governor agrees with the Government of India that there should be two personal allowances on the higher scale of Rs. 250—50—500. The Government of India are of opinion that the number of allowances on the lower scale should be fixed at four (one of which would be held by the Director of Public Instruction in Assam)." In my letter to Government, No. 1414T., dated 28th June 1895, I referred (end of paragraph 2) to the number of officers in the "European Service" (now styled "Indian") as 27; but in the attached Proposition Statement A, showing the financial effect to Bengal, I excluded the salary of the Director of Public Instruction, Assam, and reduced the number of officers to 26, with two higher-scale allowances and three lower. To the "three lower" I appended a foot-note, "Excluding the Director of Public Instruction, Assam"; but this was unfortunately misprinted "Including." The Government letter forwarding these Proposition Statements to India (No. 2832, dated 14th August 1895) explains (paragraph 3) that there are to be 26 officers of the European Service, "exclusive of the Director of Public Instruction, Assam"; and it was not noticed that Proposition Statement A showed 26 officers, *including* the Director of Public Instruction, Assam. The mistake was not subsequently detected, and it is repeated in Appendix B, attached to the Home Department Resolution of the 23rd July 1896, in which, while 27 appointments are shown, "including the Director of Public Instruction, Assam," there are only five personal allowances, two in the higher and three in the lower scale. I hope I am right in assuming that the mistake has only to be pointed out to be corrected, and that the number of personal allowances for Bengal and Assam together will be increased from five to six, as stated in India's letter quoted above. I should also point out that while in that letter the personal allowance for the Director of Public Instruction, Assam, was restricted to the lower scale, no such restriction finds a place either in the Resolution of the 23rd July 1896, or in Appendix B attached thereto. I presume that the original order stands good, but a definite ruling on the point seems necessary.

8. The Lieutenant-Governor agrees with Sir Alfred Croft in thinking that five staff allowances only were sanctioned for Bengal owing to the mistake referred to. The matter will be brought to the notice of the Government of India, with a recommendation that the mistake may be rectified.

9. In regard to the principle by which the promotion of officers coming under the old or under the new system shall be governed, Dr. Martin, in his letter No. 987T., dated 30th October 1896, proposed the following rule:—

No officer, to whichever service he may belong, will have any claim to promotion, be it to Class I or Class II of the graded service, or to one of the staff allowances in the Indian Educational Service, till such time as he would have had a legitimate expectation of preferment, on the supposition that the Education Department officers who were graded on the 1st July 1896 had elected for the particular service to which he belongs.

This rule is criticised by Sir Alfred Croft in the following terms:—

The necessity of a rule upon the point arises from the fact that there are eight (what may be called) staff appointments under the old system, and only six under the new. The officers affected could not claim more than eight staff appointments, however distributed between the old and the new service, but they seem at first sight to be entitled to six at any rate. If all the officers had chosen the old system, or all the new, there would be no difficulty; and Dr. Martin's proposed rule is based on this supposition. But the result of it would be that, as the distribution stands, the number of officers enjoying staff allowances might easily be not only less than eight, but less than six. This will be evident from the following illustration. On the 1st April Messrs. Fwbank and Stack and I shall have retired, and I assume that Dr. Martin will be appointed Director. The senior officers will then stand as follows in their order:—

<i>Old system.</i>	<i>New system.</i>
Pedler.	
Rowe.	
Willson.	
Slater.	
Booth.	
Gilliland.	
	Edwards.
	Mann.
Roy.	
Macdonell.	Robson.
Prothero.	Mon ly.
	Hornle.

Messrs. Pedler and Rowe will be promoted to Class I of the old service, and Messrs. Willson, Slater, Booth and Gilliland will remain in Class II. The other two appointments out of the six in Class II will be suspended. Messrs. Edward and Mann cannot claim them, because they have elected the new service, in which there are only six staff appointments. Dr. Roy and Mr. Macdonell cannot claim them, the way being blocked (under the assumed rule) by

Messrs. Edwards and Mann. Next let us suppose, what will probably be the case, that Messrs. Pedler and Willson go on leave from the 1st April. The two appointments in Class I will then be held by Messrs. Rowe and Slater. In Class II there will be Messrs. Booth and Gilliland and Dr. Roy, and no others will apparently be entitled to promotion. For the claim of Mr. Edwards to promotion is only valid on the supposition that all the officers above him have chosen the new service, and that one of the six personal allowances is left vacant for him. But the six allowances in the new service are strictly personal, and no junior officer succeeds to one when his senior goes on leave. Mr. Edwards, therefore, would have no claim, nor similarly would Mr. Mann. The claim of Mr. Macdonell is barred by Mr. Robson, the eighth remaining officer in the list. Hence, only five staff appointments would be enjoyed. To take an extreme supposition, if all the first six officers on the list were on leave together, no officer in the new service would, under the proposed rule, be entitled to promotion, and the only promoted officers in the old service would be three,—Messrs. Roy, Macdonell and Prothero. No officer in the new service would, in fact, be entitled to promotion until one of the six senior men had retired.

These are the obvious objections to the proposed rule; briefly, that the number of staff appointments actually held at one time would often be less than the number sanctioned under either system. But having given the subject full consideration, I am inclined to think that Dr. Martin's proposal is sound. It is certainly, in my opinion, correct as regards permanent promotions. With regard to officiating promotions there is room for doubt, but even so, it may be defended. The rule is based on the principle that no officer can rightfully claim any advantage which would not have been open to him had all his seniors elected the service to which he belongs. Therefore, no junior officer in the old service can claim promotion merely from the fact that senior officers in the new service, who would otherwise have come within range of promotion, are not entitled to it. Again, officers in the new service would seem to have no grievance, because the Government orders have made it clear that the personal allowance of an officer on leave is not transferable to his substitute; and further, those officers in Class III, who have chosen the new service and are of 15 years' standing (Messrs. Edwards, Mann, Robson, Moudy, Hornle and Hill) gain the immediate advantage of an increase of pay to Rs. 1,100. At the same time it is not clear that officers, when making their choice, have understood on what principle future promotions are to be made. Mr. Edwards, for example, told me that he expected officiating promotion if an officer went on leave, making him the sixth on active service, which promotion he would not be entitled to under the proposed rule. This question of promotions may possibly have arisen in other provinces, and it may be necessary to refer it to the Government of India for settlement. When definite orders on the point are issued, I should recommend that officers be given an opportunity of reconsidering their choice. This will be all the more necessary if any increase, such as I have proposed above, be made in the number of personal allowances in the Indian Educational Service. Meanwhile I would suggest that the word "permanent" be inserted before "promotion" in the proposed rule, the question of officiating promotion being left for future settlement.

Sir Alexander Mackenzie is inclined to concur in the view thus taken by Sir Alfred Croft, but as the question is involved in difficulty, it will be necessary to refer it to the Government of India for orders.

10. It has been ordered that "an officer of 15 years' approved service, whose total salary did not exceed Rs. 1,000, shall be given a special allowance of Rs. 100 a month." This order will have force from the date from which the new scheme will take effect. The names of officers who will reap the benefit of this ruling are not now mentioned, in view of a reconsideration of choice between the old and the new system being conceded to all of the officers of the old graded service.

11. It will not be out of place to consider here the status of Messrs. Livingstone and Bamford, who may be confidently expected to elect for the new service. The facts about Mr. Livingstone are that he was appointed to Government service in 1865, appointed to officiate in Class IV on the 17th May 1880, and acted continuously in that class up to the date of his confirmation on the 15th November 1892. He drew Rs. 700 a month from 1880 to 1892, and from the 15th November 1892 he drew Rs. 750. From every subsequent 1st December the accrual of an increment may be reckoned under Article 165 of the Civil Service Regulations. Thus, Mr. Livingstone may be regarded as having been entitled to Rs. 950, for the purposes of this scheme, from the 1st December 1896. Mr. Bamford's case is different. He was appointed to be Assistant Inspector of European Schools in February 1885. His pay was subsequently raised to Rs. 500—50—750, and after officiating as Inspector for some time he was confirmed as Inspector on the 1st November 1890. He has drawn Rs. 750 from 11th February 1895, and was therefore entitled to Rs. 800 from 11th February 1896.

PROVINCIAL EDUCATION SERVICE.

12. As already stated in paragraph 3 above, this service is for the present to consist of 107 officers. On Mr. Stack's retirement from the Indian Service, it will be increased to 108 officers, and on Mr. Ewbank's retirement, it will consist of 109 officers; and again, when the Indian Service reckons 27 officers, the number in the Provincial Service will be 110 to become 109 again when Mr. Tate becomes a member of the Indian Service. In the figures 107, 108, 109 and 110 are included six officers who are admitted on personal grounds. As these are gradually absorbed from one cause or another the service will be reduced by the number so absorbed, until the normal number 104 (or 103) is reached.

13. Of the 5 Inspectors of Schools, 1 is spoken of in the Government of India's (Home Department, Education) letter Nos. 104—115, dated the 23rd July 1896, as "a Joint Inspector of Orissa." This office is now held by Babu Radha Nath Roy, who is styled "Temporary Inspector of Schools." He has been in independent charge for four and-a-half years, and will for the future be designated "Inspector of Schools" simply. Another who comes under this appellation is the "Inspectress of Schools."

14. The distribution of the officers who are to appear in the Provincial Service list is attended with much difficulty: it has been dealt with by Sir Alfred Croft in consultation with Dr. Martin, and the Lieutenant-Governor, after weighing carefully the difficulties connected with individual cases, has placed the officers as shown at the close of paragraph 15 below.

Class I—Presents no difficulty. Rai Radhika Prasanna Mookerjee Bahadur has been permanently in Class IV of the Superior Service since 1885. Rai Dinanath Sen Sahib is the senior officer in the present Subordinate Service (Mr. Phillips being disqualified by his office for the new Classes I and II), and has been acting in Class IV of the Superior Service since 1888.

Classes II and III.—The question of the position of Mr. Billing is involved in considerable difficulty. It is argued that he has been for eight and a half years serving in the former graded service, where his name follows that of Rai Dinanath Sen Sahib, and for the same period has been serving as Principal of a first grade college; further that he draws a salary of Rs. 510 (Rs. 340 as pay and Rs. 200 acting allowance) and is, therefore, too highly paid for Class III (Rs. 500); and lastly that he has been selected by the Secretary of State for the first vacancy arising in the Indian Service. On the other hand, it is to be borne in mind that his permanent post is in Class II of the Subordinate Service, being 11th in the total list of that service. On the former grounds he would appear at the top of Class II (Rs. 600), immediately succeeding Rai Dinanath Sen Sahib; on the latter he would appear in Class III (Rs. 500). Taking all these circumstances into consideration, the Lieutenant-Governor thinks that the question will be most equitably settled by placing him at the bottom of Class II. His position as an officer serving for more than eight years in Class IV of the old graded service and as an officer specially selected for promotion to the Indian Service amply warrants such a place being assigned to him. The first three appointments in Class II will be taken by Mr. J. A. Reuther and Babus Radha Nath Rai and Abinash Chandra Chatterjee, the seniors on the list, who are qualified by their offices for this class.

Class III.—The office held by Mr. A. S. Phillips does not entitle him to promotion above Class III. He will naturally stand at the head of this class, and be followed by Babu Mathura Nath Chatterjee and Shams-ul-ulama Abul K. M. Siddiq. The next officer would in regular course be Babu Ambika Charan Bose, and to follow him would come Babu Nilmani Mukherjee, the class being concluded by the name of Mr. Tate, placed in square brackets, *vide* paragraph 3 above. The position of Babu Nilmani Mukherjee has been given special consideration. He is Principal of the Sanskrit College, and his case is thus referred to by Sir Alfred Croft:—

"Babu Nilmani Mukherjee, Principal of the Sanskrit College, has put forward a strong appeal for exceptional promotion, on the ground (1) of the importance of the Sanskrit College compared with the Chittagong College (whose Principal is above him in the graded list); (2) the high pay drawn by Mahamahopadhyaya Mahes Chandra Nyayaratna, *c.s.i.*, his immediate predecessor; (3) the extra duties that the Principal has to discharge in connection with the Sanskrit Title and Sanskrit Tol examinations; and (4) the interest felt by the Hindu community in maintaining the dignity of the College. It is true that the Sanskrit College is

a much more important institution than the Chittagong College. The latter prepares for the F. A. only, while the former sends candidates to the M. A., and the Principal has very important duties connected with the Sanskrit examinations. Both Principals entered the service in the same year, 1867, Babu Nilmani Mukherjee as an M. A., Babu A. C. Chatterjee as a B. A. Nilmani Babu has spent all his service in Calcutta, where he has done a good deal of literary work (see History of Services of Gazetted Officers, page 1024); Babu A. C. Chatterjee has spent all his service in Cuttack and Chittagong. It so happened that the latter was drawing higher pay than the former when the graded list was established in 1878, and so he took the higher place. The high pay drawn by Mahamahopadhyaya Mahes Chandra Nayayarama does not, I think, affect the question. He was promoted to the Superior Service by reason of his character and high position as a Sanskrit Scholar, and the pay that he drew as Principal was his personal pay as a graded officer. It has now been decided that the Sanskrit College Principalship is not to be in the Indian Service cadre of appointments. As to the feeling of the Hindu community, I received a letter last year, signed by Maharajas Durga Charan Law, Jotindro Mohan Tagore and Narendrakrishna, Sir Romesh Chunder Mitter, and Mr. Mohendra Lal Seneer, pointing out the importance of the Sanskrit College, and praying that in the reorganised service "a high place, both as regards pay and rank," might be given to the Principal. Lastly, Nilmani Babu draws attention to his age. He is in his second year of extension, and will have little chance of promotion to a higher grade. Babu A. C. Chatterjee is five years younger, and has many chances of promotion.

The chief grievance, it will be seen (putting aside personal and official claims), is the higher position occupied by Babu A. C. Chatterjee. But I hardly see how it can be remedied. It would be a difficult and invidious matter to disturb the order of seniority in the Education Department, which has been accepted for years. Nilmani Babu urges that he can now rise (owing to his age) no higher as Principal of the Sanskrit College, with all its responsibilities, than he would have risen had he remained Professor of the Presidency College. But though Nilmani Babu himself may not rise to the highest class, yet I have proposed that the Principal of the Sanskrit College should be eligible for that class, and it is his own misfortune that he was promoted so late in life. His promotion, however, has not been very slow. He was confirmed in Class II in 1892, and rose to Rs. 400 in 1893. It is proposed to give him Rs. 500 now. Again, his chances of promotion to Rs. 600 are not so bad as he makes out. Rai Ravdhika Prasanna Mukherjee is in his fourth, and Rai Dinanath Sen in his second year, of extension. Mr. Phillips retires in April next. Maulavi Abul Khair is limited, as Superintendent of a Madrasa, to a salary of Rs. 500. Babu A. C. Bose is in his last year of extension. Babu R. Chakravarti has already retired. Thus, of eleven officers senior to Nilmani Babu, five will have retired in the next two or three years, and one of the remainder cannot rise to Class II. His position would, no doubt, be improved if it were declared that the Principal of a second grade College could rise no higher than Class III, which would debar Babu A. C. Chatterjee from Class II, in which he is placed by Dr. Martin. But I think this would not be fair. It is proposed that head-masters of Collegiate Schools (like Mr. Phillips) should be entitled to rise to Rs. 500, and Principals of first grade Colleges and the Sanskrit College to Rs. 700. It seems reasonable that Principals of second grade Colleges should rise to Rs. 600.

I have dwelt on this question at, perhaps, tedious length, because I promised Nilmani Babu and the Maharajas that his case should be fully submitted to Government. As a matter of policy, the exceptional promotion of the Principal of the Sanskrit College would no doubt be gratifying to the Hindu community, but individual claims cannot be disregarded. As what seems to me a fair way of meeting the difficulty, I would suggest that Babu Nilmani's name should immediately follow that of Babu M. N. Chatterjee."

The extract has been given at length, and carefully considered. The Lieutenant-Governor, while fully admitting the distinguished abilities of Babu Nilmani Mukherjee and the importance of the high office which he fills, is yet of opinion that, with due regard to the individual claims of his seniors, it would be improper to give him a place higher than that now assigned to him, viz., immediately after Babu Ambika Charan Bose.

Class IV.—The remarks made by Sir Alfred Croft in reference to individual officers who may be regarded as having a claim to inclusion in this class are the following:—

Babu Ratna Mani Gupta, the next senior officer, has retired from the service. The first three places should, therefore, be taken by Mrs. M. Wheeler (II, 6), Mr. E. R. Tiery (III, 1), and Babu Chandra Mohan Mozumdar (III, 2), who come next in order of seniority. (The references are to the Civil List for January 1897, page 179.) I turn now to the case of those officers of European qualifications, who have been selected for early and exceptional promotion. They are, in order of seniority, Mr. P. Brühl (1892), Dr P. C. Ray (1889), Mr. J. N. Das Gupta (1890), and Mr. D. N. Mallik (1893). Mr. Brühl (see paragraph 15(a) of Dr. Martin's letter) was educated in Germany, and is a specialist in Science of a quite exceptional order. The other three are distinguished graduates of English universities. Mr. Brühl, Dr. Ray and Mr. Das Gupta were recommended by the Bengal Government in 1894 for immediate promotion to Rs. 350, pending sanction of the reorganisation scheme; but the Government of India declined to promote them in anticipation. If they were considered worth Rs. 350

in 1894, I agree with Dr. Martin that they have a claim to Rs. 400 in 1897. Mr. D. N. Mallik is of only three and a half years' standing, and I propose to place him in the class next below (Rs. 300). His case will be considered later on.

Along with graduates of European qualifications have always been reckoned Premchand Roychand students of the University, as entitled to equal promotion with the former. I think this principle should be maintained, as they are the most distinguished students that the University turns out. There is one officer of this class now to be considered, Babu Nilkanta Mazumdar, who was appointed to the department on Rs. 250 in 1879, and has officiated as Principal of the Cuttack College. The seniority and pay of these four officers (excluding Mr. Mallik) are (*vide* Civil List, pages 177, 179)—

	Rs.
Babu Nilkanta Mazumdar, 1879 (No. 3 in Class III) ..	280
Mr. P. Brühl, 1882 (No. 6 in Class III) ...	300
Dr. P. C. Ray, 1883 (ungraded) ...	250
Mr. J. N. Das Gupta, 1890 (ungraded) ...	250

I think that all these officers should be placed in the new Class IV in the above order (subject to the proposal made below with regard to Mr. Ghilardi). This will put Babu Nilkanta Mazumdar in his right place in the order of seniority of the old list, following next after Babu Chandra Mohan Mazumdar.

An appeal has been made to me by Mr. Pedler, then Principal of the Presidency College, in favour of Babu Bipin Bihari Gupta, one of the Professors of that institution. He is a distinguished Mathematician, being the only graduate who obtained a First Class at the M. A. examination in that subject from 1874 to 1880. He also competed in 1880, but without success, for the Premchand studentship, taking up Pure and Mixed Mathematics, Chemistry and Physics. No candidate indeed (with one exception) was declared qualified for the studentship in these subjects from 1874 to 1881; and the University at length recognised the fact that they were far too wide, and they have now been divided into six, only one of which need be taken up. I think it beyond doubt that, under the present regulations, Babu Bipin Behari Gupta, as the best Mathematician among the M. A. graduates for six years, would certainly have gained a studentship; and he discharges his duties at the Presidency College with very marked ability. While fully acknowledging his distinguished ability and usefulness, at the same time I regret that I cannot discern any principle by which he could be promoted above the heads of his seniors, all of whom are thoroughly competent and deserving officers. Babu Bipin Bihari's merits and services will soon, I hope, obtain recognition in due course. He is second on the list in Class V, and should rise to Class IV in a short time.

The case of Mr. Ghilardi, Assistant Superintendent of the School of Art, has been separately before the Government,—see correspondence ending with Mr. Finucane's No. 531T.G., dated 14th October 1896. Mr. Ghilardi has been in the department since March 1886, and draws Rs. 300, ungraded (Civil List, page 177). In Madras the pay of the Assistant Superintendent is Rs. 400 rising to Rs. 600, and in Bombay Rs. 500 rising to Rs. 750. Mr. Ghilardi certainly deserves promotion after 11 years' good work, while he has been very highly spoken of by successive Superintendents; and this has been recognised in the Government orders referred to. I should think he might properly take rank with the specialists holding European qualifications whose case has just been considered, and if that be granted, his rank should be in accordance with his seniority. In that case he would come between Mr. Brühl (1882) and Dr. P. C. Ray (1880).

It will be seen that Dr. Martin places Mrs. Wheeler, Mr. Tiery, and Babu Chandra Mohan Mazumdar below the five officers whose case has just been considered. I cannot, on reconsideration, support this arrangement, which is based on my earlier proposals of 1894. Mrs. Wheeler has occupied her present office, that of Inspectress of Schools, since 1876. As the sole Inspectress, she occupies an important position. In Madras there are two Inspectresses (belonging, however, to the European service) drawing, respectively, Rs. 500 to Rs. 600 and Rs. 450 to Rs. 500. Mrs. Wheeler is 52 years of age, and deserves consideration towards the end of a long service. Mr. Tiery and Babu Chandra Mohan Mazumdar stand next in seniority, and occupy important offices (Mr. Tiery was an Assistant Inspector before he was selected for the Murshidabad appointment), and should not be passed over without necessity. The arrangement that I propose will leave room in Class IV for the five officers with European or Premchand qualifications, and Babu Nilkanta Mazumdar will thus come into his right place, being next below Babu Chandra Mohan Mazumdar in order of seniority.

The Lieutenant-Governor accepts these views.

It is to be observed that the cases of the retired officers, Babus Bireswar Chakravarti and Ratna Mani Gupta, must be taken into consideration up to the dates of their retirement. The positions of these retired officers would be immediately below Babu Ambika Charan Bose and Babu Nilmani

Mukherjee respectively. This will involve some slight changes in the classes below, which can be settled hereafter in communication with the Accounts Department.

Class V.—Sir Alfred Croft's note upon this class is as follows:—

Class V.—The only cases requiring notice in this class are those of officers on fixed pay, whose place in the new list, with respect to graded officers in the old list, it is necessary to settle. They are those of Mr. R. F. Shaw, Head-master of the Apprentice Department-Civil Engineering College, Mr. D. N. Mallik, Assistant Professor, Patna College, Pandit Hara Prasad Sastri, Professor of Sanskrit, Presidency College, and Mr. H. A. Stark, Head-master of the Anglo-Persian Department, Calcutta Madrasa (Civil List, page 177). Mr. Shaw (M. A., Aberdeen) was appointed on 20th January 1891 on Rs. 300; Mr. Mallik (B. A., Camb., B. Sc., London) on 12th July 1893, on Rs. 250; Pandit Hara Prasad (M. A., Calcutta) on 28th February 1895, on Rs. 300; Mr. Stark (B. A., Calcutta) on 1st July 1895, on Rs. 300. It has to be determined how they should stand with respect to other officers in the old list. On reconsideration of my previous proposals, I think the method to be followed should be this:—An officer appointed on Rs. 300, which is the maximum pay of Class III, should not be in a worse position than if he had been appointed five years earlier on Rs. 200—20—300, the pay of the class. That is, he should rank next below those who had been confirmed in the class five years before the date of his appointment, all of whom at the date of his appointment will have reached the maximum of Rs. 300. He should rank above officers who were only officiating in the class five years before his appointment. (The status of a sub. *pro tem.* officer is that of an acting officer.) An officer appointed on Rs. 250 should take rank on the same principle. Since it takes three years to rise in Class III from Rs. 200 to Rs. 260, such an officer should rank next below those who were appointed permanently to the class three years before the date of his appointment, all of whom were on that date drawing Rs. 260. Hence, comparing the dates given above for the purpose of ascertaining each officer's place, Mr. Shaw may be supposed to have been appointed to Class III on 25th January 1886, Mr. Mallik on 12th July 1890, Pandit Hara Prasad Sastri on 26th February 1890, and Mr. Stark on 1st July 1890. Referring to the Civil List (page 179), it therefore appears that Mr. Shaw should come immediately before Babu Barada Prasad Ghose (III, 7) who was appointed on 1st June 1886, and that Pandit Hara Prasad Sastri, Mr. Stark and Mr. Mallik should come in that order immediately before Babu Hari Prasad Banerjee (III, 11), who was appointed to that class on 13th July 1890. [The dates of confirmation of Mr. E. Pegler and Babu S. B. Dutt (III, 8 and 9) seem inconsistent with their position in the class, but it is not really so. Those two officers, who had drawn Rs. 250 fixed pay for many years, were transferred to Class III in December 1891, and therefore took rank, exactly in accordance with the foregoing principle, as if they had been appointed to the class in December 1888.]

Sir Alexander Mackenzie accepts the principle thus enunciated, and class V will be fixed accordingly.

Sir Alfred Croft continues:—

“In reference to the position assigned to Mr. D. N. Mallik, it will be convenient at this point to consider what special prospects, in the way of exceptional promotion, are now and hereafter to be offered to those graduates in honours of English Universities whom we wish to attract to the Department, to take the place of men hitherto appointed by the Secretary of State. It has, I think, always been understood that special advantages were to be offered them. In 1894 I recommended that all such officers, appointed on Rs. 250, should, after three years, be promoted to the first vacancy arising in the Rs. 350 class; and this proposal was afterwards made the basis of the recommendation above referred to, that Messrs. Brühl, P. C. Roy, and J. N. Das Gupta, should at once be promoted to Rs. 350. The Rs. 350 class has now disappeared, and another method must be adopted. I would propose that a professor of European qualifications or a Promchand student should originally be appointed on Rs. 250; that after a service of three years in that class, he should have a claim to the first vacancy arising in Class V (Rs. 300); and that after a further service of three years in that class, he should have a claim to the first vacancy arising in Class IV (Rs. 400). As vacancies would not generally occur immediately after the expiration of the periods of three years, he would have a fair prospect of rising from Rs. 250 to Rs. 400 in about seven years; and this, I think, would offer sufficient inducement. (In the Provincial Executive Service I see that an officer rises from Rs. 250 to Rs. 500 in from six to seven years.) Candidates of this class who were appointed to the Superior Service under the two-thirds rule, rose from Rs. 333 to Rs. 500 in five years: so that the new men will still be not as well off as their predecessors were. After appointment to Class IV they would be eligible for promotion in their turn under the ordinary rules.

It is of the first importance that graduates in honours of English Universities should be attracted to the Provincial Service; the rule now proposed is therefore approved. It follows that Mr. Shaw is the first officer for promotion.

to Class IV, and that Mr. Mallik's time for such promotion will follow after he has served in Class V for three years from the date of the introduction of this scheme. In working the rule, active service (including privilege leave will alone be reckoned in the qualifying period.

Class VI.—Sir Alfred Croft observes with reference to this class:—

The cases here are those of Babu Kumudini Kanta Banerjee, Dr. P. N. Chatterjee, and Mr. M. M. Ghose (Nos. 7, 13, and 14 in Class VI of Dr. Martin's list), who have been appointed to the department on fixed pay—the first on Rs. 200 in 1887, the next two, who are graduates of English Universities, on Rs. 250 in 1894 and 1895, respectively. The place of Babu Kumudini Kanta Banerjee was fixed in my former list as following that of Miss. U. M. Bose. Dr. P. N. Chatterjee was appointed on the 9th November 1894, and should therefore rank among Class III (old list) officers as if he had been appointed to the class on the 9th November 1891. He will therefore stand after Babu B. K. Guha (III, 14). Mr. M. Ghose, appointed on 22nd June 1895, will rank as from 29th June 1892, and follow Babu Sarada Prasad Ganguli (Babu Uma Kisor Roy, the next on the list, not being a Provincial Officer). Babu Khudod Chandra Rai Chaudhuri (III, 18) has, since the date of Dr. Martin's letter, been transferred to a Provincial appointment, and should therefore come into the list before Babu Sib Chandra Gu. Dr. Chatterjee and Mr. Ghose will be entitled to the first vacancies arising in Class V, after they have served for three years each on their present pay.

The case of Maulavi Abdul Karim, B.A., Assistant Inspector of Muhammadan Education, is exceptional. It will be seen that in the provisional list, recommended in my note of 20th January 1894, I placed Maulavi Abdul Karim next after Shams-ul-ulama Ahmad (VI, 12 in that list, III, 20 in the Civil List, page 180). This was in accordance with the place that he then occupied as a sub. *pro tempore* officer. But in the Civil List for January 1897 (page 181), Maulavi Abdul Karim comes nine places lower down (III, 30). The reason is that he was in 1891, and had been for some years, substantively *pro tempore* in Class III, in place of an officer who had been appointed to the Provincial Service, but whose confirmation in that service was for some reason delayed for many years. In consequence of the rule that substantive *pro tempore* officers take rank below those who have been confirmed, Maulavi Abdul Karim found himself passed over, between 1894 and 1896, by a number of officers promoted from the class below. I think with Dr. Martin that he should take the place which I previously assigned to him in January 1894, and which he would have held had the scheme been sanctioned from about that date. In 1894 he had already been substantive *pro tempore* for over four years, and the position now assigned to him is that which he would have taken if confirmed after three years.

The reasons given for regarding Maulavi Abdul Karim's position as exceptional are sound. The argument might be strengthened by the consideration that the post held by him, viz. Assistant Inspector of Muhammadan Education, is a special one. Had this not been so, his confirmation in Class III of the former service would have taken place in regular order as vacancies occurred in the class. Under the circumstances, it is right that his case should receive exceptional treatment.

Sir Alfred Croft, in reserving four posts in this class for graduates in honours of English Universities or Promchand Students, writes thus:—

Of the four reserved appointments, one can be filled up immediately upon my departure, by Mr. Bhupati Nath Das, about whom there has been separate correspondence. He is the man so strongly recommended, as an original worker in science, by Professor Ramsay. The other three may be filled up by substantive *pro tempore* promotions from the class below, until specialists are appointed permanently to the class after the retirement of Messrs. Ewbank and Stack.

Mr. B. N. Das may at once be appointed to one of these reserved appointments, and on the retirement of Mr. Stack in the end of March, a second specialist may be appointed, and similarly another on the retirement of Mr. Ewbank towards the end of April. There will then remain one post which may temporarily be filled up.

Sir Alfred Croft has laid special stress upon the fact that nearly all the officers in this Rs. 250 class are at present drawing more than Rs. 250 a month, and that those on less than Rs. 300 a month would have had a fair prospect of rising to Rs. 300 (as pay under the old system) within a few years by regular increments. He adds:—"For the present I consider that the fair and only possible plan will be to continue to them, as personal allowances, the amounts above Rs. 250 to which they are now, or may become, entitled until all of them are promoted to the next higher class on Rs. 300." This proposal is sanctioned, and will be applicable to those who had already set foot in the former Class III or had drawn increments in the

same; these will, if they revert to Class VII of the Provincial list, continue to draw the increments to which, from time to time, they would have become entitled under the old system. This principle will be extended to all the classes.

Class VII.—Sir Alfred Croft discusses the cases of certain officers who have hitherto been on fixed pay:—

P. W. Byers, Teacher, Apprentice Department, Civil Engineering College; Annada Prasad Bagchi, Head-master, School of Art; Braja Ballabh Dutt, M.A., Lecturer, Rajshahi College; Sivendra Nath Gupta, Lecturer, Krishnagar College.

The last two men have already had their places assigned in my 1894 list. Mr. Byers was appointed on the 23rd March 1894, on a salary of Rs. 200—10—230, and therefore ranks below those who have been confirmed in old Class III, the pay of which is higher (Rs. 200—20—300). Babu Annada Prasad Bagchi was appointed on Rs. 200 on the 3rd January 1880, and therefore ranks above all officers in Class IV (Rs. 150—10—200), the senior of whom was promoted to that class in 1885. At the head of the list I keep two places for Assistant Inspectors, for a reason to be afterwards explained.

In one of the two places referred to by Sir Alfred Croft the name of Babu Kumad Bandhu Bose was entered, and the second place was reserved for an Assistant Inspector of Schools to be newly appointed.

In regard to the position given to three officers, Sir Alfred Croft writes:—

“Babu Rasamay Mitra (No. 23) and Kali Prasanna Bhattacharjee (No. 24) have been acting since November 1895 and January 1896, in the class above, having been specially selected for such promotion (Civil List, page 183). They have, therefore, been placed above Babu Rajeswar Gupta (No. 25), the senior officer for promotion, who has not yet acted in the class above.

This is sanctioned.

Class VIII.—In discussing Class VIII, Sir Alfred Croft has written:—

Class VIII.—The only special cases in this class are those of six officers transferred from fixed pay. But in arranging the names in this class, I have adopted a new method, rendered necessary by the following circumstances: In the first appointment of M. As. as Lecturers in Colleges, it has been the practice to appoint them either to Class V (Rs. 100—10—150) or to fixed pay appointments of Rs. 150, according as one or other kind of appointment happened to be vacant. But it has by no means followed that the officers in Class V, though appointed on lower pay, were in any way inferior to those who were appointed on Rs. 150. Further, those who were appointed to Class V generally received acting or substantive *pro tempore* appointments in the first instance, and were only confirmed after a lapse of time, while officers appointed on Rs. 150 were commonly appointed permanently. Thus, the former class of officers suffered a two-fold disadvantage: firstly, in the rate of initial pay, secondly, in their lower position in the list, that position being determined under the ordinary rule by the date of confirmation. I propose now to reduce this inequality once for all by fixing the position of College Lecturers, whether starting on Rs. 100 in Class V or on Rs. 150, by the date of their first service, whether acting, substantive *pro tempore*, or permanent, provided such service was continuous. And I further recommend that all such officers, whatever their previous designations may have been, should henceforth be uniformly styled Professors.”

Sir Alexander Mackenzie approves of this recommendation: it is therefore sanctioned.

To summarize:—At the present time there are 30 out of 137 posts assigned to the Superior Service filled up by Officers of the Indian Service. There remain 107 Officers for the Provincial Service. These will be distributed as follows:—

Class	I	2 Officers.
”	II	4 ”
”	III	6 ”
”	IV	8 ”
”	V	12 ”
”	VI	22 ”
”	VII	25 ”
”	VIII	28 ”
Total					107 Officers.

The nominal roll, as now sanctioned, is the following:—

CLASS I (2), Rs. 700.

1. Rai Radhika Prasanna Mukerjee Bahadur.
2. Rai Dinanath Sen Sahib.

CLASS II (4), Rs. 600.

1. Mr. J. A. Renthcr.
2. Babu Radhanath Rai.
3. „ Abinash Chandra Chatterjee, B.A.
4. Mr. Billing, M.A.

CLASS III (6), Rs. 500.

1. Mr. A. S. Phillips, B.A.
2. Babu Mathura Nath Chatterjee, M.A.
3. Maulvi Abul Khair Muhammad Siddiq, M.A.
4. Babu A. C. Bose.
5. „ Nilmani Mukerjee.
6. [Mr. W. Tate.]

CLASS IV (8), Rs. 400.

1. Mrs. M. Wheeler.
2. Mr. E. R. Thier, B.A.
3. Babu Chandra Mohan Mazumdar, M.A.
4. „ Nilkantha Mazumdar, M.A.
5. Mr P. Bruhl
6. „ O. Ghilardi.
7. Dr P. C. Ray, D.Sc (Edin.).
8. Mr. J. N. Das Gupta, B.A. (Oxon.).

CLASS V (12), Rs. 300.

1. Babu Jagat Bandhu Laha, M.A.
2. „ Pupu Bihari Gupta, M.A.
3. Mr. R. F. Shaw, M.A. (Aberdeen).
4. Babu Barada Prasad Ghose, M.A.
5. Mr E. Porley.
6. Babu Sasi Bhushan Dutta, M.A.
7. Maulvi Mahummad Ibrahim, B.A.
8. Pandit Hara Prasad Sastri, M.A.
9. Mr. H. A. Stark, B.A.
10. Mr. D. N. Mallik, B.A. (Camb.), B.Sc. (Lond.).
11. Babu Hari Prasad Banerjee (now Assistant Inspector).
12. Mrs. E. C. W. Stanbury.

CLASS VI (22), Rs. 250.

	Draws.
	Rs.
1. Sasi Bhushan Sen, B.A., <i>plus</i> personal allowance	300
2. Brajendra Kumar Guha, B.A., <i>plus</i> personal allowance	300
3. Dr. Purnananda Chatterjee, B.A., D.Sc. (Edin.)	...
4. Miss Chandra Mukni Bose, M.A., <i>plus</i> personal allowance	280
5. Kinnudini Kanta Banerjee, M.A.	...
6. Saroda Prasad Ganguli (on personal grounds), <i>plus</i> personal allowance	300
7. Mr. Manomohan Ghose, B.A. (Oxon.)	...
8. Khud Chaudia Rai Chaudhuri, M.A., <i>plus</i> personal allowance	300
9. Sib Chandra Gui, M.A., <i>plus</i> personal allowance	280
10. Shams-ul-ulama Ahmad, <i>plus</i> personal allowance	260
11. Abdul Karim, B.A., <i>plus</i> personal allowance	300
12. Bireswar Chatterjee, M.A., <i>plus</i> personal allowance	250
13. E. A. LeFevre, <i>plus</i> personal allowance	260
14. Ram Das Chakravarti, <i>plus</i> personal allowance	280
15. Ambika Chaitin Mukherjee (on personal grounds), <i>plus</i> personal allowance	280
16. Bakuntha Nath Roy, B.A. (on personal grounds), <i>plus</i> personal allowance	260
17. Mati Lal Maitra	240
18. Bhushan Mohan Sen, B.A.	240
<i>R. S. Srini Chandra Das Bahadur, C.I.F. (on personal grounds) seconded</i>	300
19. Raj Kumar Sen, M.A., <i>sub. pro tem.</i>	240
20. Chandra Kumar Maitra, <i>sub. pro tem.</i>	240
21. Atdul Munim, <i>sub. pro tem.</i>	200
22. Kumud Bandhu Bose, <i>sub. pro tem.</i>	240

CLASS VII (25), Rs. 200.

One place reserved for an Assistant Inspector of Schools.

1. P. W. Byers, *plus personal allowance* (draws Rs. 230).
2. Annada Prasad Bagchi.
3. Jagat Bandhu Bhadra (on personal grounds).
4. Bhawani Charan Mukharjea, B.A.
5. Kunja Bihari Bose, M.A.
H. A. Lane, M.A., seconded.
6. Ram Chandra Chatterjea.
7. Braja Ballabh Dutta, M.A.
8. Haranath Bhattacharjea, M.A.
9. Debendra Nath Bose, M.A.
10. Kisor Mohan Sen Gupta, M.A.
11. Upendra Nath Mitra, M.A.
Dwij Das Dutt, M.A., seconded.
12. Kali Pada Bose, M.A.
13. Joges Chandra Ray, M.A.
14. Sivendra Nath Gupta, M.A.
15. Narendra Nath Bose, M.A.
16. Madhu Sudan Rao.
17. Sagar Chandra Chakravarti.
18. Govinda Lal Set, M.A.
19. Mahamahopadhyaya Chandra Kanta Tarkalankar, *sub. pro tem.*
20. Surendra Kumar Bose, B.C.E. *sub. pro tem.*
21. Rameswar Mitra, M.A., *sub. pro tem.*
22. Kali Prasanna Bhattacharjea, M.A., *sub. pro tem.*
23. Rajeswar Gupta, *sub. pro tem.*
24. Rajendra Nath Banerjea, B.A., *sub. pro tem.*
25. Rajmohan Sen, M.A., *sub. pro tem.*

CLASS VIII (28 AT PRESENT), Rs. 150.

- Hari Charan Ray, M.A., seconded.*
1. Chandra Bhushan Bhaduri, B.A.
 2. Mukunda Chandra Vidyabagis, M.A.
Jagadis Chandra Sen, M.A., seconded.
 3. Aditya Kumar Chatterjea, B.A.
 4. Mohini Mohan Chaudhuri, M.A.
 5. Bisseswar Sen, M.A.
Sasi Sukhar Banerjea, B.A. seconded.
 6. Braja Lal Mukerjea, B.A.
 7. Pores Nath Sen, B.A.
 8. Joy Gopal Dey, B.A.
 9. Murali Dhur Banerjea, B.A.
 10. Harish Chandra Bhattacharjea, B.A.
 11. Harish Chandra Dutt, M.A.
 12. Mohit Chandra Sen, M.A.
 13. Satis Chandra Dey, M.A.
 14. Binayendranth Sen, M.A.
 15. Gopal Chandra Ganguli, M.A.
 16. Mohini Mohan Dutt, M.A.
 17. Bidhu Bhushan Goswami, M.A.
 18. Abdul Ali.
 19. Pramatha Nath Mukerjea, M. A., *sub. pro tem.*
 20. Rakhal Raj Biswas, M.A., *sub. pro tem.*
 21. Ram Prassana Mukherjea, *sub. pro tem.*
 22. Sukhbasi Tewari, *sub. pro tem.*
 23. Hari Charan Mukherjea, L.B., *sub. pro tem.*
 24. Govinda Sastri, *sub. pro tem.*
 25. Hriday Chandra Banerjea, *sub. pro tem.*
 26. Professor for Rajshahi College, *sub. pro tem.*
 27. Professor for Dacca College, *sub. pro tem.*
 28. Professor for Chittagong College, *sub. pro tem.*

15. The following quotation is also extracted from Sir Alfred Croft's note on the re-organization scheme:—

"Connected with the question of the minimum pay to be given to Professors who have graduated in English Universities, and of the conditions of their promotion thereafter, is another very similar question as to the minimum pay to be given to the holders of certain

appointments. In some cases the officers have to be appointed by the Secretary of State in England; in others, the importance of the office requires that a suitable rate of pay should be secured to the holder.

In most cases of the latter class, the officer so appointed will be of sufficient standing to have reached or passed the proposed minimum; but in the case of the transfer of an officer from the Subordinate to the Provincial Service (as, for example, of a Deputy Inspector to be Assistant Inspector), this condition will not always be realised. In order to meet exceptional cases of selection, the following minima are proposed:—

	Rs.
Principals, 1st grade (including Sanskrit) Colleges ...	400
Principals, 2nd grade Colleges ...	250
Superintendents of Madrasahs ...	250
Inspectors ...	400
Assistant Inspectors ...	250
Personal Assistant to the Director of Public Instruction ...	300
Assistant Superintendent, School of Art ...	300
Head-master, Kurseong Boarding School ...	250

Dr. Martin thinks that this proposal, if sanctioned, will probably lead to embarrassing consequences. At the present time in considering who might be a fit person to succeed to the Principalship of the Rajshahi College which is likely to fall vacant in the near future, he looked through the names of the officers in Class IV with a view to following the rule above, and as Babu Nilkanta Mazumdar has been selected to act as Principal of the Cuttack College, his choice was limited to Dr. P. C. Roy or Mr. J. N. Das Gupta. He sent for Dr. P. C. Roy to tell him that he might possibly be called upon to leave the Presidency College. The intelligence was received with consternation, and Dr. Martin, knowing that Dr. Roy is a distinguished Chemist engaged in original research in the Presidency College, after weighing the *pros* and *cons*, decided that the idea ought to be abandoned. He then considered the case of Mr. J. N. Das Gupta and came to the opinion that being a Professor of English Literature, Mr. Gupta's services at present cannot be transferred to such an office. Consequently at the outset the proposed rule is found to offer difficulties of a serious kind. Attempts may be made to follow a rule of the kind, but the Lieutenant-Governor agrees in thinking that no hard-and-fast rule can be laid down in the case of several of the offices referred to. Hitherto, Superintendents of Madrasahs (who are paid from the Mohsin Fund) and Assistant Inspectors of Schools, have always been placed on first appointment to these offices on Rs. 250 a month. This rule may be admitted, and Sir Alfred Croft's proposal may also be accepted, so far as are concerned the Assistant Superintendent of the School of Art and the Superintendent, Apprentice Department, Civil Engineering College, with a minimum pay of Rs. 300 for each, and also for the Head-master of the Kurseong Boarding School, for whom a minimum of Rs. 250 is proposed. Beyond this Sir Alexander Mackenzie is not willing to go. These last three appointments require the services of officers recruited in Europe; but in the case of Principalships of Colleges, the choice of successors is obtainable from among a long line of Professors, to most of whom it would be improper to give undue promotion, on the ground of their being, from circumstances, selected for such an office.

It is, therefore ordered that *minima* are fixed, if there are vacancies in the several classes in the case of the following posts:—

	Rs.
Assistant Superintendent, School of Art ...	300
Head-master of the Apprentice Department, Civil Engineering College ...	300
Head-master, Kurseong Boarding School ...	250
Superintendents of Madrasah ...	250
Assistant Inspectors of Schools ...	250

As regards appointments to Assistant Inspecterships, the Director of Public Instruction in recommending for promotion to these posts Deputy Inspectors from the subordinate list should be careful lest by giving such promotion the prospects of Provincial Service officers may be materially injured. It is partly to avoid a complication of this kind that just now a very senior Provincial officer is being put forward for an Assistant Inspectorship of Schools.

16. It is now necessary to decide the question what offices should entitle their holders to rise to the several classes of the Provincial Service. The following proposal is sanctioned:—

Class I (Rs. 700).—Principals of Colleges, including the Sanskrit College, teaching up to the B.A. Standard; Inspectors of Schools; Professors who have obtained degrees in honors from the Universities of Oxford, Cambridge, London, or Dublin, or who have received a European training to an equivalent standard, and the Assistant Superintendent, Government School of Art.

Class II (Rs. 600).—Limit of promotion for the Lady Principal of the Bethune College and for the Inspectress of Schools and the Personal Assistant to the Director of Public Instruction, and for Assistant Inspectors of Schools; also for Principals of Colleges teaching up to the First Arts Standard.

Class III (Rs. 500).—The limit of promotion for the following:—Principals of second grade Colleges (teaching up to the F.A. Standard), Professors not possessed of European qualifications or an equivalent, Superintendents of Madrasahs, including the Head Maulavi of the Calcutta Madrasah, Head Masters of Collegiate and Training Schools, and Head Master of the Government School of Art: the Lady Superintendent, Dacca Eden Female School, the Head Maulavi of the Calcutta Madrasah and Head Master of the Kurseong Government Boarding School, and the Head Master, Anglo-Persian Department of the Calcutta Madrasah.

Class IV (Rs. 400).—Limit of promotion for Professors in second grade (F.A.) Colleges.

As exceptions to the foregoing limits, it is ordered that Shams-ul-ulama Abul Khair Muhammad Siddiq, M.A., Superintendent of the Dacca Madrasah and Mr. Tiery of the Murshidabad Nawab's Madrasah shall be eligible for promotion to Class II. Maulavi Abul Khair has qualifications English and Oriental, equal if not superior to those of the Assistant Inspectors of Muhammadan Education; while Mr. Tiery was, for several years, an Assistant Inspector of Schools, whence he was transferred to his present appointment, as being conspicuously fitted for it.

17. All College Lecturers, Assistant Professors and Professors in the Provincial Service will, henceforth, be uniformly styled Professors.

18. All Officers in the Provincial Service will be Gazetted Officers.

19. Officers transferred from the Subordinate to Provincial list to fill vacancies in the posts of Head-master of Collegiate Schools, Assistant Inspectors, &c., will, in ordinary cases, be eligible for the minimum salary attaching to the posts which they are called upon to fill.

20. The Lieutenant-Governor now sanctions the introduction of the new scheme with effect from the 1st August, 1896. His Honour observes that, owing to the narrowness of the scale of the Provincial Service, as compared with existing salaries, the prospects of officers in the lower classes are very discouraging. For instance, officers now placed in class VI on Rs. 250 of the service are all in class III (Rs. 200—20—300) of the existing service, and before they can receive any increase of pay, they must rise to the top of class VI and then move slowly to the top of class V. He also observes that the Provincial Services of other provinces are practically devoid of class VIII on Rs. 150. Sir Alexander Mackenzie regrets this state of things, and, with a view to improving the prospects of Provincial Service officers, he proposes at an early date to consider whether something may not be done by assigning a greater number of appointments to some of the intermediate classes.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Govt. of Bengal.

SUPPLEMENT TO The Calcutta Gazette.

WEDNESDAY, MARCH 31, 1897.

OFFICIAL PAPERS.

[Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on payment of Six Rupees per annum if delivered in Calcutta, or Twelve Rupees if sent by Post.]

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 20th March, 1897.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble SIR CHARLES PAUL, K.C.L.E., Advocate-General of Bengal.

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble RAI DURGA GATI BANERJEE, BAHADUR, C.I.E.

The Hon'ble NAWAB SYUD AMER HOSSEIN, C.I.E.

The Hon'ble M. FINUCANE.

The Hon'ble C. W. BOLTON.

The Hon'ble W. H. GRIMLEY.

The Hon'ble C. A. WILKINS.

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble RAI ESHAN CHUNDRAN MITTRA, BAHADUR.

The Hon'ble GURU PROSHAD SEN.

The Hon'ble M. S. DAS.

The Hon'ble A. H. WALLIS.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

PROVINCIAL SERVICE.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

I have the honour to call attention to the fact that in the North-Western Provinces there are eight members of the Provincial Service, who hold substantively or officiate in posts which are ordinarily reserved for the Civil Service, India, listed as open to the Provincial Service. Is it the case that in Bengal there is only one member of the Provincial Service who holds an appointment ordinarily reserved for the Covenanted Service, viz., that of District Magistrate; and he, too, Mr. Batabyal, was originally a member of the Statutory Service, and has elected the Provincial Service? Having regard to the all-but-total exclusion of members of the Provincial Service from the posts listed as open to the members of that service, will the Government be pleased to take such steps as to the Government may seem fit, with a view to give effect to the recommendations of the Public Service Commission in that behalf?

The Hon'ble Mr. BOLTON replied:—

"The Hon'ble Member asked a similar question on the 22nd July, 1893, which was answered by the Hon'ble Mr. Cotton. It was then explained, and the explanation still applies, that the effect of the notification of this Government published in the *Calcutta Gazette* of the 5th April of that year, specifying the posts ordinarily reserved for the Civil Service of India to which Members of the Provincial Service can be properly appointed, was qualified by paragraph 6 of the Resolution of the Government of India, No. 1342 C. Rev., dated the 21st April 1892, which declared that until all the existing Statutory Civil Servants were provided for either by promotion or by amalgamation with the new Provincial Service, and until the prior claims of officers of the Civil Service of India and Commissions had been satisfied, the twenty posts thrown open to members of the Provincial Service could not be brought into the general cadre of that service. In filling up the vacancies which have since occurred these orders of the Government of India have been adhered to, and only one vacancy in the superior appointments has fallen to the Provincial Service, to which Mr. Batabyal was appointed. There are eleven Statutory Civilian, and the majority of them must still be provided with substantive superior appointments before the number of members of the Provincial Service in these posts can be increased.

"The Civil List of the North-Western Provinces and Oudh for the present quarter shows five and not eight members of the Provincial Service occupying posts ordinarily reserved for the Civil Service of India."

SOUTH SUBURBAN MUNICIPALITY.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

(a) With reference to the Government Notification published in the *Calcutta Gazette* of the 28th October last, regarding the sub-division of the present South Suburban Municipality, is the Government aware that such a sub-division is at variance with the boundaries, as set forth in the Resolution of the Commissioners of the aforesaid Municipality, dated the 4th February, 1896, upon which the Government has taken action, and which runs as follows:—

"That the municipality be divided into two parts following the Diamond Harbour Road, as the common boundary of the two municipalities."

(b) Is the Government aware that the Resolution has the approval of the Commissioner of the Division and of the Hon'ble Mr. Bolton when he was District Magistrate of the 24-Parganas?

(c) Is it not the case that under section 9 of the Bengal Municipal Act, the Government can only take action in any matter affecting the sub-division of a municipality on the recommendation of the Commissioners at a meeting, and is therefore *a fortiori* bound by the terms of the recommendation?

(d) Is it not the case that the sub-division, as proposed in the Government Notification, takes away from the South Suburban Municipality the richest and the most populous wards and the only dispensary situated in the Municipality?

(e) Is the Government aware that the sub-division of the municipality, as proposed by the Government, is strongly opposed to local feeling, and that the Commissioners and the rate-payers have submitted memorials against the proposed sub-division?

(f) Having regard to all these considerations, will the Government be pleased to re-consider the matter and issue a Notification in accordance with the terms of the recommendation of the Commissioners?

The Hon'ble Mr. RISLEY replied:—

“The Lieutenant-Governor is advised that Government is not bound by the specification of boundaries annexed to the Resolution of the Commissioners, and can proceed to subdivide the Municipality in the manner that appears most likely to conduce to good administration. The subdivision now proposed is the one best suited to the present circumstances of the Municipality; it has been duly notified, and no valid objections have been received. The Lieutenant-Governor is not prepared to re-consider the matter.”

PROVINCIAL BUDGETS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

I have the honour to call attention to the remarks quoted in the margin made by the Hon'ble

These budgets (Provincial budgets), after a careful examination by the Financial Department and the Secretaries of the Departments which have administrative control in each case, are compiled and forwarded to the Government of India, as a whole on the 16th January, through the Accountant-General, who, by that time, has before him the actual figures for nine months. Soon after the close of February, the actuals for two more months, or eleven in all, are available, and on or about the 10th of March, a final revised estimate for the expiring year, together with a final forecast for the year beginning on the 1st of April, are laid before the Government of India, for approval and for incorporation in the great Imperial budget for the whole of India (*vide* Council Proceedings of the 31st March, 1894).

Mr. Bourdillon, then Financial Secretary to the Government, and to enquire whether, having regard to the fact that the budget is submitted for the consideration of the Supreme Government on the 10th March or thereabouts, it would not

be possible to lay the budget before this Council before it is sent to the Government of India for final approval, with the remarks of Members of Council thereon, for the consideration of the Supreme Government?

The Hon'ble Mr. RISLEY replied:—

“Under the orders of the Government of India, the Financial statement of a Local Government cannot be presented to, or discussed by, the local Legislative Council until it has received the sanction of the Government of India.”

PROVINCIAL CONTRACTS.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to state (1) the total sum which the Government of Bengal has obtained from the Provincial contracts, owing to the normal expansion of the Revenue over and above the contract figure, that is to say the amount expected to be realized to meet the expenditure; (2) the total sum which the Government of Bengal would have obtained if the contract of 1877 had been in force; (3) the total appropriations of the Government of India over and above the sums to which the Government of India was entitled under the contracts? Have these sums been restored?

The Hon'ble MR. RISLEY replied :—

"The Hon'ble Member will find the information which he requires in the Financial statement of 1st April, 1893, and the Financial Resolution of 10th October, 1896."

FAMINE RELIEF WORKS IN BIHAR.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Will the Government be pleased to give the names and salaries of Superintendents and Assistant Superintendents employed upon relief works in the affected tracts in Bihar?

The Hon'ble BABU GURU PROSHAD SEN asked—

Will it please Government to place on the table a list of persons, not being Government servants, who have been specially appointed for the purpose of Famine Relief in the afflicted districts of North Gangetic Bihar, as charge Superintendents and Assistant charge Superintendents, with their respective salaries and allowances?

The Hon'ble MR. FINUCANE replied :—

"The Statement called for by the Hon'ble Members is laid on the table."

Superintendents and Assistant Superintendents on Famine Relief Works in the Patna Division.

A.—NON-OFFICIAL.—

 „ C. P. Beachcroft.

These officers get their grade pay and ordinary travelling allowance.

D.—Besides the above, certain officers, whose numbers are approximately given below are employed as “Circle Officers” and “Officers in charge” of works.

Name of district.	CIRCLE OFFICERS.		OFFICERS IN CHARGE.	
	No.	Pay.	No.	Pay.
1	2	3	4	5
Shahabad	25	From Rs. 35 to Rs. 75.	5	From Rs. 35 on small works to Rs. 75 on large works: Rs. 100 in few cases.
Saran	45		15	
Champaran	75		40	
Muzaffarpur	75		30	
Darbhanga	65		55	
Total	285		145	

The names of these officers cannot be given: all or nearly all of them are natives of India.
 The services of Deputy and Sub-Deputy Collectors and of Rural Sub-Registrars have also been utilised on famine work.

DISTRICT OFFICER IN KHULNA.

The Hon'ble BABU SURENDRANATH BANERJEE asked—

Is it the case that since July, 1893, no fewer than nine District Magistrates have from time

* Mr. Rompas, District Magistrate, from July, 1893 to October, 1893.
 .. Maguire, " " " " October, 1893 to April, 1894.
 .. Bell, " " " " April, 1894 to October, 1894.
 .. Brown, " " " " October, 1894 to April, 1895.
 .. Fisher, " " " " April, 1895 to October, 1895.
 .. Brown, " " " " October, 1895 to March, 1896.
 Since March, 1896, three Magistrates, Mr. Fisher, Mr. Phillimore and Mr. Vincent have held charge of the district one after another. Mr. Vincent, the present Magistrate, has been in charge since January last.

to time been in charge of the district of Khulna, many of whom holding office for only a few months? Is the statement noted in the margin showing the fre-

quent transfers of district officers from Khulna substantially correct? Are not these frequent transfers calculated seriously to interfere with the efficiency of district administration, and will the Government be pleased to take steps to prevent them?

The Hon'ble MR. BOLTON replied:—

"For various reasons it was found necessary in the past three years to change the District Officer of Khulna as often as the Hon'ble Member mentions. The Lieutenant-Governor agrees that such frequent changes are detrimental to the efficient administration of a district, and it is the endeavour of the Government to avoid them as much as possible. The necessity for retaining the same officer at Khulna for a longer period than has been the case in recent years has not escaped the notice of the Government."

PUBLIC DEMANDS RECOVERY ACT.

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to state under what circumstances and under what representations it was found necessary to permit the Court of Wards to relax the stringency of the Circular orders No. 3 of May, 1892, and 8 of October, 1895, prohibiting the issue of certificates under the Public Demands Recovery Act in estates of which a survey has not been made, and to vest it with powers to use the certificate procedure even in the case of an unsurveyed estate?

The Hon'ble MR. FINUCANE replied:—

"The existing orders are in accordance with the instructions of the Government of India, which directed that Collectors should issue no certificates on the application of a Court of Wards, except where a record of rights had been made and disputes between landlords and tenants settled, or in estates declared by a formal order of the Board of Revenue to have a settled rent-roll and to be ripe for the application of the certificate procedure."

The Hon'ble BABU GURU PROSHAD SEN asked—

Will the Government be pleased to order a strict enforcement of these Circular orders, the last of which appears to have been issued as the result of the discussions in Council on the 3rd April, 1895?

The Hon'ble MR. FINUCANE replied:—

"The Government has no intention of further altering these orders which are perfectly reasonable."

RAIN-GAMBLING BILL.

The Hon'ble Mr. BOLTON moved for leave to introduce a Bill for the suppression of rain-gambling. He said:—

“Full enquiry has been made into the practice of rain-gambling, and the evil has been found to exist to an extent which demands early action on the part of the Government. Public bodies representing various sections of the community in Calcutta have been consulted, and opinion is strongly and almost unanimously in favour of legislation. The matter can thus be dealt with at once, and delay is neither necessary nor desirable. In view of the fact that the session of the Council is, in the ordinary course, drawing to its close, I propose to ask Your Honour to suspend the Rules, to admit of my introducing the Bill and moving that it be referred to a Select Committee. Under your order, Sir, the Bill has already been published in the *Calcutta Gazette*, with the Statement of Objects and Reasons, and copies have been placed in the hands of Hon'ble Members. Its provisions are brief and simple, and I venture to anticipate that they will not provoke prolonged discussion in the Council or in the Select Committee.”

The Motion was put and agreed to.

The Hon'ble Mr. BOLTON also applied to the President to suspend the Rules of Business for the purpose of introducing the Bill and referring it to a Select Committee.

The Hon'ble the PRESIDENT having declared the Rules suspended—

The Hon'ble Mr. BOLTON introduced the Bill and also moved that it be read in Council.

The Motion was put and agreed to.

The Bill was read accordingly.

The Hon'ble Mr. Bolton also moved that the Bill be referred to a Select Committee, consisting of the Hon'ble Mr. Wilkins, the Hon'ble Babu Surendra-nath Banerjee, the Hon'ble Mr. M. S. Das, the Hon'ble Mr. Wallis, the Hon'ble Sahibzada Mahomed Bakhtyar Shah, and the mover, with instructions to report in one week. He said:—

“Sir, the Bill of which I am in charge is a small, but not unimportant, measure. It seeks to put an end to a form of public gambling which has attained considerable magnitude, which has already done much harm among certain classes of the community in Calcutta, and which tends to affect larger and larger numbers. I trust, and cannot but believe, that its object will commend itself to every Member of this Council.

“Rain-gambling was introduced into this City many years since by the Marwaris, who are much addicted to play and wagering of one kind or another, and is practised in the Bara Bazar quarter, where they chiefly reside. For some years it was confined to one house containing a large courtyard where the gamblers can assemble. Two more houses were subsequently opened, and facilities for gambling are now offered at three establishments. The system of play followed at these places has been thus described. Attached to the houses are a number of men who register bets for the proprietors, charging them or the successful wagers a commission of one pie or of one anna, respectively, on each rupee won. The bets are made on the occurrence of rain within a certain time, and they are registered three or four times daily. The proprietors of the premises offer odds against rain, and these depend chiefly on the state of the weather, ranging from level money to 2 to 1, 3 to 1, and so on, sometimes up to 50 to 1. Those who back the rain do not win unless the fall suffices to cause an overflow from a small raised tank through a spout, which is visible from the courtyard. A clock is kept on the premises to regulate the time.

"For many years after its introduction rain-gambling was practised mainly by the Marwaris; but, though it doubtless brought much pecuniary loss and misery to members of that community, as is inevitable with the systematic pursuit of gambling, the evil did not attain such proportions as to attract public notice and call imperatively for the interference of the Government. Recent years, however, have seen a marked development of this vice; and crowds of all nationalities are now observed at the gambling establishments. The Commissioner of Police has reported that they are frequented by Europeans, East Indians, West Indians, Native Christians, Jews, Hindus and Muhammadans—no doubt, chiefly the poorer and less respectable of those classes—and that native women and even children take part in the betting. So systematised and general has rain-gambling, in fact, become that a guide to it was published in the past year, which professed to instruct the public in the study and forecast of the weather and to furnish tips for the rainy season. It appears that bets are made for small sums of few annas as well as for many hundreds of rupees, and temptation is thus offered to the poor and the wealthy alike. The gambling-houses and the streets where they are situated are frequently crowded from morning till midnight, and stalls for registering bets are kept in the street as well as inside the premises, causing much obstruction to traffic. A public nuisance thus exists, and, apart from the annoyance to persons residing in, or using, the streets who do not take part in the gambling, the Police fear that there may, at any time, be a serious breach of the peace. The attention of the Government was drawn to this gambling by a question asked in this Council by the Hon'ble Babu Surendranath Banerjee in July, 1895, but Sir Charles Elliott was not disposed to undertake legislation, on the grounds that betting in private houses could not be put down, and that it was not desirable to devise a law to stop this form of betting when other forms were left untouched. Last year the matter was again brought before the Government by a memorial submitted by a considerable number of residents of the neighbourhood of the gambling-houses, complaining of the injury done to those who resorted to them, and praying for their suppression. His Honour the Lieutenant-Governor was satisfied that a state of things existed which demanded further consideration, and after the receipt of a report from the Commissioner of Police, the Calcutta Corporation, the British Indian Association, the Central National Muhammadan Association, the Muhammadan Literary Society and the Indian Association were invited to express their opinion whether the evil of rain-gambling is confined to the Marwari community, or whether it is so far reaching and disastrous in its effects as to warrant recourse to legislation. With one exception, all these representative bodies have replied that rain-gambling extends to other classes than Marwaris, and strongly recommend legislation. It is stated by one of the Muhammadan bodies that many *purda-nashin* ladies of certain sections of their community are being drawn into this gambling through the agency of female brokers secretly employed by the proprietors of the establishments in Bura Bazar. The only dissentient opinion as been expressed by the British Indian Association. They recognize that the evil exists and is very demoralising, and that others than Marwaris are affected; but they object on general grounds to any legislation unless means could be devised for checking all other kinds of gambling, whether public or private. The Hon'ble Members will observe that the existence of a serious evil is generally admitted; and, apart from the testimony thus received, it is manifest that an organized system of public gambling such as this cannot be kept up without injury to many if not the majority of those whom it attracts. Instances of ruin and crime resulting from indulgence in rain-gambling have been mentioned, and it is impossible to doubt that many such cases have occurred. In the memorial presented last year, to which I have already alluded, it was stated that native bankers and merchants and young women of respectable families had ruined themselves by this pernicious habit. If the Council desires to hear of specific cases, I would mention two. In 1892 a young man committed suicide in consequence of his inability to repay a sum of money embezzled from his employer for the purpose of meeting losses at rain-gambling. Two years later

another case came to notice in which a son had stolen ornaments of large value and money from his father for the same purpose. In the former case the Jury which sat in the Coroner's Court made a presentment recommending that measures should be taken to stop rain-gambling. In the presence of the clear evidence of the widespread evil which is being done by these gambling establishments of Bura Bazar, not only among the Marwaris, rich and poor, but also among the poorer members in particular of other communities, the Lieutenant-Governor could entertain no doubt as to the necessity for legislation for the suppression of rain-gambling, and this Bill is the outcome of his consideration of the matter. It has been submitted to the Governor-General in Council, and sanction to its introduction in this Council has been received.

"I have mentioned the objection taken by the British Indian Association to legislation for this form of gambling while other kinds of gambling are left unchecked. Betting on horse races has been specified as equally pernicious, and it has been argued that so long as such betting is permitted legislation for the suppression of rain-gambling cannot be justified. It is not my desire to attempt to minimise the mischievous consequences of betting on the Turf; but I would draw attention to a broad distinction between it and the gambling which this Bill is designed to suppress. Racing is held for a few hours on only a few days of the year; rain-gambling continues daily and practically all day for six months. It is a legitimate inference that the mischief done by betting in the one case must be far less than in the other. But whatever may be the fact as regards betting on the race-courses, it is, I venture to think, on the present occasion a sufficient reply to the objection to partial legislation to say that it is unreasonable to abstain from dealing with a particular form of betting which can be reached and suppressed because attempts to suppress other forms appear undesirable or impracticable. Legislation against rain-gambling has been undertaken in Bombay and undertaken with success, and there is no reason to anticipate failure in this Presidency. I confess my inability to understand the attitude of those who, while admitting the very demoralising effects of rain-gambling, would permit it to flourish in this City and draw more and more of the poorer classes under its baneful influence. They cannot desire to defend it as a legitimate pastime, or deny that it is possible to enforce a law for the suppression of the gambling houses, and their objections to legislation must, therefore, be characterized as purely academic.

"It remains for me, before explaining the provisions of the Bill, to notice that a memorial, largely signed by Marwaris, including some heads of firms, and many managers and servants of other firms whose owners were absent from Calcutta, has recently been received protesting against legislation. The memorialists traverse the statements made in the memorial of last year in condemnation of rain-gambling, assert that this form of gambling is comparatively innocuous or not more injurious than others, and that if suppressed gambling in some new form will take its place, and pray that it may not be interfered with. I have already, I trust, satisfied the Council that the character of an innocent pastime which the memorialists claim for rain-gambling cannot be rightly ascribed to it. It is possible, as they anticipate, that the Marwaris will devise some new form of gambling on its suppression. They have, the memorialists state, introduced in Bombay a system of betting on the number of cotton bales sold daily in the London market, not unlike the well-known betting on the prices realised at the Government opium sales in Calcutta. The suppression of rain-gambling will, however, at least protect from ruin and misery many outside the Marwari community who have been drawn into the gambling establishments. But the Government has reason to know that the more respectable Marwari residents themselves would be glad to see this gambling suppressed, although they are prevented by caste obligations from openly announcing their view. In any case, it would be entirely inconsistent with the principle of English administration in regard to gambling to tolerate the existence of public gambling houses in Calcutta or any other town of this Province.

"The provisions of the Bill may be very briefly explained. In Bombay legislation took the form of a short Act amending the General Gambling Act of the Presidency by including 'wagering' in the definition of 'gaming,'

and 'any article used as a subject or means of gaming' in the definition of 'instruments of gaming.' Wagering on rainfall thus became illegal, and water-spouts and clocks watched for the decision of the bets, if within the premises of the gaming house, became instruments of gaming. In the present Bill it is proposed to effect the object in view by directly prohibiting rain-gambling. The definition of 'common gaming house' in the Bengal Acts is, therefore, to be amended by the addition of words which will bring within it any premises in which rain-gambling, specified as 'the form of wagering called rain-gambling,' is carried on; 'gaming' is to be defined as including rain-gambling; and within the definition 'instruments of gaming' are to be included books or registers in which rain-gambling wagers are entered, and all documents containing evidence of such wagers. These amendments will, it is believed, be effective against rain-gambling as it is now conducted. If gambling is hereafter practised in private houses it could be done only on a small scale, and the harm would be proportionately small. The risk of prosecution would be a strong check against attempts to revive the gambling establishments in private residences. But while provision is made for suppressing the rain-gambling which actually exists in Calcutta, it is obviously essential to guard against the setting up of similar establishments in the vicinity or in any town of the interior. The amendments which I have described are, therefore, to be introduced in the following Acts, which provide for the punishment of gambling in this Province, that is, Act XXI of 1857, so far as it relates to Howrah, Act IV (B.C.) of 1866, relating to the Town of Calcutta, and the general Act, II (B.C.) of 1867 which operates in particular places on extension."

The Hon'ble MR. WALLIS said:—"I believe I am in order in referring at this stage of the proceedings to the general provisions of the Bill which is now before the Hon'ble Members, and which it is proposed to refer to a Select Committee. I do not wish, sir, for one moment to stand here as the champion of rain-gambling or of wagering or betting of any description; but I would desire to submit that the proposal at this meeting to introduce the Bill, to suspend the Rules of Business, to move that it be read in Council, and to appoint a Select Committee with instructions to report in a week, has, to say the very least of it, the appearance of undue haste. Personally I must admit that I am not prepared at such short notice to refer in detail to the principles of the Bill, or to express an opinion one way or the other; for up to the present the memorial which was referred to by the Hon'ble Member in charge of the Bill, and which I understand was submitted to Your Honour last year, praying that rain-gambling should be suppressed, has not reached my hands, and it was only on Tuesday last that I received official notice that I would be asked to sit on the Select Committee. Since then I have endeavoured to find out something about this form of wagering. I have interviewed several gentlemen who are capable of giving an unbiased opinion, and I have visited one of the betting houses. I am compelled to say that in my opinion the betting is carried on in a very systematic and open way. I certainly hold with the opinion expressed by Sir Charles Elliott through his Chief Secretary as recently as July 1895 that it would be practically impossible to put down betting in private houses, and if this particular form were stopped, it would break out in some other, and if driven into secrecy, might be more harmful than if practised openly. Further, he did not think it possible to devise a law which would stop the form of betting known as rain-gambling without also bringing such practices as betting on races or on other events of chance within its prohibition. This, sir, seems to me the correct view of the matter; for it is manifestly undesirable to legislate for one particular form of wagering and to leave untouched so many others which are known to exist. I do not think, sir, that this Bill has been sent to the European Associations for opinion. I am almost certain that the Bengal Chamber of Commerce has not been consulted, and I know the Trades Association have not. I would therefore beg, sir, that you will exercise the discretion which is given you under section 22 of the Rules of Business, and allow me to put forward an amendment that the discussion of the general principles of the Bill be postponed, and that the Bill be referred

to all the Associations and public bodies in Calcutta for an expression of their opinion with a request that they report as early as possible. In support of my amendment, I would urge that as this form of wagering has been carried on for upwards of three quarters of a century, it is certainly not desirable to hurry the Bill through, even if my amendment should lead to the postponement of the question until the autumn session, or even until next cold season."

The Hon'ble SIR CHARLES PAUL said:—"I desire to make one observation. I find that objection is taken to this Bill on the ground that no legislation should be undertaken in regard to one form of gambling until we are also prepared to take into consideration legislation in respect of other forms of gambling. I hope this Bill may be the commencement of an attack upon gambling of every description. The objection taken does not commend itself to my mind, we must make a beginning."

The Hon'ble MR. M. S. DAS said:—"A good deal has been written in the papers and said about this Bill, but one thing I do not understand, namely, why there should be so much opposition to this Bill. The existing law on the subject contains a provision against keeping a common gaming-house, and the amendment proposed by this Bill only aims at enlarging the definition of the term "common gaming-houses." I do not see how there can be any analogy between betting at races and the system of gambling for the suppression of which this Bill has been introduced; because certainly there is a certain amount of difference between people betting in their own houses and the systematic betting carried on in establishments which are open to the public where any one can go and indulge in betting. The law aims at putting down such common gaming-houses. A legislative assembly does not undertake to improve the morality of the people. We do not sit here to do the work of preachers and moralists; but in all countries the Legislature does undertake to put a certain amount of restraint upon places of public resort for the protection of the public. The Marwari community are of course quite welcome to indulge in betting in their own houses; but if they require certain appliances for the purpose, a reservoir and a spout through which water must flow, they reduce it to the form of a common gaming-house. I do not think it is the intention of this Bill to stop Marwaris or any other persons from gambling about rain falling, or staking their purses upon prognostications of rain; but it is this particular system of gambling which it is proposed to suppress by means of this Bill.

"While we are on this subject, I beg respectfully to submit that this opportunity should be utilised to introduce a small amendment in the Gambling Act which affects the mufassal. There is a difference in the provisions of the two Acts,—the Act which affects Calcutta, and the Act which affects the mufassal, with regard to the power of the Magistrate to order the search of a house on suspicion that it is a common gaming-house. A Magistrate in Calcutta can take the initial proceeding when he receives information upon oath; whereas under the Mufassal Act no such thing is necessary to enable the Magistrate to take the initial proceeding. It has often been remarked that in carrying out the provisions of this Act, some *zoolum* is done by the mufassal police; and as it is the duty of this Council to protect the interests of the public by preventing gambling, I think it is the duty of the Council as well to see that some person should be held responsible for any annoyance or insult to which an innocent person may be put when the search of his house is made on information which perhaps proceeds from malice or spite. This would not be the case if the information was on oath. This is a suggestion I beg to make, and I hope the Hon'ble Member in charge of the Bill will take this matter into consideration. It is a very small matter, and I hope the Hon'ble Member will see his way to introduce such an amendment."

The Hon'ble RAI ESHAN CHUNDR A MITTRA BAHADUR said:—"Up to yesterday I thought of opposing this Bill, but after hearing the instances of ruin which the Hon'ble Member in charge of the Bill has adduced, I consider the object of this Bill to be extremely benevolent. I think, however, that the Bill may be made

a little more comprehensive in its provisions. I am not one of those who think that because the Government cannot touch gambling upon horse-racing or on opium *tejimundis*, the Legislature should not be in a position to put a stop to the evil which this Bill is intended to meet. Evils must be met gradually, and because one particular form of gambling cannot be dealt with at once, that is not a reason which should prevent legislation regarding another particular evil. I therefore think the legislation now proposed is one which ought to be supported. No doubt there are certain sections of the law which confer too much power upon the police, but at the same time the police must have some power for the suppression of this evil, and I would suggest that the definition of gaming-house should be amended in Select Committee. If the mere fact of finding cards in a house is sufficient to raise a presumption that it is a gaming-house, no house would be free from suspicion. The law as it stands provides that the finding of cards is evidence of a house being a gaming-house. I submit that the law goes too far in this respect, and I have no doubt the Council will be able to introduce a modification which would lead to general satisfaction."

The Hon'ble BABU SURENDRANATH BANERJEE said:—I shall not be doing justice to myself if I do not accord my cordial support to this Bill. I have not been able to follow the observations of the Hon'ble gentleman who has asked for the postponement of the Bill. His chief grievance seems to be that certain European Associations were not consulted. He does not say that the enquiry instituted by the Government was not exhaustive, but that particular Associations representing particular interests were not consulted. I should like to ask the Hon'ble gentleman what interest the European Associations have in a Bill of this description. Suppose the Government were to introduce a Bill relating to mercantile matters, would it be any answer to the Bill being proceeded with that the British Indian Association and the Indian Association or the two distinguished Muhammadan Associations which are so ably represented here, had not been consulted? I do not suppose the Hon'ble Member in charge of the Bill would waste his time in sending such a Bill round for the consideration of bodies who could not be presumed to have any particular knowledge of such matters. The European community have not the smallest interest in the Bill now before the Council. It is not pretended that European merchants or tradesmen frequent places like these or take part in rain-gambling transactions. The European Associations were not consulted because it was not thought necessary to do so. The Calcutta Corporation considered the matter at a meeting of the general committee, the executive body of the Corporation. I hold in my hands the proceedings of that meeting when the vote in favour of legislation was practically unanimous, there being only two dissentients. The Bill was also considered by the Indian Association with the Hon'ble Member for the University in the Chair, and the vote there was absolutely unanimous. The Muhammadan Literary Association and the Central Muhammadan Association also supported legislation in connection with this matter. I confess I cannot understand the other argument which has been urged by the same Hon'ble Member, namely, that this practice has been in force for the last seventy-five years, and therefore it may be allowed to continue for some time longer. Prescription does not consecrate an evil. No matter how long an evil has been in existence, if it is an evil which is growing and is expanding, if it is proving detrimental to a substantial portion of the community, it is the duty of the Government and of the Legislature to put it down. It has been urged that because we cannot suppress betting on the turf, therefore we must not interfere with rain-gambling. I would rejoice if we could see our way to suppress betting on the turf; but does it stand to reason and common sense that because we cannot suppress both these evils we must not suppress one of them when it is in our power to do so? The two forms of gambling do not indeed stand on the same footing. Betting on the turf is supported by the opinion of the civilized world, and a legislator wastes his breath who legislates in violent opposition to public sentiment. It would be futile to do so. Betting on the turf is supported by a large body of public opinion, and canons and rules have come into existence which act as safeguards against abuse. I should like to know if any such safeguards exist as

to rain-gambling. Then I am told that if rain-gambling be suppressed in public, it will be carried on in secret. This is precisely one of those forms of gambling which cannot be carried on in secret. If it rains the bet is won; if it does not, it is lost. The gamblers must look at the clouds. They can hardly do so in secret. Further, if an evil practice is suppressed by legislation, and if such legislation is not very much in advance of public sentiment, the evil is sure to be minimized and must eventually disappear. Let me give a concrete instance. The Government has put down those dens of iniquity in which opium smoking was practised. Opium smoking has not indeed disappeared. But the evil has been minimised. The number of opium-smokers has become less, and in the course of the next twenty or thirty years the evil will have disappeared. It will be the same in the case of rain-gambling. If you fail to deal with the evil now, it will strike a firm root in the soil, vested interests will gather round it, and it will gradually enlist the support of a sympathetic public opinion. I have discussed this question with men of light and leading in Burra Bazar, and I have heard no opinion except such as condemned the practice. Calcutta society was not long ago convulsed by the tale of an atrocious murder committed by a Bengali named Annoda Prosad Ghose. He murdered his sons. And when the story of his life was published, what was the most startling fact which it disclosed? He was a confirmed rain-gambler, and lost the whole of his fortune, amounting to two lakhs of rupees, in the rain-gambling establishment. Only the other day I was having a conversation with one of the foremost men in the Marwari community. He said there was a respectable lady living in Burra Bazar who had taken to rain-gambling; she went through the whole of her money, and then went astray; another person embezzled his master's money, and then expiated his guilt in the Presidency jail, and there are no doubt other cases which have not seen the light. I have no hesitation in saying that it is the bounden duty of the Government and the Legislature to suppress an evil which is spreading fast. It is not confined to the Marwari community. it has spread to the Bengalee community, to Eurasians, Armenians and Jews. I know there are clerks employed in the Bengal Office who frequent these gaming-houses. I hope and trust this Bill will be passed into law before the rains set in, and a Government which places such a law as this upon the statute-book will be entitled not only to the lasting gratitude of the Marwari community, but to the approbation of the thinking and the good among all sections of the people.

The Hon'ble NAWAB SYUD AMER HOSSEIN said:—"While according my support to this Bill, I must protest against any delay in passing the measure, for that will mean to allow another full season for the practice of rain-gambling, which begins from about the middle of the month of May. Next to the Commissioner of Police, I, as Magistrate of the Northern Division of the Town, have had frequent opportunities of observing the evil effects of rain-gambling. It is carried on within my jurisdiction, and I have had several cases of honest gomashtas, durwans and other servants falling into the temptation, and after losing all they possess, committing either theft or criminal breach of trust. In addition to the two cases of suicide mentioned by the Hon'ble Member in charge of the Bill, I had, while acting as Coroner last year, another case, in which a man committed suicide simply because he was ruined by rain-gambling. I had also before me the case of Annoda Prosad Mitter, the real cause of whose ruin was rain-gambling. I therefore strongly support this Bill."

The Hon'ble RAI DURGA GATI BAERJIA BAHADUR said:--"With Your Honour's permission I will say a word or two in support of this Bill. The exhaustive and lucid speech of the Hon'ble Member in charge of the Bill gives an adequate idea of the pernicious effects of rain-gambling. I have personal knowledge of the ruin which this baneful system of gambling has caused to many families in Calcutta. This evil is not confined to Marwaris, but extends also to other sections of the community. In fact, it is a public nuisance, as has been remarked by the Hon'ble Mover; and the sooner it is suppressed, the better for society. It is an acknowledged evil, and there is no reason why it should not

be suppressed because other similar evils exist. There seems to be nothing in the system of rain-gambling which can commend it either from a social or moral point of view. The sooner therefore this serious and growing evil is suppressed the better. This has already been done by legislation in Bombay, and I do not see why this Council should not follow the example set by that Legislature."

The Hon'ble BABU GURU PROSHAD SEN said:—"I hope the Hon'ble Member in charge of the Bill will see his way to include section 6 of the Gambling Act in his scheme of amendment. That section provides that when any cards, dice or other instrument of gaming are found in any house, tent, room, space, or walled enclosure entered or searched under the provisions of the last preceding section, or about the person of any of those who are found therein, it shall be evidence, until the contrary is proved, that such house is used as a gaming-house. Here the accused has to prove his innocence when a case is brought against him. That Act was passed in 1867. Probably the emergency of the case at the time required a provision like that; but when the Legislature is engaged in amending the Gambling Act there is no reason why this particular section should not come under revision."

The Hon'ble MR. BOLTON in reply said:—"The support which this Bill has received from the Council is very gratifying to myself as its Mover. The Hon'ble Mr. Wallis has taken objection to the haste with which legislation is being pressed. The sole reason for passing rapidly through the early stages of the Bill is that the Session of the Council will come to an end shortly, and that, therefore, if the measure is to be passed now, the Council must go through the preliminary stages quickly. For delay in passing this Bill I can conceive no possible reason. In addition to the cases which I have mentioned to the Council, other instances of the very serious evil done by rain gambling have been mentioned by the Hon'ble Babu Surendranath Banerjee and the Hon'ble Nawab Syad Ameer Hossein, and there can be no reason for allowing this form of public gambling to continue for one day longer than can be avoided. The Bill will cause injury to none but the keepers of the gambling-houses, who, no doubt, benefit very largely by the recklessness or want of intelligence of the unfortunate people who resort to their houses. To the gamblers, and others who might hereafter have been tempted to follow their example, this Bill will be an incalculable boon. If the Marwari community, as those who have memorialised against legislation have themselves declared, cannot repress their passion for betting, the Bill will not be open to the reproach of adding to the many ways in which they indulge that passion: on their own admission it will only result in one form of gambling being substituted for another. Inquisitorial interference with gambling in private houses is not proposed. The Bill deals only with *public* gambling, for the suppression of which the law already provides. All that it insists upon is that if the Marwaris choose to indulge in gambling, they shall not be permitted to do so in houses to which the public are invited. While making these remarks about the Marwaris, however, I must repeat that it is known to the Government that the most respectable men of that community are most anxious that legislation on this subject should be carried through, and that they would hail with the greatest satisfaction the passing of this Bill. The action of the Government in pushing this Bill through the Council, therefore, needs no defence. I have already, in my opening speech, replied to the argument that this legislation is unjustifiable while we abstain from interfering with other forms of gambling, and other Hon'ble Members have also pointed out the futility of that argument. The Hon'ble Mr. Wallis took exception to the Government not having invited the opinions of the Chamber of Commerce and the Trades Association on the necessity for legislation in this case. As I have already informed the Council, various native Associations have been consulted, and with a single exception they strongly and unanimously recommend legislation. It did not occur to the Government to consult the Chamber of Commerce and the Trades Association, because Europeans are not concerned with this matter. The fact, as reported by the Commissioner of Police, that Europeans and Eurasians resort to these rain-gambling houses can afford no ground for a contention that the interests of Europeans in general are affected by the

provisions of this Bill. It appears to me, therefore, entirely unnecessary to postpone the consideration of this Bill in order to invite the opinions of the Chamber of Commerce and the Trades Association. As opinions have already been invited and received from the Associations which are really concerned with this measure, and which it was necessary to consult as representatives of different sections of the native community in Calcutta, I must oppose the amendment which the Hon'ble Member desires to move for postponing the consideration of the Bill to another Session of the Council. During that interval a serious public nuisance will continue, and further evil will be done among the people who are drawn to these gaming-houses. The Hon'ble Mr. Das, Babu Guru Proshad Sen, and Rai Eshan Chundra Mittra have suggested that the Council should also take into consideration certain provisions of the Acts dealing with public gambling, but it is not necessary to examine those provisions of the law at present, and I must object to our travelling beyond the scope of this Bill, which has been framed simply for the purpose of including rain-gambling as practised in Bara Bazar among the different forms of public gambling which are prohibited by the existing law. We are not here to undertake the general revision of the gambling law. For such a revision of the law a separate measure must be introduced, in connection with which the principles which regulate the law could be discussed. I am not prepared, therefore, to support the suggestion of the Hon'ble Members that the desirability of amending the sections to which they have referred should be considered. If any Hon'ble Member desires to bring forward in Select Committee any particular amendment of the law, he will be at liberty to do so, but personally I shall strongly oppose any amendment in the direction which has been suggested."

The Hon'ble THE PRESIDENT said:—"Before putting the motion, it is perhaps as well that I should express my own personal views in regard to this measure. I am afraid I do not rise a very great height of moral elevation in connection with this Bill. Personally, I have no sympathy whatever with gambling in any shape or form. I never made a bet in my life; I do not play cards for money; and the only gambling I ever indulged in, if it can be so called, was when I took some tickets in Lady Mackenzie's lucky bag at the Fancy Fair at Belvedere a few days ago. I am no believer in enforcing morality by legislation. I look upon this Bill simply as a measure of police. I have been convinced by the reports of the Commissioner of Police that the practice of rain-gambling has grown to the dimensions of a large and growing public nuisance. It is solely in that light that I approach the question. At home and in most civilised countries common gaming-houses are looked upon with disfavour, and are suppressed by legislation. The mode in which this form of gambling is conducted in Burra Bazar has become so intolerable as to call for the intervention of the police. They are common gaming-houses of a most notorious description, and ought, as a matter of police pure and simple, to be suppressed. This is simply the light in which I view the question.

"I am not prepared to accept the amendment of the Hon'ble Mr. Wallis, though of course it is open to him to ask that it should be put to the Council should he consider it necessary to do so. This Bill has been before the public for a long time. It did not occur to me to refer it to the European Associations, but it was open to those Associations, if they were interested in the measure, to approach the Government without any special invitation. They have often done so in the past, and will, I trust, continue to do so in the future. I do not know what the Hon'ble Mr. Wallis saw in Burra Bazar in the middle of the hot weather,—probably not very much, but if he visits it in the rains or reads a description of it in the rains, I think he will be convinced that this is a measure which, in the interests of good order in the city, we are bound to press forward. The delay in introducing this Bill into Council is not altogether the fault of the Government of Bengal. We had to secure the approval of the Governor-General and of the Government of India to this legislation before we could introduce it, and the Government of India amidst its many duties necessarily and unavoidably lost some time in replying. We

must push it through now, because we consider that when once the determination has been come to to put down the evil, we ought not to allow it to continue for another rainy season. As a matter of fact no delay could add to the information which the Select Committee will have before them. I have in the drafting of this Bill, which follows largely my own suggestions, avoided as far as I could the difficulties which arose from the introduction of the form of words which found favour in Bombay. I sought to raise no general question as to the propriety of other forms of wagering, but to make the Bill deal directly and simply with the particular evil which we sought to control, rain gambling in common betting houses. Hence the shape which it assumes, and I trust the Select Committee will see their way to return it to the Council without any material alteration in its form.

"The Hon'ble gentlemen who have suggested that we should take this opportunity of amending other portions of the Act have also pressed upon us the inadvisability of delaying the passing of this Bill. But I must call attention to the fact that if we do tamper with or alter the Act as a whole and the general principles of it, we must necessarily hang it up until opinions upon those alterations are received from all over Bengal. Therefore I trust that when this Bill goes before the Select Committee, they will confine their attention to the Bill as it is now laid before them."

The Hon'ble Mr. WALLIS said:—"I still desire, with Your Honour's permission, notwithstanding all that has been said by the respective speakers, respectfully to put the amendment I have brought forward. I should have refrained from making any further remarks but for one or two observations which have fallen from the Hon'ble Babu Surendranath Banerjee. He said that this Council would not think of referring commercial questions for the consideration of the Muhammadan Literary or other kindred Associations, but the Hon'ble Member surely does not seriously mean to compare this piece of general legislation to legislation confined to commercial questions pure and simple. He must remember that the Chamber of Commerce, holding the position it does in Calcutta, has not been built up by taking into consideration questions which concern them alone as commercial men, but their views have been asked and sought for by the Government, and they have taken up questions entirely outside the interest of Commerce, and have done so in the interests of all classes of society. And I may also be allowed to say that the Trades Association, though in a much less degree, have ventured to do the same. I therefore still consider, notwithstanding what has fallen from the Hon'ble Members who have spoken and the Hon'ble Member in charge of the Bill, that this Bill should be referred to the Chamber of Commerce and the Trades Association for an expression of their views.

"I prefaced the remarks which I first made by saying that I was not championing rain-gambling or gambling or betting of any sort, and I purposely avoided expressing my opinion either on the question directly before me or upon any other form of wagering or betting. I said that I was not in a position to discuss the general provisions of the Bill simply because I did not know sufficiently about the matter. I must, however, now frankly admit that the attitude which I took in respect of this Bill has been considerably altered by what I had since heard of the crimes which have resulted from the effects of this vice of rain-gambling. The Hon'ble Member in charge of the Bill has been good enough to put my name on the Select Committee, and I shall therefore have the opportunity of considering any further information which may be placed before us. I could, however, still desire, with Your Honour's permission, that my amendment should be put to the Council."

The Hon'ble Mr. WALLIS's Motion that the Bill be referred to all Associations and Public Bodies in Calcutta for an expression of their views upon it, with a request to report thereon as early as possible, was put to the vote and negatived.

The Hon'ble Mr. BOLTON's Motion that the Bill be referred to a Select Committee was then put and agreed to.

AMENDMENT OF CERTAIN SECTIONS OF BENGAL TENANCY
ACT, 1885.

The Hon'ble Mr. FINUCANE moved for leave to introduce a Bill to amend sections 30, 31, 39, 52 and 119 and Chapter X of the Bengal Tenancy Act, 1885. He said:—

“This Bill with its Statement of Objects and reasons will be circulated and placed in the hands of Hon'ble Members in a day or two. The Bill is an important one—perhaps one of the most important Bills introduced in this Council for many years past, but I do not propose to detain the Council to-day in attempting to explain its provisions or its objects and reasons. I shall, with the permission of the Council, do so when Hon'ble Members have had time to read the Bill and see what its provisions are.”

The Honble RAI ESHAN CHONDRA MITTRA Bahadur said:—“As I have great doubts upon the point, may I ask Your Honour's permission to put a question to the Hon'ble Member in charge of this Bill, namely, whether this Council has the power to curtail or to modify the jurisdiction of the High Court.”

The Hon'ble SIR CHARLES PAUL said:—“As the question of the power of this Council to interfere with the jurisdiction of the High Court has been mentioned, I wish to state that I have lately had occasion to consider the question. The Bengal Council has no power to cut down any Act of Parliament, and so far as the High Court receives any jurisdiction from an Act of Parliament, this Council cannot modify or control such jurisdiction, but all jurisdiction which the High Court receives from the Acts of the Governor-General in Council or from any Act of this Legislature can, with the consent of the Governor-General in Council, be controlled or modified or abrogated by this Council.”

The Hon'ble THE PRESIDENT said:—“The Bill is not before the Council at present, and none of the members know at present what it contains. A reference to the Bengal Tenancy Act will show that this Council has the power to amend that Act, and therefore the objection which has been taken is premature at this stage. The only question at present before the Council is that leave be given to introduce a Bill, contents unknown, to amend the Bengal Tenancy Act. The Bill, as the Hon'ble Mr. Finucane has said, is a very important one, and I have no intention of rushing it through. It will at present be simply introduced and explained; it will then be published and referred for opinion to all public officers and local bodies, and there will be ample time, before the Council takes up the Bill in its later stages, to know what the Bill proposes to do, what it does not do and what the Council ought to do.

“I will also take this opportunity to say that I have no intention of hurrying through the further stages of the Partition Bill, but I hope the Select Committee will be able to submit its report before the Council parts, as my intention is to republish the Bill and to refer it to public officers and local bodies, and to await the receipt of their opinions before the Council proceeds to consider the Select Committee's report.”

The Motion was put and agreed to.

The Council adjourned to Saturday, the 27th instant.

CALCUTTA;
The 30th March, 1897. }

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

THE SUBORDINATE EDUCATIONAL SERVICE.

GENERAL DEPARTMENT—EDUCATION.

Calcutta, the 30th March 1897.

RESOLUTION—No. 1281.

READ—

Resolution from the Government of India, Home Department No. ^{4 Edu.} ~~204-214~~ dated the 23rd July 1896.

Read also—

This Government Resolution No. 1244, dated the 26th March 1897.

Letter No. 1020T., dated the 5th November 1896, from the Director of Public Instruction.

IN Resolution No. 1244, dated the 26th March 1897, the reorganization of the Education Department so far as regards the Superior Service (including the Indian and the Provincial Services) has been dealt with. The present Resolution relates to the Subordinate Educational Service.

2. The proposal originally made by the Government of Bengal in 1891 was to put the officers into six classes on pay as follows (see paragraph 16 of General Department letter No. 267T.G., dated the 28th September 1891):—

Rs.

Class	I,	2 per cent. of the officers, on 250 a month.			
"	II,	4	ditto	on 200	"
"	III,	8	ditto	on 150	"
"	IV,	26	ditto	on 100	"
"	V,	28	ditto	on 75	"
"	VI,	32	ditto	on 50	" "

2. Dr. Martin in this connection writes:—

"The total number of officers to be brought thus into the classified list is 512, as shown in the accompanying list, *plus* three Additional Deputy Inspectors of Schools (see Government Order No. 1581, dated 10th April 1896), and two Head Clerks for new Inspectors to be employed under the new reorganisation scheme, or in all 517 officers, so that on the scale mentioned above, we should have, say—

In Class	I	10 officers.
"	II	20 "
"	III	41 "
"	IV	132 "
"	V	144 "
"	VI	170 "

At a cost of—

				Rs.
Class	I	2,500
"	II	4,000
"	III	6,150
"	IV	13,200
"	V	10,800
"	VI	8,500
Total				45,150

"This total is less than the value of the appointments at present held by these same officers, and I therefore venture to suggest a modification both in the standard scale and in the value of the classes. One reason for my doing this is that, though my instructions are that the new arrangements shall involve no expenditure in excess of what is now being incurred, I yet understand that I am not, on the other hand, called upon to effect any savings.

"The value of the posts held by the officers who are to be placed in the new subordinate list amounts to Rs. 46,200 monthly.

"I think, therefore, that I am entitled in my proposal to place the value of the appointments in the new list at not less than this sum."

Later on Dr. Martin brought forward arguments for raising the value to Rs. 47,200, and in a note furnished by Sir Alfred Croft the figure has been again raised to Rs. 47,500. The Lieutenant-Governor now sanctions Rs. 47,500 as the value of the appointments to be included in the service.

3. Dr. Martin continues:—

“When I brought forward my scheme for the Subordinate Service in 1893 (No. 6918, dated the 17th November 1893), I wrote as follows:—

“I have ventured to make a slight deviation from the standard scale with a view to give some relief to a large body of Rs. 50 men, who, though they were not considered eligible to advancement to Class VII of the present Subordinate Service, have nevertheless been serving for such a long time upon fixed pay (Rs. 50) that some encouragement to them, however slight, is advocated; and since I can arrange this without additional cost, I hope that my proposal may be sanctioned. To give an idea of the class of men for whom I wish to do something, I may mention the case of a host of Sub-Inspectors of Schools, who may be said to have a claim to promotion, but to whom this promotion cannot be given with due regard to the requirements of the Department. Of these, for example, I find that one man has been drawing Rs. 50 since 1875, six since 1876, two since 1877, five since 1879, three since 1881, four since 1882, three since 1883, eleven since 1884, and forty-eight since 1885. Stagnation of this kind can be in no way beneficial to the Service, and now that an opportunity has arisen for giving the necessary relief, I think it right to take advantage of it. My plan is, while leaving the percentages of men in Classes I, II, III, and IV as proposed above, to have three other classes instead of two: the 60 per cent. of officers reserved for the two classes being distributed as follows:—

				Rs.
Class V	to contain 16 per cent. on	...	75	a month.
“ VI	“ 22 “ on	...	60	“ ”
“ VII	“ 22 “ on	...	50	“ ”

Though the instances adduced are not quite applicable to the present time, yet the circumstances of the Department as it now exists call for the modification quite as much as they did in 1893, and I venture still further to suggest another modification, namely, that a class be admitted into the scale intermediate between those on Rs. 100 and Rs. 150, viz., on Rs. 125. One reason for making this proposal is that I can so arrange for giving encouragement to a much large number of deserving men than by the six or seven-grade scale, and another is that I desire to have a class into which may advantageously be placed at the start officers who may be especially selected for such important posts as Head-masterships of Zilla Schools and Deputy Inspectorships of Schools.

4. These proposals are approved, and the service will be composed as follows:—

Class.	Rs.			Number of officers.	Value. Rs.
I	(250)	10	2,500
II	(200)	24	4,800
III	(150)	45	6,750
IV	(125)	60	7,500
V	(100)	75	7,500
VI	(75)	90	6,750
VII	(60)	105	6,300
VIII	(50)	108	5,400
Total				517	47,500

The officers who have been admitted on personal grounds into the Provincial list will have their names placed on the subordinate list in square brackets. The cases of two of these officers, however, require special consideration from the fact that had they remained in the subordinate service list, they would be entitled to pay at the rate of Rs. 250 a month, whereas by their promotion to the Provincial list they can get pay at the rate of Rs. 200 only. Personal allowances of Rs. 50 a month will be allowed to each of these officers (Babus Jagat Bandhu Bhadra and Kunja Bihari Bose) till such time as they may by promotion be raised to Class VI of the Provincial Service on Rs. 250 a month.

5. Dr. Martin takes advantage of the class on Rs. 125 to suggest the promotion of a number of Head-masters and Deputy Inspectors, who happen to be lower down (though generally on Rs. 100 a month) in Class VI of

the old subordinate list. His proposal is approved, and the Lieutenant-Governor goes further in declaring that this new Class IV on Rs. 125 shall be generally the door of promotion to Head-masterships of Zilla Schools and Deputy Inspectorships of Schools.

6. Dr. Martin further goes on to say :—

"Similarly, in the case of Class VII on Rs. 60, I have proposed for admission to it, without their being necessarily the senior officers, a large number of *graduates*, who have been serving for some time on Rs. 50; and at the same time I have not forgotten the case of the senior of the Sub-Inspectors of long standing on Rs. 50. I desire to give special consideration to University graduates: this is in conformity with the principle enunciated in the concluding portion of paragraph 19 of the Government Resolution (General Department), dated the 21st January 1879, where it was declared that the regular method of recruiting the Education Department should be by the appointment to it of University graduates."

Sir Alfred Croft has made the following remarks on this proposal:—

"B.A. graduates could usually be appointed to the lowest class on Rs. 50. M.A. graduates (other than those who are appointed to the Provincial Service as College Professors) should, I think, be appointed to Class VII on Rs. 60, with the promise of the first vacancy in Class VI (Rs. 75) after three years' service in Class VII, and of the first vacancy in Class V (Rs. 100) after three years' service in Class IV. This would correspond to a similar proposal which I have made regarding Professors of European qualifications in the Superior Service; and as it is desirable to attract as many Masters of Arts as possible to the Subordinate Service, I recommend that it be adopted."

The proposals meet with the approval of Sir Alexander Mackenzie and are sanctioned; at the same time the Lieutenant-Governor directs that caution be observed in giving preferment to graduates lest the natural claims of other deserving officers may be unduly overlooked.

7. The vexed question of assigning positions in the list to officers, who being on fixed pay did not appear in the old subordinate graded list, has been thus dealt with by Sir Alfred Croft:—

"I recommend that (as in the Provincial Service) the place of an officer on fixed pay in relation to officers in the graded service be determined on the assumption that, if he draws a salary equal to the maximum of any class, he should rank as if he had been appointed to that class five years earlier, with a corresponding rule if his salary lies between the maximum and the minimum. Thus, if appointed on Rs. 200 in January 1891, he should rank next after the officer confirmed in the Rs. 150—10—200 class in January 1886; if appointed on Rs. 175 in 1891, he should rank next after the officer appointed to the class in 1888."

The list which is attached to this Resolution and which has been approved by Government has been prepared, so far as the Classes I, II and III are concerned, in conformity with this principle. The principle has also been observed to a very great extent in the other classes, though special consideration has been given to officers holding particular appointments and to graduates, and in addition those officers who were considered to have reached the limits of their promotion in the old graded list have necessarily been kept down in the new list.

8. The following principles are approved by the Lieutenant-Governor, and sanctioned:—

- (a) Promotion from class to class will not be determined by seniority alone. Seniority is only one of the conditions which render an officer eligible for promotion. Efficient service in the posts hitherto held, the nature of the appointments in which officers are serving, and capacity to fill posts of higher responsibility, are other determining factors of equal importance are to be considered as well as seniority.
- (b) Promotion of an officer to a post of greater responsibility will not necessarily imply promotion to a higher class on higher pay. An officer's selection for a post of greater responsibility will be an indication of his fitness for promotion at some future time, and in this way he will indirectly be a gainer; in this connection see the remark made above at the conclusion of paragraph 5.

9. Recently some additional Deputy Inspectorships of Schools have been sanctioned by Government. It is the desire of the Lieutenant-Governor that these posts should, as far as possible, be filled by gentlemen of the Muhammadan persuasion with a view to training them for ultimate employment as Deputy Inspectors of Schools in Muhammadan districts. Sir Alexander

Mackenzie has learnt with surprise that throughout Bengal there is but one Muhammadan Deputy Inspector of Schools, and this in His Honour's opinion is not right. The Director of Public Instruction will give this matter his careful attention, and see that the wishes of Government are followed, provided Muhammadan gentlemen properly qualified for the posts are procurable.

10. Excepting the Personal Assistant to the Director of Public Instruction who finds a place in the Provincial Service, the office establishment of the Director and also those of Inspectors of Schools and of Colleges will be included in the subordinate list.

11. Sir Alfred Croft makes some special recommendations of which the following are approved:—

- (a) The promotion to Class VI (Rs. 75) of Maulvi Abdur Razzaq, Head Maulvi of the Hooghly Madrasa. He is a man of considerable Arabic learning, and comes of a family renowned for scholarship. His position is an important one, and justifies a substantial increase.
- (b) The promotion to Class VII (Rs. 60) of Pandit Krishna Pada Vidhyaratna, lecturer in Sanskrit of the Chittagong College. He is a competent scholar and underpaid. The Sanskrit Teacher in the Collegiate School, who has lesser work to do, draws the same pay of Rs. 50, and stands many places higher. A somewhat better position should be given to the College Professor; but as he only teaches up to the First Arts, he should be content with a good place in Class VI, giving him some prospect of promotion.

12. Promotions to Classes I and II of the new Subordinate Service will be made by Government and gazetted. Appointments and promotions to the lower classes will be made by the Director of Public Instruction. Throughout the Subordinate Service the Director of Public Instruction is authorized to order transfers, and to decide the positions of officers, subject to an appeal to Government. He is empowered to grant leave to officers in all the classes from I to VIII. The power of appointment carries with it the power to suspend an officer, stop his promotion, degrade him to a lower class, and dismiss him or dispense with his services.

13. The scheme set forth in the previous paragraphs of this Resolution will take effect from the 1st August 1896.

By order of the Lieutenant-Governor of Bengal,

M. FINUCANE,

Secretary to the Government of Bengal.

List of officers to be included in the Subordinate Educational Service under the scheme of Reorganization.

[Prepared when it was thought that the scheme would take effect from 1st October 1896.]

Number.	Name.	Designation.
1	2	3

CLASS I—(10)—Rs. 250.

1	[Saroda P. Ganguli]	...	Provincial Service List.
2	Uma Kisor Roy	...	Deputy Inspector of Schools.
3	Khirood Ch. Rai Chaudhuri, M.A.	...	Head Master, Zilla School. <i>Since been removed to Provincial list.</i>
4	[Ambika Charan Mukherjea]	...	Provincial Service List.
5	[Baikuntha N. Roy, B.A.]	...	Ditto ditto.
6	[Bhuvan Mohan Sen, B.A.]	...	Ditto ditto. <i>Since been removed to Provincial list.</i>
	<i>Rai Sarat Chandra Das Bahadur, C.I.E.</i>	...	<i>Ditto ditto.</i>
7	Gaur Mohun Basak	...	Head Master, Zilla School.
8	G. Lawrence	...	Foreman Instructor, Civil Engineering College.
9	Sripati Banerjea	...	Deputy Inspector of Schools.
10	[Jugat Bandhu Bhadra]	...	Provincial Service List.

CLASS II—(24)—Rs. 200.

1	Francis X. Mukherjea, B.A.	...	Second Master, Collegiate School.
2	Kali Nath Chaudhuri	...	Deputy Inspector of Schools.
3	[Kunja Bihari Bose]	...	Provincial Service List.
4	Piyari Mohan Sen	...	Deputy Inspector of Schools.
5	Radha Lal	...	Ditto ditto.
6	Ram Prakash Lal	...	Ditto ditto.
7	Syam Lal Datta, B.A.	...	Second Master, Nawab's High School.
8	A. F. Burnie	...	Foreman Instructor, Civil Engineering College.
9	Abdul Haq Abid, B.A.	...	Second Master, A. P. Department, Calcutta Madrasa.
10	Hari Har Das	...	Deputy Inspector of Schools.
11	Sasadhar Roy	...	Head Master, Zilla School.
12	J. H. D'Abreu, B.A.	...	Second Master, Bihar School of Engineering.
13	Mrs. E. A. Pegler	...	Head Mistress, Kurseong School.
14	Mohim Ch. Chatterjea, B.A.	...	Deputy Inspector of Schools.
15	Ram Sundar Basak	...	Additional Deputy Inspector of Schools.
16	Syama P. Roy	...	Head Master, High School.
17	Kura R. Roy	...	Head Master, Bihar School of Engineering.
18	Hari Charan Nag	...	Head Master, Survey School.
19	Abhay Ch. Pal, B.A., B.L.	...	Second Master, Collegiate School.
20	Rajani K. Ghosh, B.A.	...	Third Master, Collegiate School.
21	Kedar N. Ghosh	...	Head Master, Zilla School.
22	E. Cleghorn	...	Head Master, Branch School.
23	Abhay Ch. Mitra, M.A.	...	Second Master, Training School.
24	Kailas Ch. Bhattacharjea, B.A.	...	Head Master, Zilla School.

CLASS III—(45)—Rs. 150.

1	Giridhari Bose	...	Deputy Inspector of Schools.
2	Sura Nath Chatterjea, B.A.	...	Head Master, Zilla School.
3	Adya N. Mukherjea, M.A.	...	Second Master, Collegiate School.
4	Umesh Ch. Bose	...	Head Master, Survey School.
5	Jugat Ch. Sarkar, B.A.	...	Head Master, Zilla School.
6	Banamali Mallik	...	Second Assistant to the Director of Public Instruction.
7	Ishan Ch. Ghosh, M.A.	...	Deputy Inspector of Schools.
8	Hari Das Banerjea, M.A.	...	Ditto ditto.
9	Baladev Ram Jha, B.A.	...	Head Master, Zilla School.
10	Adi Nath Mitra	...	Deputy Inspector of Schools.
11	Gopal Ch. Ghosal	...	Ditto ditto.
12	Parmanand	...	Second Master, Training School.
13	Govind Ch. Singh	...	Second Master, Zilla School.
14	Dwarka Prasad	...	Deputy Inspector of Schools.
15	Bhagavati Charan Sen	...	Ditto ditto.

Number.	Name.	Designation.
1	2	3

CLASS II—(45)—Rs. 150—concl'd.

16	Becharam Nandi, B.A.	...	Head Master, Zilla School.
17	Krishna K. Adhikari, M.A.	...	Deputy Inspector of Schools.
18	Phani Bhusan Bose, M.A.	...	Ditto ditto.
19	Radha K. Chakravarti	...	Ditto ditto.
20	Mahendra N. Datta	...	Ditto ditto.
21	Trailakya N. Chakravarti	...	Head Master, Zilla School.
22	Tarak Bandhu Chakravarti	...	Deputy Inspector of Schools.
23	Ram Taran Samanta	...	Ditto ditto.
24	Mahini M. Bose, B.A.	...	Head Master, Zilla School.
25	Bhagawan Ch. Dutta, B.A.	...	Ditto, ditto.
26	Kesab Lal Bose	...	Ditto, ditto.
27	Sajivan Lal Singh, B.A.	...	Ditto, ditto.
28	Mahmud, B.A.	...	Third Master, Anglo-Persian Department, Calcutta Madrasah.
29	Amjad Ali, B.A.	...	Third Master, Collegiate School.
30	Nalini Mohan Sanyal, M.A.	...	Head Master, Zilla School.
31	Hira Lal Pal, B.A.	...	Deputy Inspector of Schools.
32	Tripura Ch. Banerjee	...	Second Master, Collegiate School.
33	Adhar Ch. Mukherjee	...	Third Assistant, Director of Public Instruction.
34	Siddeswar Banerjee, B.A.	...	Third Master, Collegiate School.
35	Golok Chandra Chakravarti	...	Head Master, Zilla School.
36	Bhuvanesvar Gupta	...	Deputy Inspector of Schools.
37	Hari N. Chatterjee	...	Ditto ditto.
38	Trailakya Nath Ghosh, B.A.	...	Head Master, Zilla School.
39	Rakhal Das Chakravarti, M.A.	...	Ditto, ditto.
40	Mati Lal Mallik, M.A.	...	Deputy Inspector of Schools.
41	Lok Nath Chakravarti, B.A.	...	Second Master, Collegiate School.
42	Hari Nath Sen, B.A.	...	Fourth Assistant, Director of Public Instruction.
43	Kalika N. Mukherjee	...	Deputy Inspector of Schools.
44	Kedar N. Ganguli	...	Head Master, Zilla School.
45	Tarak N. Sarkar, B.A.	...	Ditto, ditto.

CLASS IV—(60)—Rs. 125.

1	Bhola Nath Mukherjee	...	Head Master, High School.
2	Mir Sajjad Ali	...	Deputy Inspector of Schools.
3	Sarada K. Sen	...	Ditto ditto.
4	Abdus Salam	...	Head Maulvi, Madrasah.
5	Jadu Nath Chakravarti	...	Deputy Inspector of Schools.
6	C. H. Harcourt	...	Second Master, Kurseong School.
7	Muhammad Azizul Haq, M.A.	...	Second Master, Nawab's Madrasah.
8	Nil Mani Pal	...	Fourth Master, Collegiate School.
9	Piyari Mohan Chatterjee	...	Head Master, Zilla School.
10	Ram J. Bhattacharjya	...	Third Master, Collegiate School.
11	Raj Krishna Gupta	...	Head Clerk, Presidency College.
12	Hem Ch. Banerjee	...	Head Master, Training School.
13	Bhagavati Sahai, M.A., B.L.	...	Deputy Inspector of Schools.
14	Dwarka Nath Banerjee	...	Ditto ditto.
15	Kali Kamal Chatterjee	...	Head Clerk, Inspector of Schools.
16	Mohim Chandra Bose	...	Deputy Inspector of Schools.
17	Jadu N. Pal, B.A.	...	Ditto ditto.
	Uma Charan Roy, B.A.	...	Head Master, Zilla School.
18	Dwarka Nath Bose, B.A.	...	Ditto, ditto.
19	Som N. Jharkandi, B.A.	...	Deputy Inspector of Schools.
20	Baldeo Misra, B.A.	...	Ditto ditto.
	Ramdani Pande	...	Ditto ditto.
21	Jogeswar Ghosh	...	Head Clerk, Inspector of Schools.
22	Prasanna K. Ghosh	...	Head Master, Zilla School.
23	Becharam Ganguli	...	Deputy Inspector of Schools.
24	Prasanna Chandra Vidyaratna	...	Lecturer (Sanskrit), Dacca.
25	Lal Mohan Vidyanidhi	...	Head Pandit, Training School.
26	Jogeswar Sarkar, B.A.	...	Second Master, Zilla School.
	Abhay Charan Bose	...	Midnapore College.
27	Mahendra Narayan Mukherjee	...	Second Master, Zilla School.

1220 SUPPLEMENT TO THE CALCUTTA GAZETTE, MARCH 31, 1897.

Number.	Name	Designation.
1	2	3

CLASS IV—(60)—Rs. 125—*consold.*

28	Hara Mohan Ganguli	Fourth Master, Collegiate School.
29	Kedar Nath Roy	Second Master, Collegiate School.
30	Raj Kumar Lal	Off Second Master, Zilla School.
31	Sriharsha Bhattacharjea	Fifth Master, Collegiate School.
32	Lachman Lal	Second Master, High School.
33	Ramesvar Sen	Additional Deputy Inspector of Schools.
34	Madhu S. Singha, B.A.	Deputy Inspector of Schools
35	Jadab Krishna Das	Fourth Master, Collegiate School.
36	Durga Ch. Banerjea	Second Master, Training School
37	Makunda Lal	Deputy Inspector of Schools.
38	Latu Lal Malik, B.A.	Third Master, Collegiate School.
39	Harendra Narayan Chakravarti, B.A.	Head Master, Zilla School
40	Akhay Kumar Sen	Lecturer, Chittagong College.
41	Rindu Lal Banerjea, B.A.	Second Master, Zilla School.
42	Sri Nath Guha	Deputy Inspector of Schools
43	Radha Raman Guha, L.C.E.	Second Master, Survey School
44	Adhar Ch. Banerjea, B.A.	Fourth Master, Collegiate School.
45	Raj Kumar Das, M.A.	Head Master, Zilla School.
46	Harbans Sahay	Deputy Inspector of Schools.
47	Raghu Nath Ghosh	Ditto ditto.
48	Hari Mohan Sen, B.A.	Second Master, Collegiate School
49	Prasanna Kumar Bose	Third Master, Bihar School of Engineering.
50	Braja Syam Majumdar	Fifth Assistant to the Director of Public Instruction.
51	Nanda Lal Das, B.A.	Head Master, Zilla School
52	Murcsh Chandra Deb	Sixth Assistant to the Director of Public Instruction
	<i>Bhupati Nath Das</i>	
53	Gopal Chandra Sarkar, B.A.	Head Master, Zilla School
54	Rajendra Lal Gupta, B.A.	Head Master, High School
55	Priya Nath Roy, B.A.	Ditto ditto
	<i>Jogendra Nath Hazra, M.A.</i>	<i>Midnapore College</i>
56	Sripati Mukherjea, B.A.	Deputy Inspector of Schools.
57	Annada Prasad Mitra, B.A.	Head Master, Zilla School
58 }		
59 }	Vacant	Reserved for Additional Deputy Inspectors of
60 }		Schools

CLASS V—(75)—Rs 100

1	Syud Reazat Hussein	Second Master, Zilla School.
2	Gopal Ch Chatterjea	Sub-Inspector of Schools
3	Ram Dayal Ghosh	Ditto ditto.

The 29th March 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 736 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 30th March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 21st March 1896 and 1897 is shown in the following statement:—

		15TH TO 21ST MARCH			
		1896.		1897.

Total	...	27,698	37,700	190,130	2,58,788

During the week under report, rice continued to be imported in large quantities from Burma, namely, 147,787 cwts., against 171,214 cwts. in the week ending 14th March 1897. The only other ports from which rice was imported into Calcutta were Balasore (7,889 cwts. against 5,154 cwts.) in the corresponding week of 1896, and Coconada (29 cwts. against nil) in the corresponding period of last year. Of the total import of 27,023 cwts. of paddy, Burma contributed 24,593 cwts., against nothing during the week ending 21st March 1896. The improvement under gram and pulses and miscellaneous food-grains was due to larger despatches from the Madras ports and from Rangoon.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the third week of March 1897 is compared with the figures for the corresponding period of 1896 :—

1	15TH TO 21ST MARCH			
	1896.		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>

Paddy	2,640	3,593	44	60
Wheat	1,100	1,497	127	173
Gram and pulses	9,604	13,072	11,899	16,196
Other food-grains, such as jowar, barley, oats, &c.	730	994	3,233	4,400
Total ...	155,093	2,11,099	201,676	2,74,503

The exports of rice rose from 103,834 cwts. during the week ending 21st March 1896 to 172,980 cwts. during the period under review, owing chiefly to larger shipments to Arabia (59,042 cwts. against 2,079 cwts.), United Kingdom (39,921 cwts. against 19,484 cwts.), Mauritius (28,307 cwts. against nil), and Abyssinia (11,306 cwts. against nil); on the other hand, there was a heavy decline in the exports to Demarara (nil against 33,723 cwts.) and to Ceylon (16,736 cwts. against 42,386 cwts.) The increase of 3,208 cwts. under miscellaneous food-grains was almost entirely due to the export of 3,166 cwts. to Mauritius, which received nothing during the corresponding week in 1896.

The trade of Calcutta with coast ports during the week under report was about half that of the corresponding period in 1896, viz., 20,675 cwts. against 45,128 cwts. The largest trade was in rice, the shipments of which fell to one-third, i.e., from 37,185 cwts. to 13,393 cwts. owing to the exports to Madras ports having declined by 13,742 cwts. and those to Bombay by 9,675 cwts. The trade under the other heads was small, and the fluctuations call for no remarks.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 709 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPT.,
The 30th March 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

MEMORANDUM.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 28th February 1897, as compared with the trade of the corresponding period of 1896 :—

IMPORTS.

	{ 1897	19,447	19,447	26,469
Cuttack ...	{ 1896	...	35,249	24,313	59,562	81,070
	{ 1897	...	12,976	12,976	17,662
Puri ...	{ 1896	...	8,963	8,963	12,200
	{ 1897
Total ...	{ 1896	...	44,212	1,02,660	1,46,872	1,99,909
	{ 1897	...	12,976	19,742	32,718	44,533

The import trade of Chittagong, which amounted to 18,511 cwts., showed an increase of 18,274 cwts. owing mainly to the receipts of rice and paddy from Burma. Balasore, too, showed a rise of 774 cwts. on account of larger shipments of wheat, gram and pulse and other food-grains from Calcutta.

The export trade of Narayanganj aggregated 295 cwts. against *nil* in 1896. In the case of Balasore, the decline of 58,899 cwts. was chiefly due to smaller despatches of rice, paddy and gram and pulse to Calcutta and Cochin, but the exports to the Laccadives amounted to 2,099 cwts. of rice, paddy and other food-grains against *nil* in the corresponding week in 1896. The falling off of 46,586 cwts. under Cuttack is due to the cessation of exports of rice and gram and pulse to all Foreign and Indian ports except Mauritius, which, however, received 12,976 cwts. of rice, against 27,345 cwts. in the corresponding period of the preceding year. The trade of Puri also declined by 8,963 cwts., there being no despatches of rice to Foreign ports.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 706 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 20th March 1897, both days inclusive, to have been 26,67,629 maunds. The destination of 25,00,181 maunds is specified. About two-thirds of this quantity (16,57,112) was carried to the North-Western Provinces and Oudh, rather more than one-sixth (4,35,417 maunds) to stations in Bengal, and the rest (1,07,652 maunds) to other provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 29th March 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chilpur, Kidderpur Docks and Port Trust Railway) by the East Indian Railway from 1st January to 20th March 1897.

STATION TO WHICH CONSIGNEE.	Total from 1st to 30th January 1897.	Total from 31st Janu- ary to 27th February 1897.	Week ending 6th March 1897.	Week ending 13th March 1897.	Week ending 20th March 1897.

FOOD-GRAIN TRAFFIC OF CALCUTTA DURING 1896.

Memorandum.

No. 737 (Statistics).—The 30th March 1897.—The following memorandum is published for general information.

M. FINUCANE,

Secretary to the Govt. of Bengal.

The traffic of Calcutta by boat and road is registered at a cordon of 26 registering stations situated on the Hooghly and on the canals and principal roads around Calcutta, in Howrah, and in the suburbs. Statistics of the traffic of Calcutta carried by Inland Steamers are obtained by Government from the different Steamer Companies in Calcutta, and of the railborne traffic from the railway audit offices at Sealdah and Jamalpore. Information in connection with the sea-borne trade is furnished by the Collector of Customs, Calcutta. Consolidated statements of the food-grain import and export traffic of Calcutta, carried by all these routes, for the 10 months from January to October 1896, as compared with the corresponding months of 1895, were published in the *Calcutta Gazette* of the 27th January 1897. Similar statistics for November and December 1896 have also since been published in the *Gazettes* of 24th February and 17th March 1897, respectively.

2. The results of the import and export traffic during the calendar year 1896, as compared with the figures for the corresponding period of 1895, is shown in the following statement:—

FOOD-GRAINS.		By rail.	By country boat.	By inland steamers.	By road.	By sea.	TOTAL.

Total	Import ... { 1895 ...	93,01,482	1,34,14,180	5,69,364	11,48,465	11,64,344	2,55,97,821
	... { 1896 ...	73,58,467	1,09,94,434	9,48,824	11,35,059	31,36,50	2,33,47,288
	Export ... { 1895 ...	2,01,520	9,12,285	3,86,069	6,66,621	1,67,80,55	1,88,97,047
	... { 1896 ...	19,03,395	12,37,006	10,40,517	8,66,771	1,01,74,520	1,52,21,814

Compared with that of 1895, the total food-grain traffic of Calcutta in 1896 showed the considerable decrease of 22½ lakhs of maunds under imports and of 36½ lakhs of maunds under exports. The quantity of food-grain imported into Calcutta by rail was 20·88 per cent. below the figures for the preceding year, but the quantity so exported from Calcutta rose

by 844.51 per cent. The country-boat traffic shows a decline of 18.23 per cent. under imports and an increase of 35.65 per cent. under exports. The traffic carried by inland steamers showed an advance under both heads, namely, 31.51 per cent. and 169.51 per cent., respectively. The imports by road remained nearly the same as in the previous year, but the exports rose by 29.87 per cent. The variations in the sea-borne trade have been remarkable, the imports showing an advance of 169.29 per cent., and the exports a heavy decline of 39.18 per cent.

3. That the quantity of rice imported by country-boat was as usual larger than the total imported by all other means, though the boat traffic was of course itself much less than in the preceding year. The surplus of imports of all classes of food-grains over exports during the calendar year 1896 is compared below with the surplus of 1895:—

		Surplus of imports over exports.	
		1895.	1896.
Rice	...	16,32,145	27,05,435
Paddy	...	7,26,448	8,09,567
Wheat	...	20,84,133	23,43,664
Gram and pulses	...	20,41,290	9,46,455
Other food-grains	...	2,12,768	3,20,353
Total	...	67,00,774	71,25,474

There was a large surplus of all kinds of grain, with the single exception of gram and pulses, left at the end of the year 1896, in comparison with that left at the end of 1895, awaiting exportation to famine centres. Similar figures before 1895 are not available.

4. In order to ascertain the stocks of rice in and near Calcutta, a separate enquiry has for many years been made once a month, but has been made every week since the occurrence of the present famine. This information is obtained by a special officer who visits every *aruth* (or wholesale warehouse) in the 14th marts round Calcutta and Howrah, and receives from each of the 157 *aruthdars* at present on the list a report of the quantity of rice in hand on the date of his visit. To the total quantity thus ascertained, the following additions are made:—

*Calcutta side.	
Baliaghatta.	Pathuriaghatta.
Ultadanga.	Posta.
Chitpur.	Jorabagan.
Golabari.	Tollygunge.
Coomertooly.	Chella.
Hatkola.	Kidderpore.
Culpathat.	
Howrah side.	
Rankestipur.	

- Stocks of rice at Baidyabati, Nawabganj, Bhadreswar and Chandernagore, the figures for which are obtained by local enquiry and forwarded by the Collector of Hooghly.
- Stocks on the railway premises at Howrah, Sealdah, Chitpur and Rutherford, the figures for which are obtained from the railway authorities concerned.
- Floating stocks on boats in the Calcutta canals as reported by the Supervisor of those canals.
- Floating stocks on boats in the Hooghly as reported by the Vice-Chairman of the Calcutta Port Commissioners.

5. For the minor bazars and innumerable retail shops, scattered about the town of Calcutta and the suburbs, no detailed enquiry is possible, but in order that the stocks in these bazars and shops may not be left out of account, the amounts shown in the margin (representing roughly the requirements of about five weeks' consumption for the town population) have been estimated and assumed to represent these stocks. These estimates are assumed as constant

		Mds.
Minor bazars	...	2,40,000
Retail shops	...	2,50,000
Total	...	4,90,000

quantities for the purpose of the monthly or weekly return. The present estimate was made in August 1877, when Mr. F. Newbery, then of the Bengal Civil Service, made a local enquiry into the Calcutta stocks; the number of shops were taken from the Census tables, and the quantity was struck from the average amounts seen in the shops inspected. Accuracy is not claimed for the estimates under these heads; they are merely employed for the purpose of making the account as complete as possible.

6. The whole enquiry is completed in three days by the different agencies employed for the purpose. Before the Madras famine in 1876-77, the stocks of rice in Calcutta constantly amounted to 70 to 80 lakhs of maunds, but at the close of that year they were only about half of that quantity, and in subsequent years they have further diminished. The stocks in the first week of April 1896 were 20,89,000 maunds, or about half of the stocks at the close of 1876-77. With the opening up of the country by railways and steamers, however, the question of stocks in Calcutta has become one of secondary importance, for dealers find it more advantageous to keep their stocks in the interior, and to import by instalments such quantities only as they require to fulfil their contracts with exporters.

7. It may be interesting to investigate how far the figures of rice stocks are borne out by the statistics of the import and export trade of Calcutta. In the mufassal, where the people subsist chiefly on rice, the daily rate of consumption has been fixed, for purposes of calculation, at three quarters of a seer per head, but in the metropolis, where more articles of food other than rice are consumed, half a seer per head per day is considered to be a fair

average. Adopting these rates and reviewing the figures for April 1896, taken as being the first month of the current official year, the figures compare as follows:—

	Rice. Mds.	Paddy. Mds.	
Total imports into Calcutta by all routes during April 1896 ...	8,79,000	1,20,000	
Total exports into Calcutta by all routes during April 1896 ...	10,93,000	66,000	
	- 2,20,000	+ 54,000	= 34,000
Deduct ...	34,000		maunds of rice.
Net deficit in rice ...	1,86,000		
Stocks of rice on the first week of April 1896 as stated in paragraph 6 ...		20,89,000	
Stocks of paddy on 1st April 1896, converted into terms of rice ...		4,65,000	
Total ...		25,54,000	
	Mds.		
Deduct net deficit shown above ...	1,86,000		
Deduct requirements for consumption during April 1896 at half-a-seer per head per day on a population of 900,000 persons ...	3,37,000	5,23,000	
Balance on 1st May 1896		20,31,000	
Stocks of rice in the first week of May 1896, as published in the Gazette ...		21,13,000	

In this and the following calculations paddy has been converted into terms of rice at a maund of paddy to 25 seers of rice.

8. A similar test applied to the figures of imports and exports for the 10 months from January to October 1896 gives the following results:—

	Rice. Mds.	Paddy. Mds.	
Total imports from January to October 1896 ...	1,12,69,000	19,20,000	
Total exports from January to October 1896 ...	92,60,000	11,77,000	
Surplus of imports over exports ...	20,09,000	7,43,000	Mds.
Add ...	4,65,000		= 4,65,000 of rice.
Total surplus in rice ...	24,74,000		

	Mds.	
Stocks of rice on the 1st week of January 1896 ...	17,15,000	
Stocks of paddy on 1st January 1896 converted into rice ...	4,75,000	
Total ...	21,90,000	
Add—Surplus of imports over exports as shown above ...	24,74,000	
	16,61,000	
Deduct—Requirements for consumption for 10 months for a population of 900,000 souls, at the rate of half-a-seer per head per day ...	33,75,000	
Balance on 1st November 1896 ...	12,89,000	
Stocks of rice in and around Calcutta in the first week of November 1896, as published in the Gazette ...	12,57,000	

9. The figures for November 1896 are similarly shown below:—

	Mds.	
Excess of imports of rice over exports during November 1896 ...	1,68,000	
Excess of imports of paddy over exports during November 1896, converted into rice ...	28,000	
Total ...	1,96,000	

	Mds.
Add—Stocks of rice as ascertained in the 1st week of November 1896	12,57,000
	14,53,000
Deduct—Requirements for consumption for 900,000 souls, at the rate of half-a-seer per head per day during November 1896	3,27,000
Balance on 1st December 1896	11,16,000
Stocks of rice in the first week of December 1896, as published in the Gazette	11,72,000
10. Finally, the following memorandum gives the statistics for December 1896 :—	
Excess of imports of rice over exports	5,28,000
Excess of imports of paddy over exports, converted into rice	13,000
Total	5,41,000
Add—Stocks of rice as ascertained in the first week of December 1896	11,72,000
Deduct—Requirements for consumption at the rate of half-a-seer per head per day for 900,000 persons	3,37,000
Balance on 1st January 1897	13,76,000
Stocks of rice in and around Calcutta on the first week of January 1897, as published in the Gazette	11,15,000

The difference amounts to 2,61,000 maunds, and is explained as follows. The stocks shown above represent Bengal rice only, while the figures of imports and exports include Burma rice and rice brought to Calcutta by coasting vessels. These imports do not find their way into the *aruths* at which enquiries are made by Government, but are stocked by the importers in their own godowns for export when required; and as such godowns do not come within the scope of the enquiries made by Government, these figures are not taken into account in ascertaining the stocks of rice in Calcutta. The quantity of rice imported from Burma in 1896 was 1,36,000 maunds, and the greater part of this was imported in December; the imports from the Balasore and Chandballi ports during December 1896 amounted to 66,000 maunds. These two figures, taken together represent 2,02,000 maunds, which reduces the difference noticed above to merely 59,000 maunds, and if wastage be taken into consideration, there will be a further reduction.

M. FINUCANE,

Secretary to the Government of Bengal.

STATISTICAL DEPT.,
The 30th March 1897.

WEATHER AND CROP REPORT.

For the week ending the 29th March 1897.

Burdwan.—Rainfall at Sadar .95, Kalna 1.20, Katwa .78, Raniganj 1.17. Weather unsettled. Recent rain has facilitated ploughing all over the district. *Rabi* harvest and pressing of sugarcane nearly over. Fodder sufficient. Water scarce in some villages. Condition of cattle good. Common rice selling as follows:—

	Srs.	c.	Srs.	c.	
Sadar	10	0 to 12	0
Kalna	10	0 to 11	0
Katwa	10	15 to 11	2
Raniganj	10	4	

Birbhum.—Rainfall at Sadar 1.95, Rampur Hat .93. Weather much cooler. Ploughing going on everywhere. Price of common rice at Sadar 9½ seers, and Rampur Hat 10½ seers per rupee. No want of fodder or water.

Bankura.—Rainfall at Sadar 3.74, Vishnupur 1.37, Gangajalghati 3.08, Raipur 1.70, Maliara 2.08, Indas 1.29, Khatra 1.81, Kotalpur 1.22, Onda 2.2. Weather generally cloudy and rainy at the beginning of the week. Ploughing of lands is briskly going on. Pressing of sugarcane almost finished. Harvesting of *rabi* continues. Rice selling at Bankura 11 seers, and Vishnupur 11½ seers per rupee.

Midnapore.—Rainfall at Sadar .97, Contai 1.84, Tamluk .80, Ghatal 1.34. Weather cloudy. Heavy rain at Sadar yesterday (28th), which will improve prospects of indigo. Plantation of sugarcane continues. Wheat and barley are still being cut in Garlibetta. *Boro* is still being sown in Keshpur, Binpur, Gopiballavpur, and Dantan. The recent rain has proved beneficial to *boro* and *til*. Fodder sufficient except in Chandrakona, and water sufficient except in Garlibetta. Cattle-disease reported from Keshpur, Binpur, Garlibetta and Benapura. Common rice selling as follows:—

	Srs.	
Sadar	...	11
Contai	...	12 to 13
Tamluk	...	11½
Ghatal	...	11½ to 12

Hooghly.—Rainfall 3.29 during last week, besides a heavy shower yesterday (28th). *Boro* doing well in some places. Common rice sells from 8½ to 10½ seers per rupee.

Howrah.—Rainfall at Sadar .46, Ulubaria .69. Weather hot and cloudy. Prospects of *rabi* not favourable. The recent rainfall has done good to the standing crops. Fodder and water sufficient. Common rice sells at 8½ to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar 1.31, Barasat .36, Basirhat .52, Diamond Harbour .85. Weather cloudy. Prospects of sugarcane improved by recent rain. Ploughing going on. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

Rajshahi.—Rainfall at Sadar ·34, Nator ·34, Naugaon ·54. Sowing of paddy and *til* commenced, that of jute going on. Ploughing of lands retarded for want of rain. Fodder available. Scarcity of water reported from some places. Common rice selling at 8 to 11 seers per rupee. Two test-relief works open. Numbers on relief on Saturday 27th March—

			Men.	Women.	Children.	Total.
Test-workers	670	Nil	28	698

Price of rice at relief-works, 8 to 9 seers per rupee.

Dinajpur.—Average rainfall 2·39. Weather cool and cloudy. The rain has improved the prospects of *bhadoi* rice, jute, and sugarcane. Condition of cattle good. Fodder and water sufficient. Common rice selling at Sadar 10 seers and Thaknrgon 9 seers per rupee;

Jalpaiguri.—Rainfall at Sadar 2·23, Alipur Duars 2·03. Weather cloudy and cold. Rain has done much good, and preparation of land for sowing *betri* rice and jute has been briskly taken up. Fodder and drinking-water-supply improved. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar 2·29, Siliguri 1·37. Weather seasonable. Hills—*Bhutta* being planted; wheat, barley, and *phaphur* being harvested; land being prepared for *chota marua* and *bhadoi* crop. Terai—Ploughing for *bhadoi*, jute and sugarcane going on; tobacco being out. Price of coarse rice:—

			Srs.	
Hills	9
Terai 9 to 10	

} per rupee.

Bhutta sells from 13 to 20 seers per rupee.

Rangpur.—Rainfall at Sadar 2·51. Sowing of *aus* and jute going on. The rain of the week has done great good to these crops, but slightly damaged tobacco, which is being cut. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient.

Bogra.—Rainfall ·70. Sowing of jute and *aus* in progress. Fodder and water sufficient. Price of common rice at head-quarters 10½ seers, and in the interior from 9 to 11½ seers per rupee.

Pabna.—Rainfall at Sadar ·50 and Sirajganj ·96. Weather partially cloudy and rainy. *Rabi* crops out and carried. *Boro dhan* favourable. Fodder sufficient. Relief wages calculated at 9½ seers per rupee. Numbers on relief on Saturday, 27th March—

			Men.	Women.	Children.	Total.
Test-workers	160	Nil	51	211

Dacca.—Rainfall at Sadar ·79, Manikganj ·49, Munshiganj 2·74, Narainganj 1·75. Weather cloudy and rainy. Recent rain has done much good to standing crops, especially to *boro*. Lands are being prepared for cultivation of jute and *aus*. Want of drinking-water reported from Munshiganj and Manikganj subdivisions. Fodder available. No cattle-disease. Price of common rice, 9 to 11 seers per rupee.

Mymensingh.—Rainfall at Sadar 1·06, Kishorganj ·28, Netrokona 2·33, Jamalpur 2·02. Weather cloudy and changeable. Good rain in the northern portion of the district. Lands everywhere prepared. Sowings commencing. *Boro* much benefited by rain. Cattle-disease reported from Netrokona and Kishorganj. Price of common rice 9 to 10 seers per rupee.

Faridpur.—Rainfall at Sadar ·47, Goalundo ·54, Madaripur 1·33. Weather normal. Recent rain will facilitate ploughing and sowing, but more wanted. Price of common rice 9 to 10 seers per rupee. Fodder and water sufficient.

Backergunge.—Rainfall at Sadar ·30, Pirojpur ·51, Patuakhali and Bhola ·10. Weather cool. Prospects of crops poor. Common *aman* rice sells from 8½ to 11 seers per rupee.

Tippera.—Rainfall at Sadar 2·19, Brahmanbaria 2·05, Chandpur 1·91. Weather cool with intermittent showers and clouds. Want of good water reported from many places in Chandpur. Price of rice increasing slightly—

	Srs. c.	Srs. c.
Sadar	...	9 0 to 10 0
Brahmanbaria	...	10 0 to 11 8
Chandpur	...	9 8 to 10 0

Noakhali.—Rainfall at Sadar 1·54, Feni 2·13. Lands being cultivated for *aus*. Rain has done good. Fodder and water not sufficient. Price of common rice 8½ to 10½ seers per rupee.

Chittagong.—Rainfall ·84. Weather warm and occasionally cloudy. Prospects of *rabi* crops not favourable. Water and fodder sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease continues.

Patna.—Rainfall at Sadar ·64, Bihar 69, Hilsa ·50, Dinapore ·42, Bikram ·38. Preparation of fields for *badu* and paddy seedling beds facilitated by the rain, which has also improved the prospects of sugarcane, millets and cotton. *Rabi* crops are being gathered and threshed. No damage by rainfall so far reported. Fodder and water for cattle sufficient. Green fodder in Bihar almost nil. Price of common rice at Patna 10½ seers per rupee. Numbers on relief on Saturday, 27th March—

Singhbhum.—Rainfall at Chaibassa 1·30, Chakradharpur 1 42, Ghatsilla 1·57. Rice plentiful. Price 9 to 12 seers per rupee.

General Summary.—There was general rain all over the Province during the week. The rain has done much good to spring rice, indigo, and sugarcane, and has considerably assisted the cultivation of lands for autumn rice and jute, which is now going on briskly. The rain is not reported to have caused any general injury to *rabi* crops whether in the fields or on the threshing-floors, but the *mahua* crop in the Bhagalpur and Chota Nagpur Divisions

has suffered some damage. There was a slight rise in the price of rice in some districts during the week. In the distressed districts the prices of the staple food-grain on which the famine wage is based are—Nadia (common rice) 10 seers, Murshidabad (common rice) 10 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 8 to 9 seers, Pabna (common rice) 9½ seers, Patna (common rice) 10½ seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (barley) 12 and 13 seers, Champaran (Indian-corn) 9½ seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) 9 seers, Bhagalpur (common rice) 10 seers, Sonthal Parganas (rice at Jamtara) 10 seers, Puri (common rice) 10 and 10½ seers, and Manbhum (common rice) 9½ seers.

By order of the Lieutenant-Governor of Bengal,

REVENUE DEPARTMENT,
The 30th March, 1897.

M. FINUCANE,
Secretary to the Govt. of Bengal.

Results of the Meteorological Observations taken at the Alipore Observatory from 21st to 27th March 1897.

The mean pressure of the seven days	Inches.	29.830
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29.784
The total number of hours of bright sunshine	Hours.	39.2
The maximum possible number of hours of sunshine	85.1
The mean temperature of the seven days	77.6
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83.1
The extreme variation of temperature	25.0
The maximum temperature	91.2
The highest velocity of the wind in one hour	Miles	18
The mean relative humidity	%	75
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	65
The total fall of rain from 21st to 27th March 1897	Inches.	0.57
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.24
The total fall from 1st January to 27th March 1897	2.20
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2.70

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; t, thunder; <, lightning; /, strong wind; d, drizzling rain; p, passing temporary showers; Δ, dew.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 21st to 27th March 1897.

MONTH.	Date.	Pressure at 10 A.M. corrected and reduced to 32° Falt.	TEMPERATURE.						HYGROMETRY.			Rainfall, past 24 hours.
			Daily mean.	Maximum.	Range.	Minimum.	Dry bulb at 10 A.M.	Wet bulb at 10 A.M.	Vapour tension at 10 A.M.	Dew point at 10 A.M.	Humidity at 10 A.M.	
1897.		Inches.	°		°	°	°	°	Inches.	°	%	Inches.

Statement showing the quantities of the Principal Staples of Traffic imported and exported into Calcutta from the interior during the month of December 1896	1324	Weekly return of Traffic Receipts on Indian Railways	1345

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

THE Council met at the Council Chamber on Saturday, the 27th March, 1897.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General of Bengal.

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble RAI DURGA GATI BANERJEE BAHADUR, C.I.E.

The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.

The Hon'ble M. FINUCANE.

The Hon'ble C. W. BOLTON.

The Hon'ble W. H. GRIMLEY.

The Hon'ble J. G. H. GLASS, C.I.E.

The Hon'ble C. A. WILKINS.

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble A. M. BOSE.

The Hon'ble RAI ESHAN CHUNDRAN MITTRA BAHADUR.

The Hon'ble GURU PROSHAD SEN.

The Hon'ble MAHARAJA BAHADUR SIR RAVANESHWAR PROSHAD SINGH, K.C.I.E., of Gidhaur.

The Hon'ble M. S. DAS.

The Hon'ble A. H. WALLIS.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

RAIN-GAMBLING BILL.

The Hon'ble Mr. BOLTON presented the Report of the Select Committee on the Bill for the suppression of rain-gambling. He said:—

“At the next meeting of the Council I propose to move that the Report be taken into consideration, and that the Bill be passed into law.”

The Hon'ble BABU GURU PROSHAD SEN said:—“With Your Honour's permission I wish to give notice, under Rule 21 of the Rules for the Conduct of Business, that I shall move for the introduction of a section to repeal section 6 of Bengal Act II of 1867, and the corresponding Section 47 of Bengal Act IV of 1866.

The Hon'ble THE PRESIDENT said:—“Do you propose to move it as an amendment to the Bill before the Council?”

The Hon'ble BABU GURU PROSHAD SEN replied:—“It is rather an addition to the Bill.”

The Hon'ble THE PRESIDENT said:—“I do not think we can go beyond the provisions of this Bill, which is a Bill for the suppression of rain-gambling; and what you propose to do is to move a substantial addition to the Bill by way of amendment of the Gambling Act. I have not the permission of the Government of India to introduce such a provision in this Bill.”

The Hon'ble BABU GURU PROSHAD SEN said:—“Your Honour has the permission of the Government of India to amend the Gambling Act by way of addition. I do not propose to go further. I simply ask permission for the repeal of section 6 of the Gambling Act.”

The Hon'ble THE PRESIDENT said:—“The Hon'ble Member can bring forward his motion, but I shall oppose the amendment as going beyond the scope of the present Bill. It will make a serious alteration in a law, which is on all fours with the English law on the subject.”

BENGAL FINANCIAL STATEMENT FOR 1897-98.

The Hon'ble Mr. RISLEY laid on the table the Bengal Financial Statement for 1897-98 with explanatory notes.

PART I—General Review.

(1) ACCOUNTS OF 1895-96.

1. The closed accounts for 1895-96 show that the Provincial receipts of the year amounted to Rs. 4,58,51,520 against the revised estimate of Rs. 4,56,39,000, and the Provincial expenditure to Rs. 4,43,53,440 against the revised estimate of Rs. 4,44,10,000, thus working out to a surplus of Rs. 14,98,080 against Rs. 12,29,000 anticipated when the revised estimate was framed. The main causes of this improvement were the increase in the Provincial share of the net earnings of the Eastern Bengal State Railway system, due to the heavy jute traffic during the last quarter of the year, and the decrease in expenditure under Stationery and Printing.

(2) REVISED ESTIMATE FOR 1896-97.

2. The Budget Estimate for 1896-97, as adopted by the Government of India, assumed that the year would open with a credit balance of Rs. 55,51,000, that the total revenue would amount to Rs. 4,46,36,000, and the total expenditure to Rs. 4,67,47,000, so that the year would close with a balance of Rs. 34,40,000. The latest estimate available for the accounts of the year shows that the total receipts will probably be Rs. 4,63,81,000, which is better than

was originally expected by Rs. 17,45,000, and that the expenditure will be Rs. 4,80,94,000, which gives an increase of Rs. 13,47,000: the result is a net improvement of Rs. 3,98,000, and as there is an increase of Rs. 2,69,000 in the expected amount of the opening balance, the total improvement on the original estimate is Rs. 6,67,000. The large increase of revenue in the revised, as compared with the original, estimate is mainly due to an increase of Rs. 7,87,000 in the Provincial share of the net earnings of the Eastern Bengal State Railway. There is also a considerable increase under Stamps (Rs. 4,84,000), Provincial Rates (Rs. 1,10,000), Assessed Taxes (Rs. 1,25,000), and Irrigation (Rs. 1,42,000). Smaller advances also appear under Land Revenue (Rs. 76,000), Excise (Rs. 62,000), Registration (Rs. 68,000), Miscellaneous heads (Rs. 50,000), and Civil Works (Rs. 60,000). On the other hand there is a special payment of Rs. 2,00,000 adjusted under Land Revenue, being half the amount of deferred interest on the Kidderpore Dock loans remitted by the Government of India on the recommendation of this Government. The main increase in expenditure is the provision of Rs. 18,50,000 for the relief of distress arising from the prevailing famine, a calamity which was not anticipated when the budget was originally framed, and against this increase there are decreases of about 2 lakhs under "Direct demands on the revenues," of nearly a lakh under Irrigation, and of more than 1½ lakh under Public Works, taking together the works under direct management and those under local authorities. The net result of these variations from the Budget of 1896-97 is an increase in the closing balance of Rs. 6,67,000, from Rs. 34,40,000 to Rs. 41,07,000.

(3) PROVINCIAL CONTRACT, 1897-1902.

3. I now turn to the Provincial Contract which will begin to take effect from the 1st April 1897. The chief alteration made in the conditions of the current contract which expires on the 31st of this month is the imperialisation of the receipts and expenditure of the Eastern Bengal State Railway, one-half of the net revenue of which is now assigned to this Province. By way of compensation for this loss of growing revenue the provincial share of the receipts from Excise has been raised from one-fourth to one-half. The only additional charges which have been provincialised in the new contract are the Survey and Settlement expenditure other than that in Bihar, and the expenditure on account of Marine pensioners of the Imperial Department, mainly dockyard employes, and of the pensions of Branch Pilots and other Provincial Marine officers, and of their widows and orphans. The inter-provincial adjustments hitherto allowed with Upper Burma have also been stopped. On the other hand, as important administrative changes in the Salt Department are under consideration, the receipts and expenditure of this Department have been reserved for the present as Imperial. The contract passed by the Government of India provides for an annual contribution of Rs. 14,19,000 to the Imperial treasury, from the assigned revenues of this Province, against Rs. 14,39,000 paid during the currency of the expiring contract.

(4) BUDGET ESTIMATE, 1897-98.

4. The Budget Estimate for 1897-98 under the terms of the new contract as set forth above, and as finally passed by the Government of India, accepts Rs. 41,07,000 as the opening balance, and provides for receipts aggregating Rs. 4,54,83,000 and expenditure Rs. 4,85,90,000, including a provision of Rs. 22,18,000 as the provincial share of the outlay on Famine Relief, leaving a closing balance of Rs. 10,00,000. It is estimated that on the whole the receipts, which under the new arrangement are only Rs. 3,68,000 less than the actuals of 1895-96, will be less by Rs. 8,98,000 than the revised estimate for the current year. Taking this year as the standard of comparison, it will be seen that Bengal loses Rs. 44,50,000 under railway receipts, an item of revenue which tends to develop rapidly without adding to the Provincial expenditure, except in the form of feeder roads. In exchange for the share of railway receipts which was made over in 1892, the province gets under the new contract an extra quarter of the excise revenue estimated at Rs. 33,62,000. The loss of revenue alone comes therefore to nearly 11 lakhs, while the expenditure on excise rises at the same time by Rs. 1,78,000. On the whole transaction,

therefore, putting each source of revenue at its present value, Bengal is worse off by more than 12½ lakhs; while the prospective loss is probably much greater, for it is unlikely that excise revenue will expand in the same proportion as the railway receipts. On the expenditure side the estimate, excluding famine outlay, has been passed for a total grant of Rs. 4,63,72,000 against Rs. 4,62,44,000, the revised estimate of 1896-97. The estimate of 1897-98 includes Rs. 8,06,000 for Survey and Settlement charges and Rs. 57,000 for marine pensions which have been provincialised under the contract. The budget is explained in somewhat fuller detail in next part.

PART II.—Details of the Budget Estimate for 1897-98.

RECEIPTS.

1. *Land Revenue*.—The total collections under Land Revenue in 1895-96 amounted to Rs. 3,90,52,000 and the estimate for 1896-97, as passed by the Government of India, is Rs. 3,92,50,000, which includes Rs. 3,00,000 for recoveries of survey and settlement charges in Bihar. The 12 per cent. on collections from Government estates yielded in 1895-96 Rs. 5,05,000, while the estimate for 1897-98 stands at Rs. 5,10,000. The *Adjustments* between Imperial and Provincial generally cease on the settlement of a new arrangement, and the figures shown under the head represent the fixed contribution of Rs. 14,19,000 to Imperial, less a special temporary assignment of Rs. 6,23,000 made in order to enable the Local Government to carry out the heavy programme of the Survey Department in the first year of the contract.

2. *Stamps*.—The estimate of Stamp revenue for 1896-97 was passed by the Government of India for Rs. 1,67,60,000. The latest returns from the Comptroller-General show that the receipts during the first eleven months of the year exceeded those of the corresponding period of last year by about Rs. 6,56,000. In view of the increase that has already occurred, both the revised estimate for 1896-97 and the estimates for 1897-98 have been placed at Rs. 1,74,25,000, and the Provincial share of three-fourths amounts to Rs. 1,30,69,000. The increase is almost wholly under general stamps.

3. *Excise*.—The revenue from Excise for 1896-97 was estimated at Rs. 1,33,00,000. The actuals of 1895-96 amounted to Rs. 1,33,78,000, and the figures of the first 11 months of 1896-97 show an increase of Rs. 1,74,000 over the actuals of the corresponding period of the preceding year. The estimate has accordingly been raised to Rs. 1,35,50,000 for 1896-97, but in consequence of a change in the system of levying duty on ganja exported to the North-Western Provinces, the estimate for next year has been passed at a lakh less than that for 1896-97. The Provincial share of excise revenue has been raised under the new contract to one-half.

4. *Provincial Rates*.—The actual collections of the Public Works Cess in 1895-96 amounted to Rs. 41,37,000, and the average actuals of the past three years were Rs. 41,41,000. The actuals of the first ten months of the current year show an increase of Rs. 1,27,000 over those of the corresponding period of last year. The revised estimate for the current year has accordingly been placed at Rs. 42,90,000. The prevailing scarcity will, it is anticipated, affect the collections during next year, and the estimate for that year has been taken at Rs. 40,60,000. The estimate of receipts under "General rates for the management of private estates" is Rs. 1,40,000.

5. *Assessed Taxes*.—The budget estimate of receipts from Income Tax for 1896-97 was passed by the Government of India for Rs. 46,50,000. The actual collections of last year amounted to Rs. 46,60,000, and those of the twelve months ending 28th February were Rs. 49,53,000. Both the revised estimate for 1896-97 and the estimate for 1897-98 have been placed at Rs. 49,00,000. The Provincial share of one-half is Rs. 24,50,000.

6. *Forest*.—The receipts of the Forest Department are now estimated at Rs. 12,80,000 for 1896-97 and Rs. 13,00,000 for 1897-98, against Rs. 9,19,000, the actuals of 1895-96. The increase over the actuals of 1895-96 is due to contracts undertaken by the department for the supply of sleepers to the Rai Bareilly-Benares Railway. Increased provision has also been made on the expenditure side for the cutting and carriage of these sleepers, so that the

net receipts are estimated at Rs. 6,15,000 for 1896-97 and Rs. 5,93,000 for 1897-98 against Rs. 4,53,000, the actuals of 1895-96. The lower estimate of net receipts for 1897-98 is due to a provision made to give effect to the scheme of the re-organization of the subordinate Forest staff sanctioned by the Secretary of State. The Provincial share is one-half.

7. *Registration*.—The budget estimate of receipts for 1896-97 was Rs. 13,65,000 against Rs. 13,41,000, the actuals of 1895-96. The actuals of the first ten months, compared with those of the corresponding period of last year, show an increase of Rs. 1,28,000, part of which represents an increase in the registration of mortgage deeds due to the prevailing scarcity. The revised estimate is Rs. 15,00,000. The increase in registrations is not expected to continue during next year, and the estimate for 1897-98 has accordingly been taken at less than the revised estimate for the preceding year.

8. *Interest*.—The estimate of loans for 1897-98, as passed by the Government of India, provides for a return of Rs. 3,09,000 under Interest in 1897-98, thus:—

	Rs.
Interest on advances to cultivators	57,000
Do. on drainage and embankment advances	52,000
Do. on loans to notabilities	1,000
Do. on loans to municipalities and other local authorities	1,45,000
Miscellaneous, including interest on Government securities in deposit for the Education Department	54,000
	3,09,000

9. *Post Office*.—The Provincial receipts consisted of recoveries made from the Zamindari Dāk Fund on account of establishment employed in the Post-master-General's office, but these are now adjusted in the books of the Postal Department, and do not pass through the Provincial accounts.

10. *Law and Justice—Courts of Law*.—The receipts from magisterial fines have steadily declined since 1893-94. The estimate has been placed at Rs. 8,30,000 against Rs. 8,41,000, the actuals of 1895-96.

11. *Law and Justice—Jails*.—The estimate under this head is Rs. 9,08,000 against Rs. 8,58,000, the actuals of 1895-96. The increase is mainly due to the supply of police clothing by the Jail Department.

12. *Marine*.—The budget estimate of total receipts for 1896-97 was Rs. 9,35,000. This has been raised to Rs. 9,64,000 in the revised estimate, with reference to the actuals of the 12 months ending 31st January 1897, which amounted to Rs. 9,64,000, owing to the unusually high receipts under Pilotage. The estimate for 1897-98 is Rs. 9,54,000, and is based on the average actuals of past years.

13. *Education*.—The estimate under this head amounts to Rs. 6,27,000 against Rs. 5,69,000, the estimate for 1896-97. The increase is due to the inclusion of receipts from the Eden Hindu Hostel (Rs. 40,000), which it has since been decided to keep outside the Provincial accounts, and to increased fee-receipts (Rs. 17,000) from the Kurseong Boarding School, which has been enlarged to provide for a larger number of students.

14. *Medical*.—The estimate of Rs. 2,11,000 follows the actuals of 1895-96.

15. *Scientific and other Minor Departments*.—The estimate for 1897-98 amounts to Rs. 2,23,000 against Rs. 2,08,000, the revised estimate for 1896-97, and Rs. 2,35,000, the actuals of 1895-96. The decrease, compared with the actuals of 1895-96, is due to an anticipated falling off in the receipts from the sale of quinine, in consequence of the prevailing scarcity.

16. *Superannuation receipts*.—The estimate of Provincial receipts for 1896-97 amounts to Rs. 70,000, which has been reduced to Rs. 49,000 in the revised estimate, in consequence of a change in the mode of adjusting contributions for the pension and leave allowances of certain officers. The estimate for 1897-98 has been fixed with reference to the actual demands as calculated by the Accountant-General.

17. *Miscellaneous*.—The receipts under this head fluctuate largely from year to year. The actuals were as follows:—

				Rs.
1890-91	7,70,000
1891-92	8,36,000
1892-93	8,27,000
1893-94	8,63,000
1894-95	10,12,000
1895-96	10,23,000

The estimate for 1897-98 is Rs. 9,35,000, while the revised estimate for 1896-97 is Rs. 9,28,000.

EXPENDITURE.

18. *Land Revenue*.—The total expenditure under Land Revenue for 1897-98 is estimated at Rs. 45,71,000 against Rs. 37,29,000, the budget grant for 1896-97. The increase is due to a provision of Rs. 8,06,000 for survey and settlements now provincialised, and to a larger grant for management and improvement of Government estates in proportion to the anticipated increase of revenue from those estates.

19. *Stamps*.—The estimate of expenditure for 1897-98 amounts to Rs. 7,02,000 against Rs. 6,67,000, the budget estimate for the current year, and Rs. 6,57,000, the actuals of 1895-96. The increase is under "Stamp paper supplied from Central Stores," the estimate under this head being Rs. 3,67,000 against Rs. 3,34,000, the actuals of 1895-96. The Provincial share is three-fourths.

20. *Excise*.—The total expenditure for 1897-98 is estimated at Rs. 7,13,000 against Rs. 7,11,000, the budget grant for 1896-97. The budget provides a larger grant for additional Preventive Sub-Inspectors and travelling allowances against a reduction of Rs. 25,000 in the construction of distillery buildings. These buildings will now be transferred to the books of the Public Works Department. The Provincial share has, however, been increased from one-fourth to one-half, and this accounts for the increase from Rs. 1,77,000 for 1896-97 to Rs. 3,57,000 for next year.

21. *Provincial Rates*.—The Provincial expenditure for 1897-98 has been provisionally estimated at Rs. 1,19,000 against Rs. 85,000, the grant for the current year. The amount includes a provision for revaluations in a number of districts, and also for revising the arrangement under which the cost of collecting the Public Works Department cess is divided between Provincial revenues and District funds. In settling the terms of the contract the Government of India were asked to make an assignment for the latter purpose; but this they have refused to do, and in view of the diminished resources of the Government it is uncertain whether the change contemplated will not have to be deferred at any rate for the present.

22. *Customs*.—The expenditure for the year 1897-98 is estimated at Rs. 8,00,000 against Rs. 8,02,000, the budget estimate for 1896-97, and Rs. 7,98,000, the actuals for 1895-96. The provision in the current year's budget for purchase and repairs of preventive service boats and petty construction and repairs has not been fully utilised, and there have also been savings under exchange compensation allowance. These account for small provision in the revised estimate for the year.

23. *Registration*.—The estimate for 1897-98 is Rs. 8,73,000 against Rs. 8,03,000, the actuals of 1895-96. The increase is due chiefly to provision being made for larger payments under the heads of commission to Rural Sub-Registrars and of contingent charges owing to the opening of new registration offices.

24. *Interest*.—The rate of interest payable on the Provincial loans has been reduced by the Government of India from 4 to $3\frac{1}{4}$ per cent. with effect from next year. The budget grant has been reduced accordingly.

25. *Administration*.—The estimate under this head amounts to Rs. 17,28,000, against Rs. 17,62,000, the revised estimate for 1896-97, and Rs. 17,50,000,

the actuals of 1895-96. The fluctuations are mostly due to privilege leave allowances of officers.

26. *Law and Justice—Courts of Law.*—The original estimate of expenditure for 1896-97 amounted to Rs. 89,81,000, against Rs. 88,26,000, the actuals for 1895-96. The estimate has been reduced to Rs. 88,90,000 in the revised estimate for the year, with reference to the actuals of the first 10 months of the year, which amounted to Rs. 73,91,000 against Rs. 73,09,000 in the corresponding period of the preceding year. The estimate for 1897-98 is Rs. 89,42,000.

27. *Jails.*—The estimate of total expenditure for 1897-98 has been placed at Rs. 22,32,000, against Rs. 24,70,000, the revised estimate for 1896-97. The revised estimate includes a larger provision for dietary charges consequent on the rise of prices of food-grains.

28. *Police.*—The estimate for 1897-98 amounts to Rs. 61,18,000, against Rs. 60,40,000, the budget grant for 1896-97. The increase is due to a provision for the grant of compensation for the dearness of food-grains, for the progressive annual increase of Rs. 28,000 on account of the substitution of Sub-Inspectors for Head-Constables as investigating officers, in accordance with the recommendations of the Police Commission, and larger grants for petty construction, rewards, &c.

29. *Marine.*—The estimate of expenditure for 1897-98 is Rs. 9,11,000, against Rs. 9,21,000, the sanctioned estimate for 1896-97. The decrease is under contributions to the Orissa Port Funds.

30. *Education.*—The grant for expenditure under the direct control of the Education Department was Rs. 27,76,000 in the budget estimate for 1896-97. This has been reduced to Rs. 26,75,000 in the revised estimate, partly in consequence of the absence of officers on furlough, partly owing to grants for apparatus, &c., for the Civil Engineering College not being fully utilized, and partly by reason of savings in the grants for normal or training schools. The estimate for 1897-98 provides for an increase of Rs. 71,000 over the revised estimate, including the following items:—

	Rs.
(1) Kurseeng Boarding School	17,000
(2) Bihar School of Engineering	12,000
(3) Reorganisation of the Education Department ...	17,000

31. *Medical.*—The estimate for 1897-98 amounts to Rs. 19,18,000, against Rs. 19,63,000, the sanctioned estimate for 1896-97. The decrease is due to smaller provision having been made for the renewal of bedding, clothing and instruments in the Calcutta hospitals, and to a reduction in the grant for the Bhawanipur Hospital, the equipment of which was provided for last year.

32. *Scientific and other Minor Departments.*—The estimate for 1897-98 is Rs. 4,55,000, against Rs. 4,35,000, the revised estimate for 1896-97. The decrease in the revised estimate is due to the provision for the up-keep of cinchona plantations and for the purchase of bark not having been fully utilised.

33. *Stationery and Printing.*—The estimate for 1897-98 is Rs. 11,34,000 against Rs. 12,22,000, the estimate for 1896-97. The fluctuations are chiefly in the value of Stationery supplied from Central Stores.

34. *Famine Relief.*—The total expenditure on Famine Relief, as passed by the Government of India, amounts to Rs. 23,00,000 for 1896-97 and Rs. 1,00,48,000 for 1897-98, and their distribution is as follows:—

	1896-97.	1897-98.
	Rs.	Rs.
Imperial	70,13,000
Provincial	18,50,000	22,18,000
Local	4,50,000	8,17,000
Total	23,00,000	1,00,48,000

The distribution of the grant under 33, Famine Relief, for 1897-98 in detail of the minor heads is as follows:—

	Rs.
1. Salaries and establishment in Civil Department ...	5,64,000
2(a). Relief works in charge of Public Works Department ...	39,13,000
2(b). Establishment, tools and plant for Public Works Department ...	2,75,000
3. Relief works in charge of Civil Department ...	21,71,000
4. Relief to people employed otherwise than on relief works	10,93,000
5. Gratuitous Relief ...	20,24,000
6. Miscellaneous ...	3,000
Total ..	1,00,48,000

35. *Irrigation Minor Works and Navigation.*—The chief work included under this head is the conversion into a navigable canal of the Bhangore khal, which forms a portion of the boat route between Calcutta and Eastern Bengal. This was commenced last year and will be completed during 1897-98 at a cost of Rs. 3,78,000. Under agricultural works a provision of Rs. 63,000 has been made for the Bhagwangola embankment designed to control the floods on the Bhagirathi river.

36. *Civil works in charge of Public Works Department.*—The Provincial expenditure under this head has been greatly reduced owing to the restriction of the programme rendered necessary by the reduction of the Provincial balance in consequence of famine outlay. The allotment includes the following grants for original works:—

	Rs.
Residences for Munsifs ...	40,000
Repairs of excise buildings ...	50,000
Parsonage, St. John's Church ...	25,000
Jail Barracks at Buxar and Bhagalpur ...	96,000
Subdivisional Residence, Serampore ...	25,000
Residence for District Superintendent of Police, Noakhali ...	20,000
Land for quarters of Military students of Medical College ...	14,000
New Chemical Block, Medical College, Calcutta ...	1,25,000
New Pathological and Physiological Block, Calcutta ...	50,000
Fittings, Chemical Block ...	40,000
Central Lunatic Asylum ...	1,00,000
Outpatient Department, Medical College ...	48,000
Ditto Campbell Hospital ...	20,000
Presidency General Hospital ...	1,00,000
Land for ditto ...	45,000
Roads in Western Duars ...	60,000
Government offices at Chinsura ...	37,000
Rebuilding Darjeeling Cutcherry ...	50,000
Record-room, Musaffarpur ...	21,000
Total ...	9,61,000

H. H. RISLEY,
Secy. to the Govt. of Bengal.

The 27th March 1897.

APPENDIX A.

Bengal Provincial Receipts in detail of minor heads

[The figures in columns 4 and 5 are those accepted by the Government of India.]

I.—Land Revenue—

HEADS.	Actuals, 1895-96.	Budget Estimate, c. 1896-97.	Revised Estimate 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Gross Land Revenue	3,90,52,313	3,46,47,000	4,92,00,000	3,92,50,000	The revised estimate for 1896-97 has been reduced in consequence of the prevailing scarcity.
Deduct 12 per cent. on estimated collections from Government estates (Provincial)	5,05,068	4,00,000	4,80,000	5,40,000	
Deduct on account of recoveries of Bihar survey and settlement charges (Imperial)	22,692	2,00,000	1,50,000	3,00,000	
Total deduction	5,27,760	6,00,000	6,30,000	8,40,000	
Net amount divisible between Imperial and Provincial Funds	3,85,24,553	3,83,47,000	3,85,00,000	3,84,10,000	
Provincial share of above (one-fourth)	96,31,133	95,86,750	96,25,000	96,02,500	
Deduct on account of adjustments	7,19,832	—12,00,000	—14,60,000	—7,100,000	
Net	89,11,321	83,86,750	82,70,000	88,92,500	
Add 12 per cent. collections	5,05,068	4,00,000	4,80,000	5,40,000	
Total Provincial share	94,16,389	87,86,750	87,50,000	93,32,500	

II.—Adjustments—

Fixed contribution to Imperial Revenues under the terms of contract	14,39,000	14,33,000	14,28,000	14,19,000
Add (payable to Imperial Funds)— Interest on the advances for the Hiji Tidal Canal	25,863	30,000	20,000
Contribution towards the cost of a tower clock to be set at the General Post Office	5,000	5,000
Contribution to Imperial Funds on account of the remission of the deferred interest on Kidderpore Dock Loans	2,00,000
Total to be deducted from the Provincial share	14,64,863	14,74,000	16,70,000	14,19,000
Deduct (to be received from Imperial Funds)— Advance for the remodeling of the Hiji Tidal Canal	1,46,000	24,000	21,000
Grant on account of Imperial buildings placed under local bodies	31,181	10,000	45,000
Salary of a probationer gardener at Sibpur	544	2,000	1,000
Repayment of the special contribution taken in 1894-95	3,00,000
Grant for the additional establishment entertained in the Calcutta Custom House and in the Board's Office on the introduction of the new Tariff Act	2,28,188	2,12,000	2,12,000
Towing charges of Rhotas	10,000	10,000	10,000
Assignment for the Ghatong Police Guard	15,650	16,000	10,000
Ditto for the transfer of Mackillop's Hill to Lebong Cantonment	11,600
Transfer of Observatory buildings, to the charge of Provincial Public Works Department	1,000
Special assignment on account of Survey and Settlement expenditure	6,23,000
Total	7,46,601	2,74,000	3,69,000	6,23,000
Net sum to be transferred	7,10,262	12,00,000	13,61,000	7,00,000

III.—Salt—

Rent of Warehouses	1,42,000	1,38,000	1,17,000	The receipts in 1896-96 were unusually high.
Miscellaneous	36,000	87,000	36,000	
Total	1,78,000	1,75,000	1,53,000	The receipts have been made Imperial under the terms of the new contract.

IV.—Stamps.—

HEADS.	Actuals, 1895-96.	Budget Estimate, 1896-97.	Revised Estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Sale of general stamps	45,44,000	45,08,000	50,56,000	50,56,000	The revenue continues to show a progressive annual increase.
Sale of court-fee stamps	1,19,20,000	1,19,91,000	1,20,70,000	1,20,70,000	
Sale of plain paper to be used with court-fee stamps	2,40,000	2,40,000	2,45,000	2,45,000	
Duty on impressing documents	29,000	9,000	25,000	25,000	
Fines and penalties	24,000	30,000	20,000	26,000	The actuals of 1895-96 included a special item of Rs. 10,000, representing the security deposit of the late Treasurer of Bankura, forfeited to Government for the loss of a large consignment of one-rupee Court-fee stamps.
Miscellaneous	11,000	2,000	3,000	8,000	
Total ..	1,67,73,000	1,67,80,000	1,74,25,000	1,74,25,000	
Provincial share (three-fourths)	1,25,79,000	1,25,85,000	1,30,69,000	1,30,69,000	

V.—Excise—

License and Distillery fees and Duties for the sale of liquors and drugs	1,01,38,000	1,03,03,000	1,02,30,000	1,02,30,000	The duty on ganja exported to the North-Western Provinces will henceforth be levied in those provinces and thus it is anticipated will reduce the receipts by one lakh.
Gain on sale-proceeds of excise opium	17,72,000	17,31,000	17,55,000	17,55,000	
Duty on ganja	14,61,000	12,30,000	15,60,000	14,50,000	
Fines, confiscation and miscellaneous	14,000	32,000	15,000	15,000	
Total ..	1,33,78,000	1,33,00,000	1,35,50,000	1,34,50,000	Under the terms of the new Provincial Contract half of these receipts will be Provincial instead of one-fourths hitherto.
Provincial share	33,45,000	33,25,000	33,87,000	67,25,000	

VI.—Provincial Rates—

Public Works Cess	41,37,000	41,80,000	42,90,000	40,00,000	Decrease estimated in 1897-98 for scarcity.
General rates for management of private estates	1,40,000	1,40,000	1,40,000	1,40,000	
Total ..	42,77,000	43,20,000	44,30,000	42,00,000	

VII.—Customs—

Warehouse and Wharf Rents	8,000	8,000	11,000	7,000	
Miscellaneous	85,000	75,000	84,000	84,000	
Total ..	91,000	81,000	95,000	91,000	

VIII.—Assessed Taxes—

Deductions by Government from salaries and pensions, &c.	4,97,000	4,96,000	5,15,000	5,15,000
Deductions by Government from interest on Government securities	15,000	19,000		
Deductions from salaries, &c., paid by local authority or company	60,000	52,000	43,85,000	43,85,000
Income-tax on securities of local authority or company				
Deductions by Government from profits of Railway Companies	2,000	3,000		
Ordinary collections	40,46,000	40,40,000		
Penalties	26,000	26,000		
Miscellaneous	14,000	14,000		
Total	46,60,000	46,50,000	40,00,000	40,00,000
Provincial share (one-half)	23,30,000	23,25,000	24,50,000	24,50,000

IX.—Forest—

I.—Timber and other produce removed from the forests by Government agency	24,800	4,07,800	4,34,300	4,50,000	The increase is due to the sale of sal steepers to the Railways.
II.—Timber and other produce removed from the forests by consumers or purchasers	8,63,000	7,07,800	7,96,800	8,17,000	
III.—Unskated, drift and half wood	9,400	10,300	9,400	9,600	The revised estimate for 1896-97 includes Rs. 5,000 being the sale proceeds of 500 acres of land in the Tista Division.
V.—Miscellaneous	23,000	24,100	20,600	23,400	
Total ..	9,19,000	12,70,000	12,80,000	13,00,000	
Provincial share (one-half)	4,59,000	6,35,000	6,40,000	6,50,000	

X—Registration—

HEADS.	Actuals, 1895-96.	Budget Estimate, 1896-97.	Revised Estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Fees for registering documents	12,87,000	13,10,000	14,45,000	13,65,000	The prevailing scarcity has led to larger registration in 1896-97 but this is not expected to last.
Fees for copies of registered documents	21,000	20,000	20,000	20,000	
Miscellaneous	33,000	35,000	35,000	35,000	
Total	13,41,000	13,65,000	15,00,000	14,20,000	
Provincial share (one-half)	6,71,000	6,82,000	7,50,000	7,10,000	

XII.—Interest—

<i>Class I.</i> —Interest on advances to cultivators— On advances to cultivators under Land Improvement Loans Act	11,000	24,000	24,000	2,55,300	Decrease due to the repayment of the loan to the Doo Estate.
On advances to cultivators under Agriculturists' Act XXII of 1894	12,000				
<i>Class II.</i> —Interest on advances under Special Loans— On Drainage and Embankment Advances	36,000	40,000	34,000

Miscellaneous— Interest on loans of Public Works	34,000	42,000	42,000	38,000	
Interest on the capital cost of His Honour the Lieutenant-Governor's house, &c.	1,000	1,300	1,000	1,300	
Other items	2,000	1,700	2,000	1,700	
Interest on zamindari embankment recoveries, &c.	2,000	1,000	2,000	1,700	
Total Miscellaneous	39,000	46,000	47,000	42,500	
GRAND TOTAL	2,13,000	2,67,000	2,15,000	3,09,000	

XIII.—Post Office—

Recovery on account of establishment employed in the Postmaster-General's office	5,000	5,000	Those recoveries are now adjusted in the books of the Comptroller of Post Offices.
---	-------	-------	-----	-----	--

XVIA.—Law and Justice—Courts of Law—

Sale-proceeds of unclaimed and escheated property	29,000	38,000	28,000	35,000	The actuals show a progressive decrease since 1893-94.
Court-fees realised in cash	41,000	34,000	53,000	36,000	
General fees, fines and forfeitures	7,31,000	7,70,000	6,95,000	7,23,000	
Pledership examination fees	32,000	28,000	30,000	28,000	
Miscellaneous	8,000	10,000	10,000	8,000	
Total	8,41,000	8,80,000	8,25,000	8,30,000	

XVIB.—Jails—

Jails	8,000	8,000	9,000	8,000	Larger receipts anticipated on account of supplies to the Police and Military Departments.
Jail manufactures	8,50,000	8,50,000	8,80,000	9,00,000	
Total	8,58,000	8,58,000	8,89,000	9,08,000	

XVII.—Police—

HEADS.	Actuals, 1895-96.	Budget Estimate, 1896-97.	Revised Estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Police supplied to Municipal, Cantonment and Town Funds	10,000	9,000	10,000	10,000	Based on actuals.
Police supplied to Public Departments, private companies and persons	39,000	38,000	35,000	40,000	
Presidency Police	91,000	80,000	1,00,000	90,000	
Recoveries on account of Village Police	3,000	3,000	3,000	3,000	
Fees, fines and forfeitures	37,000	23,000	34,000	25,000	The actuals show a progressive decrease since 1895-96. The estimate for 1896-97 included Rs. 20,000, being the recovery from Frontier Police for the cost of supplies which are now adjusted in the accounts by a deduction from the expenditure on account of rations.
Superannuation receipts	1,000	1,000	2,000	1,000	
Miscellaneous	8,000	10,000	7,000	8,000	
Total	1,80,000	2,01,000	1,91,000	1,80,000	

XVIII.—Marine—

Sale-proceeds of vessels and stores	1,000	3,000	3,000	2,000	The fluctuations depend on the tonnage of vessels visiting and leaving the port.
Registration and other fees	40,000	40,000	40,000	42,000	
Pilotage Receipts { Calcutta	8,57,000	8,23,000	8,74,000	8,35,000	
Chittagong	16,000	17,000			
Lead-money of Volunteers	7,000	5,000		15,000	
				7,000	
Miscellaneous.							
Deductions for mess money	10,000	12,000		10,200	
Contribution to life-boat establishment, Goshundo		300		300	
Marine survey	31,000	30,000		35,000	
Other items	6,000	1,700		4,500	
Total Miscellaneous			47,000	47,000	47,000	50,000	
Total			9,68,000	9,95,000	9,64,000	9,54,000	

XIX.—Education—

Fees, Government Colleges, General	1,68,000	1,68,000	1,68,000	1,65,000	Based on actuals.
Fees, Government Colleges, Professional	39,000	38,000	39,000	40,000	
Fees, Schools, General	3,00,000	3,10,000	3,11,000	3,27,000	
Fees, Schools, Special	18,000	15,000	18,000	18,000	Increased receipts are expected from the new boarding school for boys at Kurseong.
Contributions from Native States, private persons and Municipalities	15,000	12,000	12,000	8,000	
Income from Endowments	2,000	10,000	8,000	8,000	
Miscellaneous	16,000	13,000	18,000	19,000	Increased provision made with reference to actuals which show a progressive increase.
Fees from boarders in Eden Hindu Hostel				40,000	
Total	5,68,000	5,60,000	5,60,000	6,27,000	

XX.—Medical—

Medical School and College Fees.	52,000	48,000	52,000	55,000	Increased provision made with reference to actuals which show a progressive increase.
Hospital Receipts	88,000	90,000	1,00,000	84,000	
Lunatic Asylum Receipts	31,000	28,000	24,000	20,000	Based on actuals for 3 years ending 1895-96.
Contributions from Municipalities and private persons	30,000	24,000	32,000	39,000	
Miscellaneous	3,000	5,000	4,000	4,000	
Total	2,10,000	2,05,000	2,12,000	2,11,000	

XXI.—Scientific and other Minor Departments—

Botanic and other gardens	5,000	5,000	5,000	4,850	Reduced provision made, as scarcity will probably reduce the demand for quinine in price-packages.
Veterinary and Stallion receipts	4,000	4,000	4,000	5,000	
Cinchona Plantation	1,87,000	1,80,000	1,80,000	1,74,100	
Experimental cultivation	1,000	3,000	2,000	2,000	
Emigration fees	31,000	32,000	32,000	32,000	
Examination fees	7,000	4,000	5,000	5,000	
Miscellaneous				225	
Deduct for rounding				2,23,175	
Total	2,38,000	2,34,000	2,05,000	2,23,000	

XXXII.—*Superannuation*—

HEADS.	Actuals, 1896-97.	Budget Estimate, 1896-97.	Revised Estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Family subscriptions of native members of the Covenanted Civil Service	2,000	1,650	2,000	1,000	The smaller estimate under this head is due to a change in the system of adjust- ing the recovery of con- tributions for pension and leave allowances of officers employed on survey and settlement operations in pri- vate estates, and in the col- lection of Road Cess.
Deduction from Pension Fund, Marine	8,000	
Contributions of officers lent to Municipalities or Corporations	28,000	22,000	...	9,000	
Contributions of Officers lent to Foreign Service	26,000	35,000	...	30,000	
Contributions of persons employed by the Court of Wards	10,000	11,000	47,000	11,000	
Refunds of gratuities	1,000	350	...	400	
Miscellaneous	
Total	70,000	70,000	49,000	60,000	

XXIII.—*Stationery and Printing*—

Stationery receipts	1,000	1,000	...	1,000	
Sale of Gazettes and other publications	98,000	98,000	...	98,000	
Other press receipts	36,000	33,000	...	35,000	
Total	1,35,000	1,32,000	1,50,000	1,34,000	

XXV.—*Miscellaneous*—

Unclaimed deposits	4,61,000	3,70,000	3,88,000	3,90,000	Based on past actuals.
Sale-proceeds of Durbar presents	12,000	10,000	10,000	12,000	
Sale of old stores and materials	42,000	40,000	45,000	42,000	
Sale of lands and houses, &c.	0,000	7,000	7,000	7,000	
Fees for Government audits (of Municipal and In- corporated Local Funds)	69,000	75,000	75,000	70,000	The partition fees were very high in 1895-96.
Rents	26,000	25,000	28,000	27,000	
Miscellaneous fees, fines and forfeitures	2,65,000	1,98,000	2,20,000	2,36,000	
Miscellaneous	1,48,000	1,50,000	1,75,000	1,51,000	
Total	10,23,000	8,75,000	9,28,000	9,35,000	

XXVI.—*State Railways (Eastern Bengal State Railway System)*—

Gross receipts	1,43,16,000	1,30,00,000	Details not known	...	These have been made Imperial from 1897-98 under the terms of the new contract.
Working expenses	50,10,000	56,75,000	
Net receipts	87,06,000	73,25,000	84,00,000	...	
Provincial share (one-half)	43,53,000	36,63,000	42,00,000	...	

XXIX.—*Irrigation Major Works (Direct Receipts)*—

Orissa Canals	4,17,000	3,45,000	4,15,000	4,40,000	The increase in 1896-97 is chiefly in water rates of the Bore Canals due to the large increase in the area under rice crops, the water rates in which did not fall due till April 1896.
Madras Canals	2,64,000	2,40,000	2,43,000	2,39,000	
Hill Tidal Canal	62,000	60,000	65,000	74,000	
Bore Canals	7,72,000	8,55,000	9,47,000	8,94,000	
Total	15,15,000	16,00,000	16,30,000	16,50,000	

XXX.—Minor Works and Navigation in charge of the Public Works Department—

HEADS.	Actuals, 1895-96.	Budget Estimate, 1896-97.	Revised Estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
<i>Irrigation and Navigation Works.</i>					
Works for which Capital and Revenue accounts are kept—					
Saran Canal	2,000			10,000	
Calcutta and Eastern Canals	4,50,000	4,50,000		4,30,000	The decrease is due to much of the traffic in jute being carried by rail and steamer.
Orissa Coast Canal	88,000	70,000		78,000	
Total	5,40,000	5,20,000	6,30,000	5,18,000	
Works for which only Revenue accounts are kept—					
Nadua rivers	1,20,000	1,70,000		1,00,000	The falling off is ascribed partly to the bad state of the Nadua rivers and partly to the decline of trade.
Gaighatta and Buxi Khal	5,000	5,000		5,000	
Total	1,25,000	1,75,000		1,05,000	
Works for which neither Capital nor Revenue accounts are kept					
Eden Canal	31,000	30,000	33,500	33,000	
Total	41,000	30,000	33,500	33,000	
Total Irrigation and Navigation Works	7,06,000	7,25,000	6,63,500	6,56,000	
<i>Agricultural Works.</i>					
Works for which neither Capital nor Revenue accounts are kept—					
Government embankments	5,400	4,000	4,400	4,000	
Takavi embankments under contract	1,000	1,000	1,000	1,000	
Total Agricultural Works	6,400	5,000	5,400	5,000	
GRAND TOTAL	7,12,400	7,30,000	6,75,000	6,61,000	

XXX.—Minor Works and Navigation in charge of Civil Officers—

	Rs.	Rs.	Rs.	Rs.	
Recoveries on account of lands benefited by embankments	75,000	1,05,000	1,00,000	1,03,000	The low actuals of 1895-96 were due to the part realisation of the fixed demand of the year in Midnapore and Champaran. The revised estimate for 1896-97 includes arrears recoveries of 1895-96. The estimate for 1897-98 is based on the fixed annual demand.
Recoveries on account of capitalised maintenance charges of the Dankuni drainage	4,000	2,000	2,000	
Miscellaneous Receipts of the Dankuni-Howrah, &c., drainages	5,000	2,000	5,000	8,000	
Recoveries on account of capitalised maintenance charges of the Rajapore drainage establishment and contingencies	5,000	The estimate for 1897-98 is made up thus. Rs. Howrah drainage .. 700 Rajapore .. 3,040 Dankuni .. 4,000 Total .. 7,740 Anticipated recoveries on account of maintenance, &c., charges of the Rajapore drainage scheme capitalised.
Total	84,000	1,09,000	1,10,000	1,16,000	

XXXII.—Civil Works in charge of the Public Works Department—

Total gross receipts	2,65,000	1,80,000	2,38,000	1,83,000	The increase in the revised estimate for 1896-97 over the budget estimate is due to the increase in profits of the Darjeeling Himalayan Railway during the year, while the decrease in 1897-98 is due to the closing of the Calcutta workshops.
----------------------	----------	----------	----------	----------	---

XXXII.—Civil Works in charge of Civil Officers—

Tolls on Ferries	2,52,000	2,58,000	2,50,000	2,50,000
Cemetery receipts	2,000	2,000	2,000	2,000
Miscellaneous	1,000	1,000
Total	2,54,000	2,61,000	2,53,000	2,52,000

APPENDIX B.

Bengal Provincial Expenditure in detail of minor heads.

[The figures in columns 4 and 5 are those accepted by the Government of India.]

1.—Refunds and Drawbacks—

HEADS.	Actuals, 1895-96.	Budget estimate, 1896-97.	Revised estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	
Land Revenue (one-fourth)	Rs. 10,000	Rs. 10,000	Rs. 23,000	Rs. 14,000	The actuals of 1895-96 were unusually low, whereas those of 1896-97 are exceptionally high and include a special refund of Rs. 12,000 to Kumar Narapat Singh, of Orahat, representing the surplus balance of his estate which was confiscated and subsequently restored to him.
Stamps (three-fourths)	1,15,000	1,31,000	1,23,000	1,17,000	
Excise (one-fourth)	1,000	2,000	3,000	6,000	Will be one half from 1897-98, under the terms of the new contract. Based on actuals.
Assessed Taxes (one-half)	12,000	19,000	14,000	15,000	
Forest (one-half)	1,000	1,000	2,000	2,000	
Registration (one-half)	13,000	8,000	23,000	14,000	
Provincial Rates	1,000	1,000	1,000	2,000	
Customs (other than export and import duty)	1,53,000	1,60,000	1,60,000	1,71,000	

2.—Assignments and Compensations—

Malikans	1,73,000	1,52,000	1,58,000	1,64,000	The actuals of 1895-96 include large arrears in the districts of Gaya, Monghyr, Saran, Backergunge, Muzaffarpur, and Noakhali. The estimate for 1897-98 is based on the average actuals of the past five years.
------------------	----------	----------	----------	----------	---

3.—Land Revenue—

Survey and Settlement	31,00,000	32,25,000	31,51,000	32,28,000	Represents charges other than those incurred in Bihar, which will be made Provincial under the terms of the new contract.
Charges of District Administration	4,51,000	4,20,000	4,30,000	4,60,000	
Management of Government estates	95,000	81,000	89,000	77,000	
Land Records and Agriculture	37,15,000	37,30,000	36,70,000	45,71,000	

5.—Salt—

Salaries, establishment and contingencies	53,000	1,03,000	53,000	The estimate for 1896-97 included provision of Rs. 50,000 for a preventive establishment in the salt tracts outside Orissa, but the establishment has not yet been sanctioned. The charges will be Imperial from 1897-98, under the terms of the new contract.
--	--------	----------	--------	-------	--

6.—Stamps—

Superintendence	84,000	90,000	78,000	83,000	The decrease in 1896-97 is due partly to less salary drawn by the Officiating Superintendent of Stamps and Stationery and also to savings in the charges for freight and contingencies.
Charges for the sale of general stamps	1,08,000	1,07,000	1,08,000	1,10,000	
Charges on sale of court-fee stamps	1,31,000	1,23,000	1,23,000	1,36,000	Based on actuals.

Stamp paper supplied from Central Stores	3,34,000	3,33,000	3,34,000	3,07,000	Estimate furnished by the Superintendent of Stamps.
Total	6,57,000	6,67,000	6,78,000	7,02,000	
Provincial share (three-fourths)	4,93,000	5,01,000	5,09,000	5,27,000	

7.—*Excise*—

HEADS.	Actual, 1895-96.	Budget estimate, 1896-97.	Revised estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Superintendence	66,000	66,000	67,000	77,000	There were increased pay- ments of rewards in 1896-97.
Presidency Establishment	97,000	94,000	1,02,000	98,000	
District Executive Establishment	3,88,000	3,70,000	3,68,000	3,81,000	In the estimates for 1896-97 Rs. 50,000 was provided for the construction and repairs of Distillery Buildings, while in the estimates for 1897-98, Rs. 5,000 only has been entered under this head.
Distilleries	1,61,000	1,78,000	1,68,000	1,67,000	
Total	6,72,000	7,11,000	6,90,000	7,13,000	
Provincial share	1,68,000	1,77,000	1,72,000	3,67,000	

8.—*Provincial Rates*—

Collection of rates and cesses		44,500		85,000	
Valuation and re-valuation work		40,500		31,000	
Total	61,000	85,000	75,000	1,16,000	

9.—*Customs*—

Calcutta	7,88,700	7,54,900		7,80,700	The decrease in 1896-97 is due to reduced charges for Exchange Compensation Al- lowance and purchase and repair of boats.
Balassore	6,200	6,700		7,000	
Chittagong	24,200	30,400		26,300	
Cuttack	7,800	7,800		7,500	
Dacca	700	900		700	
Puri	1,500	1,500		1,500	
Total	7,98,000	8,02,000	7,81,000	8,00,000	

10.—*Assessed Taxes*—

Collection of Income-tax	1,84,000	1,91,000	1,81,000	1,93,000	The decrease in 1896-97 was due to the permanent Col- lector of Income Tax being on deputation and the Officiating Officer drawing less pay.
Provincial share	92,000	95,000	90,000	95,000	

11.—*Forest*—

<i>A.—Conservancy and Works.</i>		Rs.	Rs.	Rs.	Rs.	
I.—Timber and other produce removed from the forests by Government agency		28,000	2,90,300		1,76,100	Increased outlay is for cutting and delivering sleepers.
II.—Timber and other produce removed from the forests by consumers or purchasers		53,000	54,500		65,300	
III.—Confiscated, drift and waif wood		2,000	2,100		2,900	
VI.—Live-stock, stores, tools and plant		10,000	20,000		11,100	
VII.—Communications and buildings		50,000	62,400		52,400	The estimate for 1897-98 in- cludes Rs. 6,000 for a port- able tramway in the Mar- jaling Division and Rs. 12,000 for the construction of two head-quarters bangalows.
VIII.—Demarcation, improvement and extension of forests		26,000	37,200		43,600	
IX.—Miscellaneous		2,000	2,000		2,700	
Total A.—Conservancy and Works		1,80,000	4,72,000		3,84,000	
<i>B.—Establishments.</i>		Rs.	Rs.	Rs.	Rs.	
I.—Salaries		2,24,000	2,51,800		2,74,400	Increased provision made for the reorganization of the Sub- ordinate Forest Staff recom- mended by the Secretary of State.
II.—Travelling allowance		22,000	34,800		30,900

Total B.—Establishment		2,77,000	2,99,000		3,23,000	
GRAND TOTAL		4,60,000	7,70,000	6,63,000	7,07,000	
Provincial share (one-half)		2,32,000	2,35,000	2,32,000	2,32,000	

12.—Registration—

HEADS.	Actuals, 1896-97.	Budget estm. for 1896-97.	Revised estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
Superintendence	54,000	58,000	58,000	57,000	Provision has been made for larger payments under commission to Rural Sub-Registrars and under contingent charges owing to the opening of new offices and the general expansion of the department.
District charges	7,49,000	8,01,000	7,81,000	8,10,000	
Total	8,03,000	8,59,000	8,39,000	8,73,000	
Provincial share—one-half	4,01,000	4,30,000	4,17,000	4,37,000	

13.—Interest on Ordinary Debt—

Interest on Provincial advances and Loan account...	1,81,000	2,36,000	2,12,000	2,15,000	Both the revised estimate for 1896-97 and the estimate for 1897-98 are based on the estimated mean balance. The rate of interest has been reduced to 34 per cent. from 1897-98.
---	----------	----------	----------	----------	---

14.—Post Office—

Conveyance of Mails South Lushai Hills	3,000	3,000	3,000	3,000	An extra provision has been made on account of the daily postal service between Chittagong and Lunglo.
Establishment in Postmaster-General's and Deputy Postmaster-General's Offices	5,000	
Dak establishment	2,000	2,100	2,000	2,100	No provision necessary, as the charges have been transferred for audit and adjustment to the Postal Department.
Lamp deduction	10,100	10,100	
Total	5,000	10,000	5,000	10,000	

15.—General Administration—

Salary of Lieutenant-Governor (8,433½)	1,01,000	1,00,000	1,00,000	99,000	The increase in 1897-98 is due chiefly to the increase of Rs. 500 per mensem in the sumptuary allowance of the Lieutenant-Governor.
Staff and Household of Lieutenant-Governor	26,000	27,000	27,000	26,000	
Tour expenses	38,000	34,000	25,000	24,000	The increase in 1896-97 is partly due to the payment of privilege leave allowances, to the employment of an officer on special duty and to increased expenditure on postage and contingencies. The increases in 1896-97 are also due to privilege leave allowances which were not provided for in the original estimates.
Legislative Council	24,000	20,000	21,000	25,000	
Civil Secretariate	5,72,000	5,66,500	5,91,000	5,78,000	
Board of Revenue	2,05,000	2,88,700	3,00,000	3,87,000	
Commissioners	6,23,000	5,93,800	6,19,000	5,94,000	
Civil Offices of Account and Audit	72,000	74,000	74,000	76,000	
Total	17,50,000	17,00,000	17,02,000	17,23,000	

16.—Law and Justice—Courts of Law—

High Court	11,19,000	11,70,800	11,68,000	
Law Officers	3,07,000	3,03,800	3,15,000

Presidency Magistrates	67,000	68,900	68,000	
Civil and Sessions Courts	46,84,000	46,89,000	46,68,000	
Courts of Small Causes	1,74,000	1,74,500	1,70,000	
Orphan Courts	23,75,000	24,41,000	24,17,000	
Friendship examination charges	12,000	13,000	14,000	
Refunds	1,07,000	1,30,000	1,10,000	
Pay of peons	5,000	
Total	88,26,000	89,81,000	89,90,000	89,23,000	

19B.—Jails—

HEADS.	Actuals 1896-98.	Budget estimate, 1896-97.	Revised estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6
JAILS—					
Superintendence	50,000	50,825	17,30,000	57,000	The actuals of 1896-98 include charges for which provision has been made under the head Miscellaneous services and supplies.
Establishments	5,04,000	5,13,175		5,02,000	
Dietary charges	5,04,000	5,02,000		5,00,000	
Hospital	70,000	80,000		78,000	
Clothing and Bedding of prisoners	91,000	1,07,000		95,000	
Sanitation charges	18,000	15,000		18,000	
Charges for moving prisoners	47,000	42,000		47,000	
Miscellaneous services and supplies	1,04,000	1,21,000		1,20,000	
Travelling allowance	7,000	8,000		8,000	
Contingent charges	61,000	40,000		42,000	
Extraordinary charges for live-stock and tools and plant	8,000	11,000		12,000	
Total Jails	14,76,000	15,51,000	17,30,000	14,94,000	
Jail manufacture	7,83,000	6,83,000	7,40,000	7,38,000	The cost of European stores for the manufacture of chaukidari uniforms was unusually high in 1896-98.
GRAND TOTAL	22,59,000	22,36,000	24,70,000	22,32,000	

20.—Police—

Presidency Police	7,54,000	7,52,000	7,74,000	7,53,000	The increased expenditure in 1896-98 was due to privilege leave allowance which are not provided for in the estimates.
Municipal Police	36,000	45,000	45,000	40,000	
Superintendence	1,65,000	1,51,000	1,53,000	1,51,000	
District Executive Force	43,97,000	44,14,000	45,00,000	44,91,000	The revised estimate includes provision for grain compensation allowance. The larger provision in comparison with the actuals for 1896-98 is due to the extra expenditure caused by the redistribution of the Police Force in the Province.
Village Police	23,000	18,000	20,000	20,000	Based on actuals.
Special Police	5,34,000	5,33,000	4,94,000	4,99,000	The tinatong Police is being amalgamated with the district police, and no provision has been made for it in 1897-98.
Upper Burma Police charges incurred in Bengal	14,000	Will be made Provincial under the new contract.
Railway Police	1,21,000	1,15,000	1,15,000	1,30,000	The increase is on account of rent for accommodation of constables.
Cattle pounds	5,000	5,000	5,000	5,000	
Refunds	5,000	7,000	5,000	7,000	
Lump addition for increase to the pay of peons	2,000	
Total	60,30,000	60,40,000	61,10,000	61,18,000	

21.—Marine—

Salaries and allowances of officers and men afloat	68,000	70,000	71,000	60,000	Increased provision made in consideration of the rise in the prices of food grains.
Victualling of officers and men afloat	17,000	20,000	20,000	25,000	
Purchase of marine stores and coal for the building, repairs and outfit of ships and vessels	81,000	1,01,000	89,000	90,000	
Purchase and hire of ships and vessels	9,000	20,000	20,000	20,000	
Pilotage, pilot establishments and vessels	5,57,000	5,45,000	5,39,000	5,57,000	
Marine establishments	51,000	57,000	55,000	54,000	
Subsidies to steam-boat companies	24,000	20,000	20,000	20,000	Represents the subsidy granted to the River Steam Navigation Company for the conveyance of mails from Jatraipar to Dibrugarh and back. The actuals for 1896-98 include arrears payments.
Miscellaneous	33,000	51,000	28,000	40,000	The estimate for 1896-97 included a provision of Rs. 25,000 for contribution to Port Funds against Rs. 13,700 provided for in 1897-98.
State Yacht establishment	4,000	5,700	5,000	5,700	
Refunds	2,000	300	300	
Total	8,74,000	9,51,000	8,75,000	9,11,000	

22.—Education—

HEADS.	Actuals, 1895-96.	Budget estimate, 1896-97.	Revised estimate, 1896-97.	Estimate, 1897-98.	REMARKS.
1	2	3	4	5	6

CALCUTTA ;
The 2nd April, 1897. }

F. G. WIGLEY,
Offg. Asst. Secy. to the Govt. of Bengal,
Legislative Department.

NOMINATION OF REPRESENTATIVE MEMBERS TO SEATS IN THE COUNCIL OF THE LIEUTENANT-GOVERNOR FOR MAKING LAWS AND REGULATIONS.

RESOLUTION—No. 2307A.

APPOINTMENT.

Dated Calcutta, the 31st March 1897.

UNDER Rule 2 of the Regulations framed for Bengal by the Governor-General in Council, with the sanction of the Secretary of State, under section 1 (4) of the Indian Councils Act, 1892, the nomination to seven seats in the Council of the Lieutenant-Governor for making Laws and Regulations is made by the Lieutenant-Governor on the recommendation of certain bodies and Associations. Those seats are at present held by the following gentlemen, who were nominated and whose terms of office expire on the dates shown:—

Name of Member.	By what body or bodies recommended.	Date of nomination.	Date of expiry of office.
The Hon'ble Surendra Nath Banerjee.	The Corporation of Calcutta ...	22nd June 1896...	21st June 1897.
„ Hon'ble Ananda Mohan Bose.	The Senate of the Calcutta University.	10th July „ ...	9th July „
„ Montague Cornish Turner.	The Bengal Chamber of Commerce.	29th March 1897...	28th March 1899.
„ Hon'ble Rai Eshan Chandra Mitra Bahadur.	Municipalities of the Burdwan Division.	19th July 1896...	18th July 1897.
„ Hon'ble Guru Proshad Sen.	District Boards of the Dacca Division.	27th „ „ ...	26th „ „
„ Hon'ble Maharaja Sir Ravaneshwar Prasad Singh Bahadur.	District Boards of the Bhagalpur Division.	7th Sept. „ ...	6th Sept. „
„ Hon'ble Madhu Sudan Das.	Municipalities of the Chota Nagpur and Orissa Divisions.	11th Feb. 1896...	10th Feb. 1898

Five of the seats will be vacated in the course of the year, and, in accordance with practice, instructions are now issued, prescribing the procedure to be followed for the selection of the gentlemen who are to be recommended to the Lieutenant-Governor for nomination to these vacancies.

2. The Corporation of Calcutta and the Senate of the Calcutta University will be invited to submit the names of the gentlemen whom they respectively recommend for the Council. The selection will be made in accordance with the same procedure as on the two last occasions. A similar request will be addressed to the Municipalities and District Boards which have been already selected for the privilege of recommending members for the Council this year.

3. In view of these approaching vacancies the Lieutenant-Governor has fully considered the system under which the recommendations of the Municipalities and District Boards have hitherto been made and suggestions which have been put forward for modifications in the procedure. The Municipalities and District Boards are required by the Regulations to elect from amongst their members representatives to vote for the member to be recommended for the Council, each representative recording the number of votes assigned to the body by which he is deputed. Voting by representatives will, therefore, be maintained. It will rest with the public bodies to give clear instructions to their representatives as to the way in which they should vote, that is, whether all their votes should be given to one candidate, or whether the votes can be distributed between two or more candidates. In the Resolution of this Government, dated the 25th March 1893, the Municipalities and District Boards were grouped by Divisions, and the privilege of recommending the four members of the Council to be nominated in every second year was given to the Divisional groups in rotation, one member each being recommended by two groups of Municipalities and one each by two groups of District Boards. The Lieutenant-Governor does not propose to make any change in this mode of grouping the bodies or in the rotation of the groups. The division of the whole Province into two groups, which would be the only alternative way of grouping worthy of consideration, is open to objection. Equal groups could not be formed without combining Bihar with Bengal bodies in one of them, and thus depriving that group of the needed character

of representing a well-defined and distinct local area. The formation of the Bihar and Chota Nagpur Divisions into one group, on the other hand, with comparatively few bodies, would leave for inclusion in the second group the inconveniently large number of bodies in the Bengal and Orissa Divisions. It is obvious that the greater the number of representatives, the greater would be the risk of failure on the part of some to attend the centre where the votes must be recorded; and postponements and delays might thus occur in voting for the candidates for the seats in Council.

4. The only change which appears to the Lieutenant-Governor practicable and desirable in the present system is in the allotment of votes to the bodies. Under the existing orders votes have been assigned to the Municipalities on a sliding scale based on the ordinary income. District Boards, however, are treated as equal, and only one vote has been allowed to each. This plan has been found to work badly, owing to the great risk of a tie occurring in the voting by the electoral representatives; and on the last occasion the voting actually resulted in ties in the Dacca and Bhagalpur Divisions. This risk can be minimised by increasing the number of votes assigned to each Board. The Lieutenant-Governor accordingly called for the opinion of local officers on a proposal to introduce a sliding scale of votes for the District Boards, and the opportunity was at the same time taken to enquire whether experience had shown that in the case of Municipalities a modification of the existing orders is desirable, with a view of ensuring a better representation, or of minimising the chances of a tie.

5. The great majority of officers have reported in favour of a sliding scale of votes for the District Boards, and the Lieutenant-Governor accepts that view. Two sliding scales based on ordinary income were suggested for consideration one in which the number of votes varied in no fixed proportion with the income, and another in which one vote was given for every half lakh, or part of half a lakh, of income. After consideration of the opinions received, the Lieutenant-Governor has decided to adopt the second scale, which has the advantage of regulating the number of votes by a fixed proportion of the income. An additional vote will, however, be allowed only for an excess over half a lakh of Rs. 25,000 or more. The number of votes would thus be less variable, and more fairly adjusted.

6. With regard to the Municipalities it has been objected that the present sliding scale assigns an excessive number of votes to such a Municipality as Howrah, and places it in the power of its delegate to secure the return of his nominee against the votes of the delegates of seven or eight Municipalities. The Lieutenant-Governor considers this a reasonable objection. It will, in his opinion, be sufficiently met by reducing the maximum number of votes for Municipalities from eight to six. This would be best effected by striking off the present scale the two last classes of Municipalities, which are given seven and eight votes respectively, and allotting six votes for an income of Rs. 1,50,000 and over. The only Municipalities affected would be Howrah and Patna, which would each lose two votes, while the smaller Municipalities would retain their present voting power. The sliding scale will, therefore, stand thus in future—

Municipalities with an income of Rs.						Votes.	
			5,000 and less than Rs.	10,000		...	1
Ditto	ditto	"	10,000	ditto	"	...	2
Ditto	ditto	"	20,000	ditto	"	...	3
Ditto	ditto	"	50,000	ditto	"	...	4
Ditto	ditto	"	1,00,000	ditto	"	...	5
Ditto	ditto	"	1,50,000 and over	6

7. The increase in the number of votes assigned to the District Boards will very greatly reduce, but cannot altogether eliminate, the risk of a tie. Occasions, though rare, are likely to arise when rival candidates receive an equal number of votes, and it is necessary to lay down a rule to meet such cases. The various suggestions which have been made for meeting the difficulty have been considered by the Lieutenant-Governor, and His Honour is of opinion that the simplest and least objectionable solution is the drawing of lots between the candidates. In the event of a tie in future, then, the candidates will draw lots for the purpose of deciding who shall be held to have been selected for recommendation to the Lieutenant-Governor.

8. The Municipalities of the Patna and the Chittagong Divisions and the District Boards of the Presidency and the Rajshahi Divisions are entitled, according to the rotation laid down in the Resolution of the 25th March 1893, to recommend persons for nomination to the Council on this occasion. As shown in paragraph 1 above, one seat for Municipalities will be vacant on the 18th July, but the second seat will not be vacant until the 10th February next. For the seat to be filled in July, the Municipalities of the Patna Division will be requested to recommend a member. The Municipalities of the Chittagong Division will later exercise the privilege of making a recommendation for the vacancy which will occur on the 10th February 1898. For the District Boards seats will be vacant on the 26th July and the 6th September, and the District Boards of the Presidency Division and the Rajshahi Division respectively will be requested to submit recommendations for those vacancies. Each Municipality and District Board will elect one representative only, and he will be entitled to exercise all the votes of the body which he represents.

9. The following are the Municipalities of the Patna Division which will send delegates to vote for a person to be recommended for the seat falling vacant on the 18th July, and the number of votes assigned to them according to the scale shown in paragraph 6 above. The ordinary income taken is that for 1895-96.

District.	Name of Municipality.	Ordinary income.	Number of votes to be recorded by the representative.
		Rs.	
Patna	{ Patna	1,52,213	6
	{ Bihar	17,874	2

	{ Rangpur	1,78,188	4
	{ Bogra	63,759	1
	{ Pabna	86,924	2

11. Under Rule IV of the Regulations quoted, the Lieutenant-Governor now desires that intimation may be communicated by the Commissioners of the Divisions concerned to the Chairmen of all the Municipalities and District Boards enumerated in the above lists, requesting them to arrange for the convening of a special meeting of each District Board and Municipality concerned, at which one of their members may be elected to represent them for the purpose of recommending the nomination of a member

in the Lieutenant-Governor's Council. The name of the representative elected in each must be reported at once by the Chairman of the local body concerned for the information of the Commissioner of the Division.

12. The period of two months which is contemplated under Rule VII of the Regulations as the period within which a recommendation shall be made to the Lieutenant-Governor is hereby declared to run from the date on which the Commissioner of the Division issues his invitation to the Chairman of any Municipality or District Board within the group concerned to elect one of their members to represent them for the purpose of recommending the nomination of a member in the Lieutenant-Governor's Council.

13. As soon as the representatives are elected by the local bodies concerned, they will be called upon by the Commissioner of the Division to meet together on an early and convenient date with special reference to the limit of time imposed under Rule VII of the Regulations, and at such convenient place as he may specify, for the purpose of electing by a majority of votes a person whom they will recommend to the Lieutenant-Governor to be nominated as a member of the Council. The names of all candidates put forward at such meeting shall be duly proposed by one of the electoral representatives present. The election shall be by ballot, and the person elected must obtain a majority of the votes of the representatives present. If on occasion of the first ballot an absolute majority is not obtained, the candidate who obtains the least number of votes shall be withdrawn from the election, and another ballot shall then be held for the remaining candidates and so on until an absolute majority is obtained.

The electoral representatives present at this meeting shall elect among themselves a Chairman, who shall preside and be responsible for the fair and proper exercise of the ballot vote.

As soon as the election is made, the Chairman of the meeting shall without delay report to the Commissioner of the Division the name of the person so elected with the number of votes obtained and any other information which it may appear desirable to communicate, and on behalf of the meeting shall recommend to the Lieutenant-Governor to nominate for Council the person so elected. The Commissioner shall submit the report from the Chairman of the meeting, with any observations he may wish to add, to the Chief Secretary to Government, by whom the recommendations will be submitted to the Lieutenant-Governor.

14. Attention is drawn to the following Rule VI of the Regulations which have been framed by the Governor-General in Council and Secretary of State:—

VI.—It shall be a condition in the case of any person to be recommended by a Municipal Corporation or group of Municipal Corporations that he shall be a person ordinarily resident within the Municipality or the district in which it is situated, or in some one of the Municipalities constituting the group or of the districts in which they are situated. A similar condition shall also apply to persons to be recommended by District Boards.

Under this rule it is not necessary that persons recommended shall be members of any Municipality or District Board concerned, but they must be ordinarily resident within the Division from which the recommendation is made. Subject to this condition, the rules declare no limit of qualification, and it is left to the electoral representatives to recommend a person under Rule V (c) according to the majority of their votes.

15. It is desirable that the subsidiary arrangements now sanctioned shall as far as possible be given effect to by the local bodies concerned with the minimum of official interference. Divisional Commissioners and District Magistrates will, of course, afford any assistance which may be required, and do their utmost to facilitate the smooth working of the elections; but Government officers are forbidden to take part directly or indirectly in the election by canvassing, influencing votes, or otherwise interfering with the free choice of the local bodies. No indication should be given by any official member of any of those bodies as to the manner in which he himself intends to vote.

ORDERED that a copy of this Resolution be furnished to all Commissioners for information and guidance, and for communication to all the District Boards and Municipalities in their Divisions.

Ordered also that a copy be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

C. W. BOLTON,

Chief Secy. to the Govt. of Bengal.

APPOINTMENT OF A COMMISSION TO ENQUIRE INTO THE
BUILDING REGULATIONS IN FORCE IN CALCUTTA.

MUNICIPAL DEPARTMENT—MUNICIPAL.

Calcutta, the 6th April 1897.

RESOLUTION—No. 1973M.

READ—

The Administration Reports of the Calcutta Municipality for the years 1894-95 and 1895-96.

The Government Resolutions reviewing the Reports.

A letter to the Chairman of the Corporation of Calcutta, No. 5034M., dated the 28th December 1896.

A letter from the Chairman of the Corporation of Calcutta, No. 6454, dated the 30th January 1897.

A letter to the Secretary to the Government of India, Home Department, No. 882M., dated the 19th February 1897.

A letter from the Secretary to the Government of India, Home Department, No. 184, dated the 27th February 1897.

For some years past the Health Officer has pressed upon the Corporation of Calcutta the necessity of amending the Building Regulations in force in the Municipality, in order to make suitable provision for (*inter alia*) fixing the minimum width of public streets, limiting the height of houses in relation to the width of the streets on which they stand, controlling the construction of brick buildings on *bustee* lands, and fixing the minimum size of courtyards within houses, as also the minimum space to be left between the backs of houses for the purpose of ventilation. The subject was discussed at length in the Annual Administration Reports of the Corporation and the Government Resolutions thereon, cited in the preamble of this Resolution; and the Lieutenant-Governor expressed his views on it in paragraph 19 of the Resolution on the Report for the year 1895-96, to which were annexed extracts from Dr. James's report on the outbreak of plague in Hong-Kong in 1894, bringing out very clearly the intimate connection between defective dwelling-houses and spaces and epidemic disease. In that Resolution the Commissioners were informed that if after considering the subject they came to the conclusion that a special Building Act for Calcutta is called for in the interests of the health of the city, the Lieutenant-Governor would be prepared to appoint a representative Commission to formulate the principles upon which such an Act should be based. Since then the spread of plague in Bombay, Poona, and Karachi has given prominence to this aspect of the question, and the report of the sanitary officers deputed by the Medical Board to enquire into the condition of Calcutta has shown to what an extent overcrowding prevails in Calcutta, and how the construction of buildings in the older part of the town impedes or renders impossible any effective conservancy. In the letter of the 28th December 1896, the Lieutenant-Governor pressed the Commissioners to come to an early decision on the question put to them in the Government Resolution referred to above, and in their reply they unanimously consented to the appointment of a Commission, on the understanding that they would make a thorough enquiry into the history and the operation of the existing law and bye-laws on the subject, and would ascertain in what respects these have proved defective, and whether a new Building Act is necessary, or whether the case can be met by amending the existing law. The Lieutenant-Governor generally accepts this view of the functions of the Commission. It has always been his intention that a thorough enquiry should be made into the history and operation of the existing law and bye-laws bearing on this subject, and such an enquiry must necessarily be undertaken before any scheme for fresh legislation can be drawn up.

2. The task of the Commission will be intricate and difficult. They will have to deal with mixed questions of law, sanitation and engineering, and will further have to consider to what extent the principles recognised in European enactments relating to town buildings require to be modified with reference

to the soil, climate and rainfall of Calcutta, the prevailing diseases, and the habits of all classes of the population. For these reasons and as the proposal to amend the present law has given rise to some apprehensions among the leaders of Native society, the Lieutenant-Governor thinks it desirable that the Commission should be presided over by an officer of judicial experience. The Hon'ble Mr. Justice Trevelyan, who possesses great knowledge of Calcutta, and has had much experience of the working of the present law, has consented to fill the post of President. His appointment has been approved by the Government of India, and the Hon'ble the Chief Justice has rendered it possible for him to undertake the work by kindly consenting to relieve him of Court duties on the days when the Commission sits.

3. The Lieutenant-Governor is accordingly pleased to appoint the following gentlemen to form the Commission :—

The Hon'ble Mr. Justice Trevelyan	...	<i>President.</i>
„ „ H. H. Risley, C.I.E.	...	} <i>Members.</i>
„ „ J. G. H. Glass, C.I.E.	...	
Mr. H. C. Williams	...	
„ A. J. Hughes, C.I.E.	...	
Babu Kaly Nath Mitter	...	
„ Nolin Bohari Sircar	...	
Surgeon-Capt. H. J. Dyson	...	} <i>Secretary.</i>
Mr. W. Banks-Gwyther	...	
„ F. G. Wigloy	...	

The Commission will be requested to enter upon their labours at once and to report to Government the results of their deliberations within the next six months.

4. As regards the direction, character and limits of their enquiries, the Lieutenant-Governor desires to give the Commission a perfectly free hand. It is, however, suggested that in addition to the specific points which have from time to time been touched upon in the Health Officer's reports, the Commission might usefully enquire into the desirability of opening out the congested tracts of Calcutta and the most feasible plan of effecting this. They need not, perhaps, unless they themselves find it desirable or necessary, go into the details of any particular scheme of street improvement, but they should examine the general principles on which such operations ought to be conducted in order to make them financially as well as structurally successful. It is very important to consider whether the special circumstances of Calcutta point to any amendment or modification of the ordinary Law of Land Acquisition. The issue which lies in fact at the root of the whole enquiry is to what extent and in what directions private rights may equitably be made to give way to public needs. The Commission also will not fail to consider whether different sets of Building Regulations are not desirable for different quarters of the town, looking to the local circumstances of these areas.

ORDER.—Ordered that a copy of this Resolution be forwarded to the members of the Commission, to the Chairman of the Corporation of Calcutta, to the Commissioner of Police, to the Secretary to the Medical Board, and to the Public Works Department of this Government for information.

Ordered also that a copy of the Resolution be submitted to the Government of India, Home Department, for information, and that it be published in the *Calcutta Gazette*.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 6th April 1897.

M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 758 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPT.,
The 6th April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Uhandbali), Cuttack and Puri during the week ending 7th March 1897, as compared with the trade of the corresponding period of 1896 :—

	...	{ 1897	22,579	20,964	43,543	69,267

The rise of 13,906 cwts. in the import trade of Chittagong, which amounted to 15,364 cwts., was chiefly due to the imports of rice and paddy from Burma; no such imports took place in the corresponding week of 1896.

In the export trade, also, Chittagong showed an improvement of 18,905 cwts., mainly owing to the despatch of 20,375 cwts. of rice to Trinidad. The falling off of 26,984 cwts. under Balasore was due to smaller shipments of rice, paddy and gram and pulses to Calcutta. The trade of Cuttack was entirely with Colombo, and declined by 6,576 cwts. There were no exports to Foreign Ports from Puri, and the trade of that port fell off by 22,597 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 7th March 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 571 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 27th March 1897, both days inclusive, to have been 29,61,822 maunds. The destination of 27,88,966 maunds is specified. About two-thirds of this quantity (17,43,990) was carried to the North-Western Provinces and Oudh, rather more than one-fifth (5,62,279 maunds) to stations in Bengal, and the rest (4,82,697 maunds) to other provinces. In the last week of the period 86,878 maunds were exported to the North-Western Provinces and Oudh, and 1,21,402 maunds to Bihar.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 5th April 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks and Port Trust Railway) by the East Indian Railway from 1st January to 27th March 1897.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of February and March 1897, as compared with the corresponding fortnights of February and March 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, the 6th April 1897.

Quantity obtainable for a rupee.

WEATHER AND CROP REPORT.

For the week ending the 5th April 1897.

Burdwan.—Rainfall at Sadar ·41, Kalna ·90, Katwa 1·45, Raniganj ·23. Weather hot. Ploughing and manuring of paddy lands going on briskly. *Rabi* harvest nearly over; outturn for Sadar 10 annas, Kalna 8 annas. Fodder and water sufficient. Common rice selling as follows:—

			Srs. c.	Srs. c.	
Sadar 10 0	to 12 0	} per rupee.
Kalna 10 0	to 11 0	
Katwa 10 5	to 10 10	
Raniganj	10 0	

Birbhum.—Rainfall at Sadar ·12, Rampur Hat ·05. Weather hot. Ploughing continues. No want of fodder. Price of common rice at Sadar 9 seers, and Rampur Hat 9½ seers per rupee.

Bankura.—Rainfall at Sadar ·08, Onda ·75, Khatra ·90, Raipur ·45, Kotalpur ·45, Indas ·15, Vishnupur ·95. Weather hot and occasionally cloudy. Ploughing going on briskly all over the district. Threshing of wheat and barley almost over. Rice selling at Bankura 11 seers, and Vishnupur 11½ seers per rupee.

Midnapore.—Rainfall at Sadar 2·11, Contai ·60, Tamluk 1·65, Ghatal ·68. Weather seasonable. The recent rain has proved beneficial to indigo, sugarcane, *til* and *boro*. Ploughing has commenced. Plantation of sugarcane and sowing of *boro* still continue. No want of fodder or water. Cattle-disease reported from Keshpur, Garhbeta, Debra, Binpur, and Sabong. Common rice selling as follows:—

			Srs.		
Sadar	11	} per rupee.
Contai	11 to 13	
Tamluk	11½	
Ghatal	10½ to 11	

Hooghly.—Rainfall 1·68. Ploughing going on briskly for early rice. Common rice sells from 9 to 10½ seers per rupee.

Howrah.—Rainfall at Sadar 1·22, Ulubaria 2·22. Weather moderately hot and cloudy with occasional rain. Ploughing for *aus* and *aman* in Ulubaria commenced. Fodder and water sufficient. Common rice sells at 8½ to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar ·31, Barasat 1·68, Basirhat 1·55, Diamond Harbour 1·94. Weather warmer with cloud. Prospect of sugarcane improved by recent rain. Ploughing going on briskly. No cattle-disease. Fodder and water sufficient. Common rice sells as follows:—

			Srs. c.	
Sadar 9 to 11	0
Barasat	9 0
Basirhat	10 8
Diamond Harbour	10 0

Nadia.—Rainfall at Sadar 1·29, Kushtia ·03, Meherpur ·84, Chuadanga ·05, Ranaghat 1·44. More rain required for ploughing. Water-supply generally deficient. Fodder insufficient in places. Sporadic cases of cattle-pox in thana Chuadanga. Common rice sells from 8 to 10 seers per rupee. Latest price of rice where test-works are open is 9½ seers per rupee. Numbers on relief on Saturday, 3rd April—

	Men.	Women.	Children.	Total.
Relief-workers	9,980	1,730	1,510	13,220
Dependants	48	120	3,208	3,376
Otherwise relieved	1,560	7,130	2,729	11,419
Total				28,015

Murshidabad.—Rainfall at Sadar ·52, Jangipur ·07. Harvesting of gram and wheat over. Indigo doing fairly well. Sowing of *bhadoi* commenced. Fodder sufficient. Common rice sells as follows:—

			Srs.	
Sadar	9½
Jangipur	10
Kandi	10

Latest price of common rice where test-works are open is 10 seers per rupee. Numbers on relief on Saturday, 3rd April, Sadar and Kandi subdivisions—

	Men.	Women.	Children.	Total.
Test-workers ...	3,531	86	416	3,983

Jessore.—Weather cool; cloudy and damp with occasional rain. Rainfall at Jhenida 2·18, Magura 1·60, Narail 2·65, Bangaon 2·15. This rain has done much good to the cultivation of *aus* and *aman* paddy, jute and *til*, but more rain is wanted. Price of rice has a tendency to rise. Common rice sells as follows:—

	Srs.	c.	Srs.	c.	
Jessore	9	0 to 10	0
Jhenida	9	0
Magura	9	2 to 10	0
Narail	10	0
Bangaon	10	0 to 11	0

} per rupee.

Scarcity of fodder and water felt in places. Cattle-disease reported from Bangaon.

Khulna.—Rainfall at Sadar ·81, Satkhira 1·56, Bagirhat ·24. Weather warm and cloudy. Prospect of *boro* good, much benefited by recent rain. Cultivation of *aus* and jute going on. Common rice sells as follows:—

	Srs.	
Sadar ...	10 to 11	0
Satkhira ...	9	5
Bagerhat ...	10	1

} per rupee.

Relief wages calculated at 10 seers per rupee. Fodder sufficient. Water very scarce. Cattle-disease reported from some parts of the district. Numbers on relief—

	Men.	Women.	Children.	Total.
Relief-workers ...	2,104	Nil	204	2,308
Otherwise relieved ...	480	2,655	1,315	4,450
Total ...				6,758

Rajshahi.—Rainfall at Sadar ·38, Nator 1·39, Naugaon 2·56. This rain has been of some help to agricultural operations, but more is wanted for sowing of *aus*, *til*, and jute. Fodder available. Scarcity of water reported from some places at Sadar. Price of common rice ranges between 8½ and 10 seers per rupee. Numbers on relief on Saturday, 3rd April—

	Men.	Women.	Children.	Total.
Test-workers ...	580	Nil	11	591

Price of rice at relief-works, 8 to 9 seers per rupee.

Dinajpur.—Average rainfall ·44. Weather seasonable. Cultivation of *bhadoi* going on. Condition of cattle good. Fodder and water plentiful. Common rice selling at Sadar 10 seers and Thakurgon 9 seers per rupee.

Jalpaiguri.—Rainfall at Sadar ·06. Weather seasonable. The rain which fell last week has improved prospects, but slightly damaged the tobacco fields. Sowing of *betri* and jute going on. No want of fodder and water. Average price of common rice, 8½ seers per rupee.

Darjeeling.—Rainfall at Sadar ·32, Kurseong ·66, Siliguri ·20. Weather seasonable. Hills—*Bhutta* being planted; wheat, barley, and *phaphur* being harvested; lands being prepared for *chota murua* and *bhados* crop. Terai—Ploughing for *bhados*, jute and sugarcane going on; tobacco being out. Price of coarse rice:—

	Srs.	
Hills ...	7 to 8	
Terai ...	9 to 10	

} per rupee.

Bhutta sells from 13 to 20 seers per rupee.

Rangpur.—Average rainfall ·79. Rainfall at Sadar ·36. Sowing of *aus* and jute continues, and these are up in some places. Prospect appears good. Common rice selling at 8 to 10 seers per rupee. Fodder and water sufficient except at Kurigram.

Bogra.—Rainfall ·67. Sowing of jute and *aus* in progress. Fodder and water sufficient. Price of common rice at head-quarters 9½ seers, and in the interior from 7 seers 14 chitaks to 10 seers 11 chitaks per rupee.

Pabna.—Rainfall at Sadar nil, and Sirajganj .93. Weather hot and partially cloudy. *Boro* paddy progressing favourably. Land being prepared for *aus* paddy. Rain much wanted for sowing. Fodder plentiful. Relief wages calculated at 8 to 9 seers per rupee. Numbers on relief on Saturday, 3rd April—

	Men.	Women.	Children.	Total.
Test-workers ...	242	Nil	81	323

Dacca.—Rainfall at Sadar 1.12, Manikganj 2.28, Munshiganj 2.23, Narainganj 1.31. Weather hot in day time; cool at night; mornings foggy. Rain doing good to *boro*. Hail-stones did much damage to the standing crops in some villages in the Munshiganj subdivision. Fodder available. No cattle-disease. Price of common rice, 9 to 10 seers per rupee.

Mymensingh.—Rainfall at Sadar 1.42, Kishorganj 1.68, Tangail 1.03, Netrokona .35, Jamalpur 1.05. Weather clear and warm. *Aus* and jute sowings in progress. Prospects good after recent rainfall. Common rice sells from 8½ to 10 seers per rupee. Cattle-disease reported from Netrokona and Kishorganj.

Faridpur.—Rainfall at Sadar 1.19, Goalundo .37, Madaripur 1.80. The rain has slightly improved the prospects, but more is much needed. Price of common rice has risen, 8 to 9½ seers per rupee. Fodder and water for cattle sufficient.

Backergunge.—Rainfall at Sadar .91, Bhola 1.60. Weather cool. Prospect of crops poor. Common rice selling at 8 to 11 seers per rupee.

Tippera.—Rainfall at Sadar nil, Brahmanbaria 2.2, Chandpur 4.74. Weather seasonable. Ploughing continues. The rain will to some extent remove the scarcity of water in Chandpur. Price of rice rising—

	Srs. c.	Srs. c.	
Sadar ...	9 0	to 10 0	} per rupee.
Brahmanbaria ...	10 0	to 11 0	
Chandpur ...	9 8	to 10 0	

Noakhali.—Rainfall at Sadar 1.38, Feni .53. Rain has done good to standing crops. Ploughing for *aus* going on. Fodder and water not sufficient. Common rice sells at 8 to 10 seers per rupee.

Chittagong.—No rain. Weather hot and occasionally cloudy. Prospects of *rabi* crops not favourable. Rain badly wanted. Fodder and water sufficient. Rice selling at 10 seers per rupee. Sporadic cattle-disease continues.

Patna.—Rainfall at Sadar .21, Bikram .41, Barh .78, Bihar .39, Hilsa .90, Dinapore .26. Threshing of *rabi* in progress. Recent rain has done slight damage to grain at the threshing ground in Barh and in thana Chandi in Bihar, otherwise it has benefited sugarcane, millets, vegetables, &c., on the ground. Opium weighments have commenced. Fodder and water for cattle sufficient. Prices in Patna risen slightly common rice 10 seers per rupee. Numbers on relief on Saturday, 3rd April—

	Men.	Women.	Children.	Total.
Relieved in poor-houses ...	43	24	14	81
Otherwise relieved ...	4	1	Nil	5
Total ...				86

Gaya.—*Rabi* harvest finished. Ploughing for *bhadoi* in progress. Prices hardening. Common rice selling at 8½ seers per rupee.

Shahabad.—Rainfall at Sadar .22, Bhabua .58. Some rain throughout the district. Rain has not done much damage to standing crops or crops collected in threshing floor, and has benefited sugarcane. Harvesting of *rabi* and plantation of sugarcane nearly finished. Sowing of *cheena* in progress. Fodder and water for cattle in Bhabua not sufficient. Price of common rice 8½ to 9 seers per rupee. Latest price of rice at Bhabhua (8½ seers per rupee) fixes relief wages. Numbers on relief on Saturday, 3rd April—

Bhabua.

Field operations after heavy rain have drawn away labourers from relief-works.

Purnea.—Rainfall at Sadar nil, Kishanganj ·33, Araria ·41. Harvesting of *rabi* crops going on. Recent rain has done good to *launi* and *mung*, and facilitated preparation of land. Agricultural prospects generally fair. Some cases of cattle-disease reported from Araria, but not in epidemic form. Fodder and water sufficient. Prices of common rice:—

	Srs.	
Sadar ...	9	
Kishanganj ...	8½	to 9
Araria ...	10	to 11

} per rupee.

Malda.—Rainfall at Shibganj ·19. Ploughing for *bhadai* rice and jute going on. *Boro* paddy thriving well. Common rice selling at 8 to 10 seers per rupee.

Sonthal Parganas.—Average rainfall 31. *Mahua* damaged by rain and cloudy weather. Sugarcane doing well. *Rabi* harvested in Godda. Harvest proceeding elsewhere. Jamtara prices—rice 9½ seers; district prices—rice 8 to 11 seers and maize 9 to 18 seers. Cow-pox in Rajmahal. Fodder and water-supply insufficient in parts of district. Numbers on relief in Jamtara on Saturday, 3rd April—

			Total	...	9,235

Singhbhum.—Rainfall at Chaibassa .13, Chakradharpur .32, Ghatsilla .53. Rice plentiful. Price of rice 9 to 12 seers per rupee.

General Summary.—There was general rain during the week. Ploughing is being pushed on vigorously everywhere, and the sowing of early rice and jute is in progress in North and East Bengal. In Bihar *cheena* and *mung* millets are being sown as well as paddy on low lands. Spring rice and indigo are doing well wherever grown; but in parts of Champaran caterpillars have appeared and are doing some injury to the indigo. The *mahua* crop in parts of Chota Nagpur is said to have been considerably damaged by the recent rain. The harvesting of the *rabi* crops is still proceeding in some districts, and that of spring rice is going on in Orissa. The price of common rice shows a tendency to rise in some districts. In the distressed districts the prices of the staple food-grain on which the famine wage is based are—Nadia (common rice) 9½ seers, Murshidabad (common rice) 10 seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 8 to 9 seers, Pabna (common rice) 8 to 9 seers, Patna (common rice) 10 seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (barley) 12 to 14 seers, Champaran (Indian-corn) 9½ seers, Muzaffarpur (Indian-corn) 10½ seers, Darbhanga (Indian-corn) not reported, Bhagalpur (*marua*) 14 and 15 seers, Sonthal Parganas (rice at Jamtara) 9½ seers, Puri (common rice) 10 to 11 seers, Hazaribagh (rice) 8 to 11 seers and (*mahua*) 25 to 40 seers, Manbhum (common rice) 9½ seers.

The numbers on relief on Saturday, the 3rd April, were —

1896	1,36,40,040	68,174	20,604	33,900	7,80,178	2,40,207	24,848,124

STATISTICAL DEPARTMENT,
The 3rd April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal

Abstract of the results of Meteorological Observations taken at the Alipore Observatory in the month of March 1897.

	Inches.	Date.	Hour.
The mean pressure of the month	29.846		
The average pressure of March from 24 years' registers ...	29.869		
The highest pressure in the month	30.035	15th	10
The lowest pressure in the month	29.696	5th	16
The range of pressure	0.339		
	Hours		
The total number of hours of bright sunshine during the month	241.3		
The maximum possible number of hours of sunshine ...	371.3		
	°		
The mean temperature of the month	79.8		
The average temperature of March from 24 years' registers ...	80.6		
The highest temperature in the month	98.9	10th	
The lowest temperature in the month	63.9	13th	
The range of temperature during the month	35.0		
The mean daily range of temperature	19.2		
The greatest range of temperature in one day	25.9	10th	
	Per cent.		
The mean humidity of the month	71		
The average humidity of March from 24 years' registers ...	66		
	Inches.		
The mean vapour tension of the month	0.708		
The average vapour tension of March from 9 years' registers ...	0.702		
The mean cloud proportion of the month	2.62		
The average cloud proportion of March from 20 years' registers	2.47		
	In.		
The total rainfall of the month	1.37		
The total rainfall indicated by a Beckley's self-registering rain-gauge (mouth of the gauge about 52 feet above the ground)	1.34		
The average fall of March from 48 years' registers ...	1.34		
The greatest fall in 24 hours	0.80	29th	
	Days.		
The number of rainy days in the month	4		
The average number of rainy days in March from 24 years' registers	4		
	°		
The mean maximum equilibrium temperature of solar radiation during the month	144.2		
The mean difference of sun and air temperatures	54.4		
The greatest sun temperature	152.5	28th	
The greatest excess of sun over air temperature	62.6	25th	
The mean temperature of the nocturnal radiation thermometer on woollen cloth	65.9		
The mean depression of the nocturnal radiation thermometer below the minimum air temperature at 4 feet above the ground	4.9		
The greatest depression of the nocturnal radiation thermometer below the minimum air temperature	10.2	5th	
	Miles.		
The mean movement of the wind per day	125.8		
The greatest movement of the wind in one day	213.0	18th	
The greatest movement of the wind in one hour	20.0	5th Noon to 1 p.m.	

The number of hours with winds from each of the 8 points—

N. 16, N.E. 17, E. 32, S.E. 44, S. 247, S.W. 244, W. 65, N.W. 40, Calm 39.

The results of observations at the Alipore Observatory are not rigorously comparable with the registers of past years (at the Park Street Observatory). The barometer is about 3 feet higher at Alipore, and, other things being equal, reads therefore .003 lower. The diurnal range of temperature is also greater at Alipore, and the mean temperature apparently about 1.0° lower; and, finally, the thermometer which furnished the record of temperature at the Surveyor-General's Office during 20 years and upwards is found to read 0.6 higher than the Kew standard thermometer, which is the standard of reference at the present Observatory.

J. H. GILLILAND,

METEOROLOGICAL OFFICE, INDIA,
Calcutta, the 5th April 1897.

For Meteorological Reporter to the Govt of India.

Abstract of the Results of the Barometric and Thermometric Observations taken at 10 a.m. at the Meteorological Office, Chowringhee, in the month of March 1897.

The mean pressure at 10 A.M. during the month	...	Inches.	29.918	Date.	
The mean temperature at 10 A.M. during the month	...	°	83.0		
The highest temperature during the month	100.5	10th.	
The lowest temperature during the month	65.4	1st, 4th & 14th.	
The absolute range of temperature during the month	35.1		
The mean daily range of temperature during the month	21.0		
The greatest range of temperature in one day during the month	27.7	10th.	
The mean 10 A.M. humidity during the month	...	%	63		
The mean 10 A.M. vapour tension during the month	...	Inch.	.708		
The total rainfall of the month	1.50		
The greatest fall in 24 hours	0.92	29th.	
The number of rainy days in the month	...	Days	8		

C. LITTLE,
Meteorological Reporter to the Govt. of Bengal.

The mean pressure of the seven days	Inches	29.820
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29.785
The total number of hours of bright sunshine	Hours.	59.5
The maximum possible number of hours of sunshine	86.1
The mean temperature of the seven days	80.4
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	83.8
The extreme variation of temperature	25.2
The maximum temperature	93.8
The highest velocity of the wind in one hour	Miles.	15
The mean relative humidity	78
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	67
The total fall of rain from 28th March to 3rd April 1897	Inches	0.88
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.23
The total fall from 1st January to 3rd April 1897	3.08
The average fall of the corresponding period for 24 years, Surveyor-General's Office	2.98

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph. The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground. The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office. The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula. The directions and the movement of the wind are taken from the trace of a Beckley's anemograph. The mouth of the rain-gauge is one foot above the ground.

o, overcast; p, passing temporary showers; t, thunder;
<, lightning; d, drizzling rain; , dew; , fog.

METEOROLOGICAL OFFICE, GOVT. OF INDIA,

ADMINISTRATION OF PRESIDENCY GENERAL HOSPITAL.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 9th April 1897.

RESOLUTION—No. 2045Medl.

From time to time complaints have reached the Government regarding the administrative arrangements of the Presidency General Hospital. It has been alleged that delay occurs in admitting patients who are brought to the hospital; that the Resident Surgeons are not always in attendance; that the medical and nursing staff is insufficient; that the food is bad and the cooking arrangements defective; that the supply of bedding, linen, and clothing is unsuitable and inadequate; that the stock of instruments is out of date, and the fittings and arrangements of the operating-room untidy and neglected; and finally, that the Superintendent does not devote enough time to the work of the hospital.

2. The structural shortcomings of the hospital have recently formed the subject of enquiry by a Special Committee, and a scheme for reconstructing the existing buildings as funds become available has been drawn up. The land necessary for the purpose has been acquired and provision has been made in the Budget of the current year for commencing the work. A similar enquiry into the administrative arrangements of the hospital seems to the Lieutenant-Governor to be desirable, in order to ascertain how far the allegations above

referred to are well founded, and to determine what changes in the system of management should be introduced at once, and what further changes will be necessary when the new buildings come into use. A supply of bedding, linen, &c., has recently been given, and steps are being taken to renew the stock of instruments, but there are still many reforms urgently called for which admits of introduction apart from any structural changes. His Honour has accordingly been pleased to appoint the following Committee to inquire into and report upon the working of the General Hospital :—

Surgeon-Lieutenant-Colonel G. Bomford, Principal, Medical College	<i>President.</i>
Allan Arthur, Esq., President, Chamber of Commerce	} <i>Members.</i>
Surgeon-Lieutenant-Colonel J. Lewtas, Officiating Professor of Anatomy, Medical College	
Surgeon-Lieutenant-Colonel R. Cobb, Officiating Superintendent, Presidency General Hospital	
Mrs. Ashton, Honorary Secretary, Ladies' Committee of the Canning Home and Calcutta Hospital Nurses Institution	
Surgeon-Captain D. M. Moir, Officiating First Resident Surgeon, Presidency General Hospital	<i>Secretary.</i>

3. It will be the duty of the Committee to examine thoroughly and report upon all branches of the internal management of the hospital, including the hours of attendance of the medical and nursing staff; the arrangements for the diet of all classes of patients; the routine of nursing; the sufficiency of the instruments in stock; the system of supplying clothes, linen, and bedding for the use of patients; the number of servants employed and their respective duties. Their recommendations for reforms in connection with these and any other points of hospital management which may come before them should be clearly set out, and might perhaps conveniently be accompanied by a set of draft rules for the management of the hospital. The Lieutenant-Governor hopes that they will find it possible to submit their report within the next three months. While anxious to bring the hospital arrangements up to the level of present-day requirements, His Honour must impress upon the Committee the absolute necessity of framing their proposals with strict regard to a severe economy.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Government of Bengal.

WATER-SUPPLY.

No. 2018 L.S.G.—The 8th April 1897.—The following reports of the progress made in the districts of Khulna and Cuttack in collecting and placing on record the chief facts regarding water-supply are published for general information.

H. H. RISLEY,
Secy. to the Govt. of Bengal.

No. 163G.—L.S.G., dated Calcutta, the 26th March 1897.

From—E. V. WESTMACOTT, Esq., Commissioner of the Presidency Division,
To—The Secretary to the Government of Bengal, Municipal Department.

IN continuation of this office letter No. 133G.—L.S.G., dated the 21st January 1897, submitting the first quarterly report on the progress made in each district of this Division in collecting and placing on record the chief facts regarding water-supply, and the steps taken by the Municipalities and District Boards of this Division to improve the existing sources of water-supply and to open new ones, I have the honour to enclose a copy of a letter No. 634, dated the 12th March 1897, from the Collector of Khulna, reporting on the steps taken by the Municipalities in his district.

No. 634, dated Khulna, the 12th March 1897.

From—W. H. VINCENT, Esq., Magistrate of Khulna,
To—The Commissioner of the Presidency Division.

WITH reference to your letter No. 36M.—O.R., dated 18th December 1896, forwarding copy of Government Circular No. 58 L.S.G., dated 12th idem, directing to submit quarterly reports of progress made in each district in collecting and placing on record the chief facts regarding water supply, and the steps, if any, that have been taken by Municipalities and District Boards, respectively, to improve existing resources of water-supply and to open new ones, I have the honour to report as follows.

2. The Commissioners of the Khulna Municipality have made the following progress:—

- (a) One tank reserved for drinking purposes only, has been excavated in the village Bonakhamar.
- (b) The reserved tank of the civil station is being filled up with the river water.
- (c) Plan and estimate have already been submitted to Government for sanction of a new tank in the village Ohoto Boyra.
- (d) A reservoir of water is being constructed near De garden.
- (e) The Tootpara reservoir of water for Tootpara villages especially has been connected by pipes with the main reservoir.

3. The Commissioners of the Satkhira Municipality have cleared some tanks in the Satkhira, Pransagor and Bankal wards by issuing notices upon their owners; they have recently reserved one tank named Manikpukur in the Bankal ward, and they are taking steps to sink some wells in the manner in which they are ordinarily dug in this part of the country in some of the wards where drinking water will be greatly needed during the ensuing dry season.

4. The Commissioners of the Debhata Municipality report the following progress:—

- (a) There are altogether 195 tanks within the Municipality, of which 73 may be called wholesome: out of the latter 36 only may serve the purpose of supplying good drinking water.
- (b) The number of unwholesome tanks is still 122 after the re-excavation of 14 more in the year under report. Three of these 14 were re-excavated by the Municipality under section 200 of the Bengal Municipal Act, and have been reserved for the supply of drinking water under section 199. The remaining 11 were re-excavated by the owners thereof.
- (c) Five more old tanks are under orders of re-excavation, while two have been required to be cleansed under section 200.
- (d) There is one private well in the compound of a private gentleman who uses its water which is good for drinking purpose. Two more wells have been sunk by the Municipality, but they are not popular with the people though they contain pure water.

No. 87S.-G., dated Cuttack, the 30th March 1897.

Memo. by—H. G. COOKE, Esq., Commissioner of the Orissa Division.

COPY, with that of its enclosure, forwarded to the Secretary to the Government of Bengal in the Municipal Department for information, with reference to paragraph 2 of this office memorandum No. 31S.-G., dated the 22nd January 1897.

No. 320, dated Puri, the 13th March 1897.

From—W. H. LEE, Esq., Officiating Magistrate of Puri,
To—The Commissioner of the Orissa Division.

WITH reference to your No. 399S.-G., dated 17th December 1896, I have the honour to submit a copy of the Puri Municipal Chairman's report on the chief facts regarding water-supply in the Puri town for the quarter ending 31st December 1896. As regards the localities outside the Municipality, the names of villages containing 100 houses and upwards with their population have been taken down from the census register, and some 25 villages have been inspected and their sources of water-supply noted. No steps have been taken by the District Board during the quarter to improve existing sources of water-supply and to open new ones. The Markund tank is now, I am sorry to say, just as filthy as it ever was. The Swetganga is, and always has been, indescribably bad, the stuff it contains being more like soup than water.

Quarterly report on water-supply.

There are 261 tanks in the town of Puri, out of which four are big ones, namely, the Narendra, Indradumu, Markand and Swetganga, belonging to the Rani of Puri. The water of the first two tanks remains unpolluted in all the seasons during the year, but that of the last two, which are sacred tanks and used for religious purposes only by the Hindus, become dirty in almost all the seasons. Numerous attempts were made to keep the water of these tanks clean and useful, but they were of no avail, specially in the case of the Swetganga tank. Lately in the month of May last an attempt was made to dewater and cleanse the Markand tank with a steam pump, which proved a total success, whereas in case of the latter it failed. There being no proper outlet or inlet of the Swetganga tank, the water of it cannot have free intercourse with any river or such like stream so as to remedy the defects contained in it.

2. Thirty-four tanks belonging to both Municipality and private individuals have been cleansed and weeds removed out of them during the quarter under report, and a tank near the police town station has been filled in on account of its being in an insanitary condition and found greatly objectionable to the locality.

3. There are 863 wells in the town both municipal and private, and the following improvements have been made regarding their cleansing during the quarter under review:—14 municipal wells disinfected with permanganate of potassium and 79 with slaked lime. These wells were all cleaned out and vegetable growths in them removed, and also wells belonging to private individuals were all cleaned out in accordance with the proclamation given before the *panohut* festival; three wells were closed for drinking under section 149A of the Bengal Municipal Act, the water being found quite unfit for the purpose. Five wells in public places belonging to the Municipality have been fitted with pumps for the convenience of the people drawing water out of them. The sinking of a few wells in the localities in which they are required is under consideration, and a few insanitary tanks require filling up.

SPTALA OH. GHOSH,
Chairman, Puri Municipality.

RESOLUTION ON THE ANNUAL REPORT OF THE HEALTH OFFICER OF THE PORT OF CALCUTTA FOR THE YEAR 1896.

No. 869 Marine.

GOVERNMENT OF BENGAL—MARINE DEPARTMENT.

Dated Calcutta, the 13th April 1897.

RESOLUTION.

READ—

Letter from the Sanitary Commissioner for Bengal, No. 875, dated the 12th March 1897, submitting the Report of the Health Officer of the Port of Calcutta for the year 1896.

The report was due to Government on the 1st March, and was received on the 12th idem.

2. *Establishment.*—The duties of the Health Officer of the Port of Calcutta were performed throughout the year by Dr. Forsyth. His work was done in the steam-launch *Relief* and a steam-cutter until September, when the steam-cutter was replaced by a row-boat. The Sanitary Inspector carried out his duties in a bholio.

3. *Inspections.*—The total number of vessels inspected during the year was 1,566, against 1,592 in the previous year and 1,589 in 1894. The total number of vessels which arrived in port was 1,032, of which 838 were inspected. There were 1,053 departures, of which 728 were inspected. All vessels are inspected on arrival, with the exception of Indian coasting, steamers which are only inspected four times a year.

4. *Ventilation of crew space.*—The Health Officer mentions six vessels that have had their fore-castle ventilation improved, but he draws attention to serious defects in the new types of vessels, which the British India Steam Navigation Company and the Clan Line have introduced. He points out that the iron stem-to-stern decks in the new vessels of the former Company get intensely hot, and are in consequence most trying to both officers and men in the hot weather. The new cargo boats brought out by the Clan Line have not only narrow unsheathed iron decks raised above the iron hull, but also iron-sided officers' cabins. The Lieutenant-Governor concurs with the Health Officer in thinking that both the decks and officers' quarters of these vessels should be sheathed in wood. The Health Officer will be called upon to submit a further report on this subject.

5. *Sickness and mortality among European seamen.*—The number of European seamen, who arrived in the port during the year 1896, was 17,053, against 18,015 in the previous year. The daily average number in port was 1,124, against 1,431 in 1895. The total number of admissions into hospital was 1,121, and the death-rate per mille was 28.46, against 24.45 in the year previous, and 16.83 the quinquennial mean. Including the deaths out of hospital, the death-rate per mille was 40.92 during the year, against 31.44, 26.33 and 24.50 in the three preceding years.

Of the admissions into hospital, 23 cases were due to cholera, and 18 ended fatally. There were 61 admissions from bowel-complaints, one case of small-pox and one of sunstroke. There were 7 cases of drowning, against 5 in the previous year.

The following table shows the number of admissions into hospital from venereal diseases during the year 1896 and the previous ten years:—

Year.	Admissions.	Admission rate per 1,000.
1886	417	179.2
1887	228	120.4
1888	183	121.1
1889	186	114.3
1890	248	147.7
1891	185	129.7
1892	479	224.5
1893	386	185.4
1894	343	231.6
1895	342	238.9
1896	215	191.2

The total number of admissions is lower than the admissions in any of the preceding four years.

6. *Sickness and mortality among the native floating population*.—There were altogether 219 deaths in and out of hospital, against 123 deaths in 1895 and 137 in 1894, the death-rate per mille (8·54) being higher than that of 1895, which was 4·79. Of this total, 156 deaths were from cholera, against 68 deaths from this cause in 1895. There was one death from small-pox, 31 deaths from fever and 9 from bowel-complaints. Twenty-nine patients died in hospital, 27 of them from cholera, and 190 out of hospital.

7. *Pilgrim traffic*.—No vessels with pilgrims for Mecca sailed from the Port of Calcutta during the year 1896, but one vessel, the S.S. *Sultan*, sailed from Jeddah with 1,156 pilgrims and arrived at Calcutta with 1,112 pilgrims. There were 44 deaths during the voyage from Jeddah. No complaints were made.

8. *Infectious diseases*.—Five steamers arrived with small-pox on board. The cases were removed to the Campbell Hospital, and the vessels disinfected: unprotected members of the crew and passengers were vaccinated.

The number of corpses found floating in the river was 165, against 133 in 1895. The number of carcasses was 2,707, against 2,216 in the previous year. The increase will be brought to the notice of the Judicial Department.

9. *Plague*.—Plague having broken out at Bombay, quarantine was imposed by the Government to prevent its being brought by sea into the Port of Calcutta. The quarantine regulations were imposed from the 21st October 1896. From that date to the end of the year 31 steamers arrived from Bombay. On none of the vessels was there any case of plague. It is stated that the masters of vessels bound from Bombay are under instructions from their Agents to prevent the crew going ashore whilst in the Port of Bombay. On the voyage from Bombay to Calcutta, the crew's quarters and property are fumigated with sulphur, and the floors and walls of the fore-castle, &c., are washed out with a phenyle lotion. One vessel, which arrived in port on 16th December, had on board 80 bales of rags and waste paper for the Bally Paper Mills. The bales were not landed, but after being fumigated with sulphur in the hold, were put into a cargo boat, and towed to a point some six miles below Budge-Budge where they were landed and burnt. The coolies employed in landing and piling the bales were washed in a solution of corrosive sublimate, and the cargo boat was also washed with the same disinfectant.

10. *Water-supply*.—Municipal filtered water was supplied to the shipping throughout the year, and no complaints regarding the quality of the water supplied were made.

11. *Food*.—At the request of the master of the *Falls of Ettrick*, the beef and salt pork were examined, and two casks of the former and one of the latter were condemned. An examination of the biscuits of the *Arracan* was made at the request of the master, and about one ton was condemned. Two of the crew of one vessel complained of the beef not being fit to eat when cooked, but the beef was found to be of good quality. A complaint made by three members of the crew of another vessel led to 8 cwt. of biscuits being condemned.

By order of the Lieutenant-Governor of Bengal,

A. D. McARTHUR, Colonel, R.E.,
Secretary to the Govt. of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

STATISTICAL DEPARTMENT,
The 15th April 1897.M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 834 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 18th April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the 10 days from 22nd to 31st March 1896 and the corresponding period of 1897 is shown in the following statement:—

		22ND TO 31ST MARCH			
		1896.		1897.	
1		2	3	4	5
<i>Imports.</i>		Cwts.	Mds.	Cwts.	Mds.
From Foreign Ports	...	23	31	409	557
„ Indian „	...	61,962	84,337	324,673	4,41,916
Total	...	61,985	84,368	325,082	4,42,473
<i>Exports.</i>					
To Foreign Ports	...	320,809	4,36,657	116,039	1,57,942

Total	...	379,049	5,15,928	135,427	1,84,331

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the last 10 days of March 1897 are compared with those for the corresponding period of last year:—

		22ND TO 31ST MARCH			
		1896.		1897.	
1		2	3	4	5
<i>Food-grains.</i>		Cwts.	Mds.	Cwts.	Mds.
Rice	...	48,228	65,643	298,462	4,06,240
Paddy	...	9,667	13,158	15,037	20,467
Wheat
Gram and pulses	...	4,090	5,567	7,840	10,671
Other food-grains, such as jowar, barley, oats, &c.	3,743	5,095
Total	...	61,985	84,368	325,082	4,42,473

During the period of 10 days under report, rice continued to be imported in large quantities from Burma, namely, 274,970 cwts., against 147,787 cwts. in the week ending 21st March 1897. The only other ports from which rice was imported into Calcutta were Balasore (9,370 cwts. against 19,490 cwts. in the corresponding period of 1896) and Chandbali (14,119 cwts. against 28,721 cwts. in the corresponding period of last year). Burma contributed 14,002 cwts. of the total import of 15,637 cwts. of paddy, against nothing during the 10 days ending 31st March 1896. The improvement under gram and pulses and miscellaneous food-grains was due to larger despatches from the Madras ports and from Rangoon.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the last 10 days of March 1897 is compared with the figures for the corresponding period of 1896:—

1	22ND TO 31ST MARCH			
	1896.		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	326,823	4,44,842	118,128	1,60,785
Paddy	97	132
Wheat	650	885	1,136	1,546
Gram and pulses	49,167	66,922	15,600	21,234
Other food-grains, such as jowar, barley, oats, &c.	2,312	3,147	563	766
Total ...	379,049	5,15,928	135,427	1,84,331

The total quantity of rice exported to Foreign ports fell off from 274,180 cwts in the corresponding period of last year to 109,200 cwts. during the period under report. The exports in the preceding week were 172,980 cwts. There was a heavy decline in the quantities sent to Ceylon, namely, 5,606 cwts. against 118,586 cwts., and to Mauritius 1,467 cwts. against 28,041 cwts. in the corresponding period of last year; there were no exports at all to Germany and to states in Arabia other than Muscat and Reunion, against 66,411 cwts. carried to those ports in the corresponding period of last year; there was an increase in the shipments to the United Kingdom—44,484 cwts. against 27,707 cwts., to Natal 29,524 cwts. against 18,334 cwts., to Muscat in Arabia 12,477 cwts. against 935 cwts., and to Persia 4,479 cwts. against 499 cwts. during the corresponding period of 1896. The decrease under gram and pulses was due to the absence of exports to Mauritius, the United Kingdom, and to Reunion.

With the coast ports there was practically no trade in food-grains. The consignments of rice fell from 52,643 cwts. in the last 10 days of March 1896 to 8,928 cwts. during the period now under review; the port of Bombay showed a decline of 21,603 cwts. The increase in the trade in gram and pulses was 4,394 cwts. as compared with the same period of the preceding year. The trade under the other heads was small, and the fluctuations call for no remarks.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports from the 22nd to 31st March 1896 and 1897 (both days inclusive).

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS
IN BENGAL IN FOOD-GRAINS.

No. 831 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPT.,
The 13th April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Chandbali), Cuttack and Puri during the week ending 14th March 1897, as compared with the trade of the corresponding period of 1896 :—

	...	{ 1897	50,821	20,488	71,309	97,059

The rise of 17,650 cwts. in the import trade of Chittagong, which amounted to 18,038 cwts., was chiefly due to the receipts of rice and paddy from Burma, against 80 cwts. in the corresponding week of 1896.

There being no exports to Foreign and Indian ports from Chittagong, Narayanganj, and Cuttack, the trade of those ports declined by 1,102 cwts., 73 cwts., and 12,575 cwts. respectively. The trade of Puri, too, fell off by 1,469 cwts. on account of smaller shipments of rice to Foreign ports. As regards the Balasore ports, the exports of rice to Mauritius amounted to 47,882 cwts. during the week under review, against nothing in the week ending 14th March 1896. The shipments of rice to Calcutta diminished from 30,969 cwts. to 13,645 cwts., and of paddy from 12,824 cwts. to 4,660 cwts., while those of gram and pulse showed no great fluctuation, viz., 2,514 cwts. against 2,183 cwts.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below:—

Statement showing the quantities of Food-grains imported into Chittagong from each Foreign and Indian Port during the week ending 14th March 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 832 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 3rd April 1897, both days inclusive, to have been 32,59,575 maunds. The destination of 30,85,661 maunds is specified. About three-fifths of this quantity (18,43,738) was carried to the North-Western Provinces and Oudh, more than one-fifth (6,88,820 maunds) to stations in Bengal, and the rest (5,53,103 maunds) to other provinces. In the last week of the period 99,748 maunds were exported to the North-Western Provinces and Oudh, and 1,23,085 maunds to Bihar. The exports from Calcutta to Bihar now exceed the exports from Calcutta to the North-Western Provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 13th April 1897.

PRELIMINARY NOTE ON THE OUTTURN OF THE RABI
FOOD-CROPS IN BENGAL.

The following is published for general information.

REV. DEPT.,
The 13th April 1897.

M. FINUCANE,
Secretary to the Govt. of Bengal.

DEPARTMENT OF LAND RECORDS AND AGRI-
CULTURE BENGAL.

*Preliminary Note on the outturn of the rabi food-crops in Bengal,
harvested in the spring of 1897.*

Explanatory.—In consequence of the incomplete estimates returned by District Officers of *rabi* non-food-crops, it has not been found possible to prepare, by the due date, a complete report on area cultivated with all kinds of *rabi* crops during the present season and the outturn expected. The present forecast is, therefore, confined to an estimate of *rabi food-crops* only, for which early information was necessary. It is proposed to issue a more full report on the area cultivated with all kinds of *rabi* crops (food and non-food) and on the outturn obtained about a month hence.

2. *Character of the season.*—The monsoon season of 1896 was exceptionally dry, and the rains, moreover, ceased early in the latter part of September. The month of October was practically rainless, and no general rain was received over the Province till the third week of November. The absence of rain during this period, and the deficient rainfall of the previous months, produced a lack of moisture in the soil, which interfered seriously with the preparation of the land and the sowings of the *rabi* crops generally. Rain fell on the 23rd and 24th November in many parts of these Provinces, but the showers were too light to do much good to the *rabi* crops which had been sown. In December there was no rain in Lower Bengal and Orissa. In North Bengal there was general rain on the 31st, and in Bihar and Chota Nagpur light rain fell on the 25th and 31st. In January, rain was very light throughout the Province, in most parts practically nil. In February useful showers were received in all parts of these Provinces during the first three weeks of the month, which improved the prospects of the standing crops to some extent. The showers were generally light, except the rain which fell about the middle of the month in Orissa and Chota Nagpur. No rain fell during the last week of February. The rainfall of February was above the normal in Orissa and Chota Nagpur, practically normal in Bihar, and in defect of the normal in Bengal Proper. Hail slightly damaged the standing crops in Palamau during the first week of February. There was rain in the first week of March in parts of Northern and Eastern Bengal.

In the second week slight showers of rain fell in many districts; and in parts of Bhagalpur and Palamau the rain was accompanied by hail and storm which did some damage to standing crops. In the third week scattered showers (accompanied in some instances by high winds) fell in different parts of these Provinces. During the last week of March rain was general all over the Province. It proved useful to spring crops, and is not reported to have injured the crops ready for harvest or lying on the threshing floor.

Blight did some damage to the crops in Patna.

3. *Area cultivated.*—In the district returns appended hereto, the total area sown with *rabi* food-crops during the season 1896-97 is estimated at 8,226,300 acres, against 8,993,000 acres estimated to have been cropped in the previous year. The decrease of 766,700 acres (8·6 per cent) is due to the early cessation of the monsoon rains in September last. Contraction in the area cultivated is especially noticeable in Birbhum, Bankura, the 24-Parganas, Nadia, Murshidabad, Rangpur, Patna, Chittagong, Darbhanga, Saran, Monghyr, Palamau, Puri, and Angul. The district reports generally state that large areas could not be sown for want of moisture in the soil. On the other hand, there is an increase in the total area under *rabi* food crops this year, as compared with the corresponding areas of last year in Midnapore, Jalpaiguri, Dacca, Patna, Gaya, Shahabad and Purnea. The differences in Midnapore and Dacca have arisen from a revision of estimates. The increase in Jalpaiguri is stated to be due to the introduction of *rabi* cereals and pulses in the Duars; and in the other districts mentioned above, the increase is due to the extended cultivation of *rabi* crops on paddy lands after the failure of *bhadoi* and winter paddy. The failure of these latter crops led to an extension of cultivation of *boro* paddy in Jessore, Rajshahi, Faridpur, Cuttack and Balasore.

4. *Character of the crop.*—The present season has not been favourable to the *rabi* crops in these Provinces. The crops suffered very badly at the time of sowing for want of moisture in the soil. The drought that followed lasting up to the third week of November checked the proper growth and development of the plants, and the showers of January and February, which were generally below the normal, though useful, were not at all sufficient to redeem the season. Out of the 45 districts of these Provinces, one district only, viz., Gaya, returns an average crop of 16 annas, which is reported to be the result of timely rainfall; 6 districts, viz., Khulna, Rangpur, Muzaffarpur, Darbhanga,

Bhagalpur, and Malda, return crops between 12 annas and a little above 14 annas; 22* districts return crops varying from

* Midnapore, Jessore, Dinajpur, Jalpaiguri, Darjeeling, Bogra, Dacca, Mymensingh, Backergunge, Tippera, Noakhali, Patna, Shahabad, Saran, Champaran, Monghyr, Purnea, Sonthal Parganas, Cuttack, Balasore, Puri and Hazaribagh.

† Burdwan, Birbhum, Bankura, Hooghly, 24 Parganas, Nadia, Murshidabad, Rajshahi, Pabna, Faridpur, Chittagong, Angul and Khondmals, Lohardaga, Palamau, Manbhum and Singhbhum.

8 to 12 annas, and 16† districts, including 7 out of the 10 districts of the Burdwan and Presidency Divisions, 4 out of the 5 districts of the Chota Nagpur Division and Rajshahi, Pabna, Faridpur, Chittagong and Angul and the

Khondmals, return crops less than 8 annas. In Manbhum and Chittagong the crops are estimated at only $3\frac{1}{2}$ and 2 annas, respectively. Taking the Province as a whole, it would appear that the *rabi food-crops* of 1896-97 are poorer than those of 1895-96. The arithmetical mean of the outturn of this season, calculated with reference to the areas cultivated, comes to $10\frac{1}{2}$ annas, against $11\frac{1}{2}$ annas estimated as the outturn of 1895-96 over a large area.

In the Patna and Bhagalpur Divisions which together comprise $\frac{5}{8}$ ths of the total area under *rabi food-crops* and where the area under cultivation with *rabi food-crops* is not much less than was cultivated last year, the outturn may be put at not less than 12 annas.

N. N. BANERJEE,

*Assistant Director of the Dept. of Land
Records and Agriculture, Bengal.*

COUNTERSIGNED.

W. C. MACPHERSON,

*Director of the Dept. of Land Records
and Agriculture, Bengal.*

CALCUTTA,
The 3rd April 1897.

Estimate of Outturn of Rabi Food-crops in Bengal harvested in the Spring of 1897.

Subdivisional Officer of Buxar altered his estimate of area sown in the first forecast of the wheat crop for 1896-97 from 12,754 to 13,500 acres consequent on the recent enquiries made by him, and hence the difference in the area under wheat as com- pared with that shown in the first wheat forecast. The in- crease of area under other crops in column 7 over that in column 6 is due to the failure of the 11e crop, a good deal of raddy lands being utilised this year for rabi cultivation.	The "normal area" can hardly be correct. It is difficult to credit that the yield of the rabi crops has been so different this year in Shahabad and Gaya.

Champaner -- 12-3-97.	2,362,240	1,482,000	Wheat	47,000	87,700	30,000	10	14	<p>The decrease in area is due to abnormal deficiency of moisture at the time of sowing. This and the ill-effects during the same period account also for the yield being below the average. The rabi crops generally have been very good where irrigated and sown in lands usually grown with poppy, but they are very backward and promise a poor yield elsewhere.</p>

Darbhanga -- 12-3-97.	2,194,400	1,980,100	Wheat	110,800	100,400	49,300	9	12	<p>Rainfall during the months of January and February, though in small quantity, was well distributed. It had a wonderful effect in improving the barley and wheat crop, &c., while at the same time it was too light to do any harm to sugar or mustard. Allowing for the reduced area under cultivation in some parts of the district the 1896 food-crop is estimated at about 8 annas in Muzaffarpur, 12 annas in Darbhanga, and 16 annas in Samastipur. This does not agree with the subdivisional returns, which are 9 for Muzaffarpur, 11 for Darbhanga, and 9 for Samastipur. The first is too high; the second is perhaps rather low; the third, namely Samastipur, is absolutely low, and I have raised it to 16, as the area under rabi crops is there as large as usual. This is not the case within the Darbhanga and Muzaffarpur subdivisions.</p>

The increase is said to be due to the rain of February last. The figures for gram shown in the return for last year are included in those for other rabi cereals and pulses, because in Kendrapara <i>birhi</i> was included under gram, though it properly comes under other rabi cereals and pulses. There has been an increase in area under <i>datus</i> , as an account of the loss of the <i>asrad</i> crop <i>datus</i> has been largely grown, advantage being taken of the ample supply of canal water by canal authorities. The rains of February have im- proved the crops. There has been a decrease in area as compared with the normal and in the outturn as compared with that of last year of wheat and other pulses. This is due to want of rain. The area under <i>boro</i> rice is above the normal as the ralyats were induced to cultivate it to compensate the loss of winter rice by floods. The decrease in outturn is due to want of rain.

The normal area under gram could not be sown for want of moisture in September and October 1966. The cessation of rain during September and October did not admit sowings of *rahi* crops in general, and much that had been sown did not mature. In Khond, mals pulses were not sown at all.

The small area sown was due to want of moisture brought on by untimely cessation of the rains.

The decrease in the outturn is due to deficiency of rainfall at sowing time.

The Deputy Commissioner has made an estimate for *roster* under head "pulses." The figures for this district appear to be all wrong.

**SUMMARY OF THE METEOROLOGICAL AND RAINFALL OBSERVATIONS
TAKEN IN BENGAL, AND OF THE METEOROLOGICAL OBSERVATIONS
TAKEN IN ASSAM, FOR THE MONTH OF MARCH 1897.**

WEATHER during March was more unsettled than is usual at the time of the year, when the change from cold to hot weather is becoming established. Though the mean values of the various meteorological data do not differ much from the corresponding normals, they underwent numerous and in some cases large changes, while at times they varied (especially temperature) largely from the normal.

There were four occasions of disturbed weather owing to passing depressions, and on at least two of these occasions there were well-marked peculiarities similar to those I referred to in the report for February. The two most important peculiarities were (1) the tendency which the depressions showed of moving southwards and ultimately becoming diffused or disappearing over the Bay; (2) the continued cloudy weather which lasted at times for two or three days. Owing to the second of these two, the average cloud values are above the normal over the whole Province by from 10 to 20 per cent. except at Darjeeling, where there was much less cloud than usual in March. As a consequence of the continued cloud during the times of disturbance, maximum or day temperatures were very low, but these low readings were counterbalanced by the high temperatures during the early part of the month, especially about the 10th, when there was a large excess in all districts for some days.

Under present conditions a more important effect of these repeated disturbances was the frequent rainfall. Every district received amounts in excess of the normal, and the distribution of the rain shows the unusual behaviour of the depressions to which it was due. Lower Bengal received less compared with the normal than any other part of the Province, whereas in Orissa more than three times the normal amount fell. Bihar and Chota Nagpur also received between two and three times their normal falls for March. If the depressions had followed their usual course eastward, the falls in Lower Bengal would have been heavier, and in all probability there would have been much less rain in Orissa. The unusual displacement of the depressions towards the south brought Orissa more under their influence, and as in the end they disappeared over the Bay, the northerly winds which then set in over Lower Bengal were not favourable for the development of the thunderstorms to which rainfall at this season of the year is due.

The heavier rainfall in North Bengal appears to be connected with the peculiarity noticed above regarding the direction of motion of the depressions. While the shallow depressions approached the west of the Province, as usual from the west, pressure fell in North Bengal, and a local depression formed there. These local depressions were not of long duration, but they gave rise to rain earlier in North Bengal than in the other districts. The fall of pressure was followed by a rapid rise, which spread southwards and met the shallow depression from the west, causing it to take a more southerly course over Orissa into the Bay area.

At the beginning of the month the pressure distribution was still of the cold-weather type, readings being highest in North Bengal and lowest in Ceylon. The gradient, however, was very slight, and winds were light and south-westerly over a great part of the Province. Temperature was below the normal except in the south-western districts, where there was a small excess. On the 2nd rather large changes occurred, and entirely altered the character of the distribution. Readings became lowest over Bengal, while with the more general establishment of southerly winds, the area of high temperature spread northwards. Pressure fell more rapidly on the 3rd, and still more so on the 4th, on which date the fall was more than .15 inch in Bihar, and the steady increase of gradient continued till the 5th. There were then present all the signs of a depression over the western half of the Province. Winds were east or south-east at nearly all stations, and defect in pressure increased from .07 inch in East Bengal to .22 inch in the west of Bihar. The depression moved rapidly eastward over the Province, and caused only a few showers—most of them in East and North Bengal.

The usual fall of temperature accompanied the westerly winds in rear of the depression, but the change was not very marked, and a considerable excess remained in the south of the Province.

Another disturbance followed in a few days, and this was perhaps the best example of the double change to which I have referred above. On the 10th cloudy showery weather began in Chota Nagpur; and though pressure had changed very slightly, these winds were south-easterly, showing there was a low-pressure area to the west; also on the 10th there was a brisk fall of pressure in North Bengal and the adjacent parts of Assam and East Bengal, and the winds had a cyclonic arrangement round a centre near Bogra. On the 11th there were two areas of rapidly-falling pressure—one in North Bengal, the other in Orissa and Chota Nagpur. The winds were very irregular, especially in the southern districts. On the 12th and 13th pressure rose—first briskly and then rapidly—in North Bengal, and the area of lowest pressure was on the former date over Orissa, and on the latter over the Circars and the south-west of the Bay.

Scattered showers fell on the 11th in most districts, and in a few on the 10th and 12th; but as north-westerly winds became general, the cloudy showery weather soon ceased. From being about 10° above on the 11th, temperature fell to 5° below the normal on the 13th, after which it began to rise, but was not in excess till the 17th. Settled weather with

south-westerly winds and steadily increasing temperature prevailed till the 20th, when the third disturbance began. The fall of pressure in North Bengal, which was such a noticeable feature in the previous case, was not marked in this case, but the rapid rise began in the extreme north of the Province, and had the same effect as before in forcing the depression over the north of the Bay. On the 22nd pressure was lowest in Bihar, and south-easterly winds prevailed over the whole Province; on the 23rd readings were low at all the western stations as far south as the Circars; on the 24th lowest pressure was in the north of Madras. These changes show a striking similarity to those connected with the previous disturbance, but a difference arose from the rise of pressure not being maintained over Bengal. This resulted in a uniform distribution over the Province, irregular winds, and continued thunderstorms.

The rainfall caused by the above disturbance began on the 21st, but was then limited to a few scattered showers, mostly in Chota Nagpur. On the three following days showers were very general over the whole Province, and in some places heavy, a few stations in Orissa and the adjacent part of South-West Bengal receiving more than 3 inches. The rainfall ceased first in Bihar on the 24th, and on the 25th was confined almost entirely to North Bengal and Orissa.

Unusually dense cloud for the season prevailed for two or three days, and mean temperature fell many degrees below the normal. The coolest weather was on the 24th when defect varied from 5° in the east to 15° in Chota Nagpur and South Bihar.

A short period of cool settled weather followed, the first signs of an interruption appearing on the 28th, when winds became easterly and thunderstorms began in the west. Pressure changes on that date were more irregular than usual, but gave only a faint indication of unsettled weather. On the 29th pressure rose everywhere, but again by variable amounts, and the local storms were evidently due to the interaction of the variable winds which then obtained.

The rapid fall of pressure on the 30th in North Bengal caused a steeper gradient from south-west to north-east; a more regular system of south-westerly winds followed, and by the end of the month weather was again more settled. Temperature remained low throughout the last week owing to the frequent thunderstorms, the average defect being about 5° .

Pressure on an average for the whole month was slightly below the normal in all districts, the greatest defect being about $\cdot 02$ in Lower Bengal, Orissa, and part of Bihar. The changes that occurred during the month were at times large and irregular; but as the more important of them have already been described above in connection with the disturbances, it is unnecessary to make any further reference to them.

Temperature.—Neither day nor night temperatures show much variation from the corresponding normal means, but the variations from day to day were at times very large. During the early part of the month there was considerably greater heat than is usual in the early part of March, excess at times being more than 10° . During the latter half of the month, when weather remained unsettled for several days at a time, there was a large defect in mean daily temperature. These differences neutralise one another on an average for the whole month, so that the mean difference is rarely more than 1° . There was a small excess in the south of the Province and a small defect in the north.

Rainfall.—There were four periods of rainy weather, the most important being between the 22nd and 24th when general and in places heavy rain fell over the whole Province. Light scattered showers fell about the 6th, the 11th, and after the period referred to in the previous sentence on the 29th and 30th. The showers were much heavier on the two last occasions, especially in the south-western districts, where some places received more than 3 inches.

The average rainfall for the month is above the normal in all districts, more especially in the west of the Province. Excess is 2.62 inches in Orissa, 1.33 inches in North Bengal, nearly 1 inch in Chota Nagpur and Bihar, and about half-an-inch in Lower Bengal.

The rainfall being caused by thunderstorms was irregular in its distribution, and it is needless giving details of the larger amounts, as they are to be found in the preceding tables:—

The following table gives the summary of the temperature and rainfall data of each of the seven meteorological divisions of the Province for the month of March 1897:—

METEOROLOGICAL DIVISIONS.	TEMPERATURE.							RAINFALL.						
	Highest observed during month.	Lowest observed during month.	Averages for month.			Average mean of month above or below normal mean of month.	Of month.			Rainy days.			Since 16th October 1896.

The total fall from 1st January to 10th April 1897	0.40
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3.31
					3.83

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; K, thunderstorm; p, passing temporary showers;
t, thunder; <, lightning; a, dew.

DISTRICT ROAD FUND.

No. 2087R.C.

GOVERNMENT OF BENGAL—PUBLIC WORKS DEPARTMENT.

Road Cess.

Dated Calcutta, the 8th April 1897.

RESOLUTION.

READ—

Letter from the Accountant-General, Bengal, No. 1128L.F., dated 30th March 1897, submitting an abstract of receipts and expenditure of the several District Road Committees in Bengal for the quarter ending 31st December 1896.

RESOLUTION.—The Lieutenant-Governor directs that the accounts of the receipts and expenditure of the several District Road Committees in Bengal, for the 3rd quarter of the year 1896-97, be published in the *Calcutta Gazette* and circulated to the officers concerned.

ORDER.—Ordered that a copy of this Resolution, together with a copy of the abstract of receipts and expenditure, be published in the Supplement to the *Calcutta Gazette*.

Ordered also that a copy of this Resolution, and of the abstract referred to, be forwarded for information to the—

Commissioners of the Rajshahi, Chittagong, Bhagalpur, and Chota Nagpur Divisions;
Superintending Engineer of the Northern Circle;
Inspectors of Works, Eastern and Western Circles;
Financial Department of this Government.

By order of the Lieutenant-Governor of Bengal,

J. G. H. GLASS,

Secretary to the Government of Bengal.

R. E. HAMILTON,
Accountant-General, Bengal.

RESOLUTION ON THE CHEMICAL EXAMINER'S REPORT FOR 1896.

MUNICIPAL DEPARTMENT—MEDICAL.

Calcutta, the 20th April 1897.

RESOLUTION—No. 2219 Medl.

READ—

A letter from the Inspector-General of Civil Hospitals, Bengal, No. 1663, dated the 5th March 1897, forwarding the Report of the Chemical Examiner to Government, for the year 1896.

Read also—

The Report for 1895, and the Resolution recorded on it.

The number of analyses performed during the year was 3,655, against 3,342 in 1895 and 2,940 in 1894. The increase is mainly accounted for by the fact that for the first time 312 samples of imported goods were analysed for the Customs Department, with the object of ascertaining the amount of duty assessable, and of testing their composition and the accuracy of the trade descriptions annexed to them. In addition to his analytical work, the Chemical Examiner verified the petroleum-testing apparatus of the ports of Rangoon and Akyab, and gave opinions on 12 technical questions, including proposed amendments of the Explosives Act, the testing of petroleum, the detection of poisonous minerals in the lime-juice supplied to Indian emigrants, the spontaneous combustion of ships' water-signal lights, and the preservation of ganja.

2. The total number of medico-legal cases, referred to the Chemical Examiner during the year, was 952 against 829 in the preceding year, while the number of articles sent for examination in connection with them was 1,732, an increase of 88. Cases of human poisoning rose from 150 to 507, and of cattle-poisoning from 219 to 297. The viscera of 306 human beings suspected to contain poison were examined during the year, as against 292 in 1895, and in 54·24 per cent. of these cases poison was found, against a percentage of 54·45 in 1895 and 45·86 in 1894. Opium was, as usual, the most common form of poison, being found in 24·50 per cent. of the cases of human fatal poisoning, while arsenic was found in 11·76 per cent. The percentages of these two poisons in the previous year were 26·54 and 15·23 respectively. In 139 out of 306 human viscera and in 345 out of 645 other suspected substances sent up for analysis no poison was detected. The number of cattle viscera examined was 171, as against 132 in the preceding year, and in these arsenic was discovered in 66·08 per cent., against 79·54 per cent. in 1895. The Chemical Examiner complains that in medico-legal cases Subdivisional Officers frequently did not send their reports in the prescribed form; that exhibits liable to decompose were imperfectly packed; and that important material was not submitted for analysis. The Lieutenant-Governor desires to impress upon all officers who have to deal with medico-legal exhibits, the necessity of observing the rules laid down, as neglect of some simple precaution may frequently destroy a piece of valuable evidence.

3. The number of articles tested for purity and quality rose from 1,698 to 1,923, including 148 samples of explosives, 459 of petroleum and inflammable oils, 13 of *ghi* and butter alleged to have been adulterated, 57 samples of spirit tested for the Collector of Customs, 48 samples of opium and 207 other articles received from various Departments of Government.

4. The number of analyses of drinking water conducted during the year was 169 against 183 in 1895. The results were as follows:—

Good	32		Indifferent	32
Fair	71		Bad	41

Only 13 per cent. of the waters received were classified as good. The worst sample was from the Ferry Ghât well in Calcutta, but the water from the well of the Pabna Jail, from the Markand Tank at Puri, from the Balliaghatta

tank and from the Bally khul, was also found to be especially bad. Besides these, the Chemical Examiner mentions three tube-wells, the water of which was found unfit for use, in two cases, both from Narayanganj, on account of the quantity of mineral constituents and organic impurity, in the third, from the Chapra Jail, owing to the excess of saline matter contained.

5. At the suggestion of Dr. Prain samples of ganja packed in different ways have been subjected to chemical analysis at intervals during the last three years. The result is to show that the narcotic properties of the drug are reduced by keeping, while its fragrance is destroyed by packing in sealed tins. Besides the chemical analyses, eight physiological experiments were made during the year to test the strength of the stored drug. The samples were all found to be still active after three and a half years' keeping, but it needed three or four times the dose to produce the effect of the fresh drug.

6. The acknowledgments of the Lieutenant-Governor are due to Dr. Waddell, to the Additional Chemical Examiner Dr. Chuni Lal Bose, and to the Assistant Examiners, for the good work done by them during the year.

By order of the Lieutenant-Governor of Bengal,

H. H. RISLEY,

Secretary to the Govt. of Bengal.

STOCKS OF RICE IN AND AROUND CALCUTTA.

No. 245*State*.—The following is published for general information.

M. FINUCANE,

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA IN FOOD-GRAINS.

No. 939 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 20th April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 7th April in 1896 and 1897 are shown in the following statement:—

		1ST TO 7TH APRIL.			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Imports.</i>					
From Foreign Ports	23	31
„ Indian „	...	70,677	96,199	232,040	3,15,832
Total	...	70,677	96,199	232,063	3,15,863
<i>Exports.</i>					
To Foreign Ports	...	166,979	2,27,277	108,455	1,47,619

Total	...	207,702	2,82,705	134,026	1,82,424

Imports.—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period of last year:—

		1ST TO 7TH APRIL.			
		1896.		1897.	
1		2	3	4	5
		Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>					
Rice	...	44,746	60,904	205,255	2,79,375
Paddy	...	17,944	21,424	24,203	32,943
Wheat
Gram and pulses	...	7,987	10,871	1,876	2,553
Other food-grains, such as jowar, barley, oats, &c.	729	992
Total	...	70,677	96,199	232,063	3,15,863

Imports.—During the week under review *rice* continued to be largely imported from Burma, namely, 196,738 cwts. against 274,970 cwts., in the ten days ending 31st March 1897. The only other port from which rice was received in Calcutta was Balasore, which contributed 8,506 cwts., against nil in the corresponding period of 1896. No shipments were received from Chandbali during the week under report, though 44,746 cwts. were imported from that port in the week ending 7th April 1896. As regards *paddy*, the imports were chiefly from Burma, which sent 22,139 cwts., against only 305 cwts. in the corresponding week in 1896. The remainder of the imports, viz., 2,064 cwts., came from Balasore, against 328 cwts. in the week ending 7th April 1896, while no imports were received from Chandbali, against 17,311 cwts. in the corresponding week in 1896. In the case of *gram* and *pulse* the falling off was due to absence of supplies from Chandbali, which sent 7,877 cwts. in the week ending 7th April 1896. The imports from Burma aggregated 1,391 cwts., against nothing in the same period last year.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the 1st week of April 1897 is compared with the figures for the corresponding period of 1896 :—

1	1ST TO 7TH APRIL			
	1896.		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>				
Rice	168,793	2,29,746	96,251	1,31,008
Paddy	3,273	4,455
Wheat	5,502	7,489	304	414
Gram and pulses	29,256	39,820	32,645	44,433
Other food-grains, such as jowar, barloy, oats, &c.	878	1,195	4,826	6,569
Total ...	207,702	2,82,705	134,026	1,82,424

The exports of *rice* from Calcutta to Foreign ports declined from 137,058 cwts. in the corresponding week of last year to 84,454 cwts. in the period under report; the exports during the ten days ending 31st March 1897 amounted to 109,200 cwts. During the week ending 7th April 1896, States in Arabia other than Muscat drew 46,044 cwts., in the period under report nothing was sent to those States, but the United Kingdom received 12,498 cwts., against 23,018 cwts., Demerara received 16,946 cwts., against 28,334 cwts., and the largest increases occurred in the shipments to Mauritius (29,277 cwts., against nil), and Aden (13,216 cwts., against 9,485 cwts.). In *paddy* there was no trade, against 2,536 cwts. in the week ending 7th April 1896, the falling off being due to cessation of exports to Hong-Kong and New South Wales. The decline in the *wheat* trade was almost entirely owing to there being no shipments to the United Kingdom, against 4,004 cwts. in the week ending 7th April 1896. The exports of *gram* and *pulse* to the United Kingdom diminished from 21,500 cwts. in the corresponding week in 1896 to 2,654 cwts. in the week under review, while Mauritius received 14,515 cwts., against nothing in the corresponding week in 1896.

There was no trade in *rice* with the Coast ports. Compared with the week ending 7th April 1896, the largest decline occurred in the supplies sent to the Madras ports, viz., 7 cwts., against 17,022 cwts. The exports of *gram* and *pulse* were slightly more than double those of the week ending 7th April 1896, viz., 13,223 cwts., against 6,058 cwts., owing chiefly to Bombay having received 9,882 cwts., against only 1,459 cwts. in the corresponding period in 1896. The fluctuations under the other heads are small and call for no notice.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 7th April 1896 and 1897.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 944 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 10th April 1897, both days inclusive, to have been 35,75,663 maunds. The destination of 33,92,800 maunds is specified. A little more than half of this quantity (19,40,551) was carried to the North-Western Provinces and Oudh, about one-fourth (8,35,164 maunds) to stations in Bengal, and the rest (6,17,085 maunds) to other provinces. In the last week of the period 96,813 maunds were exported to the North-Western Provinces and Oudh, and 1,35,288 maunds to Bihar. The exports from Calcutta to Bihar now exceed the exports from Calcutta to the North-Western Provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 20th April 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks, and Port Trust Railway) by the East Indian Railway from 1st January to 10th April 1897.

Singhbhum.—No rain. Rice plentiful. Price of rice 9 to 12 seers per rupee.

General Summary.—With the exception of light showers at Jessore, Darjeeling, Pabna, and Mymensingh, there was no rain during the week. A smart shower occurred in Calcutta last evening. The ploughing and early sowings continue, but rain is generally required to help them on. Sugarcane, indigo, and spring rice are doing well. The harvesting of spring rice has begun. Scarcity of drinking-water is reported from parts of the Burdwan, Presidency, Rajshahi, Chittagong, and Chota Nagpur Divisions. The fodder-supply is also reported to be insufficient in some districts. In many districts prices are said to be rising. In the distressed districts the prices of the staple food-grain on which the famine wage is based are—Nadia (common rice) 9 seers, Murshidabad (common rice) 8½ seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 8 seers, Pabna (common rice) 8½ seers, Patna (common rice) 9½ seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (barley) 12 to 13 seers, Champaran (Indian-corn) 10½ seers, Muzaffarpur (Indian-corn) 10 seers, Darbhanga (common rice) 8 seers, Bhagalpur (*marua*) 13 and 13½ seers, Sonthal Parganas (rice at Jamtara) 8 seers, Puri (common rice) 10½ to 12 seers, Hazaribagh (rice) 7 to 9 seers, Manbhum (common rice) 9 seers.

The mean pressure of the seven days	Inches.
The average pressure of the corresponding period for 24 years, Surveyor-General's Office	29.778
The total number of hours of bright sunshine	70.0
The maximum possible number of hours of sunshine	88.2
The mean temperature of the seven days	87.9
The average temperature of the corresponding period for 24 years, Surveyor-General's Office	84.9
The extreme variation of temperature	32.1
The maximum temperature	103.7
The highest velocity of the wind in one hour	Miles, 15
The mean relative humidity	59
The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office	69
The total fall of rain from 11th to 17th April 1897	Inches, Nil.
The average fall of the corresponding period for 24 years, Surveyor-General's Office	0.22
The total fall from 1st January to 17th April 1897	3.31
The average fall of the corresponding period for 24 years, Surveyor-General's Office	3.55

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beekley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

Results of the Barometrical and Thermometrical Observations taken at the Meteorological Office, Chowringhee, from 11th to 17th April 1897.

MONTH.	Date.	Pressure at 10 A.M. corrected and reduced to 32° Fahr.	TEMPERATURE.						HYGROMETRY.			Rainfall, past 24 hours
			Daily mean.	Maximum.	Range.	Minimum.	Dry bulb at 10 A.M.	Wet bulb at 10 A.M.	Vapour tension at 10 A.M.	Dew point at 10 A.M.	Humidity at 10 A.M.

DISTRESS IN THE PATNA AND OTHER DIVISIONS.

No. 1166(Fam.).—The 21st April 1897.—The following papers are published for general information.

M. FINUCANE,
Secretary to the Govt. of Bengal.

No. 1132Agri. (Fam.), dated Calcutta, the 15th April 1897.

From—M. FINUCANE, Esq., Secretary to the Government of Bengal, Revenue Department,
To—The Secretary to the Govt. of India, Revenue and Agricultural Dept.

In continuation of this Government's letter No. 778Agri. (Fam.), dated the 18th March 1897, I am directed to submit the following report, under section 29 of the Bengal Famine Code, on relief operations in Bengal during the four weeks ending the 27th March 1897. I am also to enclose herewith copies of the half-monthly reports of the Commissioner of the Patna Division, No. 812F.G., dated the 22nd March, and No. 912F.G., dated the 7th April 1897, and their enclosures, together with maps of the Patna Division and of the districts of Palamau, Munbhum, Nadia, Khulna, and Bhagalpur, showing the tracts now affected.

2 There was distress requiring relief measures on a large scale in the Shahabad, Saran, Champaran, Muzaffarpur and Darbhanga districts of the Patna Division. The condition of the Patna and Gaya districts continued to be satisfactory; throughout both districts three-fifths to half an inch of rain fell on the 23rd and 28th March. This rain did no appreciable harm to the *rabi*, but, on the other hand, refreshed the standing crops and enabled ploughing to go on, as well as the preparation of seed-beds for the early rice. The *rabi* crops are expected to yield in these districts a 16-anna or full average outturn. No relief works were open in these districts. Gratuitous relief was given from funds privately subscribed or allotted by the Provincial Committee of the Indian Famine Charitable Relief Fund. There was also a poor-house in Bankipore, in which the daily average number of persons relieved was about 60, half of whom had come from the North-Western Provinces. In Gaya kitchens were open along the Grand Trunk Road and elsewhere; the prices of wheat and barley had fallen, while those of rice were stationary. The Commissioner thinks that this district will require little or no outside aid.

The following paragraphs deal with the principal features of famine relief in the other and seriously affected districts of the Patna Division.

3. *Rainfall and prospects of the crops.*—The rainfall during the month and in March 1874 was as follows:—

				March 1874.	March 1897.
				Inches.	Inches.
Shahabad ...	{	Sadar	0.25	0.75
		Bhabhua	0.79	0.36
		Sasaram	0.07	0.54
		Buxar	0.40	0.43
Saran ..	{	Chapra	0.39	0.21
		Sewan	0.42	0.55
		Gopalganj	0.30	0.45
Champaran ...	{	Motihari	0.31	1.33
		Bettia	3.47
		Barhwa	1.10
		Lagaha23

				March 1874.	March 1897.
				Inches.	Inches.
Muzaffarpur	{ Musaffarpur	0.80	0.95
	{ Hajipur	0.14	0.25
	{ Sitamarhi	0.20	1.80
Darbhanga ...	{ Sadar	0.21	2.59
	{ Madhubani	0.16	1.50
	{ Samastipur	0.08	0.90

The rainfall during the first-half of the month was slight and scattered. On the 22nd, 23rd and 24th March there was rain all over the Division; it was heaviest in Darbhanga and parts of Champaran and lightest in Saran. The greater part of the *rabi* crops had already been harvested, and the rain therefore did no damage, except in the north-east of Champaran, where the *rabi*, which had been sown late, and the poppy were damaged by hail. On the other hand, the rain has enabled cultivators to plough their lands for the early *bhadai*, and has done good to millets, sugarcane and cotton on the ground, and has to some extent improved the prospects of the indigo. The Commissioner expects a full *rabi* crop in Saran and in Shahabad (except in the Bhabhua subdivision, where it is estimated to be about 6 or 7 annas); he expects an outturn of 10 annas in Champaran, 11 annas in Muzaffarpur, and 12 annas in Darbhanga. In 1873-74 the outturn of these crops was in Shahabad 16 annas, in Saran 7 annas, in Champaran 8 annas, in Muzaffarpur 10 annas, and in Darbhanga 8½ annas.

Estimated area and population affected.—There was no change under this head in the district of Muzaffarpur.

Shahabad.—It is reported by the local officers that there has been no change in the affected area. But in the Famine Statement A an area of 1,351 square miles has been shown as affected, against 680 square miles previously reported. An explanation of this discrepancy will be obtained from the Collector.

Saran.—The total area affected in this district is now stated to be 1,684 square miles, with a population of 1,484,386 persons, against 1,412 square miles with a population of 1,352,000 previously reported. This increase is due to a general revision made by the Collector of his estimates of area affected. Relief works are now open throughout the Gopalganj subdivision, and the whole of this tract has therefore been classed as seriously affected; an area of 19 square miles in the Sadar subdivision, in which the *rabi* has been very poor, has also been placed in this category.

Champaran.—The Collector of Champaran has again revised his figures as the result of a fresh calculation, but it is stated that there has been no actual change in the area in distress. The total area affected in this district is now put down at 2,593 square miles, with a population of 1,554,000, against 1,865 square miles with 1,110,000 persons previously estimated.

Darbhanga.—The area now shown as affected is 2,940 square miles against 2,766 square miles previously reported; but no explanation of the increase has yet been furnished.

4. *Relief works.*—The progress made in the transfer of large works to the management of the Public Works Department has been slow, the number of works open in each district at the end of March being—

			Under the Public Works Depart- ment.	Under Civil Officers.	Total.
Shahabad	Nil	7	7
Saran	2	29	31
Champaran	21	59	80
Muzaffarpur	12	58	70
Darbhanga	(Not stated)	(Not stated)	134
Total			322

The total number of works open at the end of February was 254, of which 30 were under the Public Works Department and 224 under Civil Officers. The following table shows the average daily number of adult male units on

the Government relief works in each district in the second fortnight of March, compared with the numbers for the second fortnight of February:—

DISTRICT.	HALF-MONTH ENDING 27TH FEBRUARY.			HALF-MONTH ENDING 27TH MARCH.		
	Task-work.	Daily wage.	Total.	Task-work.	Daily wage.	TOTAL.
1	2	3	4	5	6	7
Shahabad ...	698	143	841	3,613	285	3,898
Saran ...	8,563	2,353	10,916	7,419	1,057	8,476
Champaran ...	74,892	4,046	78,938	76,306	6,399	82,705
Muzaffarpur ...	17,792	1,191	18,983	17,365	2,072	19,437
Darbhanga ...	77,466	3,150	80,616	50,920	5,135	56,055
Total ...	179,411	10,888	190,294	155,623	14,948	170,571

The numbers in Shahabad have risen steadily, owing, it is reported, to the conclusion of the *rabi* harvest and to the return of labourers who had gone to seek work elsewhere. The falling off in the numbers of task-workers in Saran and Darbhanga is reported to be due partly to the rain and the consequent demand for agricultural labour, partly to the *rabi* cutting, and partly to other causes. The numbers of relief-workers employed irrespective of task increased, except in Saran, but were nowhere excessive.

The average reported outturn of work, cost-rate and wages were as follow:—

DISTRICT.	AVERAGE DAILY WAGE OF ADULT MALE UNIT.				AVERAGE OUTTURN OF WORK PER ADULT MALE UNIT ON TASK- WORK.		COST RATE PER 1,000 CUBIC FEET.	
	Second half of Feb- ruary.		Second half of March.		Second half of February.	Second half of March.	Second half of February.	Second half of March.
	Task- work.	Irrespective of task.	Task work.	Irrespective of task.

There has been no great change in the average wages earned since the latter end of February. The causes of the slight variation in the outturn and cost-rate per 1,000 cubic feet are the same as those explained in paragraph 4 of the report for February. On the whole, the works were carried on smoothly and satisfactorily, but difficulty is still experienced in obtaining the establishment necessary for the strict enforcement of the prescribed tasks. None of the non-commissioned officers asked for in my letter No. 671(Fam.), dated the 9th March 1897, have yet joined, and the Government of India are now being requested to lend the services of 12 additional commissioned officers. The Lieutenant-Governor has also authorised the introduction of the piece-work system on the major relief works (*i.e.*, on canals and railways) so as to lighten the strain on the establishment.

5. *Private relief works.*—In the district of Shahabad several tanks were being excavated at the expense of private individuals, and over 6,000 labourers were employed on the Mogulserai-Gaya Railway. In Saran the Hatwa Raj had ten works open on which 4,117 labourers were employed on the 27th March. Besides these there were other private works open in the Gopalganj and Siwan subdivisions. There were no private works in the district of Champaran, except a tank which was being excavated by the Bettiah Raj, and which

employed an average of 43 labourers daily. The Darbhanga Raj had works open in Muzaffarpur and Darbhanga. The number employed on the Raj works in the former district on the 27th March was 2,828, and in Darbhanga 16,687.

6. *Poor-houses, kitchens and village relief.*—There were 21 poor-houses open in March in the five districts, against 16 in February, while kitchen relief was given at several places in Muzaffarpur, Champaran and Shahabad. The Darbhanga Raj maintained a poor-house in Muzaffarpur and kitchens in Darbhanga. In Saran the Hatwa Raj maintained four poor-houses, and the Manjha zamindars one. Employment was given to *pardanashin* women in the form of cotton-spinning and basket-making.

7. *Gratuitous relief.*—The average daily doles of gratuitous relief during the second fortnight of March were as follows in comparison with the corresponding figures for February:—

				SECOND-HALF OF—	
				February. Pies.	March. Pies.
Shahabad	10	19
Saran	8	8
Champaran	9½	10½
Muzaffarpur	10	9
Darbhanga	10	8½

The dole in Shahabad is high, because it was calculated on the basis of rice at 8½ seers per rupee. Gram and peas sell cheaper than rice, but are reported not to be always available. The dole was highest in Champaran, where it was higher than in the latter half of February.

The numbers on gratuitous relief increased considerably. In Shahabad the total number during the last week of March was 17,225, against 8,740, the corresponding figure for February, while the total number on relief works on 27th March was 6,215. The Collector writes that in his opinion the maximum has not yet been reached, and that he expects a further increase. In Saran the increase from 15,939 at the end of February to 27,319 at the close of the period under report is stated by the Collector to be due to his personal efforts to stir up the Circle Officers who were found neglecting the most patently deserving cases. The opening of more relief works is in contemplation, and when this has been done, many of the recipients of gratuitous relief will probably be drafted off to the relief works.

8. *Physical condition of the people, &c.*—The public health generally continued to be exceptionally good, and the condition of cattle is reported to have been fairly satisfactory. The death-rate in the affected portion of the district of Shahabad (3·39), though not very high in itself, is considerably higher than the registered rate (1·93) for the whole district, as shown in Famine Statement A hereto annexed. It is stated by the Collector that the death-rate of this area is in ordinary years higher than that of the rest of the district, and that this year, while other parts of the district are healthy, small-pox and heavy fever mortality are reported from the distressed tracts.

9. *Loans.*—Loans for village works under the modified rules under the Land Improvement Loans Act do not appear so far to have proved attractive, but complete information is not yet in the possession of Government. The local officers have been asked to furnish fuller particulars under this head in future reports.

10. *Food-stocks, importation of grain, and prices.*—The total imports of the Division, including Patna and Gaya, during the period under report, are stated to have been 6,24,730 maunds, and the exports 1,58,643 maunds, against 5,51,769 and 1,84,456, respectively, in February. The imports exceeded the exports by 4,66,087 maunds, and a considerable portion of the former consisted of Burma rice. No deficiency in food-supplies has been reported from any of the affected districts of the Patna Division. Prices have remained steady.

11. *Chota Nagpur.*—The situation in the Chota Nagpur Division depended to a great extent on the *mahua* crop. That crop has been seriously damaged by rain and stormy weather in the lower-lying portions of Hazaribagh, in Palamau and in Manbhum; in the district of Lohardaga, which is an elevated region, and on the plateaux of Hazaribagh, the damage done was less considerable. The poorness of the *mahua*, combined with the failure of the mango

crop, may lead to more widespread distress than was anticipated, and prices are reported to have generally risen. Public health continued to be on the whole good, and the general condition of cattle appears to have improved, although cases of disease are still reported, while the rain that fell during the month will have the effect of increasing the supply of fodder.

No report has been received from Singhbhum since the change in the weather, and exports being still far in excess of the imports, it is believed that there has been no change for the worse in the condition and prospects of this district. In Singhbhum and Lohardaga. Lohardaga, although no actual indications of distress have come to notice, prices continued to rise, exportation had stopped, and grain merchants had begun to import rice in considerable quantities and were selling it at 8 seers per rupee in the head-quarters of the district. There was rain throughout the district on the 21st, 22nd, 23rd and 24th March, the fall amounting to 1·13 inches at Ranchi, ·73 of an inch at Palkot, ·91 at Lohardaga, and 1·62 at Silli, and there has been further rain since the close of the period under report. The extent of the damage done to the *mahua* crop is not yet known. The poorer classes are beginning to feel the pinch of distress, and the local officers contemplate opening test-works shortly.

The total rainfall in Palamau during March is reported to have been 1·48 inches, and the outturn of the *mahua* crop is estimated at about 10 annas. The *rabi* crops have been seriously injured by rust and worms, and the outturn for the whole district is estimated by the Deputy Commissioner at 6 annas. Prices have risen higher than before, the price of rice being under 8 seers per rupee in many places. The relief works are not, however, attended by large numbers. At the end of February there were nine Government relief works open, with a total number of 4,287 labourers (men, women and children). The number of works has since been increased to 13, but the labourers employed on them numbered only 3,181 at the end of March. This fall in the numbers is attributed to the gathering of the *mahua*, but it also appears to show that the people must have greater resources than was supposed by the local officers. Several private works are open, but precise information of the numbers employed on them has not been furnished. The numbers on Government gratuitous relief increased from 514 at the end of February to 1,524 on the 27th March. The Commissioner thinks that this increase is what may be expected, as the continued rise in prices makes itself more and more felt by persons who are unfit for manual labour.

The Palamau Branch Committee of the Indian Famine Charitable Relief Fund have commenced operations, and at the close of the period under report, were giving relief to 297 *parda-nashin* women, 88 respectable men, and 99 children, the daily rate being two annas per adult and one anna per child. They have also given supplementary relief to 46 others.

The offer of Government to pay a bounty of eight annas for every maund of Burma rice imported has not had much effect. The total quantity of Burma rice imported up to the close of the period under report is stated to have been 1,803 maunds. The bounty has since been extended to country rice, and will be paid for all rice brought into the Palamau district up to the 30th April. The total amount of advances for village relief works in this district, sanctioned up to 27th March, was Rs. 32,700, and the total amount paid Rs. 11,096.

The Deputy Commissioner of Palamau reports that 16 persons came to Daltonganj from Singrauli in the Mirzapur district in a very emaciated condition. Some of them were sent to the hospital and some were given gratuitous relief.

The *mahua* crop in Manbhum as elsewhere in the Chota Nagpur Division has been considerably damaged by the inclement weather during the latter half of March, the loss being estimated by the Commissioner at not less than eight annas. Prices continued high, ranging from 8 to 10 seers. The area affected remained the same as previously reported, but of the eleven test-works which were open at the end of February, two were closed in the first half of March, as they

failed to attract labourers. The total number on the nine remaining works on the 27th March was 3,459, against 3,492 at the close of February. When the report for the month of February was submitted to the Government of India, precise information had not been received as to the numbers on gratuitous relief. The number estimated by the Deputy Commissioner was 5,000. At the end of the period now under report, the actual number on gratuitous relief was 4,118. No precise information has been furnished of the amount advanced under the modified rules under the Land Improvement Loans Act.

The hopes entertained of a full *mahua* crop in Hazaribagh have been falsified by the bad weather, and the outturn of this crop is now estimated at 12 annas. Prices, already high, show a tendency to rise. In places rice was selling at less than 8 seers per rupee. The ordinary works under the Public Works Department and the Road Cess Committee have been converted into test-works at a piece-work rate of Re. 1-9 per 1,000 cubic feet. During the last week in February the total number employed on these works was 1,136, which rose to 2,261 in the second week of March and 2,618 in the fourth week. Four kitchens were opened in the beginning of the month. The number was subsequently raised to 14, and the number of persons fed at these *kitchens*, as stated in the supplementary telegraphic report of 6th April, was 535. The system of giving relief to women and indigent artisans by cotton spinning and weaving was being steadily developed with successful results by the Hazaribagh Branch Relief Committee.

12. *Presidency Division*.—During the latter half of the month there was general rain throughout the Division which has considerably improved the prospects of the future: the mango crop is, however, reported to be poor everywhere. The position in the 24-Parganas was unchanged, food-stocks were sufficient, and no distress was apprehended.

In Nadia distress has extended to the eastern half of thana Tehatta, and the total area affected during the period under report was 927·75 square miles with a population of 478,612. Although the recent rain, which averaged over three-fourths of an inch throughout the district, has improved prospects, the present pressure has increased. The number of Government relief works (14) remained the same as before, but the total number employed on them on the 27th March was 10,641, against 6,873 at the end of February. Large numbers are said to have been employed on the excavation or re-excavation of tanks undertaken by private individuals, but precise figures have not been furnished. The numbers on gratuitous relief largely increased, being 11,399 at the close of the period under report. Public health continued to be exceptionally good, and the death-rate in the affected area was lower than in the remainder of the district. The condition of cattle is also reported to have been good. Food-stocks were sufficient and prices were generally steady.

The affected area in this district is reported to have been the same as before, but distress has deepened, and the number of beggars and applicants for gratuitous relief is reported to have increased, notwithstanding that large numbers are being relieved by the local Committee of the Indian Famine Charitable Relief Fund. There has been rain throughout the district, the reported fall in the affected area being ·51 inch. This area ordinarily grows nothing but winter rice, but it is satisfactory that the people are taking advantage of the early rain to sow autumn rice and jute.

Four relief works were open in February, and the total number employed on them was 583. The number of works has since been increased to 16, of which 13 are tanks and 3 are roads. The total number of relief-workers on the last day of the period under report was 2,669, and the Collector writes that about 6,000 more are employed on works carried out by private individuals. The number on gratuitous relief has increased from 1,949 at the end of February to 4,090 at the end of March. Prices were generally stationary, and although the affected area depends on importation for its food-supply, no want of grain in the local markets has been reported; the condition of cattle was good. An outbreak of cholera has increased the death-rate in the distressed

tract as well as in some of the other parts of the district in which there is no distress, but in which cholera prevails. This outbreak is attributed to the want of good drinking-water, for the supply of which several tanks are being excavated by Government as well as by private individuals, and the District Board is taking steps to sink ring-wells in the worst villages. Arrangements have also been made for two doctors to visit the affected villages with cholera medicines, and one of them is already on the spot.

It was reported last month that a man and a woman were alleged to have died of starvation. On enquiry it has been found that the man died of a disease which may have been due to insufficient food. The woman had no fixed residence and lived by begging. She did not come to the Circle Officer, and the *post-mortem* examination showed that her condition was such that in all probability no relief would have saved her life.

In this and some other districts of Lower Bengal women refuse absolutely to work on relief works, though their husbands who are respectable cultivators are working at less than half the wage earned by coolies in ordinary times. The result is that the Code wage being insufficient for the maintenance of the male workers and female members of the families, the numbers on gratuitous relief are disproportionately large. The Lieutenant-Governor has therefore authorised the introduction of the piece-work system at somewhat higher than the Famine Code rates, that is to say, the workers will be allowed to earn as much as they can, without a maximum limit, at somewhat higher rates for earthwork than those prescribed by Mr. Glass's tables.

The rain was general in Murshidabad and amounted to over an inch; it has slightly improved the condition of the affected tract in this district. Besides facilitating the preparation of land for the next *bhadoi* and winter rice crops, it has improved the prospects of the mulberry cocoon and of the *boro* paddy. It has also enabled the cultivators to sow a species of paddy known as *shati*, which takes 60 days to mature. Eight test works were open, and the total number of men, women, and children employed on them on the 27th March was 3,360. There was no regular organization for the distribution of gratuitous relief; but some relief of this kind was given through the agency of the police and of private gentlemen. Food-stocks were sufficient, and prices were generally stationary. Public health was, on the whole, satisfactory. The supply of fodder for cattle was sufficient, but in one of the affected thanas (Gowas) cattle-plague is reported to have broken out.

The district of Jessore has had the heaviest rainfall in the Division, the total fall from the 21st to the 30th March being—

				Inches.
Sadar	1.63
Jhenidah	3.18
Magura	3.98
Narail	2.74
Bangaon	2.66

The condition and prospects of thana Muhammadpur in the Magura sub-division improved, while anxiety with regard to Bangaon is stated by the Collector to be nearly at an end. The price of common rice is reported to have risen slightly, but food-stocks were sufficient. Public health and the condition of cattle were fair. Gratuitous relief was continued, the total number in receipt of such relief during the latter half of the month being 882.

18. *Bhagalpur Division*.—The affected districts in the Bhagalpur Division continue to be Bhagalpur and the Sonthal Parganas. In the other parts of the Division it is reported that there has been a gradual rise in the prices of all food-grains, notwithstanding the harvesting of the *rabi* crops and the recent rainfall, which is reported to have done much general good, but caused some slight injury to grain on the threshing floor, and more serious damage to the maturing *mahua* flower. The mango crop, which is of great importance in the districts of Malda and Bhagalpur and in the north of Monghyr, will, it is feared, be a failure.

In Bhagalpur, actual distress is still confined to parts of the Madhipura and Supaul subdivisions in the north, comprising a total area of about 500 square miles with a population of

325,000 persons. The recent fall of rain, which amounted to 1·91 inches in Madhipura and 1·41 inches at Supaul, is reported to have done nothing but good in these tracts, inasmuch as it has given a great stimulus to field operations, and as there was little or no *rabi* that could be damaged by the rain in the fields or on the threshing floors. In consequence of this improvement in agricultural prospects, the numbers on Government relief, which had risen from 8,160 at the end of February to 18,027 on the 22nd of March, fell to 13,474 in the week ending 29th March. At the end of the period under report there were nine relief works open in the two subdivisions, against four in the latter half of February. The total number of relief-workers was 9,819. Several tanks were being excavated by private individuals, and it is reported that private charity and private relief-works are playing an important part as they have done in all previous seasons of scarcity in North Bhagalpur. Government gratuitous relief was given by grain doles at the end of the period under report to 3,394 persons. The physical condition of the people and the public health were good, and food-stocks were sufficient.

Two other tracts in this district are threatened with distress. One is an area of about 150 square miles in the Colgong thana of the Sadar subdivision, which contains purely rice lands with no low lands, with next to no *rabi*, and with no *mahua*. In this area the rice crop is estimated to have been 4 annas only. The other tract is the Katuria thana in the south of the Banka subdivision, in which it was hoped that the *mahua* crop would help the poorer classes. That crop has been considerably damaged by the rain, and the loss is estimated at from 4 to 6 annas. Both tracts are being carefully watched, and arrangements are ready to administer relief when needed.

The distressed area in the Sonthal Parganas is 367 square miles with a population of 93,000 in the Jamtara subdivision.

In this and other parts of the Sonthal Parganas the *mahua* flower is a great adjunct to the food-supply. It is used by the people for one meal in the day, the other meal being of grain. The rainfall during the latter half of March, which amounted to 1·24 inches, damaged the *mahua*, and the outturn is now estimated at one-third of an average crop. There were four relief works open, the numbers employed on which aggregated 2,313 at the end of the period under report, while the number in receipt of gratuitous relief was 235. Public health is reported to have been unusually good. The cattle were in good condition.

Anxiety is felt for the southern portion of the Godda and the north and south of the Deoghur subdivision. Test-works were opened, but did not attract labourers. The *mahua* crop is reported to have given relief for the time.

14. *Orissa Division.*—Reports from Angul and Balasore continue to be satisfactory. No single instance of distress has come to notice in either district. In the district of Cuttack it was believed that there was distress in pargana Kuhunda-Jaipur, with an area of about ten square miles. A test-work was opened, but was not attended by any labourers. It is reported that there is abundance of work on the railway, but that the railway authorities have difficulty in securing labourers. This shows that the people are not now in need of relief.

	Inches.
* Cuttack	5·78
Jajpur	2·68
Kendrapara	4·09
Banki	1·76
False Point	3·69

There was heavy rain throughout the district,* which has improved the prospects, and distress is reported to be confined to those who cannot work. For these a system of gratuitous relief has been organised; about 70 persons daily were in receipt of doles during the week ending 27th March 1897.

The staple crop of the district of Puri is winter rice, and this crop during the past season, was injured first by heavy floods in July and then again by drought, the monsoon rains having ceased entirely in the middle of September 1896. The estimated outturn of this crop for the whole district is 8 annas, but in some parts is reported to

have been as low as 2 annas or less. The worst tract is an area of 250 square miles with a population of about 70,000 lying along the northern and eastern

Bajrakote, Malud, - Parikud,
Andhari, Satpara, Manikpatna,
Balbhadrapur and parts of parga-
nas Chowbiskud and Serari.

shores of the Chilka lake and comprising the par-
ganas named on the margin. The soil is generally
sandy and grows only one crop, and the people are
always more or less in straits. It was in these
tracts that the famine of 1866 first made its appearance. It is reported that
there are no local stocks of food-grains, and steps have been taken to supply
this deficiency by importation from other parts of the district. Government
relief works have been in progress since January, and the Raja of Parikud
commenced certain protective embankments as early as November 1896.
The Commissioner, who recently visited the affected tract, reports that the
people themselves did not say that they would require relief after the
setting in of the rains, and he thinks that this statement may be relied on.
During the latter half of March there was heavy rain, which in the affected
tract amounted to 2 45 inches, and slightly improved the condition of the tract.
Fifteen relief works and four test works are reported to have been opened in or
near the distressed area, and the total number employed on them at the end
of the period under report was 4,204. In addition to these a District Board
road running through Malud and Parikud employed a daily average number
of 436 persons, and the works undertaken by the Raja of Parikud were in
progress. Gratuitous relief was given to a daily average number of 75 persons.
Public health and the condition of cattle were good.

15. *Burdwan, Rajshahi, Dacca and Chittagong Divisions.*—There is nothing
of importance to report with regard to the Burdwan, Rajshahi and Dacca
Divisions. The Commissioner of Chittagong writes that the only district in his
Division which gives grounds for anxiety is Chittagong, but that in this district
there has been general rain varying from 2 to 4 inches which has done good.
The Commissioner reports that there is a tract along the sea coast in Satkania
and Banskali in which certain classes feel decided pressure. There is sufficient
rice in store, but it is stated that the means of purchasing it are wanting.
The Lieutenant-Governor does not think that there can be any widespread
distress in Chittagong, and trusts that such isolated cases of distress as
may occur will be adequately met by the measures which the local officers are
taking with funds locally raised or provided by the Provincial Committee of
the Indian Famine Charitable Relief Fund.

* The figures in columns 3 to 5 for Champaran include 73 miles of the proposed Railway from Bairaunia to Bagaha, which would give employment to about 120 persons for three months.

No. 812F.G., dated Bankipore, the 22nd March 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith, for the information of the Lieutenant-Governor, my half-monthly famine report under sections 13 and 24 of the Famine Code. The period dealt with consists of the two weeks ending the 6th and 13th March 1897.

PART I.—INTRODUCTION.

2. I have not been on tour since my last report was despatched, as no tract seemed to call for particular attention, except the north of Saran, and I was unable to arrange a tour with the Collector in that subdivision before he had to return to head-quarters to compile his report.

PART II.—DISTRICT REPORTS.

3. *Patna.*—Very little need be said about this district, as it still remains in good case. Some damage from caterpillars is reported, and there are complaints about the produce of the poppy. These complaints are made every year and deserve no particular attention.

4. In food-grain traffic there has been a rise in exports, imports remaining about the same. The figures for both rail and river traffic are 53,310 maunds against 45,490, and 44,091 maunds against 45,466. Most of the imports are rice (34,377 maunds), much of it from the Burdwan Division by rail and from Goalundo by steamer. Of the exports, "grain and pulses" accounted for 38,625 maunds, which went not only westward to the North-Western Provinces, but also down to Howrah. The rice imported from Calcutta stations amounted to 10,225 maunds.

5. Orders will be issued on the point raised by the Collector as to the calculation of average grain-doles.

6. *Gaya.*—The reports from this district continue to be most satisfactory. The *rabi* fully answers expectations, and the price of the early pulses and cereals is falling, rice being a little more expensive, partly, no doubt, on account of exports to Palamau.

7. The volume of food-grain traffic by rail has fallen off, the obvious result of a good local harvest. Imports were 3,711 maunds against 9,483, and exports 1,206 maunds against 1,082. The balance in favour of the district is thus 2,505 maunds against 8,401. Most of the imports were rice (2,580 maunds), of which 747 maunds came from Howrah, being Burma rice for re-exportation to Palamau: to that district 979 maunds of Rangoon rice were exported by road against 668 maunds in the preceding fortnight.

8. The three kitchens along the Grand Trunk Road at Kusa, Madanpur and Aurangabad continued to give useful relief, and as a fourth has now been added at Bara Chatti, in the extreme south-east corner of the district, the provision for needy travellers is ample.

9. The Collector is satisfied that his arrangements for the distribution of charitable relief are complete, and that no cases of indigence are likely to be overlooked. In this district, as in Patna and in Shahabad, outside the Bhabua subdivision, there should be little or no need for a grant from the Provincial Committee of the Relief Fund. In the midst of such good prospects and excellent crops local charity should be sufficient to meet all demands, and should be required to do so.

10. *Shahabad.*—In this district there has been a considerable increase in the number on relief works, and a smaller advance in that of those receiving gratuitous relief; but this was expected, and the advance has, in fact, been less than was anticipated.

11. The area between the plateau and the Sone, reported last time to be under observation, has now been thoroughly inspected, and has been classed as not requiring relief for the present, though it will need assistance later on in the summer.

12. The harvesting of the *rabi* is in full swing all over the district, but it is now reported that the outturn in the Bhabua subdivision is poor, and that it will be less than half an average crop: in the other subdivisions prospects are much better. Prices remain steady.

13. As compared with the previous fortnight, there has been a small falling off in the imports of food-grains and a large increase in the exports, the former being 21,507 maunds as against 23,702 maunds, and the latter 18,058 maunds as against 9,470 maunds: the balance in favour of the district is thus 3,449 maunds against 14,232 maunds. The whole of the imports except 8 maunds was rice, and of the exports the greater part was either gram and pulses (7,560 maunds) or wheat (6,581 maunds): as the new wheat is hardly in yet, it is clear that the *banias* are unloading their old stocks on the market in anticipation of a good *rabi*.

14. The numbers on receipt of relief and the result of the work done is set forth in the following table:—

Week ending.--	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wage, irrespective of task.	Gratuitous relief, including dependants.	Total.		
1	2	3	4	5	6	7	8
20th February 1897	4	628	209	9,425	10,262	c. ft. 50.5	Rs. A. P. 2 3 9
27th " "	4	767	78	10,462	11,297	51.4	2 2 10
6th March " "	5	1,357	113	8,973	10,443	47	2 7 6
13th " "	6	2,392	181	11,814	14,390	44	2 10 1

Turning first to relief works, it will be seen that there were six open at the end of the fortnight as against four at the beginning of it. The average daily number of male units on task-work has risen steadily, and so has the number of those on daily wage. In the last week the proportion of the latter to all those on relief works was 7.1 per cent. The average daily outturn fell to 44 feet, and the cost per 1,000 cubic feet rose to Rs. 2-10-1. Both these are reasonable figures, and the variations from the figures returned at the end of the previous fortnight are doubtless due to the greater numbers and to the inexperience of the new comers. The Collector reports that he inspected three relief works and found all correct. He complains of the comparatively large number of women and children on the works, the cause of which appears to be that which operates in Saran also, *i.e.*, the absence of the adult males in search of work elsewhere, and he has rightly judged that the way to meet the difficulty is to take up tanks as relief works rather than roads.

15. The number of persons on gratuitous relief has not greatly increased, and indeed it fell during the first week of the fortnight. As I foresaw would be the case as soon as more relief works were opened, the number of persons in receipt of gratuitous relief in the neighbourhood fell both absolutely and relatively; and in the last week of the fortnight, in every 100 persons receiving relief, 82 were on charitable relief and 18 on relief works: in the last week of the previous fortnight the figures were 91 and 9. As time passes, the disproportion will be still further reduced, I trust, as the lists are checked and weeded.

16. The poor-houses and kitchens along the Grand Trunk Road and at Arrah are still doing good work. Form 6 shows that in the first week an average of 490, and in the second an average of 386, persons were fed daily: these figures do not include those for the Delhi poor-house. The average value of the daily dole was 1 anna, which is rather high: it has not been stated on what basis it was fixed. I have in a separate communication warned the Collector that outside the Bhabua subdivision charitable relief, if given at all, should be given on the most limited scale; the district as a whole is well off, and each village must, as usual, support its own poor.

17. *Saran*.—The report from this district discloses merely a development of existing conditions. In the more fortunate tracts the *rabi* has proved a fine crop: in the rice villages the distress of the people is on the increase.

18. In *Sewan* the *rabi* harvest has employed labour to such an extent that several works have been closed. In the *Gopalganj* and *Sadar* subdivisions, as has before been stated, the good and bad areas are greatly intermingled. Mr. Earle is so much impressed by this fact that he is having crop statements prepared, circle and circle and village by village, so as to be able to focus his attention not only on the works tracts but on the worst villages.

19. As a result of the good *rabi* crop, the prices of wheat, rahar and barley are falling; so much so that the Collector has been able to alter his basis of calculation for the wage on relief works, and, instead of 10 seers all round, to take 12 seers (barley) in the *Sadar* subdivision, and 13 seers (Indian-corn) in the other two. I am surprised to find the latter reported so cheap, for it was selling at less than 10 seers in parts of *Gopalganj* at the end of December, and a similar fall is not reported elsewhere.

20. There has been some check in the food-grain traffic, as was to be expected with the *rabi* coming in. The total reported imports by road, river and rail were 83,129 maunds against 90,491, and the exports 3,829 maunds against 7,365: the balance in favour of the district is therefore 79,300 maunds against 83,126. Out of the grain imported by rail, viz., 77,728 maunds, as much as 67,592 was rice, and out of this total more than half, i.e., 35,870 maunds, came from *Howrah*.

21. As regards relief works and gratuitous relief, I give the following comparative table as usual:—

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wage, irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
1897.							
<i>A.—Under the Collector.</i>							
20th February	8,408	1,141	14,815	23,864	31	2 13 0
27th " ...	34	7,599	1,141	14,484	23,174(a)	38	2 6 9

13th " ...	36	9,160	929	16,628	26,717	38	2 11 10½
<i>B.—Hutwa Raj.</i>							
20th February	3,963	683	668	4,314	34.3	3 4 0
27th " ...	10	2,938	1,240	668	4,846	34.3	3 5 9
6th March	3,020	854(b)	3,874	32	3 7 9
13th " ...	10	3,130	733	614	4,377	28	3 14 0

(a) Besides these there were two major works under Public Works Department agency, with a daily average of 484 task-workers and 1,046 on daily wage, irrespective of task.

(b) Figures not reported.

22. Turning first to task-work, it will be seen that the numbers are slightly rising. Including in *Gopalganj* the relief workers on the *Hutwa* works, the total average daily attendance for the last week of the fortnight was 12,290 against 10,537 in the last week of the preceding fortnight. It has been stated above that that there has been a great falling off in *Siwan*, and this will be clear from the figures in the margin, which are those for the average daily number of male units on relief works under both Civil and Public Works Department agency in each subdivision for each of the last two weeks. It is clear that the Collector is perfectly right in saying that while distress is increasing in *Gopalganj*, it is much less in *Siwan*.

SUBDIVISION.	Week ending—	
	6th March.	13th March.
<i>Sadar</i> ...	1,249	1,621
<i>Siwan</i> ...	1,884	1,396
<i>Gopalganj</i> ..	8,559	9,273
Total ..	11,692	12,290

23. The daily outturn is good in the Government works, but has fallen off a little in those under the Hutwa Raj. The cost per 1,000 cubic feet is satisfactory in the former, and is not excessive in the latter. Mr. Earle, however, has found reason to doubt the measurements in some cases, and is taking steps to prevent this recurring as far as possible.

24. The numbers of persons on daily wage, irrespective of task, is kept within reasonable limits; the Collector explains that many of these are people who are engaged in baling out tanks.

25. Gratuitous relief remains high; but the remarks on Mr. Earle's report show that the result of his observations and enquiries is not that it is overdone, but that in some places it has not gone far enough. He has appointed four native Assistant Superintendents of charges on Rs. 100 a month to aid the Charge Superintendents in the Gopalganj subdivision in the supervision of their circle officers. As the charges are very large and all the Charge Superintendents somewhat inexperienced, I have agreed to the proposal as a temporary measure. The services of these assistants will be dispensed with as soon as possible.

26. The poor-houses are thinly attended, as it is clear that beggars can do better for themselves outside at this time of year when the *rabi* is coming in.

27. Some advances are being taken for village improvements under the specially favourable terms sanctioned by Government: this is almost the only district where the proposal has been taken up.

28. *Champaran*.—The prominent feature in the return for this district for the past fortnight is an apparent advance of 38 per cent. in the number of adult units relieved in all ways, but the Collector shows that the figures are fallacious and the advance apparent only.

29. The harvesting of the *rabi* has not yet commenced generally throughout this district, as the season here is always a good deal behind that of other districts in the Division, and accordingly harvest operations have not yet had any appreciable effect on the numbers seeking relief.

30. Prices are fairly steady, but those of common rice and *makai* have risen slightly: there has been a rise at Bagaha, which I am sorry to see.

31. In food-grain traffic there has been a still further development, the rail-borne imports having been 18,390 maunds against 14,400 and the exports 387 maunds against 786, so that the balance in favour of the district was 18,003 maunds against 13,614. Of the 18,390 maunds of imports, 11,919 were rice, of which 10,240, all consigned to Bettiah, came from Howrah. It is reported that 15,341 maunds of food-grains were registered as imported from Nepal, and as this probably went for the most part to Chainpattia, it will serve to maintain the stocks in the Hardih and Ramnagar charges.

32. The following statement gives the principal statistics of relief for the fortnight:—

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wage, irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
						c ft.	Rs. A. P.
20th February 1897	...	79,663	4,058	29,395	113,106	22½	4 0 3
27th " "	66	70,132	4,034	29,575	103,741	24	3 14 8
6th March " "	...	84,207	5,391	37,473	172,071	24	3 11 8
13th " "	78	92,654	5,219	45,422	143,295	27	3 8 4

The number of works open at the end of the fortnight was 78, of which 60 were under the Collector, employing 84,938 male units a day, and 18 under the Public Works Department, employing about 12,935: of the whole number 50

were tanks. From the figures given for relief works, it would seem that there has been a considerable increase in the daily average attendance during the fortnight under review, but Mr. Macpherson shows that this is fallacious, and that in fact there have been large errors in returns from the Bagaha and South Bettiah charges; it is therefore useless to compare the figures of attendance in this and the previous fortnight; proper orders will be passed. Private relief works employed an average of 640 male units a day during the fortnight.

33. As regards outturn and cost per 1,000 cubic feet, the former has risen and the latter fallen during the fortnight. A reference to Form No. 7 shows that the outturn on Public Works Department works, which are mostly roads, was better than that on Civil Agency works, which were nearly all tanks.

34. The remarks made in Mr. Macpherson's 17th paragraph have my entire support. It is a great fault in forms 5 and 19 of the Famine Code that they have no totals for classes. I have already prepared a circular prescribing certain modifications of these forms without altering the headings, and I propose to address Government on the subject of altering the latter, with the object of simplifying the forms and making them more useful.

35. The numbers on gratuitous relief are now a good deal higher than they have been before, and the Collector seems to think that, as soon as the gratuitous relief lists have been completely checked (which should be during the current fortnight), it will be possible to reduce the numbers again; moreover, there is some doubt as to the manner in which the numbers have been calculated. Taking the figures as they stand, however, the percentage of persons on gratuitous relief to all those relieved was 31·69 in the last week of the fortnight as against 28·5 in the week ending 27th February and 6·01 for the week ending 30th January. It has been stated previously in these reports that the circle organisation in Champaran was developed rather later than elsewhere. The daily dole is about right, being a little over 9 pies a day.

36. Four poor-houses were open at the close of the fortnight, one of them being that at Bettiah, which was taken over from the Raj officials. The daily average number of inmates of all poor-houses was 332 for the second week of the fortnight, of whom 136 were at Bettiah. When the Lieutenant-Governor visited this place the number present was 760 and the daily average for last fortnight was 650; the Collector will be asked what has become of the balance of about 500 persons. The average daily attendance at the Motihari poor-house has risen from 79 to 117. The kitchens in the Hardia thana referred to in paragraph 39 of my last report fed about 477 persons a day.

37. *Muzaffarpur*.—In this district, as in others, the harvesting of the *rabi* has arrested the progress of distress and has prevented any large increase in the number on relief works, while the total in receipt of relief of all kinds has fallen slightly. The Collector has been on tour in the Sitamarhi subdivision and reports that the condition of the people appears to be good.

38. There has been no change in the distressed area, but in order to be prepared for the rapid increase in the numbers seeking relief, which may be expected in April and May, Mr. Hare has, with my approval, appointed two more Charge Superintendents and one Assistant Charge Superintendent. He has also appointed paid circle officers in some of the planters' *ashats*, since it has been found here, as in Champaran, that many of these gentlemen have not the time to look minutely into the administration of gratuitous relief, though their services in the way of general supervision are very valuable. Mr. Hare has asked for still more Charge Superintendents, and his proposals are being separately dealt with.

39. The *rabi* in the Sadar and Hajipur subdivisions is said to be very good, while in Sitamarhi it is fair, but the area sown is short.

40. Prices are generally stationary with a tendency to fall in those of the early *rabi* crops except at Sitamarhi, where the Collector reports that "every food grain, except wheat, has risen in price, the rise in the case of *rahar* and *marua* being $1\frac{1}{2}$ seers. Wheat has fallen by half a seer." This has caused Mr. Hare some anxiety, and he has asked the Subdivisional Officer to stimulate the local merchants to import. I will address the Collector separately on the subject. So far as can be gathered from the fortnightly statement of imports and exports, at first the exports from stations in the subdivision largely exceeded the imports, the grain being chiefly rice, mostly from Nepal; since the beginning of January, however, imports have been better and exports have fallen off.

64. There is again an advance in the numbers on gratuitous relief, though it is much less than in the previous fortnight. The advance is most marked in Champaran, and there is an extraordinary falling off in Muzaffarpur; both these points are noticed in their proper place above. The ratio of adult units on gratuitous relief to the total of units relieved in the last week is as follows:—Shahabad 82·09, Saran 55·12, Champaran 31·69, Muzaffarpur 49·79, Darbhanga 42·79: whole Division 41·73. The dole given is now no longer high anywhere, but it is highest in Shahabad.

65. Appendix A gives the expenditure to date so far as it can be gathered from the district statements. The total expenditure to the 13th March was Rs. 13,60,857, of which Rs. 3,43,504 were expended in the fortnight under review. It will be observed that the cost of establishments is not shown, for it is obvious that the Rs. 2,419 in column 13 must refer to contingencies alone. Darbhanga still stands first with more than 5½ lakhs, and Champaran is only a quarter of a lakh behind.

66. The process of taking over works by the Public Works Department has continued, and from the district reports it appears that at the end of the period under report the figures were as follows:—*Works under Public Works Department Agency*.—Saran 2, Champaran 18, Muzaffarpur 8, Darbhanga 35: total 63. *Civil Agency works*.—Shahabad 6, Saran 4 (including Hutwa Raj), Champaran 60, Muzaffarpur 54, Darbhanga 90: total 254. Some of the officers of Royal Engineers, detailed for duty in North Bihar, joined their appointments during the fortnight just past. The five military officers whose services have been asked from the Government of India are daily expected.

67. The usual statements are appended.

APPENDIX A.

District.	RELIEF WORKS.					GRATUITOUS RELIEF.										MISCELLANEOUS.				Total
	Paid for task-work.	Daily wage, irrespective of task.	Dependents under sections 83 and 84.	Total of columns 3, 5 and 6.	Poor-houses, &c.	Relief of artisans.	Relief by grain-doles.	Relief by money-doles.	Kitchens.	Miscellaneous charitable relief.	Total of columns 6 to 11.	Establishment and contingencies.	Tools and plant.	Cash and stores.	Bounties for digging wells. PATNA COMMR.'S OFFICE;
BANKPORE,
The 22nd March 1897.

J. A. BOURDILLON,
Commissioner.

No. 298F., dated Bankipore, the 17th March 1897.

From—T. INGLIS, Esq., Collector of Patna,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit the following report under section 24 of the Bengal Famine Code for the first half of March 1897.

2. The figures in it relate to the two weeks ending on 6th and 13th idem.

3. SECTION 24 (1).—The area affected and arrangements of relief circles remain unchanged.

4. SECTION 24 (2) (a): *General state of the affected tracts, &c*—I have nothing new to chronicle. The slight rise in the price of food-grains presses the same classes as I have referred to in my previous reports. In the towns a number of people are being relieved, chiefly *pardanashin* women, their children, and men of a respectable class who are too old to work. The results of the working of the different sub-committees of the Charitable Relief Fund, however, could show that in some instances sufficient care is not taken in investigating cases, and that the obligation resting on relatives to maintain the poor members of the family is being transferred to that fund. The *rabi* harvest is being pushed forward and is nearing completion.

5. SECTION 24 (2) (b): *Crop prospects*—The *rabi* crop is nearly harvested from all quarters. I have received assurances of the damage done to *masur* and peas and other crops by caterpillars. In Patna City the same pest has attacked the potato crop, and the police have reduced their estimates, which I consider a very low one—6 to 10 annas or an average of 8 annas. It must be remembered that, except in the lowlying lands on the south of the city, most of the land is highly cultivated and the supply of water ample, and, but for the presence of caterpillars, I would have taken the crop as an average one. There is a universal complaint of the outturn of poppy. The capsules are said to be able to stand only three lancements. The season has been most favourable for poppy. The hot winds have not set in early as they did last year, and we have had slight rain on several occasions. Last year the outturn was 4½ seers per bigha, and this year the Sub-Deputy Opium Agent expects 5 seers of a produce valued at Rs. 30 per bigha. The mango crop will be, I fear, a very poor one, the rain in the second week of February having produced foliage and hindered the flowering of the trees. Sugarcane is being largely sown, also *china* (millet) in Bihar. The land is also being prepared for *bogaha* (broadcast) paddy.

6. SECTION 24 (2) (c): *Food stocks*.—These are sufficient. The cultivators are holding their stocks everywhere, and this has affected prices, especially in Bihar. The stock of *maka* (Indian-corn) and *marua* in that subdivision has been exhausted in the market. For some days these two crops and also barley were not to be obtained in the Marufganj market in Patna City. New barley is now coming in.

7. SECTION 24 (2) (d): *Importation and exportation of food-grains*.—The figures for the two weeks are as follows:—

				Mds.
Imports	44,091
Exports	53,310
			Net export	9,219

The chief import continues to be rice, which accounts for 34,377 maunds, against an export of 8,763 maunds. The bulk of the exports come, under the head "Gram and pulses," which amounted to 38,625 maunds, the chief centre of the export trade being Mokameh.

Imports of rice by rail have come mostly from Kaniganj, 4,923 maunds, and Howrah, 9,855 maunds, besides smaller quantities from Burdwan, Sultanganj, and Ahmedpore. By steamer the imports are chiefly pulses from Goalundo and Indian-corn from Khagaria.

On the export side we have sent gram and pulses to Howrah, Allahabad, Cawnpore, Agra and Benares by rail and rice to Dobri by steamer.

The following quantities were imported from the stations named in the Commissioner's Famine Circular No. 15 of 1897, paragraph 3:—

		Rice.	Paddy.
		Mds.	Mds.
Howrah	...	9,855	374
Kidderpore	...	370	Nil.
Calcutta
Sealdah

8. SECTION 24 (2) (e): *Rainfall*.—None has been measured. There were a few drops one day in connection with a dust-storm, but these did not lay the dust, and were nowhere measured.

9. SECTION 24 (2) (f): *Public health*.—Continues good. A few cases of small-pox in Dinapore town and a few villages in the Bihar subdivision have been reported.

10. SECTION 24 (2) (g): *Emigrations or immigrations of famished people*.—Nil. The Sub-divisional Officer reports that an unusual number of Jains from Rajputana and the Deccan are visiting the shrines at Puri and Rajgir. This may be due to fear of the plague.

11. SECTION 24 (2) (h): *Condition of cattle*.—Continues fair. The cattle are turned into the *rabi* fields as they are cleared of the crops. Some anxiety is reported from Barh on account of anticipated scarcity of water.

12. SECTION 24 (2) (i): *Prices*.—Prices have slightly risen in different parts of the district, but the average prices remain practically unchanged, except in the case of *arhar*

(rahar) and *marua*. In the former case, the rise can only be due to the exhaustion of the stocks of old grain and the non-arrival of the new crops, which has been excellent. In the case of *marua* the stock in the market is becoming exhausted.

13. SECTION 24 (3): *Number of relief works open, &c.*—Nil.

Arrangements are nearly completed for starting the annual earthwork repairs on the District Board roads from the 1st proximo. These will be done departmentally with temporary hands. Several roads will be grouped in one circle and placed under one man, who will take them up in turn. The work is expected to extend over about two months, and should meet the case of the labouring classes.

14. SECTION 24 (4): *Number of poor-houses open, &c.*—The poor-house was opened at Bankipore on the 1st. The number of inmates on the 13th instant was 70. There have been three deaths, all cases of persons who came in bad health. The inmates complain of the insufficiency of the ration provided under the Famine Code. Clothes have been provided by the Charitable Relief Fund, and other comforts provided from funds presented by the visitors to the institution. Besides these, a number of resting stations have been provided along the pilgrim route from Baidyanath, and the police and Government tahsil offices supplied with funds to deal with cases of distress.

15. SECTION 24 (5): *Organization for employment of artisans, &c.*—Nil.

16. SECTION 24 (6): *Organization for the distribution of the grain-doles, &c.*—These have practically ceased, except in the case of beggars and the poor of the lowest classes. All other cases have been or are being transferred to the Charitable Relief Fund, who generally distribute relief through one of their members.

17. SECTION 24 (7): *Relief in kitchens.*—Nil.

18. SECTION 24 (8): *Number of persons to whom loans, &c.*—Under the Land Improvement Loans Act Rs. 700 has been sanctioned to three persons—average Rs. 233.

Under the Agriculturists Loans Act Rs. 200 has been sanctioned for three persons—average Rs. 66.

The security taken has been either landed property or the cultivators' holdings. None have come forward to take loans on a joint security.

The majority of applications recently refused by me have been from persons who are well-to-do and wish to get money on the easy terms offered by Government and for objects which do not come under the scope of the Acts. I have been strict in granting loans, as I understand Government would prefer advances being made when the need for them is greater.

19. SECTION 24 (g): *Financial Statement.*—The financial statement is appended. The allotments made to police stations for meeting urgent cases of distress were omitted in the previous returns. These have been included in the present statement. Consequently, the balance shown in the previous statement will not tally with the opening balance of the present fortnight.

20. SECTION 24 (10). Nothing new to report.

21. SECTION 24 (11). No change.

22. *Payment of postal money-orders.*—No report received.

APPENDICES.

The following statements are appended:—

- (1) Form 6 for each week separately.
- (2) Famine Statement E, Form 7.
- (3) List of prices.
- (4) Export and import statements, Forms 8 and 9.
- (5) Abstract and comparative statement of exports and imports.

With regard to Form 6, I would note that different officers prepare them in different ways. Difficulty is greatly felt in complying with the instructions at foot of the form for fillings in columns 2, 3, 4, 5, particularly in cases of occasional relief. Cases that are relieved from week to week, or at least for the week as a whole, can conveniently be shown in averages; but others, relieved for a few days in the week or once for all, cannot be conveniently shown in the return in averages. I would ask how such cases should be dealt with. For the present I have arranged that total figures should be shown, e.g., one man relieved for seven days will be shown in Form 6 as seven men. Similarly, two men relieved for five days will be shown as ten men.

The average dole in column 10 of Form 7 will then be arrived at by dividing the total cost of relief by the total adult number of persons relieved. Otherwise one man relieved for one day cannot be shown but in fractions in columns 2, 3, or 4 and 5.

23. *General.*—The fortnight under report calls for no special remarks. The strain of high prices is being felt, especially by the middle classes. The supply of labour for harvesting the *rabi* crop has been plentiful and the remuneration given in grain: a portion of the produce harvested has been cut down in places. The poor-house has not attracted large numbers, which shows that private charity has not failed. The Charitable Relief Committees are working slowly, except at Dinapore and Futwa, where the figures returned would seem to indicate too hasty action. At the same time these are centres in which the middle classes in reduced circumstances were expected to be found. When the *rabi* is harvested, the ordinary repair works on roads should meet the wants of the labouring classes. The pilgrims seem to me to have improved by their trip to Baidyanath, those returning looking in better condition than those I noticed going eastwards in the beginning of February.

41. The total imports for the whole district amounted to 53,595 maunds against 41,837 in the previous fortnight, and the exports were 2,946 maunds against 2,560: the balance in favour of the district was, therefore, 50,649 maunds against 39,277. Out of the total imports 38,944 maunds were rice, of which 11,670 maunds came from Howrah.

42. The following statement compares, as usual, some of the principal statistics of relief during the past and the previous fortnight:—

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wage, irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
1897.	.					c. ft	Rs. A. P.
20th February ...	46	16,918	1,915	20,744	38,977	69.39	1 3 11
27th " ...	48	18,668	1,067	48,230	67,963	64.15	1 5 5
6th March	17,272	1,503	23,368	42,143	55.39	1 8 5
13th " ...	62	18,264	2,052	20,151	40,467	50.7	1 10 3

It will be seen that the number of works has increased from 48 to 62, of which 54 were under Civil Agency: of the increase of 14, 9 were under Civil Agency and 5 under Public Works Department Agency.

43. Owing to the demands of the *rabi* harvest, the numbers on relief works have only slightly advanced, though more works have been opened, and Mr. Glass's tasks have been introduced: the falling off occurs in all three subdivisions. The average daily attendance of both task-workers and those on daily wage was 19,733 for the week ending 27th February and 20,316 for that ending 13th March: during the intervening week the numbers fell to 18,775. If to these we add the numbers of male units on the Darbhanga Raj relief works, viz., an average of 2,175, 3,306 and 2,762, we get for each of the three last weeks the following average daily number of male units on relief works—21,908, 22,081, and 23,078.

44. The average daily outturn per male unit has fallen steadily since the general introduction of Mr. Glass's tasks, but it still higher here than in most districts. As noticed in my last report, the proportion of adult males on relief works in this district is very large, and, contrary to my expectations, it is now larger than before. Excluding the Raj works, in the week ending 27th February, out of 134,292 persons on task-work, 73,191 were adult males, giving a percentage of 54.5: for the week ending 13th March the total number was 109,583, of whom 69,696 were adult males, equivalent to 63.6 per cent. With the fall in the outturn the cost per 1,000 cubic feet has slightly risen, but is still very low.

45. Mr. Hare records a protest against the reduction of the task to the level of Mr. Glass's standard, and urges that latitude should be given to the local officers to exact different tasks from workers of different calibre: his remarks will be found in paragraphs 23 and 24 of his report. I have from the first held the opinion that Mr. Glass's tasks err, if at all, on the side of leniency; but I have cordially accepted them as a fair average for the great majority of relief workers, and have always said that if they are generally executed we shall do exceedingly well. Mr. Hare's objections lead back in effect to the classifications prescribed by the Famine Code, which have been universally condemned as too elaborate for practice, as leading to uncertainty, and as asking too much of the discretion, the capacity, and, I may add, the honesty of the subordinate establishment. His further suggestions that the diggers should be graded, promoted, and paid monthly seem to me to be too elaborate and likely to break down in practice.

46. The numbers on gratuitous relief have fallen greatly during the fortnight; but the Collector has not discussed the variation either in his present or his previous report. The figures in column 5 of the above statement show a sudden rise in the figures for the week ending the 27th February, and an equally sudden fall in the succeeding week. I am inclined to think that the

figure 48,230 is wrong, but Mr. Hare's attention will be called to this matter. Apparently no gratuitous relief is administered by the Darbhanga Raj in this district except through the medium of poor-houses, but this will be verified by a reference to the Collector.

47. The daily number of persons in Government poor-houses was 318 against an average of 409 for the two previous weeks: the daily average for the fortnight in the Raj poor-house at Jabdi was 165 against 288.

48. The Collector's remarks in paragraph 31 as to the propriety of giving loans to cultivators will be fully dealt with elsewhere. I have called for the opinions of the Collectors of this Division on the correspondence forwarded with Government order No. 716Fam. of the 12th instant, and will report to Government when those opinions are received.

49. *Darbhanga*.—In this district the feature of the fortnight under report (if the figures are correct) has been a sensible rise in the numbers on relief works and in receipt of gratuitous relief during the first week, followed by a fall again during the second week. The factor which has produced these changes is the cutting of the *rabi*, which has taken off a large number of the labouring classes. In other respects there has been very little change: the *rabi* is good, and the Collector adheres to his former estimates; prices are stationary or shows a tendency to fall, and the public health is excellent.

50. In respect of food-grain traffic by rail, there has been a rise in imports from 36,965 to 52,803 maunds, and a fall in exports from 10,139 to 3,904 maunds, so that the balance in favour of the district was 48,899 maunds against 26,826. This rise is remarkable; for, with a promising *rabi* crop coming to perfection, I shall have expected that, as in Gaya, there would have been stagnation, or an advance in exports as in Shahabad. Of the imports, by far the greater portion was rice (20,649 maunds), of which 4,542 maunds came from Howrah: Darbhanga itself took just half the imports.

51. The following table gives the usual comparative figures for relief works and gratuitous relief during the past and the previous fortnight:—

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task-work.	Daily wages, irrespective of task.	Gratuitous relief, including dependents.	Total.		
1	2	3	4	5	6	7	8
29th February...	...	1,01,298	3,891	46,013	1,51,202	c. ft. 32·5	Rs. A. P. 2 11 7
27th "...	91	53,635	2,409	52,052	1,18,096(a)	32·7	2 11 3
6th March...	...	73,258	6,124	51,690	1,30,972	26·6	2 15 3
13th "...	125	58,188	4,075	46,571	1,08,834	30·2	2 11 3

(a) Besides 13 works under the Public Works Department with about 13,000 workers.

The number of works open during the last week of the fortnight under review was 125, of which 90 were under Civil Agency and 35 under the Public Works Department. The figures for the two classes of work are given in Form No. 7.

52. Looking at the above statement first, it will be noticed that the numbers on task-work have fallen greatly during the last four weeks, that the numbers on daily wage, irrespective of task, have slightly increased, while those

Average daily number of male units on task-works in each subdivision in the week ending.

	February 10th.	February 27th.	March 6th.	March 13th.
1	2	3	4	5
Sadar	57,230	32,707	37,311	23,241
Bansattiwar	5,535	5,509	5,021	4,385
Madhubani	65,645	34,128	19,998	37,394
Total	1,28,410	72,344	62,330	65,020

on gratuitous relief have remained about the same. It is difficult to institute comparisons with confidence, as some of the figures for previous weeks were admittedly incomplete, but as subdivisional totals have now been given in Form 5 for Civil Agency works, it is easy to say where the variations have occurred; the marginal figures show that in the Sadar subdivision the numbers have remained low, while in Madhubani they have begun to rise again. The explanation is to be found in the attraction of the *rabi* harvest, and also in the number of private works open.

53. The average outturn per male unit is better again and is very fair. Mr. Carlyle has explained in his 23rd paragraph that the fall in the outturn in the week ending 6th March is due to the taking over of works by the Public Works Department, who either started large tanks with long lead and lift, or took over tanks from the Civil Agency, which had already progressed very far. The same causes explain the rise in the cost per 1,000 cubic feet and its fall again in the week ending 13th. A reference to Form 7 will show that apparently in both weeks the results on Civil Agency works were better than those in works under the Public Works Department, but Mr. Carlyle's remarks, already referred to, explain the circumstances and show that the apparently poorer result is justifiable.

54. The numbers on gratuitous relief are still very large, but they have fallen a good deal in the last fortnight: as more relief works are opened, it is expected that they will fall further still.

55. The figures for Raj relief works and gratuitous relief, said to be given on a separate statement, have not been received.

PART III.—CONCLUSION.

56. The period under report presents no striking features; the weather has been seasonable; the harvesting of the *rabi* has continued to draw labour away; and partly for this reason, partly because the subordinate establishment gain experience every day, and partly because the system of work has now finally been settled, the outturn of work and the rate of cost has been steadily improving.

57. Crop prospects continue excellent, and the *rabi* all round is likely to be better than it was in 1874. The estimate of the poppy remains high except in Sewan and Champaran.

58. Prices show no tendency to rise except in particular places. The rise in Sitamarhi is the most important of these; but this place, Bhabua in Shahabad, and Bagaha in Champaran, are being carefully watched. The *rabi* now coming into the market will certainly prevent prices from rising.

59. Traffic in food-grains has again been brisker, as the accompanying statement will show:—

DISTRICT.	IMPORTS.		EXPORTS.		EXCESS—I. OR E.	
	Fortnight ending 27th February 1897.	Fortnight ending 13th March 1897.	Fortnight ending 27th February 1897.	Fortnight ending 13th March 1897.	Fortnight ending 27th February 1897.	Fortnight ending 13th March 1897.

Total ..	2,62,344	2,77,227	76,892	63,640

The volume of trade has amounted to 3,60,867 maunds against 3,37,236 maunds, the imports being 2,77,227

DISTRICT.	FORTNIGHT ENDING—	
	27th February.	13th March.
1	2	3
	Mds.	Mds.
Patna	13,201	10,225
Gaya	752	745
Shahabad	1,980	1,499
Saran	20,584	35,870
Champaran	6,018	13,580
Muzaffarpur	1,682	11,670
Darbhanga	384	4,543
Total ...	44,580	78,32

maunds against 2,62,344 maunds. Every district, except Patna, as usual, shows an excess of imports over exports, and in all but Gaya and Saran the balance in favour of the district exceeded that of the fortnight before. This is most noticeable in Muzaffarpur and Darbhanga. The figures in the margin show how greatly the imports of rice from Howrah and Kidderpur have increased, the large advances in Champaran, Muzaffarpur and Darbhanga being particularly satisfactory. Some of the Burma rice imported into Saran is probably sent away

again by boat from Revilganj.

60. The statement below shows what percentage of the population in the distressed areas of each district was in receipt of relief of all kinds on the last day of the fortnight. The totals have been taken from the *Calcutta Gazette*: the figures for Muzaffarpur include 3,000 on account of the Darbhanga Raj relief works at Parihar:—

DISTRICT.	Estimated population of affected area.	Number in receipt of relief on the 13th March.	PERCENTAGE RECEIVING RELIEF ON THE—	
			27th February.	13th March.
1	2	3	4	5
Shahabad	371,824	17,863	1.6	4.8
Saran	1,352,598	88,377	2.86	2.83
Champaran	1,110,000	205,386	15.33	18.5
Muzaffarpur	1,660,000	51,990	1.85	3.13
Darbhangha	2,270,000	169,867	7.46	7.48
Total	6,764,422	483,483	6.13	7.14

61. The statement below compares as usual most of the relief statistics for each district for the past and the previous fortnight:—

DISTRICT.	FORTNIGHT ENDING 27TH FEBRUARY 1897.								FORTNIGHT ENDING 13TH MARCH 1897.							
	TASK-WORK.				DAILY WAGES, IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.		TASK-WORK.				DAILY WAGES, IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.	
	Average daily number of male units.	Work done by each per diem.	Wages earned by each per diem.	Cost of 1,000 cubic feet.	Average daily number of male units.	Daily wages earned by each. Total	170,411	32 6	1 5	2 11 5	10,993	137,459	138,712	28 4	1 3	2 13 3	13,381	139,801

Taking the Division as a whole, and the mean of the whole fortnight, it appears that there has been a slight advance in the numbers on task-work, daily wage, irrespective of task, and gratuitous relief.

62. Turning first to task-workers, it will appear that the daily number has increased nearly 2 per cent., the increase being relatively large in Shahabad, and apparently great in Champaran, though, as already explained in paragraph 32 above, this is probably fallacious: in Darbhanga there is a falling off. There has been some reduction in the average outturn of work, except in Champaran, where it is, as a fact, the lowest of all. The reasons for this change have been explained above in dealing with each district, where it has also been shown that the work in the second week was better than in the first. The cost per 1,000 cubic feet has risen *pari passu*. The wage earned per diem in all the districts is now fairly even.

63. The numbers on daily wage, irrespective of task, are not excessive: the ratio is 6.8 per cent. of the whole numbers on relief works.

T. INGLIS,
Collector.

No. 2411G., dated Gaya, the 16th March 1897.

From—H. SAVAGE, Esq., Collector of Gaya,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit famine report for the fortnight ending 18th March. The figures relate to the period under report with the exception of Statements 8 and 9, which are for the two weeks ending 6th March.

2. *Section 24 (1).*—No area is affected by famine.

3. *Section 24 (2).*—*Crop prospects.*—Harvesting of *rabi* crops is in progress, and a full average or 16-anna outturn is expected. Opium collections are approaching completion. The fortnight under report was favourable to the crop, and there was some improvement in the yield, which will probably not fall short of that of last year.

4. *Prices of food-grains.*—The subjoined Table (Appendix A) shows the prices of the principal food-grains for each subdivision. Prices of wheat, barley and gram have fallen, as new grain is coming into the market. The price of rice has, however, risen slightly.

5. *Importation or exportation of food-grains.*—The annexed Statements 8 and 9 show that the figures for import and export are both even less than those of the previous fortnight, imports being 3,711 maunds and exports 1,206 maunds, against 9,483 and 1,082 maunds respectively. The imports were chiefly rice (2,580 maunds): of this, 746 maunds were imported from Howrah. Rangoon rice mainly for export to Palamau. No rice was received from Calcutta, Sealdah and Kidderpore. One thousand and eleven maunds of gram and pulses were imported from the Patna and Monghyr districts. The chief articles exported by rail were wheat, paddy and rice. Three hundred and four maunds of paddy were exported to Darbhanga, and 256 maunds of rice to the Patna and Shahadad districts. Four hundred and eighty-eight maunds of wheat were also exported to the Patna district.

6. Nine hundred and seventy-nine maunds of Rangoon rice were exported by road from Gaya to Palamau during the period under report under the stimuli of the bounty of 8 annas on a maund sanctioned by Government.

7. *Rainfall.*—There was a fall of .02 inch at Jahanabad on the 11th instant and .05 at Aurangabad on the 10th.

8. *Public health.*—Continues good.

9. There was no noticeable emigration or immigration of famished people.

10. Condition of cattle is good.

11. *Section 24 (3).*—*Relief works.*—Nil.

12. *Section 24 (4).*—The cook-house at Kusa continues to supply with food daily an average number of 144 travellers, the quantity of grain consumed being rice 62 maunds, pulses 16 maunds, salt 2 maunds, and vegetables 4 maunds.

13. An average number of 98 and 42 travellers were respectively fed daily at Aurangabad and Madanpore kitchens at an average daily cost of Rs. 5 in the former and Rs. 2 in the latter.

14. Another kitchen has lately been opened at Barachatty, and now needy travellers are supplied free with cooked food at suitable places throughout the Grand Trunk Road in this district.

15. During the fortnight subordinate Charitable Relief Committees, in accordance with the scheme referred to in my last report, have been organised in many of the thanas and outposts, and the remainder will be organised before the close of the month when Gaya will have as perfect a system for charitable relief throughout the mufassal as it is possible to frame without paid agency. In the towns special arrangements have been made for house-to-house enquiry by members of the Central Committee or Sub-Committees formed in the towns, and it seems impossible any person in actual want can now remain unknown and unrelieved either in town or country.

16. The Marwaries of Gaya town continue to spend Rs. 5 a day on distribution of cooked food and uncooked grains to the poor and needy.

17. *Section 24 (5 to 7).*—Nil.

18. *Section 24 (8).*—No loan under the Agriculturists' Loans Act was given during the period under report. Rupees 15,650 were advanced under the Land Improvement Loans Act, the total amount advanced up to date during the current year being Rs. 9,038 under the former and Rs. 96,100 under the latter Act. The amount advanced under both Acts in the last year was Rs. 2,500 and Rs. 50,000 respectively.

19. *Section 24 (9).*—Financial Statements are blank.

GAYA COLLECTORATE,
The 15th March 1897.

H. SAVAGE,
Collector.

No. 98F., dated Arrah, the 17th March 1897.

From—J. WINDSOR, Esq., Collector of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my report under sections 13 and 24 of the Famine Code for the first half of the month of March 1897. The figures dealt with in this report relate to the weeks ending Saturday, the 6th and 13th March 1897.

Section 24 (1). Area affected.—The area affected remains the same as was given in my last fortnightly report.

In my last report I promised to give a full account of the area south of Akberpur, lying between the river Sone and the plateau, which has been under observation. This is a narrow strip of land with but little culturable land and thinly populated. In accordance with instructions issued by Mr. Marindin, the Local Board Sub-overseer opened a test relief work on the road south of Akberpur. He went all along the course of the road, but was only able to get 25 labourers to come to the work, and they only worked for one day. The area of this tract is 50 square-miles, with a population of 6,000. The class of people for whom the work is intended are now all engaged in cutting *rabi* crops, and they will find employment on that till the month of April; then *mahua* picking will commence, and will last till May. When this is over the labouring classes will have no work, and will be in want of relief. I have consequently ordered the Subdivisional Officer of Sasaram to close this work in the meantime, and to re-open it after two months or whenever there are reasons to think that the tract shows any sign of distress. I have at the same time instructed the Subdivisional Officer to keep a careful look out on the condition of the people, and to continue to notice the subject in his fortnightly reports. There is no anxiety at present about this area.

The arrangements of Charges and Circles in the affected area, as previously reported, remains unaltered. The three Charges of Ramgarhohund and Chainpur, and Bhabhua are fully manned and are subdivided into 17 Circles, but hitherto the plateau has been managed by the head-constable of the Adhaura outpost. It, however, appeared that the condition of the plateau required a more organized system of relief than that of distribution by the police, and I have accordingly appointed Ram Dhyani Lal, Tahsildar of the Banskati mahal, who has knowledge of this plateau, to be the Circle officer. He will join shortly and take up the work. I have asked the Subdivisional Officer to watch very carefully the relief operations here, so that more Circle officers may be sent, if necessary. There is no stock of grains on the plateau, and the circumstances there require that large quantities should be imported at one time. I have separately addressed you on this subject. The Subdivisional Officer, who has visited this tract during the last fortnight, reports that the condition of the people there is not at all good. The villages are small with but little cultivation, principally *धान*, which was a total failure. The *rabi* there is fair—a 10-anna crop on the land which was sown, which was, however, only a small portion of the culturable area. The people of this tract depend on fruit, &c., in ordinary years, to eke out their supply of grain food, but this year, owing to the failure of rice crop, fruits are now forming their staple food. As regards the Khotas plateau, it is not anticipated that relief will be required till May, but I have asked Mr. Stephenson to look into the condition of the people there, and have requested the Subdivisional Officer of Sasaram to render every assistance he can.

2. The general condition of the people in other parts of the affected area, besides Adhaura, is much the same as reported previously. The general health of this area is good, but cases of small-pox are reported from Ramgarh and Chard in Bhabhua Subdivision, and from Chinari in Sasaram. Fever is reported from Adhaura.

Rabi cutting is going on throughout the district, and it provides work for a great number of men. In Bhabhua Subdivision it is nearly finished, and this partially accounts for the greater number of labourers on relief works. The poppy is almost everywhere good, and is estimated by the Subdivisional Officer of Bhabhua at 12 to 14 annas. The outturn of *rabi* is estimated in this Subdivision by the Charge Superintendents at 2 to 4 annas in the south, where caterpillars have done great damage, and from 8 to 10 annas in the north, the area under *rabi* is less this year than usual, and the outturn is estimated over the whole area at about 6 or 7 annas. The Subdivisional Officer, Bhabhua, has supplied me with full notes on this subject, and from what I saw myself in my tour last week, I am of opinion that the above estimate is approximately correct. The condition of the standing crop in the Sadar Subdivision is reported favourable, and the outturn is estimated at 12 annas. The area sown this year is evidently greater than last year. Irrigation and rainfall have done much good to the crops. The *khesari* crop was very much damaged by caterpillars in all parts of this Subdivision, especially in the jurisdiction of Pero.

In Buxar subdivision the outturn of the *rabi* crops is good, varying from 6 to 16 annas, and the average outturn is estimated by the Subdivisional Officer at 11 annas. South of the railway line the crops were aided by canal irrigation, but in spite of this the outturn there was not so good as in the diara lands north of the line.

The Subdivisional Officer of Sasaram has not submitted any report on this point, but from the reports which I have received from the police, it appears that the outturn is 10 annas on the whole. The crop here was affected partly by late rainfall and partly by caterpillars. The short review of the outturn of the *rabi* crops shews that these crops have added largely to the food-stock of the district. In respect of the affected area, this is only a considerable factor in the Ramgarh Charge, and accounts for the relatively smaller number of people on gratuitous relief there than in the other two charges. South of the Grand Trunk Road there was but little *rabi* grown, and the outturn was poor. A slight temporary relief has been afforded by the cutting of what crop there was, but the stock of the harvest was not sufficient to permanently improve the condition of the people.

The figures of imports and exports received from the Traffic Superintendent are appended to the report in Forms Nos. 8 and 9. The total imports during the fortnight amounted to 21,507 maunds and exports to 18,058 maunds, leaving a surplus of 3,449 maunds in the district. The increase in exports over the figures for last fortnight is due to the export of

rubis crops just harvested. As has been remarked in previous reports, the importation into Bhabhua is from Sasaram, and also largely *via* Zamania railway station, so that it is not shown in these Returns.

In two of the Charges of affected area grain is supplied by contractors at 9 seers to the rupee, delivered at fixed places, but in the Bhabhua Charge rice is purchased from local Banias at 8 to 8½ seers. The Subdivisional Officer has now arranged with two contractors jointly, Babu Makund Sahu and Babu Kani Ram, to supply the Bhabhua Charge at 9 seers. They will import rice straight from Burma. In all probability they will be able to continue to supply rice at this rate, as the Calcutta rate will not vary much, and the stocks in Burma are ample.

There has been no rain during the fortnight, but at the beginning of last week it looked very threatening, but the clouds luckily passed off without rain, which would have damaged the crops severely. Prices of food-grains have been practically stationary during the fortnight under report.

There is always a stream of travellers up and down the Grand Trunk Road, and this year there has been some increase owing to the scarcity up-country. There has been a very large emigration of men from the Bhabhua Subdivision to the east in search of work. Every year this emigration takes place, but it has doubtless been intensified this year by the approach of distress. It may also be noted that in ordinary years very little attention is paid to this matter, while this year the subject has been forcibly impressed upon our notice, and it is found that the number of women and children left by their husbands and fathers is very large indeed. It is almost impossible to obtain figures, nor could much reliance be placed upon what figures were given. It remains to be seen whether these men will return home when the *rubis* harvest is over. If they do, the difficult problem of finding work for all the women and children, who can carry but not dig, will be more easily soluble. In Sabar outpost in the Sadar Subdivision, about 150 men are reported to have gone to Eastern Bengal in search of employment. Some needy persons have come from Ballia and Azamgarh districts to the Dumraon thana jurisdiction, and find employment in the *rubis* harvest. When this is over they will return to their respective districts.

The condition of the cattle on the plains in Bhabhua Subdivision is getting worse. Fodder is short, and there is very little straw from the *rubis*. The water-supply is also running out, and there is complaint of scarcity of water. The Subdivisional Officer of Bhabhua has been asked to press on enquires into applications under the relaxed rules of the Land Improvement Act. From other parts of the district this complaint is not heard.

3. The four relief works, as noted in my last report, are still in progress, and two new ones, viz., Hata-Karumnasa road and the Adhaura tank, have been opened during the fortnight under report. The number of male units employed on the relief works during the second week was 14,352, and in the first week 8,144, while those on daily wages, irrespective of task, was 1,107 in the second and 679 in the first. The number of labourers employed on the last day of the period was, men 1,418, women 1,503 and children 873, or 3,794 in all. During my tour in Bhabhua last week, I inspected three of the relief works. The condition of the labourers was good, and I heard no complaints. The tasks fixed and the rates of wages paid were correct. The proportion of persons employed on daily wages, irrespective of task, has decreased on the whole, and all dependents receive gratuitous relief in their villages, except small children, who are brought to the works as being too young to be left at home. It is not necessary, at any rate at present, to establish kitchens for the children. It is not necessary to comment on the figures in Form 7. The outturn of work and earnings may be called satisfactory. The District Engineer has prepared a complete programme of relief works in progress and in project, copy of which is annexed. The Hata-Dhanouti road will be started at once; this will give six road works in progress, as well as tanks. The Adhaura tank is not under the District Engineer.

The Sabar tank is in progress. It employed about 300 to 400 labourers during the period. The cost will be paid by the Sabar ward, and I am applying for a loan to be sanctioned under the relaxed rules of the Land Improvement Act. The tank at Bhabhua is being deepened by Babu Makund Sahu at his own expense. There are about 140 people working on it.

There are three other tanks in the Bhabhua Subdivision, for the excavation of which loans have been taken, but no information has been furnished about them. The great difficulty on relief work is the preponderance of women over men, which means that a large number of women have to be taken on gratuitous relief, because there are no diggers for them to carry for on the works. If this difficulty is not removed by the return of men who have emigrated, tank work will be required to be started, as a greater proportion of women over men can be employed on tank excavation than on road work. On the Moghalsarai-Gaya Railway 5,828 men, women and children were engaged during the week ending 6th March, and 6,029 during the week ending 13th March.

4. *Poor-houses and kitchens*.—The poor-houses at Bhabhua, Sasaram and Arrah, and kitchens at Dehri, Jahanabad, Mohania and Durgaoti, continue distributing cooked food to travellers and needy persons. In the poor-houses, residence is required. Travellers are not allowed to remain at the kitchens on the Grand Trunk Road, unless they are physically unable to proceed, when they rest till they are sufficiently restored to continue their journey. The total numbers of persons relieved during the period are given in form No. 6 appended to this report. The poor-house at Arrah was opened on the 1st instant. Very few persons are now in it, but it is expected that the number will increase in the course of the next month.

5. There is no organization for employment of artisans, &c., but the Subdivisional Officer of Bhabhua has now taken steps to send some raw cotton and grass for string, to be made up by persons receiving gratuitous relief.

I enclose, herewith, a copy of my report on the action taken by the Charitable Relief Fund Committee. The work is just beginning, and no Circle members are yet appointed. Subscriptions are coming in.

6. All gratuitous relief is given in grain doles. From Form No. 6 appended to this report, it would appear that the average number of persons receiving gratuitous relief during the fortnight was 10,521 in the first week and 13,039 in the second. The increase is partly due to the finishing of the *ra'is* cutting, and partly to further visiting of the villages, especially in the Itamgarh Charge, where the number has increased from 800 to 2,000. The Charge Superintendents are still busy checking the lists of the Circle officers. This may in some degree reduce the number, but on the other hand other cases will be discovered by further enquiries, and distress generally will become more widely felt, so that I cannot but anticipate that the number on gratuitous relief will continue to rise.

7. There were 866 applications received in Bhabhua for agricultural loans, and 163 under the relaxed rules of the Land Improvement Act, which have been given to Circle officers for enquiry. Rupees 250 have been advanced in this Subdivision under the new rules. Rupees 5,000 sanctioned under the new rules have been allotted entirely to Bhabhua. A sum of Rs 234 has been advanced in Sasaram under the Agriculturists Loans Act. The figures for money-orders called for in your Circular No. 3 of the 9th January 1897 are not completely received, but I hope I shall be able to give this from the next month.

The prescribed Returns are annexed.

No. 84, dated Arrah, the 15th March 1897.

From—J. WINDSOR, Esq., Collector of Shahabad,

To—The Honorary Secretary, Bengal Provincial Executive Committee, Indian Famine Charitable Relief Fund, Calcutta.

I HAVE the honour to submit the fortnightly report for the period ending with the 15th instant, as required by your Circular No. 6, dated the 3rd March 1897. On receipt of your Circular No. 1, dated 29th January 1897, a meeting was held on the 16th ultimo, and a Local Committee was formed at Arrah, and Resolutions for forming Local Committees in each of the subdivisions of the district, viz., Buxar, Bhabhua, and Sasaram, and authorizing each Local Committee thus to be formed to divide the extent of its area into sub-committees for Municipal, and into Circles for rural areas, were passed. A Municipality is to constitute a Circle by itself; other Circles are to consist of 10 villages each generally. In the Bhabhua Subdivision a Local Committee and Circles have been formed, and in other Subdivisions the Subdivisional Officers have been asked by the District Magistrate to organize Local Committees and Circles, but no reports have been yet received of their doings. A strong Sub-committee has been formed at Arrah, working in subordination to the Arrah Local Committee under the presidency of Mr F. H. Harding, the Judge of the district. The Arrah Local Committee, owing to a paucity of educated persons in the interior of the district, find it difficult to get a sufficient number of suitable persons to put in charge of circles to obtain necessary information about deserving cases in the rural areas.

Local Committees have been constituted as the proper agencies for collecting subscriptions. Collecting books, with letters, have been issued to the leading residents of the district, and a Circular letter inviting subscriptions has been issued.

Up to date Rs. 2,758 have been collected and paid in the Sadar Treasury, and more subscriptions are expected by and by.

A Resolution has been passed that members in charge of Circles will make their own enquiries into cases of relief. They may utilize the services of local *samiudars*, respectable persons and panchayats in getting lists, but they should enquire into cases themselves, or through agents, before recommending them for relief.

After framing their lists, town sub-committees or members in charge of rural Circles are required to report to the Local Committee to which they are subordinate, asking for a grant. The Local Committee, after considering their requirements on the basis of the aforesaid reports, will apply to the Arrah Executive Committee (which is the same body as the Arrah Local Committee) for a grant which, in its turn, will, after duly considering the various applications, make such allotments from time to time as their funds permit. The allotments thus made will be distributed among the various Local Committees, which will be distributed among its Sub-committees and working members in rural Circles, who will dispense the relief among the persons mentioned in their lists. The object of the Local Committees is to help the destitute persons of the respectable class, principally *pardanashin* women who have no male member to support them, and are suffering from the high prices.

This form of relief comes under the third head of your Circular No. 1 above referred to, and the Local Committees have not received any applications for granting relief under any of the other heads mentioned therein. No lists have been received from the different bodies, but in Arrah town it is expected that the number of applicants will come up to 500. The sanctioned allotments would, before this, have been distributed to the Arrah Town Sub-Committee, but for the want of a cheque-book to draw money from the treasury, a copy of which has been received late yesterday.

Messrs Burrows and Mylne of the Becha Firm have subscribed and paid a handsome amount of Rs. 2,000 to be locally spent. The following allotments were sanctioned by the Arrah Executive Committee provisionally for the places mentioned below on the 16th ultimo—

				Ra.
The Arrah Local Committee	100
„ Arrah Municipality	300
„ Jagdispur ditto	50
„ Buxar ditto	100
„ Dumraon ditto	100
„ Sasaram Local Committee	300
„ Bhabhua ditto	500

J. WINDSON,
Collector.

No 781F.—G., dated Chapra, the 17th March 1897.

From—A. EARLE, Esq., Collector of Saran,
To—The Commissioner of the Patna Division.

In continuation of my letter No. 595F.—G., dated the 4th instant, I have the honour to submit herewith my famine report for the two weeks ending the 13th instant.

2. SECTION 24 (1).—*Area affected during the period under report, and approximate estimate of the portion of the population affected.*—There is no real change to report, but I shall modify the map and figures of population when sending in my report for the second half of this month. The whole of the Gopalganj subdivision should be coloured brown, as relief works are now open throughout the said subdivision.

3. SECTION 24 (1).—*Number of relief circles and of officers in charge.*—The prescribed statement is appended. The Gopalganj thana charge has been subdivided into two charges under Messrs. Lang and Lister, respectively. It is proposed to split up the Sadar subdivision into two charges as soon as Mr. Twidell arrives from Gopalganj after making over charge to Mr. Lang. The number of Circle Officers have increased from 54 to 58, as the increase being chiefly in the Sadar subdivision, where the numbers on gratuitous relief were too large for the existing staff to manage.

4. SECTION 24 (2).—*General state of the affected tract during the half-month under report.*—In Siwan the cutting of the *rabi* crop has had, as expected, a very marked effect, and most of the relief works have already closed spontaneously.

In the Gopalganj subdivision the alleviation produced by the cutting of the *rabi* crop is accompanied by greater distress in the large rice areas. Had it not been for the good *rabi* crop there would have been no acute distress, verging in parts on famine, but real famine throughout the subdivision. The same remarks apply to affected tracts in the Sadar subdivision. The difficulty to be contended with in this district in dealing with distress is to localise it. One village with nothing but rice is famine-stricken, while another next to it is holding out well owing to the large proportion of *rabi*. Impressed with the importance of localising distress, I am having statements drawn up circle by circle and village by village showing the areas under rice, *rabi* and *bhadoi*, and as soon as these are ready, I shall have them printed and a map prepared. Meantime I am constantly impressing the importance of the subject on local officers.

5. SECTION 24 (2).—*Crop prospects.*—In Siwan a 16-anna, in Gopalganj a 12-anna, and in the Sadar a 10-anna *rabi* would be a fair estimate. In the south and west of Mirganj thana the crop is very good, but to the east of the Gopalganj thana it is very poor. The opium crop has suffered seriously owing to the blight called “murka.” *Rahar* has suffered considerably from frost in the Chapra, Parsa and Sonpur thanas.

6. SECTION 24 (2).—*Food-stocks.*—These are ample everywhere, and are now being largely supplemented by the *rabi* harvest.

7. SECTION 24 (2).—*Importation and exportation of food-grains.*—

(a) *Railway statistics.*—Imports show a decline from 82,194 to 77,728 maunds, and exports show a corresponding decline from 6,006 to 2,636 maunds. As the *rabi* crop is now coming in, imports may be expected to decrease and exports are almost certain to increase. Rice was chiefly imported from Howrah, Burdwan, Raniganj, Nirmali (in Bhagalpur), paddy from Howrah, Bhaptiah (in Bhagalpur), and other food-grains from Gorakhpur, Garahara (Monghyr) and Siliguri (Darjeeling). Rice was chiefly exported to Basti (Gorakhpur) and Bettiah, gram and pulses to Gorakhpur, and other food-grains to Janakpur road. 35,870 maunds of rice out of a total of 67,672 maunds imported and 2,850 maunds of paddy out of a total of 3,962 maunds imported were imported from Howrah. There were no imports from Calcutta, Sealdah and Kidderpur.

(b) *Rice/raj.*—Imports decrease largely, viz., from 8,799 to 3,236 maunds. Exports declined from 1,359 to 539 maunds. Rice was chiefly imported from Bhagalpur, and other food-grains from Balia. Exports were chiefly to Balia and Gorakhpur.

(c) *Saterghat.*—Imports have declined from 3,412 to 1,574 maunds owing to the cutting of the *rabi* crop. They consisted chiefly of rice from Muzaffarpur and Champaran, and of paddy from Muzaffarpur. Exports appear for the first time; but, as they refer entirely to *gur* and potatoes, they are of no account. The Subdivisional Officer is being directed to take care in future that food-grains only are reported. Mr. Chapman, of the Sadar subdivision, continues to report large imports from Muzaffarpur into Parsa thana.

8. SECTION 24 (2).—*Prices.*—The prices of wheat, *rahar* and barley have gone down considerably, and our wages on relief works will now be calculated at 12 seers in the Chapra subdivision and at 13 seers in the Gopalganj and Siwan subdivisions till further orders instead of at 10 seers all round. The former are the current prices of barley, and the latter is the current price of *makai*. How long this improvement will last is a matter of doubt. Temporary crops, such as peas, are selling at 15 seers per rupee; but I do not approve of creating undue fluctuations unless the crop which is the basis of the calculation is a substantial one.

9. SECTION 21 (2).—*Rainfall.*—Nil.

10. SECTION 24 (2).—*Public health.*—(a) Public health for the first time is not uniformly good. Small-pox is reported from the Gopalganj and Sadar subdivisions, and cholera has broken out in the latter subdivision in one village.

11. SECTION 24 (2).—*Emigration and immigration of famished people.*—There are a few cases of famine-stricken immigrants from Gorakhpur in the Chapra poor-houses.

12. SECTION 24 (2).—*The condition of cattle* is good save in the Gorkha outpost, where water is required. Mr. Chapman intends to give out some advances under the Land Improvement Act in this quarter with a view to the construction of wells.

13. SECTION 24 (3).—(a) There were 34 Civil Agency and 2 Public Works Department Agency works open during the week ending the 13th instant, or a total

of 36, viz., 12 in the Sadar subdivisional charge, 8 in the Siwan subdivisional charge, 8 in the Gopalganj thana charge, and 8 in the East Meerganj charge. During my recent tour in the East and West Meerganj charges, I found the first signs of people travelling far for works and of a desire to camp near the same. This was in rice areas where distress is increasing.

- (b) A daily average of 921 male units on Civil Agency works and 7 on Public Works Department Agency works were paid daily wages irrespective of task during the week ending the 13th instant. Writing on this subject Mr. Lyall remarks as follows:—

“The number irrespective of task cannot be decreased. In theory it is exceedingly simple to set a task of baling so much water, but in practice it is impossible to set the task, as the water comes up at constantly varying rates; and the quicksand at the bottom, so often to be dealt with at the end of tank work, also renders all efforts at setting a task futile. When it is impossible to measure and estimate the task accurately, it is merely a conventionality to set a task, and in my opinion it is better to see full work is exacted as best one may.”

I consider that there is much truth in what he states. Mr. Chapman does not explain why the numbers on this class of work are so high in his charge.

- (c) A daily average of 8,290 male units on Civil Agency Works and of 870 on Public Works Department Agency work were paid for task work during the week ending the 13th instant.

- (d) Again, the number of D class people is absurdly high in Mr. Garrett's charge. I explained the matter to him personally when on tour, and found that his so-called D class people should be placed in B class. He now understands. The classification on Mr. Green's works (Public Works Department Agency) in the first week was still more impossible, as all his labourers were A class people. In the second week he has shown a considerable number under B class and the rest under A class. I have pointed out to him that the rules under which he is working have discarded A and C classes altogether, and that while the mass of workers fall under B class, there are a few weakly people who will come under D class.

- (e) The average rate of wage per male unit for task work on the average of the two weeks was 1 anna 8 pies on Civil Agency and 1 anna 9 pies on Public Works Department Agency works. During my recent tour I found that Mr. Garrett was paying female labourers too high. I passed the necessary orders.

- (f) The average rate of wage per male unit for work done irrespective of task on the average of the two weeks was 1 anna 8 pies on Civil Agency and 2 annas 3 pies on Public Works Department works. With regard to the latter figure it is to be noted that only seven men obtained this wage. They were evidently mates of gangs. The rate of wage per male unit for work done irrespective of task was highest in the Gopalganj thana charge, where over 100 people were receiving over 2 or 3 pice each per diem. The rate paid for this class of labour was also high in Mr. Garrett's charge. I am calling on the Subdivisional Officer to explain.

- (g) The cost per 1,000 cubic feet was on the average of the two weeks Rs. 2-9-3 on Civil Agency and Rs. 3-1-10 on Public Works Department Agency works. I will ask Mr. Green, Executive Engineer, Gandak Division, to explain how this occurred as the lead and lift are not high. In the last return he showed 10 annas 3 pies. I shall be in the neighbourhood of these works in a few days, and will find out how things stand. The cost per 1,000 cubic feet was again highest in the Siwan subdivision. I pointed out to the Subdivisional Officer that this was on the last occasion caused in part by the fact that he showed his Sunday labourers under works paid by tasks. He states in explanation on this occasion that the lead and lift were high, inasmuch as, when lately inspecting Mr. Garrett's charge, I found that in at least two cases the sub-overseers entered incorrect measurement in their books—I am not sure, but that the rate should not by right be higher all round. The subject is engaging my special attention, and the staff in fault will be suitably dealt with. It is generally done by them through fear of too high a rate per 1,000 cubic feet being disclosed.

- (h) The work done per male unit was, on the average of the two weeks, 39 cubic feet on Civil Agency works and 41 on Public Works Department Agency works. The work done per male unit was again lowest in Siwan, where an average of 23 cubic feet only was done as against the district average of 39. What inference is to be drawn depends upon whether measurements are correctly made. The subject is engaging my attention.

- (i) The statement required by Government Circular No. 34 (Fam.), dated 10th February 1897, is herewith submitted with my remarks attached.

- (j) *Private relief works.*—*Gopalganj subdivision, Huthwa Raj.*—Ten works were open during the week ending the 13th instant, employing a daily average of 3,130 male units on task work and of 733 such units on work done irrespective of task. This is due to a good deal of baling out of water going on. Out of the ten works open, only five admit of much earth excavation, the rest having reached water level. More works are required, and I have passed the necessary orders. The wages paid per male unit are not higher than on Civil Agency works, but they should be lower, as I found Mr. Ryan had, through a misapprehension of orders, been paying too liberally. The average cost per 1,000 cubic feet, viz., Rs. 3-10-10, is considerably higher than on Civil Agency works, but no fair inference can be drawn till we are sure that measurements

are being properly made at our own works. At one of the Raj works I found measurements recorded far in excess of the actuals, and am taking due action in regard to the conduct of the officer in charge. I am sadly in want of a District Engineer, whom I can send round especially on the business. The attention of all officers has, however, been drawn to the subject; and I hope that I shall find no more inaccurate measurements. The work done per male unit is 30 cubic feet.

Siwan subdivision.—The two tanks referred to in the last report are in progress.

Sadar subdivision.—Mr. Chapman furnishes no information on this subject, but I have lately passed one or two applications for loans for tank-digging.

14. SECTION 24 (4).—*Poor-houses.*—(a) There were the same number of Government poor-houses, viz., one at Siwan and the other at Chapra. The average number relieved was 49 and 98 respectively during the week ending the 13th instant. The average cost per adult unit was Re. 0-1-5 and Re. 0-1-2 respectively. The Subdivisional Officer of Siwan does not explain why the cost has risen from Re. 0-1-1 to Re. 0-1-5 per head during the last two weeks as compared with the two previous weeks.

(b) The average number of persons relieved in the four Huthwa poor-houses in the last week under report was 352, as against 454 in the weeks ending the 27th ultimo. A large number of persons have been let out owing to the cutting of the *rabi* crop. The average cost per adult unit is very low, viz., 8 pies. I will ask the Manager to explain how this is the case.

(c) The Manjha private poor-house now contains only 28 individuals.

15. SECTION 24 (5).—The Subdivisional Officer of Siwan only submits an incomplete return showing 53 persons so employed. When I am satisfied (I am not so satisfied by any means at present) that all deserving cases have been detected and provided for, I will begin to be particular in calling for these returns.

16. SECTION 24 (6).—(a) The daily average number of men, women, and children in receipt of gratuitous relief for the week ending the 13th instant is 3,396 men, 11,441 women, and 3,582 children respectively. It is remarkable that in the Gopalganj subdivision the figures show a slight decrease in the week ending the 13th instant (7,590) as compared with those for the week ending the 6th instant (8,186), notwithstanding the fact of my having personally discovered numerous deserving neglected cases and issued stringent orders in the matter. I can only presume that the number will increase in the coming fortnight. The average cost per adult unit is 8 pies.

(b) As indicated above, I have had grave fault to find with Circle Officers in the Gopalganj subdivision, and have had to procure sanction from you to the appointment of Assistant Charge Superintendents as a temporary measure, i.e., until the Public Works Department has taken over a good many works and so relieved Charge Superintendents. During the two weeks under review, I have spent a great deal of time in personally visiting villages and interviewing *panchayats*, because I feel assured that unless we enlist the co-operation of the village authorities and keep a strict watch over the Circle Officers, there will be very grave risk of deserving cases escaping attention in the isolated distressed villages in this district.

17. SECTION 24 (7).—Nil.

18. SECTION 24 (8) *Advances.*—(1) In Chapra Rs. 300 and in Siwan Rs. 1,112 have been advanced under the new rules of the Land Improvement Act during the two weeks under review. No sum has been disbursed in Gopalganj in the same period.

(2) A good many applications are pending in the Gopalganj and Sadar subdivisions under the Land Improvement Act. I have deputed a *kanungo* specially to the Gopalganj subdivision to deal with applications under the Agriculturists' Loans Act, but he has not passed any as yet.

19. SECTION 24 (9).—The prescribed statement is submitted.

20. SECTION 24 (10) AND (11).—Nil.

21. (1) *Your Famine Circular No. 1 of 1897, paragraph 5.*—The Railway authorities failed to send in the fortnightly statement required by you, but have sent monthly figures, which I herewith submit in the form prescribed by you.

(2) *Your Famine Circular No. 30 of 1897.*—The jail statistics are herewith submitted.

22. *Your letter No. 290 F.—G., dated 7th February 1897.*—The total number (1) on relief works and (2) in receipt of gratuitous relief on the last day of the period under report was 14,576 and 18,394 respectively.

BEJIN BHARAT BOSH,
Manager, Raj Hatwa.

No. 711F., dated Motihari, the 17th March 1897.

From—D. J. MACPHERSON, Esq., Collector of Champaran,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my report under section 24 of the Famine Code for the first fortnight of March 1897. The figures dealt with relate to the weeks ending on Saturday, the 6th and 13th of the month. My report will not, I fear, reach you to-morrow, the due date, as figures for half the works under the Public Works officers were not received until afternoon to-day, and this has delayed the compilation of the mass of figures required for Forms 5 to 7 until after my report should have been ready. An attempt was made to compile them from the daily post-cards, but these were found to be far from complete.

2. His Honour the Lieutenant-Governor of Bengal visited the district at the beginning of the fortnight under report, and went as far as Ramnagar and Shikarpur, the most distressed portions of the country. He inspected some of the relief works in progress, and also the poor-house at Ramnagar and the large private kitchen at Bettiah carried on by the Raj.

3. *Section 24 (1) (a) : Area affected.*—There is no change to report in this respect since the close of last fortnight, when I reported the area at present in distress to be 1,865 square miles, with a population of 1,110,000.

4. *Section 24 (1) (b) : Relief circles.*—There is nothing fresh to report in regard to these. The indigo-planters who have been honorary circles officers have been busy with their sowings during the fortnight, and for the most part unable in consequence to test gratuitous relief lists in the villages themselves.

5. *Section 24 (2) (a) : General state of the affected tracts, crop prospects, and rainfall.*—The weather was somewhat disturbed on the evening of the 10th instant, but the only rainfall recorded at the registering stations was two cents at Bagaha. There was about a tenth of an inch in a limited area a few miles to the east of Motihari, which had the result of destroying the first sowing of indigo there. Some *rabi* crops, especially peas, are being harvested, but only to a limited extent as yet. In only one or two places has this resulted in a reduction in the number of relief workers, and indeed there has been, on the whole, a considerable increase during the fortnight, which was to be expected until harvesting operations became general. In the rice tracts the numbers on relief are more likely to go on increasing steadily than to suffer any temporary diminution through the harvesting of the *rabi* crops.

6. *Section 24 (2) (b) : Food-stocks and traffic in food-grains.*—Forms 8 and 9 annexed to this report show that during the fortnight ending on the 13th March, 18,390 maunds of food-grain were imported by rail and 387 exported, against 14,400 and 786 maunds respectively during the preceding fortnight. Of the imports, 10,240 maunds of rice to Bettiah and 3,340 maunds of paddy to Jodhara were from Howrah.

7. An abstract statement, as prescribed by you, is annexed showing imports and exports by rail from the 1st October to the end of the period under report. The figures for the preceding year cannot be given, as none have been got for November and December 1895, and those for other months are month by month, and not fortnight by fortnight. The total import of food-grains by rail since 1st October has been 65,445 maunds, and the export 54,377 maunds.

8. A considerable quantity of food grain is being imported from Nepal. During the first fortnight of March, 16,341 maunds were registered, and no doubt much more has been brought in that has escaped registration.

9. *Section 24 (2) (c) : Prices.*—I annex a statement showing how the prices of the principal food-grains at Motihari and Bettiah have stood at the beginning, middle and end of the fortnight under report, and the average price of late years at this season is also given in it. The price of common rice has risen at both places by half a seer, and is now 8½ seers per rupee at Motihari and 9 seers at Bettiah. Burma rice is selling at Motihari at half a seer cheaper than common rice of this district. Maize has risen from 10 seers 1 chitak to 9½ seers at Motihari, but fallen from 10 seers to 10¼ seers at Bettiah. *Rabi* grain has on the whole fallen in price. I have not received any statement of the prices at Ramnagar, no doubt because all Mr. Still's office staff are down with fever. At Bagaha the price of common rice is 8 seers and of maize 9½ seers per rupee, which is dearer than a fortnight ago.

10. *Section 24 (2) (d) : Emigration and immigration of famished people.*—It is reported that the immigration of destitute people from the North-Western Provinces into the Bettiah subdivision has now slackened.

11. *Section 24 (2) (e) : Condition of cattle.*—The cattle are, on the whole, not much worse, so far, than in ordinary years; but they have begun to suffer from scarcity of water.

12. *Section 24 (2) (f) : Public health.*—The death-rate of the district for the month of February was 2.26 per mille, against an average of 2.41 during the last five years. The average for the last ten years was 1.62, but the registration of vital statistics was put on an improved basis about five years ago, and it is manifest that it was very imperfect before that. In thanas Gobindganj, Bettiah, Madhuban and Motihari the death-rate of February has been higher than during the past five years, but in every case it is considerably under an annual rate of 40 per mille. As usual, the figures will be reviewed in greater detail in the report to be submitted at the close of this month. Some deterioration in physique is generally reported to be observable, especially among women and children. No deaths attributable to starvation have been reported during the fortnight.

13. The subjoined statement shows the result of observations on prisoners admitted into the Motihari Jail during the fortnight as compared with the corresponding period of 1896. The statement shows a continued falling off in physique as compared with that year.

Health on admission.	CONVICTS.				UNDER-TRIAL PRISONERS.			
	1897.		1896.		1897.		1896.

Below ditto	4	57.2	37	72.2	7	29.2
Total as above	7	100	7	100	52	100	24	100

14. Section 24 (2) (g) : Crime.—I have received as yet no statistics of crime during the fortnight under review, nor any information as to cases of incendiarism, such as were referred to in my last report.

15. Section 24 (3) (a) : Government relief works.—Statements D (Form 5) and E (Form 7) annexed to this report give particulars of works open during the weeks ending on the 6th and 13th March. There were 78 works (reckoning different sections of a road as separate works) open at the close of the fortnight as compared with 66 at its beginning, the increase being due for the most part to new major works started by Public Works Department agency. Under the latter agency there were 18 works reckoning as above, and under Civil agency 60 works. The progress made by the Public Works Department in undertaking works is still slow. Of the works open 50 were tanks, 19 roads, 3 embankments and 6 pynes.

16. The subjoined statement shows the principal figures regarding persons on relief during the fortnight under review as compared with the preceding fortnight.

Week ending	Number of works open at close of fortnight.	Daily outturn per male unit.	Cost per 1,000 cubic feet.	AVERAGE DAILY NUMBER OF MALE UNITS ON—			
				Task-work.	Daily wages, irrespective of task.	Gratuitous relief including dependents (adult units).	Total.
1	2	3	4	5	6	7	8
		C. ft.	Rs. A. P.				
20th February	22½	4 0 8	79,653	4,058	29,395	113,106
27th	66	24	3 14 8	70,132	4,034	29,575	103,741
6th March	24	3 11 8	84,207	5,391	37,473	127,071
13th	78	27	3 8 4	92,654	5,219	46,423	143,296

17. If the figures in this statement are to be believed, there has been a large increase in the numbers on relief both those on relief works and those in receipt of gratuitous relief. But there are grave reasons for doubting the correctness of the figures reported from two of the charges, South Bettiah and Bagaha. These two charges alone show an increase in the numbers on relief works during the fortnight, of 13,414 and 13,094 male units, that is 26,508 male units between them. The total increase for the whole district, shown in the statement given above, is 23,707 male units, so that, excluding these two charges, there has really been a reduction of 2,801 male units. Now it will be observed that in the week ending on 27th February there was a decrease of 9,545 male units shown as on relief works as compared with the week ending on the 20th February, and I find that the whole of this is accounted for by an inexplicable decrease of 9,957 male units in the figures for Bagaha alone. The figures for this charge for the last four weeks are—

Week ending	Male units.
20th February	13,328
27th	3,371
6th March	13,166
13th	16,465

It seems certain, therefore, that about 10,000 persons on relief works were omitted from the returns for this charge for the week ending on the 27th February. Then the South Bettiah charge shows an actual doubling of figures during the fortnight, namely, from 12,286 male units for the week ending 27th February to 25,650 for the week ending 13th March. This can hardly have actually occurred, more especially as the tract is a *rabi* producing one. All these discrepancies would have been more easily discovered had there been columns in Form 5 (Statement D) for showing against each charge the total numbers employed on task-work, and I take the opportunity of urging strongly that the form be revised, as it easily can be, to provide for this. As it is, I had personally to make the most laborious calculations to get at the figures I have quoted. Under all the circumstances I am sceptical therefore of there having been any substantial increase in the numbers on relief works during the fortnight, and I think it probable that the number employed on task-work is more likely about 85,000 than 92,654. An actual decrease was not to have been expected, as, although some *rabi* crops are being cut in places, harvesting operations are not usually general in Champaran until much later than elsewhere in Bihar, just as the sowings are later; and in the rice-producing tracts the numbers should steadily increase. Now, however, that in many parts of the district numbers of those on relief works should be seeking employment in harvesting the crops, I have issued orders enforcing greater stringency in exacting the full task and in turning off the works all who seem content to earn the penal wage without making proper efforts to do a task: these will certainly prefer staying away altogether to going to a poor-house.

18. The doubt which exists as to the correctness of the figures reported vitiates the averages of the outturn of work on Civil agency works shown in Form 7 and in the statement given in paragraph 16: the result is, no doubt, really better than there appears. Such as they are, however, the figures show an outturn on Civil agency works during the fortnight of a little less than 24 cubic feet per male unit as against 24 cubic feet during the preceding fortnight, and a cost per 1,000 cubic feet of Rs. 3-14-10 against Rs. 3-15. But no less than 46 out of the 60 Civil agency works are tanks with long leads and lifts. The trained professional agency employed on works under the Public Works Department is now showing a marked improvement, the outturn per male unit during the fortnight having been nearly 29 cubic feet and the cost per 1,000 cubic feet Rs. 3-5-2, against 19½ cubic feet and Rs. 4-5-2 in the preceding fortnight. But as many as 14 out of the 18 works under Public Works Department agency were roads and an embankment with much shorter leads and lifts than tanks.

19. *Section 24 (3) : (b) Private relief works.*—The only private relief works for which returns have been received are two tanks being excavated at the cost of the Tetaria Indigo Concern, and one, nearly completed, at the cost of the Bettiah Raj. For the former returns have been received only for the week ending 6th March, during which a daily average of 444 men, 83 women and 91 children, total 618 persons, were employed. These two tanks cost, respectively, Rs. 3-5 and Rs. 4-2-8 per 1,000 cubic feet. On the Bettiah Raj tank an average of only 66 men, 27 women and 8 children, total 96 persons, were employed throughout the fortnight, and the cost per 1,000 cubic feet was Rs. 2-6-7. These are believed to be the only works specially undertaken to afford relief that are being carried out by private agency at present. They have been conducted on the piece-work system.

20. *Section 24 (3) : Poor-houses.*—At the close of last fortnight the only poor-houses open were those at Motihari and Ramnagar. During the second week of the fortnight now under review, poor-houses were open also at Bettiah and at Makhwa. The former has taken the place of a large private kitchen carried on by the Raj. I subjoin a statement showing the number relieved at these poor-houses and the cost incurred, but no returns have been received for the Ramnagar poor-house for the first week.

	DAILY AVERAGE NUMBER OF INMATES.				Cost.	Daily cost per adult unit.	REMARKS.	
	Men.	Women.	Children.	Total.				
1	2	3	4	5	6	7	8	
Week ending 6th March 1897.								
Motihari poor-house	42	84	28	104	Rs. 7 4	A. P. 1 5	Open for two days only.	
Ramnagar ditto	(No return received.)							
Week ending 13th March 1897.								
Motihari poor-house	44	39	34	117	62 14 5	1 5		
Makhwa ditto	7	8	3	18	4 7 0	2 1		
Bettiah ditto	54	48	24	126	60 15 2	1 2		
Ramnagar ditto	34	16	11	61	49 1 6	2 0		
Total ...	189	111	88	388	177 6 1	...		

There were four deaths in the Bettiah poor-house—three from diarrhoea and one from pneumonia. The inmates are reported all to be wanderers from other districts and professional beggars.

21. *Section 24 (4): Employment given at homes.*—It has not been found necessary to give special employment to weavers, artisans, &c. No detailed information has been received regarding the cotton given out to *pardanashin* women to spin into thread in return for gratuitous relief. In South Dhaka charge only is any progress known to have been made in this matter.

22. *Section 24 (5): Gratuitous relief given in the shape of grain and money-doles.*—Three statements in Form 6 are annexed showing the gratuitous relief administered during each of the two weeks covered by this report and during the fortnight as a whole. The number of persons relieved was 46,886 in the first week and 56,450 in the second as against 37,416 at the close of the preceding fortnight. From the reports received it appears that the completion of the gratuitous relief registers has been pushed on vigorously and is about finished; but it further appears that they remain to be tested in a great many villages, particularly in the circles of indigo planters who have been busy with their sowings. I have issued orders to have the lists all most carefully checked, as the number now shewn as on gratuitous relief is excessive. At the same time there is much doubt about the accuracy of the returns, as some misapprehension appears to exist as to how the daily number of individuals is to be calculated in cases in which the doles are not given once a week. The number of adult units gratuitously relieved was 37,473 in the first week and 45,422 in the second, and the daily dole per adult unit cost on the average 9½ pies and 9¼ pies respectively.

23. *Section 24 (6): Kitchens.*—There were three kitchens open in the Hurdih charge, but returns have been received for them only for the second week of the fortnight. These show a daily average of 139 men, 127 women and 211 children; total 477 relieved. The expenditure has been noted for only two of them, and amounted to Rs. 195-11-9. Those figures are not included in the gratuitous relief Statement No. 6.

24. *Section 24 (8): Loans.*—Under the Agriculturists Loans Act, Rs. 4,871-8 was advanced during the fortnight to cultivating tenants, who required assistance to enable them to till their lands and conserve and purchase seed-grain. This was done through the agency of Sir William Hudson, who has accepted responsibility for the repayment of the amount. A sum of Rs. 1,100 has also been given out in advance for the construction of several irrigation cuts in the Hurdih thana.

25. *Section 24 (9): Finances.*—I annex a statement showing the expenditure incurred during the fortnight under report, which amounted to Rs. 1,52,509-15-3, of which Rs. 1,21,372-4-3 was spent on relief works, and Rs. 31,137-11 on gratuitous relief of various kinds.

26. The prescribed statement showing task-work enacted is annexed.

DISTRICT CHAMPARAN.

Statement showing rates of wages paid on relief works (including test works) and tasks exacted for the fortnight ending 13th March 1897.

District.	RATES OF DAILY WAGES AND TASKS.											REMARKS.		
	Man.		Woman.		1 Big child.		Small child.		Adult male unit.		Grain on which calculated under section 104 of the Famine Code.		Retail price of the grain in column 13 (number of seers for a rupee).	Rate per 1,000 cubic feet of earthwork.
	Wage.	Task.	Wage.	Task.	Wage.	Task.	Wage.	Task.	Average wage.	Average task.				
1	8	3	4	5	6	7	8	9	10	11	12	13	14	15
Champan-Mithani	A. P. 3 0	An able-bodied B class man has to excavate 100 cubic feet in "hard clay soil, 100 cubic feet in "medium, and 200 cubic feet in soft soil or sand. Average, say, 100 cubic feet.	A. P. 1 3	A. P. 1 0	A. P. -6	A. P. 1 5	26 cubic feet both cut and carried.		9 1/2 and 8 1/2 seers per rupee.	9 9 0	It is impossible to give particulars of the lead and lift, as there are 76 works in all. No less than 50 of these are tanks with long leads and lifts, and, having regard to this fact, the average lead may be taken at about 150 feet and lift at about 14 feet. The average competition of the gang cannot be stated, as the number of gangs is not shown in the returns.
Minimum	1 0		1 3	1 0	-6						

Columns 7 and 8.—The task of these, and also of adult male carriers where there are not enough carriers without employing such, is to carry the quantity shown in column 3, the proportion of carriers to diggers-being regulated as far as possible by the lead and lift.

MITHANI,

The 17th March 1897.

D. J. MACPHERSON,

Collector.

No. 2210R., dated Muzaffarpur, the 18th March 1897.

From—L. HARR, Esq., Collector of Muzaffarpur,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my half-monthly report for the first-half of March 1897. The figures in the returns are for the two weeks ending March 6th and 13th, respectively.

2. SECTION 24 (1) (a).—*Area affected*.—There has been no change under this head since the last report.

3. SECTION 24 (1) (b).—*Number of relief circles and officers in charge*.—I have increased the number of circles in some cases where they have been found to be too large, now that distress is increasing; also I have had to put in several native circle officers to carry out the continual detailed enquiries, village by village, which are now necessary. These duties and arranging for the distribution of the doles and the writing up of the registers and accounts, occupy the whole time of a circle officer, and it cannot be expected that the planting community should, as a rule, do more than supervise this work and give occasional assistance. Their presence at the circle centre, and their general supervision and the assistance they are able to give in seeing that everything is done decently and in order and in preventing abuses are, however, very valuable.

4. I have also secured and put in two more Charge Superintendents and one Assistant Charge Superintendent. The former have been posted—Mr. A. MacBean to the Paru thana charge, and Mr. A. A. C. Weatherall to the Bhutahi charge, comprising the northern part of the Sitamarhi thana. Mr. Wilcox, the Assistant Charge Superintendent, has been learning his work and giving valuable assistance at Sitamarhi. He will be posted to another charge directly. Final orders have been passed on my requisitions for more Charge Superintendents.

5. SECTION 24 (2) (a).—*General state of the affected tracts*.—I have paid a visit to all the charges of the Sitamarhi subdivision during the fortnight under report, and the condition of the people appears to me to be good. Both those on the works and those on gratuitous relief show no signs of emaciation. I do not mean to say that there are no causes of emaciation at all, but that these are few, and that the general condition does not seem to me to show any marked deterioration over ordinary years. The health returns also point in the same direction.

6. At present the *rabi* cutting is affording some relief to the people.

7. SECTION 24 (2) (b).—*Crop prospects*.—The *rabi* in the Sadar and Hajipur subdivisions is very good. In Sitamarhi it is fair, but the area under crop is short. The harvesting of the crops has commenced in many places.

8. SECTION 24 (2) (c).—*Prices*.—Two statements—(1) showing the prices at the head-quarters of each subdivision, and (2) those at the head-quarters of each thana and outpost in the mufassal—are appended. At Muzaffarpur the price of rice and *rahar* fell by half a seer, and that of gram rose by a similar amount, whilst the other crops were stationary. In Hajipur there has been a fall in the price of wheat, gram, and *rahar*, but rice and *makai* seem to be stationary. In Sitamarhi, however, every food-grain except wheat has risen in price, the rise in the case of *rahar* and *marua* being by $1\frac{1}{2}$ seer. Wheat has fallen by half a seer.

The statement of money-orders from abroad, prescribed in paragraph 4 of Commissioner's Circular No. 3 for February 1897, is appended. It shows some Rs. 30,000 more sent into this district in February 1897 than in February 1896.

9. SECTION 24 (2) (d).—*Food-stocks*.—Food-stocks continue to hold out, and there seems no sign of insufficiency. The *rabi* harvest when gathered will add to the present stock, especially in the Sadar and Hajipur subdivisions. I confess I do not like the rise of prices in Sitamarhi, and should be glad to see more active importations into that subdivision. I have asked the Subdivisional Officer to try and induce the local merchants to import rice from Calcutta, and I should be glad if any one from Calcutta could be induced to take up a local business at Sitamarhi. Possibly the Arracan Company or another Company could be induced to do so by the Secretariat in Calcutta if the facts were made known to them.

10. SECTION 24 (2) (e).—*Imports and Exports*.—The prescribed statements in forms 8 and 9 are appended. It will be seen that the total imports during the period under report amounted to 53,595 maunds and exports to 2,946 maunds. The net imports thus amounted to 50,649 maunds.

11. The following will show the quantity of rice and paddy imported from the places mentioned in paragraph 5 of your circular No. 15:—

			Rice. Mds.	Paddy. Mds.
From Howrah	11,670	2,661
" Calcutta
" Sealdah
" Kidderpore	370

The imports were principally from Howrah, Raniganj, and places in the district of Darbhanga.

12. I am still not in a position to submit the comparative statement prescribed in paragraph 5 of your circular No. 1 of 1897, as the abstract statement (third item), referred to in paragraph 2 of the circular, has not yet been forwarded to me from your office.

13. SECTION 24 (2) (f).—*Rainfall*.—There was a slight shower at Sitamarhi on the 11th March 1897, amounting to .05, and a few drops at Nawada in the Hajipur subdivision on the 9th; otherwise there was no rainfall during the period under report.

14. SECTION 24 (2) (g).—*Public Health*.—Public health continues exceptionally good.
15. SECTION 24 (2) (h).—*Emigration and Immigration*.—There has been no emigration or immigration of famished people.
16. SECTION 24 (2) (i).—*Condition of Cattle*.—The condition of the cattle generally continues good. There was a small outbreak of rinderpest in the Belsand thana of Sitamarhi subdivision, which has however subsided. The disease is said to have appeared also in the jurisdiction of the Pupri thana of that subdivision, and the Veterinary Assistant Surgeon at Sitamarhi has been deputed by the Subdivisional Officer to look after these cases.
17. SECTION 24 (3) (a).—*Relief-works*.—The number of relief-works open at the close of the fortnight was as follows :—

UNDER CIVIL AGENCY.

Sadar subdivision.

Sadar and Paru thanas	18
Kalrat thana	8
					— 26

Sitamarhi subdivision.

Sitamarhi thana	7
Belsand "	5
Shiuhar "	1
Pupri "	4
					— 17

Hajipur subdivision.

Mahua thana	7
Lalgunge "	4
					— 11

				Total	...	54
Under Public Works Department Agency				8
						—

Total works under both agencies ... 62

18. The total number of workers on civil agency works on the last day of the fortnight was 14,129, of whom 12,803 were paid by task work and 1,326 by daily wages.

The workers on the Public Works Department agency on the same day numbered 7,485, of whom 7,169 were paid by task and 316 by daily wage.

The aggregate number of labourers under both agencies on the last day of the period under report thus amounted to 19,972 paid by task work, 1,642 by daily wage, or 21,614 in all.

19. It will thus be seen that the demand for work is gradually developing, and that consequently the number of relief-works has risen under civil agency from 45 on the 27th February 1897 to 54 on the 13th March 1897, and on Public Works Department agency from 3 on the former date to 8 on the latter, whilst the number of workers on the 13th March amounted to 14,129 under civil agency and 7,485 under Public Works Department agency, against 18,189 under the former and 2,129 under the latter on the 27th February 1897. The total increase from 20,318 to 21,614 is not large, considering the task has been reduced to Mr. Glass' scale. The increase in the number of works is due to the necessity of having some work not too far away to which applicants for gratuitous relief can be sent if they are fit for work. I am of opinion that the reason the numbers have not more largely increased is on account of the labour afforded by the *rabi* cutting.

20. Expenditure during the half-month under report on civil agency works amounted to Rs. 13,864-12-8 on task work, Rs. 2,064-4-8 on daily wages, or Rs. 15,929-0-11 in all, and on the Department of Public Works agency to Rs. 1,318-13-6 on task work, Rs. 124-11 on daily wages, or Rs. 1,443-8-6 in all. The gross expenditure on relief-works thus amounted to Rs. 17,372-9-5.

21. Statements in forms 5 (section 26 (i) and 7 (section 26 (iii)) are appended.

22. The statement of the maximum and minimum wages prescribed in Government circular No. 1J., dated 6th January 1897, is also submitted.

Now that Government has definitely ordered the introduction of Mr. Glass' tasks and scale of wages, this statement may, I presume, be discontinued, only noting the change from one scale of wages to another.

23. As regards the task, I wish to place on record my view that it is a mistake to reduce it so far as it has been reduced. I think greater latitude should be allowed to officers in charge of relief-works to fix the task according to the individual digger's capacity. I do not mean to say that I would have an indefinite number of scales of task or would attempt any minute subdivision or classification, but I am very distinctly of opinion that stout and sturdy men should be kept fully employed for a reasonable part of the day. Not to insist on this is to give encouragement to a very troublesome class, and to greatly demoralize the relief-workers

and upset the whole relief-work organization. It is these sturdy persons who give all the trouble to the establishment, and who will always endeavour to escape any task, however small it may be, and who endeavour often with too great success to intimidate the officers in charge. To keep them well employed is to keep them out of mischief.

24. It seems to me therefore the digger's task should be fixed fairly high, and that suitable remission should be given to weak diggers. To carry this out on a large work some greater inducement than at present should be given to the mates to enforce strict attention to discipline, and to keep the labourers up to their work. They would in this district hold a better position if they were paid monthly, and they might be graded and get promotion according as the outturn of work of their gangs approached the task demanded. As it is, they are not sufficiently dependent on the officer in charge, and he has none of their pay in hand from which he can fine them if necessary.

25. SECTION 24 (3) (b).—*Private relief-works*.—A statement showing figures for the private relief-works of the Maharaja of Darbhanga in the Sitamarhi subdivision is appended.

26. SECTION 24 (4) (a).—*Poor-houses*.—The number of poor-houses was unchanged, viz., 5. Statistics will be found in the statement appended hereto. The proposed poor-house at Hajipur is under construction, and will open shortly. The total number of inmates in all the poor-houses taken together on the last day of the fortnight was 321. During the fortnight the poor-house at Pupri was burnt down. It has not been discovered how the fire occurred. No one was injured.

27. SECTION 24 (4) (b).—*Private poor-house*.—Figures for the Darbhanga Raj poor-house at Panharpur are given in a separate statement.

28. SECTION 24 (5).—*Organization for employment of artisans, &c.*—No special arrangements have been made for the relief of artisans, &c.

29. SECTION 24 (6).—*Gratuitous relief*.—Grain doles are being distributed by circle officers. The average number of recipients under civil agency in the second week of the fortnight under report was 23,922.

30. SECTION 24 (7).—*Kitchens*.—No public kitchens have yet been started. The Sub-divisional Officer, Sitamarhi, however, is taking steps to open kitchens at the head-quarters of each circle principally for feeding children who may show signs of being neglected by their parents.

31. SECTION 24 (8).—*Loans*.—Rupees 700 were granted in the fortnight under report as loans for land improvements, and Rs. 1,468 as agricultural loans. I have addressed you in my No. 2178R., dated the 16th March 1897, on the subject of the grant of agricultural loans during 1897-98. I would most strongly urge upon Government the great importance of this question. I have suggested that if Government do not see their way to finance these loans that it would be wise to use some of the Charitable Fund money in this way. No one who has had to deal on a large scale with relief-works in India can have any doubt of the extreme difficulty of making adequate enquiry in the enormous number of cases in which enquiry is necessary, and the consequent grave danger of demoralization in the giving of donations to recoup people for famine losses. Such relief is very apt to degenerate into a scramble. But I refer you to my letter for a full expression of my views.

32. SECTION 24 (9).—*Financial statement*.—I annex a financial statement so far as I have been able to complete it.

Prices of Food-grains in the district of Muzaffarpur.

L. HARE,
Collector.

Dated Darbhanga, the 18th March 1897.

From—R. W. CARLYLE, Esq., Collector of Darbhanga,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit herewith my ninth half-monthly report for the weeks ending 6th and 13th March respectively.

Corrected figures
differing slightly from
those in the telegram.
The figures in the
telegram. The revised
figures are 51,065
R. W. C.

2. (1a) I have no change to report in the area affected, though there is a temporary diminution in the portion of the population affected, as the *rabi* crops are being harvested, and this gives much more remunerative employment to those who can obtain it than anything we can give on famine works. The affected area covers 2,940 square miles, and on the 13th March 91,393 persons were on relief works, while 51,441* were receiving gratuitous relief. Besides this, the Darbhanga Raj had 19,971 on relief works and 9,862 on gratuitous relief.

3. (1b) There are eight Charge Superintendents with five assistants under them, and 72 circles with as many officers in charge. Some of these circles will be subdivided when I am able to appoint officers to look after them.

4. (2a) The ripening of the *rabi* crops has caused a distinct, though temporary, improvement in the state of the district, as though labour is not employed as freely as it would be in an ordinary year, yet a large number before on our relief works have found employment in gathering the crops. This has had comparatively little effect on gratuitous relief tests, as they include very few people who can work, and of course the relief so afforded is only temporary. I do not know when our numbers will go up again, but probably by the end of this month.

(2b) I think my last estimate of the *rabi* nearly correct, namely, about 8 annas in Madhubani, 12 annas in the Sadar, and 16 annas in Samastipur. This of course is allowing for the reduced area under cultivation, and only refers to the food-crops. Tobacco and opium are probably a full average crop, taking the whole district.

5. (2c and d) I have nothing to add to previous reports on this subject. I see no reason to doubt that private trade will supply all the requirements of the district. Imports by rail during the fortnight exceeded the exports by 48,899 maunds, against 26,826 maunds in the previous fortnight. Imports rose from 36,965 to 52,803 maunds, while exports fell from 10,139 to 3,904 maunds. The imports of paddy are 740 maunds from Kidderpore and 1,876 maunds from Howrah; of rice 4,542 maunds from Howrah. There were no imports from Saldah and Calcutta.

6. (2e) There was a slight fall of rain in some parts of the district on the 13th March 1897. It did not affect the crops in any way.

7. (2f) Public health continues good. The death-rate for February is 18.3 per mille per annum for the district, against 23.7 last year.

8. (2g) No emigration or immigration of famished people has been reported.

9. (2h) Cattle are in fairly good condition.

10. (3a) Relief works were open in or near the affected tracts. The numbers on the last day of the week were—

Civil agency work.—Men 2,307, women 29,174, children 6,488.

Public Works Department work.—Men 14,312, women 14,073, children 4,539

Detailed figures are given in Famine Statement D. It now gives most of the particulars required for public works, but is not quite complete yet, as the new post-cards and printed forms required by the Public Works Department to supply the information had to be ordered from Calcutta.

11. (3b) The figures for Raj relief works are given in a separate statement. The numbers on the 13th were 13,716 men, 4,684 women, 1,571 children on relief works.

12. (3c) I regret I have not yet got from any Circle Officer complete reports regarding the number of tanks, &c, undertaken by private agency other than Raj, but I believe it considerably exceeds 100, and probably from 20,000 to 30,000 people work on them daily. I hope to supply approximate figures with my next report.

13. (3d) Wages are—

Full wages.				As.	P.
Men	1	9
Women	1	3
Big children	0	9
Small children	0	6
Minimum.					
Men	1	0
Women	1	0
Big children	0	6
Small children	0	3
Penal.					
Men	0	9
Women	0	9
Big children	0	5
Small children	0	3

14. (4a) Poor-houses are now open at Darbhanga, Madhubani, Warisnagar, Benipati and Khajauli. Poor houses are being built at Singhia, Bahera and Phulpras, but I have not yet received reports of any person being sent to them.

15. (4b) The number in the poor-houses on the 13th came to 79.

16. (4c) The scale of food distributed is that laid down by the Famine Code.

ROADS AND TANK, &c.
CIVIL AGENCY WORKS.

FAMINE STATEMENT D.

DISTRICT DARBHANGA.

For the week ending 6th March 1897.

[illegible]

FORM No. 5—concluded.

R. W. CARLYLE,
Magistrate.

No. 912F.G., dated Bankipore, the 7th April 1897.

From—J. A. BOURDILLON, Esq., Offg. Commissioner of the Patna Division,
To—The Secretary to the Government of Bengal, Revenue Department.

I HAVE the honour to forward herewith, for the information of Government, my half-monthly famine report under sections 13 and 24 of the Famine Code. The period dealt with covers the two weeks ending the 20th and 27th March 1897.

PART I.—INTRODUCTION.

2. I have not been away from Bankipore during the period under report as I had important work at head-quarters, and there was no special need for inspection. The Hon'ble Mr. Glass spent a considerable part of the past fortnight on tour in Darbhanga, Muzaffarpur and Champaran, and his notes have been published for the information of those concerned. On the 28th ultimo, the day after the fortnight ended, His Excellency the Viceroy passed the day at Bankipore, and I was able to give informal explanation of several points.

PART II.—DISTRICT REPORTS.

3. *Patna*.—In this district everything continues prosperous. About half an inch of rain fell all over the district on the 23rd and 28th March, which has done no appreciable harm to the crops on the threshing floors, while it has greatly refreshed the standing crops, such as millets of various kinds and sugar-cane, and it has enabled ploughing to go on, and the preparation of seed beds for the early rice to be commenced.

4. The price of rice has risen a trifle and also that of Indian-corn as the stock of this edible is coming to an end, but barley, gram and rahar are generally cheaper, and it is clear that stocks in hand are sufficient.

5. There has been a slight advance in the volume of traffic in food-grains, and as the imports have been higher and the exports lower, the balance is now well in favour of the district instead of against it. The figures are as follows: imports 57,997 maunds against 44,091 and exports 44,348 maunds against 53,310. Out of the imports, 44,009 maunds were rice from Howrah and other places in the Burdwan Division; of the exports, 31,288 maunds were "gram and pulses" all going to the North-Western Provinces, and rice reached 11,064 maunds.

6. Gratuitous relief with funds privately subscribed has been going on, but details are not given. Only Rs. 11-12-3 have been expended during the fortnight on gratuitous relief under the Famine Code.

7. Figures for the poor-house at Bankipore have not been given, but I can say of my own knowledge that the daily average relieved was about 60, and that only a small proportion of these belong to the district: about half of them hail from the North-Western Provinces.

8. *Gaya*.—Here also the situation continues satisfactory. About three-fifths of an inch of rain fell all over the district and did no harm but much good, as I have explained above in writing of Patna. Prices are stationary for rice, and falling for wheat and barley. The death-rate for January and February was the same, i.e., 1.4 per mille per annum, just half what it was in 1896 at the same time.

9. The offer of a bounty on rice exported to Palamau has obviously stimulated the food-grain traffic, which shows a marked increase. The imports were 11,002 maunds against 3,711 and the exports 3,152 maunds against 1,206, leaving a balance in favour of the district of 7,850 maunds against 2,505 in the previous fortnight. The total rice imported amounted to 10,245 maunds, but none of it came from Howrah; 1,418 maunds of Rangoon rice previously

imported were sent on to Palamau during the fortnight; if this trade becomes brisk, it may well be that the balance will turn against Gaya, but that need cause no uneasiness so long as prices remain steady.

10. Food was distributed as before, at the kitchens on the Grand Trunk road and elsewhere, to the following number of persons at each: Kusa 83, Madanpur 48, Aurangabad 110; figures from Bara Chatti and the private kitchen in Gaya supported by the Marwaris are not forthcoming; a kitchen has been opened by a Mohunt in the Nawada subdivision which feeds about 100 persons a day.

11. Local Sub-Committees for the distribution of gratuitous relief under the auspices of the Indian Famine Relief Committee are preparing lists; they are said to be self supporting, and as I stated in my last report this district will require little or no outside aid.

12 *Shahabad*.—The phenomena of the previous fortnight have been repeated in this district during that under report, i.e., a considerable advance in the numbers on relief works equivalent to 74 per cent., while the increase in the numbers on gratuitous relief is only 23 per cent. The figures taken for comparison are the daily average for the last week in each fortnight.

13. The half inch of rain which fell on the 23rd and 28th benefited the district generally. Prices remain fairly steady; that of rice has risen a little, while rahar has come into the market. Gram is a little dearer than before at Sasaram and Bhabua, and a little cheaper at Arrah and Buxar. The general health is good, and for the district generally the mortality is a good deal below normal, but in the affected area it seems to be higher, the rate for February being 3.39 per mille against a mean of 2.44:—the Collector's attention will be directed to the matter. There has been some small-pox, and the Civil Hospital Assistant of Bhabua was one of the victims.

14. Food-grain traffic has revived again, and the volume of it has exceeded not only that of the fortnight ending 13th March, but that of the previous fortnight also. The figures are: imports 26,108 maunds against 21,507 and exports 14,908 maunds against 18,058. The balance in favour of the district is therefore 11,272 maunds against 3,449. The imports were mostly rice, and the exports wheat and "other food-grains."

15. "Food-stocks," the Collector reports; "remain as before"; the distressed area is fed almost exclusively by importation from Zamania and Sasaram. For the plateau of Adhua and Bhotas the Collector has proposed special arrangements, certain modifications in which are still under discussion: I hope to sanction them in a few days. We shall probably be able to supply the villages of the plateau with food without offering bounties, but the matter will be separately reported if the orders of Government are needed.

16 The following statement compares the figures of relief for the past and the previous fortnight:—

SHAHABAD.

Week ending	Number of works open	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit	Cost per 1,000 cubic feet.
		Task work	Daily wage, irrespective of task.	Gratuitous relief, including dependants	Total.		
1	2	3	4	5	6	7	8
1897.						C ft	Rs A P.
6th March ...	5	1,857	113	8,978	10,143	47	2 7 6
8th " ...	6	2,392	184	11,814	14,390	44	2 10 1
30th " ...	7	3,069	222	11,573	11,861	42	2 10 7
7th " ...	7	4,168	349	14,590	19,097	42	2 10 11

17. Taking task works first, it will be seen that there was a steady rise in the numbers employed, while the average daily outturn and cost per 1,000

cubic feet remained the same. In this district the soil is harder than in North Bihar, and much of it is "medium," so that the reported outturn of 42 cubic feet is very fair; the numbers on daily wage are not excessive. The increase in the numbers on relief works is said to be due partly to the conclusion of the *rabi* harvest, and partly to the return of emigrants; this last cause both here and in Saran will probably raise the numbers considerably in the next few weeks. It is extraordinary that in Form 5 there are no D class workers at all.

18. Mr. Windsor reports that the East Indian Railway authorities complain that they cannot get labour for the construction of the Moghul Sarai-Gaya line, and I have had a separate communication from the Agent to the same effect. It is urged that the rates given on our works are so liberal that labour will not go to the East Indian Railway works, but the argument is hardly a fair one. The above table shows that our rate comes to Rs. 2-10-11 per 1,000 cubic feet, while the railway offers Rs. 2 per 1,000 cubic feet for cutting, carrying and dressing. Our figures, however, include many payments for labour which is not fully remunerative. I cannot admit that we are outbidding the railway authorities, and the disinclination of the people to go to the railway work must be due to some other cause. The Collector has been directed to point out to the railway authorities that considering the price of grain, their rates do not offer a fair wage, and should be raised to Rs. 2-4.

19. Under gratuitous relief there is a considerable advance during the fortnight equivalent to 23 per cent., as has already been stated above; the Collector is alive to the fact that as their bread-winners come back, many of the persons in receipt of gratuitous relief should be removed from the list. The average dole is high, but I have ascertained verbally from the Collector that the reason is that rice at 8½ seers is taken as the basis of calculation both here and on the relief works; but he has now arranged to take as his standard some cheaper grain, such as peas (11 seers) or gram (11½ seers).

20. The daily average number in poor-houses and kitchens was 400 for the first week of the fortnight and 409 for the second, Bhabua having about one-fourth of the whole.

21. *Saran*.—In this district the past fortnight has been marked by steady progress, by a reduction of the numbers on task work, and an increase of those on gratuitous relief.

22. The charges and circles continue the same and may now be taken as finally made up. The Collector requires another Charge Superintendent to fill a vacancy in the Sadar subdivision, and to relieve the Joint-Magistrate, Mr. Chapman, who has been nearly breaking down: a military officer has been applied for. The area affected is now said to be 1,684 square miles and the population 1,484,386.

23. The rainfall of the 22nd, 23rd and 24th March was slighter in this district than it was further to the east, Sewan and Gopalganj receiving about half an inch each, and Chapra less than a quarter of an inch. No damage at all has been caused, but on the contrary the growing crops have been refreshed.

24. The Collector estimates the *rabi* roughly at three-fourths of an average crop. As Sewan is more generally a *rabi* country than either of the other subdivisions, the condition of its people continues to improve.

25. Prices are generally stationary, but, as elsewhere, the prices of rice and *makai* are rising, while those of wheat and barley are falling. The basis for the grain equivalent is now barley at the following rates: Sadar and Sewan subdivisions and Mirganj thana in Gopalganj 13 seers; Gopalganj thana 12 seers.

26. The public health remains fairly good. A slight local outbreak of cholera was checked by prompt treatment.

27. Imports have risen again. Taking the figures for rail, river and road together we get the following tables, as compared with those of the previous fortnight: imports 94,490 maunds and exports 6,104 maunds against 83,130 maunds and 3,820; the balance in favour of the district is therefore 86,386 maunds as compared with 79,301. The Collector notes carefully the source of

imports and the destination of exports; three-fourths of the imports consisted of rice, much of it from Howrah, as will be noticed below; Chapra, Revilganj and Sewa absorbed the bulk of the imports, Sewan taking as much as 21,390 maunds, of which a large portion no doubt will find its way to the relief works in Gopalganj.

28. The following statement compares as usual the principal relief figures of the past and previous fortnight:—

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task work.	Daily wage, irrespective of task.	Gratuitous relief, including dependants.	Total.		
1	2	3	4	5	6	7	8
1897.		A. Under the Collector.				C. ft.	Rs. A. P.

		B.—Hutwa Ref.					
13th March	...	3,20	854	554	4,428	32	3 7 9
20th "	10	3,180	753	514	4,377	28	3 14 0
27th "	...	2,532	848	416	3,796	25	3 6 8
27th "	1	2,043	435	393	2,861	25	3 1 9

The number of Government works has fallen off by 5 owing to the closing of works in the Siwan subdivision. Of these, only 2 were under the Public Works Department, viz., two irrigation channels in Gopalganj. There has been some delay in the taking over of works by the Public Works Department, but I regret to say that the Executive Engineer has been ill: and two new works were opened at the end of the period.

29. The numbers on relief works have fallen considerably owing partly to the closing of the works as mentioned above, partly to the fact that the alteration of the basis of calculation has lowered the wage, and partly to the rain and the consequent demand for agricultural labour. The daily average numbers on relief works in each subdivision (including the Hutwa works and works under Public Works Department Agency) during the last three weeks are shown in the margin. Apparently

SUBDIVISION.	Week ending—			
	6th March.	13th March	20th March	27th March.
Sadar	1,819	1,621	1,137	2,308
Siwan	1,854	1,896	1,111	928
Gopalganj	8,669	9,273	7,977	5,809
Total	11,692	12,390	10,225	9,040

distress is increasing in the Sadar and declining in other two subdivisions, or else the effect of the circumstances mentioned above is less in the Sadar subdivision than elsewhere. Relief works will be opened in the rice tracts of the Sadar subdivision in the course of the current month, and I expect that with the return of the male emigrants from the East there will be some advance in the numbers of relief workers, though I doubt whether it will be so great as Mr. Earle expects.

30. The outturn on Government works is good, always supposing that the measurements are correct, for Mr. Earle reports that he has had to punish several cases of incorrect measurements. The outturn in Civil Agency works is lower and the cost rate higher than on Public Works Department Agency

works for the same reason as in Champaran, viz., that most of the former are tanks. The lowering of the daily wage has also reduced the cost rate all round. On the Hutwa Raj works there is an improvement in the cost rate, but it is still too high, and the outturn is much below that obtained on Government works; the labourers were, it is believed, employed on tanks for the most part.

31. The numbers on gratuitous relief have gone steadily up, and in the last week of the fortnight they provided just 75 per cent. of the whole number in receipt of Government relief. In face of the strong opinion expressed by the Collector in paragraph 4 of his report, which is based on personal experience, and the admitted fact that in Saran gratuitous relief must take a very high place, I hesitate to say that it is being overdone, but the matter deserves and will receive careful attention.

32. As before, two Government poor-houses were open and four maintained by the Hutwa Raj. In the former 108 persons were relieved daily during the last week under report, in the latter the daily average was 2·3; the corresponding figures in the last week of the previous fortnight were 147 and 352.

33. *Champaran*.—There is nothing to complain of in the condition of affairs in this district, and the relief of the people is being conducted steadily along the authorised lines.

34. Mr. Macpherson has revised his figures of affected area and population. The representations contained in paragraphs 3 and 4 of his report are reasonable, and I accept his proposed figures of 2,593 square miles and 1,554,000 souls, against 1,865 square miles and 1,110,000 souls as stated in previous reports. During the fortnight under review two non-officials were taken on as Assistant Charge Superintendents and two military officers arrived from the Punjab, so that the district is now fully manned.

35. Champaran appears to have had heavier rain on the 22nd, 23rd and 24th March than any other district, except Darbhanga, as 3·47 inches were registered at Bettiah, and the fall was very heavy over a tract between Ramnagar and Gobindganj. As the harvest is later in this district than elsewhere in the Division, I was apprehensive of considerable damage, but Mr. Macpherson is able to report after careful enquiry that except a tract to the north-east of the district where the *rabi* and the poppy were damaged by hail, the rain has been everywhere most beneficial. The rain caused the resowing of much indigo, but has given better promise of a crop than before.

36. Prices are practically stationary with a tendency to fall, which will, I hope, continue as the new grain of the *rabi* harvest comes in; maize is hardly to be had, as is the case elsewhere. The most satisfactory feature is that the price of grain is not rising in Ramnagar, which is doubtless due to the facts to be noticed below.

37. Imports have been larger and the balance in favour of the district greater than in any previous period. The total imports by rail were 47,581 maunds and the exports 286 maunds against 18,390 maunds and 327 maunds in the previous fortnight, so that the net imports were 47,295 maunds against 18,003 maunds, and the total addition to the food-stocks of the district in the month of March has been 65,598 maunds. Eighty-five per cent. of the food-grains came from Calcutta, being all rice and paddy, probably from Burma, and more than four-sevenths of the total imports went to Bettiah. Nearly 10,000 maunds of grain passed in through the registering stations in the Nepal frontier, besides all that may have been smuggled in. All these facts are most satisfactory as showing that the local traders are alive to the wants of the district, and are supplying them to the full.

38. The death-rate is below the average for the whole district, but in four thanas it has been slightly higher than the mean of the last five years—mostly it is believed from fever. The dry season has caused a much reduced mortality in the northern and western parts of the district.

39. There has been a considerable increase in crime, which is the only unsatisfactory feature in the present report: the figures are given in paragraph 18 of Mr. Macpherson's report. Incendiary fires have certainly also been numerous, though they appear to have been only partially reported by the police.

40. The following comparative statement gives the principal figures for Government relief of all kinds:—

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task work.	Daily wage, irrespective of task.	Gratuitous relief, including dependants.	Total.		
1	2	3	4	5	6	7	8
1897.						U. ft.	Rs. A. P.
6th March	84,207	5,391	37,473	1,27,071	24	3 11 8
13th " ...	78	92,054	5,219	45,422	1,43,295	27	3 8 4
20th "	82,580	6,217	47,911	1,36,708	28	3 5 4
27th " ...	80	70,083	6,581	49,955	1,26,569	27½	3 12 5

The number of works open was only increased by 2 during the fortnight: 59 of these were Civil Agency works and 21 were under the Public Works Department. A reference to Form 7 shows that on each day of the last week of the fortnight there were on the average 56,895 male units on the Civil Agency Works, and 13,138 on those under Public Works Department Agency. The Collector explains that out of the 59 first named, 47 were tanks, while among the 21 works under the Public Works Department, only 4 were tanks.

41. There has been a steady fall in the number of persons on task work for the last three weeks, due partly to the rain which made work impossible for a day or two, and also attracted a good deal of labour to the resowing of indigo and other agricultural operations, and to a less degree to the cutting of the *sabi*, which was hardly in full swing during the fortnight under report. In the south Bettiah charge the fall has been very great owing to a stricter enforcement of rules and the closing of some works, accompanied by a transfer of the Charge Superintendent. Private relief works have virtually come to an end, the only work open during the fortnight being a tank at Bettiah with a daily average of 39 male units.

42. The general outturn has remained pretty constant, being 28 cubic feet in the first and 27½ cubic feet in the second week. For reasons which have been stated before, the outturn under Public Works Department Agency in this district is necessarily better than that in works under Civil Agency; moreover, after the rain which fell in the last week, tank work was rendered still more difficult and expensive by the collection of water in the pits.

43. The gratuitous relief figures show a steady advance, and in the last week of the fortnight composed 39·4 per cent. of the whole, as against 31·69 in the last week of the previous fortnight. In the week ending 30th January the ratio was only 6·01 per cent., so that it is clear that the circle organisation has been greatly developed during the last two months. Mr. Macpherson points out that gratuitous relief is apparently rather overdone in one or two charges, and it will be watched. The percentage of persons on gratuitous relief to the whole population of the affected area is 3·9. The daily dole is somewhat high.

44. Four poor-houses were open during the fortnight with an average daily attendance of 420 for the first and 407 for the second week. Four kitchens were open also with a daily average of 383 and 407 persons.

45. *Muzaffarpur*.—In this district the numbers on relief works and in receipt of gratuitous relief have advanced slowly. In other respects there is little to report.

46. The rainfall of the 23rd and 28th greatly benefited the crops: nearly two inches fell at Sitamarhi and nearly an inch at Muzaffarpur, the fall to the south of the district being much lighter. *Alua*, which is largely planted in this district, was greatly benefited, as were the smaller millets now in the ground.

47. The public health was exceptionally good, the deaths in February 1897 having been 5,177 against 8,824 in the same month of 1896.

48. Prices are stationary: they are higher in Sitamarhi than elsewhere, but the Collector hopes that importations of Burma rice will soon bring down

the price. Form 8 shows that 6,593 maunds of food-grains, almost entirely rice and paddy, were imported, and only 14 maunds exported. After despatching my last report I called for a return of imports and exports of the stations in this subdivision, but it has not yet been submitted.

49. Imports generally were a little lower than in the previous fortnight, being 52,292 maunds against 53,595, and the exports were about the same as before, viz., 2,831 maunds against 2,946, so that the net imports were 49,461 maunds against 50,649. Of the imports, 34,151 maunds were rice and 9,042 paddy: this came mostly from Howrah and the Darbhanga district.

50. The *rabi* is roughly estimated at about 11 annas, and as prices are steady and there are no signs of depletion of stocks and no exportation, it seems clear that the grain in hand, reinforced by the *rabi* now harvested, will suffice to carry the people on till the *bhadoi* comes in, though owing to high prices they must be put in the way of obtaining money to buy food.

51. The usual comparative statement of relief works and gratuitous relief is given below:—

Muzaffarpur District.

Week ending—	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task work.	Daily wage, irrespective of task.	Gratuitous relief, including dependants.	Total.		
1	2	3	4	5	6	7	8
						O. ft.	Rs. A. P.
6th March 1897	...	17,272	1,503	23,868	42,143	55.39	1 8 5
13th " "	62	18,264	2,052	20,151	40,467	50.7	1 10 3
20th " "	...	16,075	2,912	23,642	41,929	50.95	1 10 0
27th " "	70	18,656	2,132	25,985	46,773	47.11	1 13 6

The number of works has increased from 62 to 70, four having been opened under Civil and four under Public Works Department Agency. There are 58 Civil Works open against 12 under the Public Works Department.

52. There was a fall in the average number of task workers in the first week of the fortnight here as elsewhere, on account of the occurrence of the *Holi* festival, but with this exception the numbers have gone slowly up from 17,272 male units for the week ending 6th March to 18,656 for that ending the 27th. The average daily outturn of work is very high, but a good deal higher in the Civil Agency works than in those under the Public Works Department (*vide* Form 7). The high general outturn is due no doubt in part to the extraordinarily small number of D class workers shown in the returns. In the week ending the 27th March, the percentage of D class male units in this district to the whole number of male units employed on task work was 1.76. It has not been stated why there has been a small falling off in the outturn during the last week. The cost per 1,000 cubic feet is still the lowest in the Division.

53. The numbers on daily wage, irrespective of task, are not excessively large anywhere, but there are large local variations in this respect as in the number of dependents on the works as a glance at Form 5 will show. The Collector's attention will be drawn to these points, for which very likely there are local causes.

54. The numbers on gratuitous relief are going steadily up, having reached a daily average of 25,985 in the last week of the fortnight: no explanation has yet been received of the average of 48,230 reported for the week ending 27th February.

55. Six poor-houses were open during the period under review. The average daily number of inmates was 345 and 278 in the two weeks, which is about the same as before.

56. The relief works of the Darbhanga Raj in Parihar employed a daily average of 2,350 male units, and the poor-house at Jabdi accommodated a daily average of 148, against 165 and 288 during previous fortnights.

57. *Darbhangha*.—The report from this district shows that the work of relief is going steadily on; and that there has been, as was expected, a small increase in the numbers on relief works and in the receipt of gratuitous relief.

58. The rainfall of the 22nd, 23rd and 24th March was heavier in Darbhanga than in most other districts, totalling over 2 inches in the Sadar station and the north of the district. The mean of 22 registering stations, omitting two, the reports from which are obviously wrong, is 1.67 inches. This has done immense good to the growing crops, and has enabled the cultivation of the fields to be continued.

59. The *rabi* is now nearly all in, and the Collector adheres to his estimate of about three-fourths of an average crop all over the district, whereas the Director of Land Records estimates 14½ annas.

60. There is very little variation in prices: rice is dearer at Darbhanga and Madhubani, and cheaper at Somastipur: wheat is cheaper at Darbhanga and Samastipur, and stationary at Madhubani: gram is cheaper everywhere, and *rakar* cheaper in the south, and dearer at Madhubani.

61. The food-grain traffic has again been brisk: imports totalling 57,961 maunds against 52,803 and exports 3,364 maunds against 3,904, so that the balance in favour of the district has been 54,597 maunds against 48,899. As usual, most of the imports are rice and paddy, the former being 18,725 maunds, and the latter 24,649; there was also an importation of 12,473 maunds of other "food-grains." Two-thirds of the imports went to Darbhanga, much of it doubtless for despatch to the Madhubani subdivision. Stocks are said to be holding out well, and as in Muzaffarpur there are no signs of depletion.

62. The following statement gives the usual figures:—

DARBHANGA.

Week ending.	Number of works open.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Average daily outturn per male unit.	Cost per 1,000 cubic feet.
		Task work.	Daily wage, irrespective of task.	Gratuitous relief, including dependants.	Total.		
1	2	3	4	5	6	7	8
6th March 1897	73,258	6,124	51,590	130,972	C. ft. 26 6	Rs. A. P. 2 15 3
13th " "	125	58,188	4,075	46,571	108,834	30.2	2 11 3
20th " "	48,931	5,486	50,545	104,964	32.1	2 11 6
27th " "	134	52,910	4,782	53,868	111,560	29.5	2 14 5

The number of works has risen from 125 to 134, of which 89 are under Civil Agency and 45 under the Public Works Department. On the 27th ultimo, the total number of persons employed on these, was as in the margin. It will be observed that with nearly equal totals, the proportion of men and of children is much higher in the works under the Public Works Department, and of women in those under Civil Agency.

The attention of the Collector will be called to the matter.

63. Taking the task works together first, under whatever agency conducted, it appears that the numbers, which began to fall after the 6th March, have not yet recovered, though they are rising again. Employment on private tanks and embankments still continues, but the *rabi* cutting was approaching completion during the last of the weeks under notice, and in that ending the 20th March the *Hol* festival drew away many workers. The outturn and cost

rate are good, considering what a large proportion of the works in hand are tanks. Form 7 shows that the outturn on Civil Agency works was better than on those under the Public Works Department; the explanation was suggested in my last report. The number on daily wage, irrespective of task, keeps low.

64. In this district where acute distress prevails over more than two-thirds of its area, it is important to note the variations not only in the district totals, but in those of its subdivisions. The statement in the margin shows

Average daily number of male units on task works in each subdivision in the week ending :—

1	March 6th.	March 13th.	March 20th.	March 27th.
	2	3	4	5
Sadar { Civil Agency ...	37,311	25,241	23,451	21,903
... { Public Works Agency	30,870	18,448
Total ...	37,311	25,241	33,321	40,351
Samastipur { Civil Agency ...	5,021	4,325	2,656	2,401
... { Public Works Agency
Total ..	5,021	4,325	2,656	2,401
Madhubani { Civil Agency ...	19,088	27,284	12,451	10,280
... { Public Works Agency	14,001	14,200
Total ...	19,088	27,284	27,512	24,480
Total Civil Agency ...	62,320	56,850	37,958	34,654
Total Public Works Department Agency	30,292	24,803	25,591	32,654
GRAND TOTAL ...	122,612	81,744	63,489	67,308

what these variations have been, and under what agencies they have occurred. In the returns for the two weeks ending 6th and 13th March, details by subdivisions are not given for the Public Works Department works. It will be seen that the total numbers fell steadily for the first three weeks, and then began to rise again: the cause of the fluctuations has already been reported. Looking at the two

weeks under report, it will be noticed that there has been a general falling off in Madhubani only; in Samastipur only Civil Agency works are open, and in the Sadar subdivision the fall in the numbers on Civil Agency works and the concurrent rise in those on Public Works Department signifies the taking over of more works by the latter: it will be seen that, for the same reason, the Public Works Department figures have risen steadily throughout the month after the drop of the first week.

65. The numbers on gratuitous relief are rising slowly again, though they are below the high figures reported for the weeks ending 6th and 13th February, viz., 64,841 and 70,428. Now that the circle lists are complete, and full supervision is exercised, there should be no great increase in these figures, though it is possible that they may go up during May and June. The dole is somewhat high still in the case of persons relieved by the Civil Department.

66. On the last day of the period under review, there were seven poor-houses open with 89 inmates. These figures compare curiously with those of other districts, especially Muzaffarpur, and it would seem that many persons are relieved at their houses in Darbhanga, who would be entered in poor-houses elsewhere.

67. It appears that, in the fortnight in question, the Darbhanga Raj employed a daily average of 15,547 male units on relief works, and supported 10,766 persons a day by gratuitous relief.

PART III.—CONCLUSION.

68. The foregoing paragraphs, in which I have commented on the district reports, show that ordinary conditions have existed, and that during the fortnight just past steady progress has been made.

69. Crop prospects continue excellent. There was a fall of rain all over the Division on the 22nd, 23rd and 24th March, which was heaviest in Darbhanga and parts of Champaran, and lightest in Saran. As the greater part of the *rahi* had been harvested everywhere, except in Champaran, no damage was done, and even from that district the Collector reports that except in one tract no harm resulted. On the other hand, the rainfall has everywhere enabled cultivation to be carried out for the early *bhadoi*, and has been of incalculable

value to the millets in the ground, and to sugarcane and cotton, and has probably altered for the better the prospects of indigo. The final estimates of the *rabi* have not yet been sent to me by district officers, but, speaking generally, I expect that the three southern districts (with the exception of Bhabua in Shahabad) will give a 16-anna crop. In Champaran we may count on a 10-anna crop, and in Saran, Muzaffarpur and Darbhanga the crops should be about 11 or 12 annas. The first forecast of the Director of Land Records give the following figures: Patna 11½, Gaya 16, Shahabad 9, Saran 11½, Champaran 11½, Muzaffarpur 12 and Darbhanga 14½. The Patna and Shahabad figures are too low. How much better these harvests are than those of 1873-74 will be seen from a perusal of the following figures, which represent the outturn of that year, viz., Patna 12, Gaya and Shahabad 16, Saran 7, Champaran 8, Muzaffarpur 10 and Darbhanga 8½.

70. Prices remain remarkably steady.—The rain has infinitely improved the prospects of fodder for the cattle. Public health is extraordinarily good, and crime, except in Champaran, has not greatly increased.

71. Judging by the steadiness of prices, stocks show no sign of depletion, although certain food-grains are being exhausted, such as country rice and Indian-corn, but all officers are agreed that there is little or no apprehension, and that the grain-dealers have fully met the crisis, expanding their operations where they were already familiar with the import trade, and rapidly accommodating themselves to their new business in tracts which usually export food-stocks. The imports and exports of the fortnight under report are set forth in the following statement:—

DISTRICT	IMPORTS.		EXPORTS.		EXCESS -I. OR E.

DISTRICT.	FORTNIGHT ENDING—		
	27th February.	13th March.	27th March.
	1	2	3
Patna	13,201	10,225	7,899
Gaya	752	745
Shahabad	1,939	1,490	4,872
Saran	20,584	35,870	32,169
Champaran	6,018	13,580	34,907
Muzaffarpur .. .	1,682	11,670	16,051
Darbhanga .. .	384	4,542	6,814
Total	44,560	78,132	1,02,712

72. The whole volume of trade has been 4,22,506 maunds against 3,60,807 in the previous fortnight; and as both the imports have been heavier and the exports less, the balance in favour of the Division as a whole was 2,72,500 maunds against 1,93,587 maunds. It will be noticed further that every district, even including Patna, showed an excess of imports over exports and a greater importation than before except in Muzaffarpur, the advance being very large in Champaran, and relatively great in Shahabad. It is equally satisfactory to notice that rice from Howrah, Calcutta and Kidderpore, which is presumably Burma rice, has been coming freely into the districts of the Division. The figures are given in the margin, those for Champaran are very reassuring.

73. The statement below shows what proportion of the population in each district was in receipt of relief of all kinds on the 27th March and on two previous dates. The totals are taken from the *Calcutta Gazette* as

subsequently corrected by the Collectors. The Muzaffarpur figures include 2,500 on account of Raj relief in Parihar :—

DISTRICT.	Estimated population of affected area.	Number in receipt of relief on the 27th March.	PERCENTAGE RECEIVING RELIEF ON THE—		
			27th February.	13th March.	27th March.
1	2	3	4	5	6
Shahabad	371,824	24,732	1·6	4·8	6·65
Saran	1,484,386	44,401	2·86	2·83	2·99
Champaran	1,551,000	164,426	15·33	18·5	10·58
Muzaffarpur	1,660,000	60,768	1·85	3·13	3·66
Darbhanga	2,270,000	202,084	7·46	7·48	8·9
Total	7,840,210	496,411	6·13	7·14	6·76

The increase observable in all districts, except Champaran, is due to the steady development of relief operations. In Champaran the fall is due to a readjustment of the area and population, as explained in the Collector's report and stated in paragraph 34 above.

74. The statement below compares as usual most of the relief statistics of the past and the previous fortnight. As most of the points have already been noticed in dealing with the district reports, an elaborate examination of the figures is not required :—

Total	182,719	18,551	139,601	155,923	14,946	160,965

Taking the Division as a whole and striking a mean for the whole fortnight, it appears that there was a falling off in the numbers on task work, and an increase in those on daily wage, and in the receipt of gratuitous relief.

75. In respect of task workers there has been a decrease everywhere, except in Shahabad, due to the *rabi* cutting and the rain, and also in places to stricter administration. The outturn of work has improved in Saran and Darbhanga, and fallen off slightly in Muzaffarpur and Shahabad; it is best in Muzaffarpur and lowest in Champaran in both fortnights. The rate per 1,000 cubic feet varies inversely with the outturn, being lowest in Muzaffarpur

and highest in Champaran: there is very little variation in the districts in each fortnight. The same may be said of the average daily wage.

76. The number of those paid by daily wage, irrespective of task, is now here excessive: the percentage they bear to all relief workers was 6·8 per cent. in the previous period, and 8·76 per cent. in the fortnight just past: some doubt is felt as to these figures inasmuch as there is some uncertainty as to the manner in which the Sunday's attendance and the Sunday wage of task workers are shown. Orders are under issue, which are intended to ensure uniformity, and in future these persons and the pay they receive will be shown under the heading "Daily wage irrespective of task."

77. In respect of gratuitous relief, there is again an advance in the numbers, which is shared by all districts. Taking from Form 6 the figures of gratuitous relief for the last week of the fortnight, it appears that out of the total number relieved daily, those on gratuitous relief were equivalent to the following percentage: Shahabad 76·39, Saran 75, Champaran 39·46, Muzaffarpur 55·55, Darbhanga 48·28. These figures display in all cases, except Shahabad, a considerable advance on those given in paragraph 64 of my last report. The dole is highest in Shahabad and Champaran.

78. The process of taking over works by the Public Works Department has gone on but slowly. During the fortnight only 17 works were taken over by them, and on the 27th ultimo the total number open was as follows:—

Works under Public Works Department Agency.

Saran	2
Champaran	21
Muzaffarpur	12
Darbhangha	45
Total					80

Works under Civil Officers.

Shahabad	7
Saran	29
Champaran	59
Muzaffarpur	58
Darbhangha	89
Total					242

GRAND TOTAL, ALL WORKS ... 322

79. Appendix A gives the expenditure to date, so far as it can be ascertained from the fortnightly statements. The total expenditure to the end of the month, which also corresponds with the end of the financial year, was, as reported, Rs. 17,10,920, but it was probably a good deal more. Of this sum Rs. 3,50,063 were spent in the fortnight under review. So far as these figures go, they show that nearly 13 lakhs have been spent on relief works and more than 3½ lakhs on gratuitous relief.

80. During the fortnight under review, five officers of the army reported their arrival, and were posted as follows:—*Champaran*.—Lieutenant Kaye, 21st Punjab Infantry; Lieutenant Dalzel, Devonshire Regiment. *Muzaffarpur*.—Lieutenant Smith, Royal West Kent Regiment. *Darbhangha*.—Lieutenant Battye, 6th Bengal Cavalry; Lieutenant Cassels, 35th Sikhs. All these have been set to work, and two more have been asked for—one for Saran and another for Muzaffarpur.

81. This report would be incomplete without a few words to show what has been done during the month of March now past, although the main facts may be gathered from what has been said above, and in my previous report for the first fortnight of the month.

82. The weather throughout has been very favourable, so that it is almost certain that the *rabi* will exceed expectations: after most of it was gathered in rain fell, rendering it possible for the raiyats to carry out a great deal of cultivation at an earlier date than usual. The public health has been extraordinarily good, and the condition of the cattle fairly satisfactory. Prices have remained steady, and grain has been imported in increasing volume to

meet the demands of the people. The figures below show how steady the influx has been:—

DISTRICT.	NET BALANCE IN FAVOUR OF THE DISTRICT FOR THE PERIOD ENDING—							
	26th Decem-ber.	9th Janu-ary.	30th Jan-uary.	19th Feb-ruary.	27th Feb-ruary.	13th March.	27th March.	Total.

								I 2,33,208 I 15,616 I 67,198 I 7,33,808 I 82,328 I 3,27,479 I 55,755

The figures in column 2 give the net result up to the 26th December 1896, and those in column 9 give the total result since the commencement of operations. It is instructive to notice how in Shahabad imports have fallen off, as its good *rabi* crop became a certainty, how Champaran and Darbhanga which usually export have become large importing districts, and how steady the increase has been in the case of the former. The figures in the last column imply a vast addition to the food-supply of the districts of this Division.

83. Next, I invite attention to the statement below which compares the principal relief statistics in the last fortnights of February and of March:—

DISTRICT.	FORTNIGHT ENDING THE 27TH FEBRUARY 1897.									FORTNIGHT ENDING THE 27TH MARCH 1897.								
	TASK WORK.				DAILY WAGES IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.			TASK WORK.				DAILY WAGES IRRESPECTIVE OF TASK.		GRATUITOUS RELIEF.

Shahabad
Saran
Champanan
Muzaffarpur
Darbhanga
Total	243	179,311	10,888	...	137,459	...	315	155,623	14,048	...	160,961	...

(a) Exclusive of 10 works opened by Hutwa Raj

84. The number of works open increased from 243 to 315: the nur on relief works, taking both task workers and those on daily wage together fell off by nearly 20,000, owing to the *rabi* harvest and the rain in the last of March; but the numbers on gratuitous relief rose from 137,459 to 160,961: advance being great in Champaran; the apparent fall in Muzaffarpur is probably due to a mistake in some of the figures of the earlier period. Lastly, the rate is apparently higher, and the outturn lower in the later than the earlier period, but some at least of the difference is due to closer supervision and more accurate measurements.

85. Lastly, I give in the margin the numbers in each district in receipt of all kinds of relief on the last Saturday in each of the two months.

DISTRICT.	NUMBERS IN RECEIPT OF RELIEF OF ALL KINDS ON THE--	
	27th February.	27th March.
Shahabad	5,965	24,732
Saran	38,691	44,201
Ohamparan	170,251	164,426
Muzaffarpur	30,875	60,768
Darbhanga	169,511	202,084
Total	415,293	496,251

86. So far it is not too much to say that, with the exception of the very small numbers still on relief in Muzaffarpur, events have fallen out much as it was hoped, and expected that they would. The weather has been most providential for the crops.

Numbers rose rather rapidly on relief works as field labour ceased in January and February, but fell again in March when the *rabi* harvest began. Gratuitous relief has increased steadily, as our circle organisation was perfected. If our prognostications for the future are fulfilled, as they have been in the past, we may look for a sharp rise in the numbers on relief works in April and May, and if the rains are favourable a steep fall will follow in June and the succeeding months. I believe that our numbers on relief of all sorts will not rise so high as in 1874, or come with so great a rush for three reasons: firstly, because we have had a better *rabi*; secondly, because operations began earlier; and, lastly, because I venture to think that (chiefly for that very reason) our organisation is better and our preparations to meet a rush are more complete.

87. The usual statements and the monthly maps are appended. Statements A and B have not yet been prepared on a uniform system, as district officers find it hard to understand what is wanted, and the matter will be separately referred for the Lieutenant-Governor's orders.

APPENDIX A.

District.	BASINEE WORK.					GRATUITOUS RELIEF.					MISCELLANEOUS.					GRAND TOTAL.	
	Paid for task-work.	Daily wage, irrespective of task.	Depen- dants under sections 83 and 84.	Total of columns 3 and 4.	Poor, houses, &c.	Relief of artisans.	Relief by grain doles. PATNA COMMR.'s OFFICE;
BANKURA,
The 7th April 1897.

J. A. BOURDELLON,
Commissioner.

No. 2F., dated Bankipore, the 2nd April 1897.

From—T. INGLIS, Esq., Collector of Patna,

To—The Commissioner of the Patna Division.

I HAVE the honour to submit the following report under section 24 of the Bengal Famine Code for the second-half of March 1897.

2. The figures in it relate to the two weeks ending on 20th and 27th idem.

3. SECTION 24 (1).—No change.

4. SECTION 24 (2) (a).—*General state of the affected tracts, &c.*—There has been little or no change. The unsettled weather during the fortnight has not caused any appreciable damage so far as my reports go. The rain was not very heavy, and was followed by sunshine. It enabled ploughing to be carried on and sowing of sugarcane and millet in some parts, while it benefited the standing crops.

5. SECTION 24 (2) (b).—*Crop prospects.*—The rainfall facilitated the planting of sugarcane and sowing of millet which is to be found now in all stages of growth. It also benefited standing crops, sugarcane, millet, cotton (a small crop), hot-weather vegetables, &c. The *rabi* harvest is nearly completed; tobacco, *rahar*, castor and in some places wheat and barley are in course of being harvested: much of the crop is still in the *kulihans*, and must have suffered somewhat from the rain. I visited several *kulihans* and found the raiyats had little to complain of. Ploughing for the *bhadosi* crop and the preparation of rice seedling beds were facilitated by the recent rain.

6. SECTION 24 (2) (c).—*Food-stocks.*—The Subdivisional Officer of Barh says that there is a rumour that stocks are running short. He does not believe this to be true, and it is impossible to believe it with the crop, the harvesting of which is nearly completed. It is true that certain grains, such as *marua* and *makai* (Indian-corn), are not found in large quantities in the market, but this does not prove that the cultivators are not well supplied with food-grains. The evidence available all points to the cultivators holding up their stocks, and they will continue to do so till the next crop is assured. There are no signs reported of any deterioration in the condition of the people. On the contrary, the recent enquiries made into the cases of relief granted by the Charitable Relief Fund Committees have led my officers to speak more hopefully of the condition of the classes for whom they expected relief would be necessary.

7. SECTION 24 (2) (d).—*Importation and exportation of food-grains:—*

				Mds.
Imports	57,997
Exports	44,348
			Net import	13,549

All returns have been received. The imports consist chiefly of rice, 44,009 maunds, having been imported out of a total import of 57,997 maunds. This rice came from Howrah (7,899 maunds), Raniganj (6,104 maunds), Burdwan (8,536 maunds), and Mallarpur (6,281 maunds). Wheat shows an import of 3,121 maunds and gram and pulses of 3,966 maunds. The chief station of import is Patna Ghat, which imported 26,790 maunds. Bankipore received 7,022 maunds. Barh imported 5,664 maunds, all rice.

Exports consisted mainly of gram and pulses and rice. The former class of food-grains was exported to the amount of 31,288 maunds out of a total export of 44,348 maunds, Mokameh, Barh, and Khusarpur being the chief exporting centres, and the North-Western Provinces the destination of the consignments. The export of rice reached 11,064 maunds, and this trade was mainly confined to the river traffic from Patna City.

The following quantities were imported from the stations named in the Commissioner's Famine Circular No. 15 of 1897, paragraph 3:—

			Rice. Mds.	Paddy. Mds.
Howrah	7,899	783
Kidderpore
Calcutta
Sealdah

8. SECTION 24 (2) (e).—*Rainfall.*—The following is the recorded rainfall at the several reporting stations:—

Sadar	0.64
Bikram	0.38
Barh	0.29
Bihar	0.60
Hilsa	0.50
Dinapore	0.42

There was a further fall of rain on the 28th ultimo.

9. SECTION 24 (2) (f).—*Public health* continues good. The death-rate for March has not been received. That for February was 1.86 against 1.45, the average of the previous ten years.

The variable temperature of the period under report cannot have been healthy. Small-pox is still reported from a few villages, not of a virulent type.

10. SECTION 24 (2) (g).—*Emigration or immigration of famished people.*—None reported.

11. SECTION 24 (2) (h).—*Condition of cattle* continues fair. The outbreak of rinderpest continues in Patna City. Our powers for dealing with it are very limited, and Hindu feeling is antagonistic to any really effective measures for stamping it out. A segregation camp has been provided. The recent rains must have improved the fodder supply.

12. SECTION 24 (2) (i).—*Prices.*—Rice has risen in price. The price of other food-grains has perhaps slightly improved, though the minimum price is generally slightly higher. Burma rice does not find much favour.

13. SECTION 24 (3).—*Number of relief works open*—Nil. Arrangements have now been completed for opening repair work on the District Board roads at once. These will spread through April and May.

14. SECTION 24 (4).—*Number of poor-houses open, &c.*—There is a poor-house at Bankipore where the minimum ration is given, except in the case of those in hospital who are fed under the instruction of the Medical Officer. Much interest is taken in this poor-house by the visitors. The Subdivisional Officer of Barh wishes to open poor-houses at Barh and Bukhtiarpur, but I have called for further information before seeking your sanction. In my opinion kitchens will be sufficient.

15. SECTION 24 (5).—*Organisation for employment of artisans, &c.*—Nil.

16. SECTION 24 (6).—*Organisation for the distribution of grain doles, &c.*—No change has been made. Relief where necessary is given by the Charge Superintendents, but such cases are very few. The Charitable Relief Fund organisation has relieved a number of cases; but the enquiries I have had made in the Dinapore and Futwah Circles show, as I expected, that relief has been given indiscriminately and without reference to the objects which are the special charge on that Fund. In Dinapore I have ordered the Sub-Committee to reconsider their action; while in Futwah the relief has been stopped in those cases which do not deserve it.

17. SECTION 24 (7).—*Relief in kitchens.*—None so far. It is possible that kitchens may be opened at Barh, Bukhtiarpur and Dinapore. In the two former places the Subdivisional Officer of Barh seems to think that the supply of cooked food is repugnant to the feelings of the people. He forgets that the object of relief operations is to assist those in distress and that there must be some test of this measure of distress into which those relieved may have fallen. In Dinapore a kitchen may be necessary, as the Subdivisional Officer reports that the distressed poor are unwilling to come to the poor-house at Bankipore.

18. SECTION 24 (8).—*Number of persons to whom loans, &c.*—Loans have been granted to 14 persons under the Agriculturists' Loans Act, but no payments have been made. The amount sanctioned is Rs. 270, or an average of a little over Rs. 19.

19. SECTION 24 (9).—*Financial statement.*—The usual statement is submitted.

20. SECTION 24 (10).—Nothing to report.

21. SECTION 24 (11).—Nil.

22. SECTION 27 (iii).—*Water-supply.*—I have nothing new to report under this head. The rainfall can have had little effect on the water-supply.

Statistics of admissions to the Bankipore Jail.

I have now received figures for January and February from the Superintendent.

In January, out of 74 admissions, 52 were in good health (but of these, 25 were under their proper weight), 19 were in indifferent health, and 3 in bad health.

In February, out of 34 admissions, 25 were in good health (14 being under weight) and 9 in indifferent health.

These figures are unaccompanied by statistics of the corresponding period of 1896; but while the general health seems to have been fair, the weight of a large number of the admissions was under the standard.

APPENDICES.

The following statements are appended:—

- (1) Form 6 for each week separately.
- (2) Form 7.
- (3) List of prices.
- (4) Financial statement.
- (5) Export and import statements (Forms 8 and 9).
- (6) Abstract and comparative statement of exports and imports.
- (7) Monthly Famine statement A.
- (8) Ditto ditto B.

The map of the district is not required.

General.—The rainfall has, I believe, done little harm to the crops; in the *kadihans*, and what harm has been done has been more than compensated by the benefit done to the standing crops and the facilities given for further agricultural operations, while the condition of the green fodder supply must have improved. The temperature is remarkably cool for this time of year, and this may account for the continued good health of the district.

FORM No. 6.

[See section 26 (ii) of the Code.]

DISTRICT PATNA.

Statement of gratuitous relief for the week ending 20th March 1897.

NAME OF CIRCLE AND HEADS OF GRATUITOUS RELIEF.	NUMBER OF PERSONS RECEIVING GRATUITOUS RELIEF.				Money expended.
	Men.	Women.	Children.	Total.

* These figures do not include any railway.
(a) Advances in the previous year Nil.

BANKIPORE,
The 3rd April 1897.

T. INGLIS,
Collector.

No. 2554G., dated Gaya, the 1st April 1897.

From—H. SAVAGE, Esq., Collector of Gaya,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit famine report for the fortnight ending 27th March. The figures relate to the period under report, with the exception of Statements 8 and 9, which are for the two weeks ending 20th March.

2. *Section 24 (1).*—No area is affected by famine.

3. *Section 24 (2).*—Crop prospects.

The rain in the second half of March, which it was feared would damage the wheat on the threshing floors, did little or no harm in that direction. On the other hand, it facilitated the ploughing of fields for *bhadai*, and benefited the recently-planted sugarcane. Harvesting of *rabi* crops and gathering of opium are almost finished.

4. *Prices of food-grains.*—It will be seen from the accompanying comparative statement showing the prices of food-grains (Appendix A) that the prices of wheat and barley have fallen and that of rice remains almost stationary.

5. *Importation or exportation of food-grains.*—The figures of Statements 8 and 9 show:—

	Mds.		Mds.
Import	... 11,002		Export ... 3,152

against 3,711 and 1,206 maunds respectively of the previous fortnight. The increase in import is due to the increasing demand in Palamau district, to which 1,418 maunds of Rangoon rice were exported during the fortnight under report. The large import into Gaya indicates that export to Palamau will be brisk in April.

The principal item of import is rice (10,245 maunds) and export wheat (2,063 maunds). Rice seems to have been consigned from Bolepur (district Burdwan), Howrah and Patna ghât, and wheat exported mostly to Patna, Allahabad and Howrah. No rice came from Calcutta, Sealdah or Kidderpore.

6. The Government order extending the offer of bounty of 8 annas on all sorts of rice has recently been received here, and will of course stimulate export to Palamau.

7. *Rainfall.*—About three-fifths of an inch of rain fell throughout the district. The effect is stated above.

8. Public health continues good. The death-rate per mille for the month of February last was 1.4, that is, the same as in January; the figures for the corresponding period of 1896 being 2.8.

9. No case of emigration or immigration of famished people came to my notice.

10. *Section 24 (3).*—*Relief works.*—Nil.

11. *Section 24 (4).*—During the period under report the cook-house at Kusa fed 1,156 persons, or an average of 83 persons daily, the quantity of grain consumed being rice 36 maunds, pulses 9 maunds, salt 1 maund, and vegetables 2½ maunds.

12. An average number of 110 and 48 travellers was respectively fed daily at Aurangabad and Madanpur kitchens at an average daily cost of Rs. 6 in the former and Rs. 5 in the latter.

13. Figures for the kitchen at Barachatti have not yet been received. I understand, however, the daily cost for feeding the poor and needy at this kitchen averages from Rs. 4 to Rs. 5.

14. The Marwaris of Gaya town continue to spend Rs. 5 a day on distribution of cooked food and uncooked grains to beggars.

15. The Mahanth of Budhauri has opened a kitchen at Budhauri in the Nowada subdivision, where 100 persons are said to be fed daily.

16. The organisation of Relief Committees at each thana and outpost has been completed. Each Committee has raised by local subscription an amount sufficient to meet local wants for some time, and the members are at present engaged in making out lists of persons likely to require relief.

17. *Section 24 (5 to 7).*—Nil.

18. *Section 24 (8).*—No loan under the Agriculturists' Loans Act was given during the period under report. Rupees 7,300 was advanced under the Land Improvement Loans Act previous to receipt of orders suspending grant of loans under that Act. The total amount advanced during 1896-97 and the previous year under both Acts is noted below:—

	Amount advanced in 1896-97.	Amount advanced in 1895-96.
	Rs.	Rs.
Under the Agriculturists' Loans Act.	... 9,038	2,500
Under Land Improvement Loans Act	... 1,05,700	50,000
19. <i>Section 24 (9).</i> —Financial statements are blank.

GAYA COLLECTORATE,
The 1st April 1897.

H. SAVAGE,
Collector.

No. 178F., dated Arrah, the 2nd April 1897.

From—J. Winsor, Esq., c.s., Collector of Shahabad,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my report under sections 13 and 24 of the Famine Code for the second half of the month of March 1897. The figures dealt with in the report refer to the weeks ending Saturdays, the 20th and 27th March 1897.

2. *Section 24 (1): Area affected.*—I have nothing to add to what I have previously reported under this heading. There has been no change in the areas affected during the period under review. Since my report the test relief work opened in the tract south of Akbarpur has been closed on account of non-appearance of labourers. The people there are reported to be engaged in reaping the rabi crops, and there is no complaint. The Subdivisional Officer states that there is no anxiety to be felt about the tract in the meantime, but I have instructed him, as noted in my previous fortnightly report, to watch the condition of the people in this tract, and inform me whenever any action appears necessary. I have received no further information about the Khotas plateau, but it is not expected that relief will be required there till May. As no relief operations are in progress, I have not included the area and population of that tract in Form 10. The revised figures in columns 4 and 5 give the area and population of the whole of the Bhabua subdivision and of the Chenari outpost.

3. The arrangement of charges and circles in the affected area, as previously reported, remains unaltered. The plateau in the Bhabua subdivision which had hitherto been managed by the head constable of Adhowra, has been placed under a circle officer, Ramdhyan Lal, as noted in my last report. He has been stationed at Adhowra, and has been instructed to go over the whole of the Bhabua part of the plateau, and report where it will be possible to store grain and where other circle officers should be stationed, if they are required. The circumstances of the plateau being exceptional, a slight difference in method in the distribution of relief is necessary, and the Subdivisional Officer, with my approval, has issued instructions for the guidance of the circle officer, a copy of which is enclosed herewith. In addition to the difficulties in connection with communication and supply of grain on the plateau, it also appears that the water-supply is likely to become deficient. An officer has therefore been deputed to go round the plateau, and report what measures can be taken for improving the water-supply, either by digging wells or excavating tanks or by repairing, enlarging and deepening existing sources of supply.

4. The Subdivisional Officer, Mr. Stevenson, reports that the distress in Chenari outpost is not so acute as in Chainpur and Bhabua.

5. *Section 24 (2): General state of the affected tracts.*—The general condition of the people remains the same as reported last fortnight. Public health is fairly good, but small-pox is still reported in several places. Eleven cases occurred on the Jahanabad road, but steps were taken to have the sufferers removed at once to hospital. The Civil Hospital Assistant of Bhabua died of small-pox during the fortnight. He is a great loss, as he took a considerable interest in the poor-house. The Civil Surgeon has made temporary arrangements, pending the appointment of a permanent Hospital Assistant.

6. The rabi outting is nearly over, except in places where sowings were late. I dealt fully with the outturn in my last report.

7. The weather has been exceptionally cool for the time of the year. It was cloudy from the 20th, and on the 23rd there was heavy rain throughout the district. The recorded rainfall at Sadar was 0.75, Bhabua 0.36, Sasaram 0.51 and Buxar 0.43. The rain has not done much damage either to the crops in the fields or on the threshing floors, and has benefited sugarcane. In this district there is very little "china" sown, and so far as I can learn cultivators have not taken advantage of the rain to commence ploughing. There was also rain in the night of the 27th and early morning of the 28th instant, but this does not fall within the period covered by this report.

8. *Food-stock and traffic in food-grain.*—Forms 8 and 9 appended to this report will show that during the fortnight 26,180 maunds of food-grains were imported by rail and 14,908 maunds exported.

The corresponding figures for the preceding fortnight were 21,507 and 18,058 respectively, so that imports were greater by 4,673 and exports less by 3,150 maunds. The balance in favour of the district during this last fortnight is 11,272 maunds against 3,449 maunds in the preceding period. The imports consisted chiefly of rice and the exports of wheat and other food-grains. Out of the imports 4,872 maunds of rice came from Howrah. The statement appended to this report will show the quantity of rice imported to each station. The food stock of the affected area remains as before. Nearly the whole of it is imported chiefly *via* Zamania, but also from Sasaram. The rice imported *via* Zamania comes from Calcutta and Burma. Babu Mokand Sahu supplies Ramgarh charge, Babu Brindaban Das the Chainpur charge, and Babu Makund Sahu and Kani Ram the Bhabhua charge, so far as gratuitous relief is concerned. A large proportion of the recently cut rabi is being exported from the Bhabua subdivision to the Benares district.

9. As regards the food-stocks in the district, I regret that I have not yet been able to work out conclusions from the mass of figures that have been furnished. They are being dealt with in this office and will be reported on separately. So far I have not received any

complaint that food-grains are not available for labourers employed on relief works. Hitherto local Banias have been found ready of their own accord to maintain a sufficient supply of food for these labourers.

10. *Prices*.—I annex a statement showing the prices of food-grains during the period under report. There has been a slight fall in the price of wheat, while the prices of other grains remain nearly stationary.

11. *Emigration and immigration*.—Emigration is reported to have ceased in the Bhabhua subdivision. The Subdivisional Officer reports that the police submitted figures showing that 3,087 people in all had emigrated from 468 villages. These figures cannot be accepted as having any approach to accuracy. Labourers are now returning to their homes, and this, apart from other causes, will tend to increase the numbers on relief works.

12. The condition of the cattle in the Bhabhua subdivision is not good, fodder being insufficient, the rabi crop produced only a little straw, but the recent rain will improve the fodder to a certain extent. No complaint has been received from any other part of the district.

13. *Public health*.—A statement showing the mortality of the whole district and the affected area compared with the corresponding month of the previous year is appended. The total number of deaths reported during the month of February for the whole district was 3,993 against 5,080 in the previous year, giving a death-rate of 1.93 against 2.96 per mille per month. The figures for the affected area are 1,263 deaths against 913 in the preceding year, and the death-rate 3.39 against 2.44 per mille per month. No deaths have been reported as due to starvation.

I annex a statement furnished by the Superintendent showing the result of observations on prisoners admitted into the district jail during the month of March 1897. This statement does not show any marked decline in the health of prisoners.

14. *Section 24 (3), Relief works*.—There were seven relief works open during the period under review. The Hata-Dharowli road was opened during the fortnight, while the others are the same, as shown in the last return.

They are—

- | | |
|--------------------------|------------------------------|
| (1) Hata-Durgaoti road. | (4) Hata-Dharowli road. |
| (2) Hata-Karamnasa road. | (5) Bhabua-Sabar road. |
| (3) Hata-Bhabua road. | (6) Jahanabad-Malhipur road. |
| (7) Adhawra tank. | |

The statements D and E (5 and 7) give the particulars of the relief works open during the fortnight under report and the number of persons employed on them. The number of works increased from six to seven during the fortnight. The number of persons employed on the 27th ultimo was 5,780 on task-work and 435 on daily wages, or 6,215 against 3,794 on the last day of the previous fortnight. The average number of male units employed during the first week was 3,069 on task-work and 220 irrespective of task. The work done per diem by each male unit was 41 cubic feet, the wage earned was 0-1-9 and the cost per 1,000 cubic feet amounted to Rs. 2-10-9. In the following week the average number of male units employed on task work increased to 4,162 and the number paid by daily wages to 349, the outturn of work done was 42 cubic feet, and the average rate paid remained the same, and the cost was Rs. 2-10-11. Besides these works there is the Sabar tank with about 800 labourers on its and with increasing numbers. The cost of this work is to be met by a loan taken by the Sabar ward, but it is managed as a relief work. The tank at Bhabua is nearly finished and there are only about 50 men on it. In addition to these there is a tank being excavated at Chenari and two at Patesar by private persons, about which no information was received by the Subdivisional Officer. The increased of numbers on works is very noticeable. The average number of male units on task work has increased from 1,357 to 4,162 in three weeks, and that on daily wages from 113 to 349. This is explained partly by the finishing of the *rabi* cutting in this district and partly by the return of those who had gone to the east for work. Early steps will be taken to open more relief works, the difficulty being that establishments are not to be procured. The increase in the number on daily wages is due to the fact that the officers in charge have been ordered to employ as many women and children on the work as possible, so as to relieve the gratuitous relief lists and ensure that work is taken from all capable of labour. They are employed, when they cannot be provided with employment as carriers, in nicking out pits, breaking clods, and so forth.

15. On the Moghalsarai-Gaya Railway 6,021 men, women and children were employed in the first week and 6,114 during the second week. The Subdivisional Officer of Sasaram has visited Dehree, and reports that the Company has still the same complaint that they cannot get sufficient number of labourers. Of about 400 labourers between Sasaram and the Kudra river, there was only one gang of local men not exceeding 80, all the rest being from the North-West, which shows either that the labourers of that part of the subdivision are not in need of work, or that they do not work on the line on account of the low rates. The rates for earthwork have, however, been raised from Rs. 1-12 to Rs. 2 per 1,000 cubic feet during the period under report, and it is as yet too early to decide whether at this enhanced rate labour cannot be obtained. The Subdivisional Officer of Bhabua is making this increase generally known.

16. *Section 24 (4), Poor-houses*.—All the poor-houses and kitchens reported in my previous report were open during the period, and continued distributing food to travellers

and needy persons. The total number of persons relieved during the period is given in Form No. 6 appended to this report.

17. *Section 24 (5).*—There is no organization for employment of artisans, but the Subdivisional Officer of Bhabua has arranged, through the Charge Superintendents, to distribute cotton and *munj* grass to those who are in receipt of gratuitous relief.

18. *Section 24 (6).*—All gratuitous relief is given in grain-doles. From Form No. 6 appended to the report, it would appear that the average number of persons receiving relief during the fortnight was 13,503 in the first week and 17,225 in the second. The numbers reduced to adult units were 11,576 and 14,590, respectively.

The increase, therefore, in the figures for the preceding fortnight is not proportionately so great as in the numbers on relief works. I do not, however, consider that we have yet reached the maximum, and I expect a further increase to occur.

19. *Section 24 (8).*—During the fortnight there were 698 petitions received in Bhabua for agricultural loans, but they were not made jointly, and could not be granted. Under the Land Improvement Loans Act a sum of Rs. 500 has been advanced in Bhabua and Rs. 265 under the Agriculturists Loans Act in Sasaram.

20. *Section 24 (9), Finance.*—I annex a statement showing the allotment and expenditure under the different headings during the fortnight.

The other statements and maps are annexed.

Comparative statement showing the prices of staple food-grains for the fortnight ending 27th March 1897.

J. WINDSOR,
Collector.

No. 1025F.—G., dated Chapra, the 3rd April 1897.

From—A. EARLE, Esq., Collector of Saran,
To—The Commissioner of the Patna Division.

In continuation of my letter No. 781F.—G., dated the 17th ultimo, I have the honour to submit herewith my famine report for the two weeks ending the 27th ultimo.

2. SECTION 24 (1).—*Area affected during the period under report, and approximate estimate of the portion of the population affected.*—As indicated in paragraph 2 of my last report, my map requires modification.

	Area in square miles.	Population.
Gopalganj thana	358	275,023
Minus non-affected tracts	126	50,400
	232	224,623
Mirganj thana	435	359,607
Minus non-affected tracts	7	2,800
	428	356,807
Siwan subdivision	829	800,738
Minus non-affected tracts	207	200,184
	622	600,554
Sadar tracts	402	402,402
Total affected tracts	1,684	1,484,386

The whole of the Gopalganj subdivision should now be painted brown, as relief works are open throughout that subdivision. An additional tract of 19 square miles has to be added to the immediately affected area in the Sadar subdivision. This is the country in which the *rabi* has been poor. Further, in about six weeks' time it is probable that it will be found necessary to have relief works open in a total area of about 650 square miles. I trust that this may be the total area of the Sadar subdivision in which it will be necessary to open such works. The map as amended is annexed, and revised figures showing population are given in the margin: 8 per cent. of the immediately affected population is 118,751.

3. SECTION 24 (1).—*Number of relief circles and of officers in charge.*—The prescribed statement is submitted. The Sadar subdivision has been split up into two charges, viz., East and West Chapra, in charge of Messrs. Twidell and Chapman respectively. I am now submitting a report asking for another officer for the Sadar, as famine work is rapidly increasing there, and Mr. Chapman cannot cope with it in addition to his onerous office duties. The number of circles has risen from 58 to 61, the increase being in the Sadar subdivision, where the existing circles were still too large. Very little change in future in this respect will be required.

4. SECTION 24 (2).—*General state of the affected tract during the half-month under report.*—There is continued general alleviation in the Siwan subdivision, and there is no cause at present for apprehension in respect of this tract. The general state of the Gopalganj subdivision is much the same as before. The large decline in the number of relief workers is due to the cutting of the *rabi* crop and the lowering of the wages owing to the decline in the price of the commonest kind of food-grain, viz., barley. The large increase in the number of persons gratuitously relieved in the Gopalganj subdivision is chiefly due to my personal efforts to stir up the Circle Officers who were found neglecting the most patently deserving cases. These officers seem in many cases to be wanting in common sense. Many of them will as readily relieve undeserving as neglect the most obviously deserving cases, and constant vigilance on the part of Charge Superintendents and Assistant Charge Superintendents is necessary. I have duly impressed the importance of carefully scrutinizing their work on all Charge Superintendents, and of seeing that particular attention is paid to the rice villages. It will be grossly unjust and extravagant if as much money is spent in *rabi* as in *rice* villages, and I must look to Charge Superintendents to see that the principle is borne in mind. More relief works are required, and are being opened, and when this is done, I hope that many of the recipients of gratuitous relief will be drafted off to relief works. In the Sadar subdivision distress is increasing rapidly in the rice tracts, and in about six weeks' time I fear that extensive relief will be required both in these tracts and also in those in which the *rabi* has been poor.

5. SECTION 24 (2).—*Crop prospects.*—My estimates of the *rabi* crop are unchanged, viz., 16 annas in Siwan, 12 annas in Gopalganj and 10 annas in the Sadar. The late rainfall has materially assisted the sowing down of cheena and the preparation of rice lands. During my last tour I saw a good many *chaws*, usually under water all the year round, sown down to the every bottom, and the rice coming up well. I regret to say that the mango crop is, as far as I can ascertain, a failure. This is a very serious loss.

6. SECTION 24 (2).—*Food-stocks.*—These are ample.

7. SECTION 24 (2).—*Exportation and importation of food-grains—(a) Railway figures.*—

Imports show an increase from 77,728 maunds to 85,275 maunds, and exports from 2,636 maunds to 5,341 maunds. Rice was chiefly imported from Bhupthahi and Nirmali (in Bhagalpur), Howrah, Burdwan and Raniganj: paddy from Howrah: grain and pulses from Mokameh (Patna): and other food-grains from Gorakhpur and Colonelganj (Gonda). Rice was chiefly exported to Pipra (Champanan) and Basti (North-Western Provinces): wheat to Howrah and Laheria Sarai (Darbhanga): and other food-grains to Bhagalpur, Gorakhpur and Mankapur (Gonda). Out of 62,504 maunds of rice imported, 32,169 maunds and out of a total of 10,989 maunds of paddy imported, 9,158 maunds were imported from Howrah. There were no imports from Calcutta, Sealdah and Kidderpore.

(b) *Railganj statistics.*—Imports increased from 3,236 maunds to 7,895 maunds, and exports from 539 maunds to 675 maunds. Rice was chiefly imported from Murshidabad and Bhagalpur, and other food-grains from Murshidabad, Ballia and Arrah. Rice and paddy were chiefly exported to Ballia.

(c) *Saterghat figures.*—Imports declined from 1,574 maunds to 1,320 maunds, while exports were for the first time reported at 83 maunds. The imports were chiefly from Champanan, Muzaffarpur and Darbhanga; exports were to Champanan and Muzaffarpur.

8. SECTION 24 (2).—*Prices*.—The prices of rice and *mahai* have gone up, while those of wheat and barley have fallen. Wages on relief work will be given, as heretofore, according to the prices of barley; but as there is a difference of a seer between the prices in Gopalganj thana and those current in Mirganj owing to the non-existence of any large markets in the latter area, I shall fix the rates as follows:—

						Srs.
Sadar	12
Siwan	13
Gopalganj thana	12
Mirganj „	13

9. SECTION 24 (2).—*Rainfall*.—The rainfall, which was as shown in the margin, has much benefited the newly sown sugarcane and encouraged a more extensive sowing of cheena and enabled the deep *chaur* lands to be sown down.

10. SECTION 24 (2).—*Public health*.—(a) The cholera in the Gurkha outpost has been completely checked by the prompt disinfection of wells with permanganate of potassium. Small pox is prevalent in parts; but, on the whole, public health is good.

(b) Monthly Statement A shows that the monthly death-rate nowhere approaches 40 per mille.

(c) No case of starvation has been brought to light, nor should any such occur, considering the complete arrangements that have been made by Government.

11. *Emigration and immigration of famished people*.—Thirty-one out of a total number of 270 people admitted into the Chapra poor-house, or 11·4 per cent., came from the North-Western Provinces, 14 being from Gerakhpur. I am obtaining similar figures from the Gopalganj subdivisional poor-houses.

12. SECTION 24 (2).—*The condition of the cattle* is good.

13. SECTION 24 (3).—(a). There were 29 Civil Agency and 2 Public Works Department Agency works (Irrigation Department), or a total of 31 works open during the week ending the 27th ultimo, viz, 12 in the Sadar, 4 in the Siwan and 15 in the Gopalganj subdivision. The cause of decline in the number of works is due to the fact that there are now only four works open in the Siwan subdivision.

(b) A daily average of 988 male units on Civil Agency works and 197 on Public Works Department Agency works were paid daily wages irrespective of task during the week ending the 27th ultimo. The Sadar subdivision is responsible for 667 out of the total of 985 gratuitously employed on Civil Agency works, but Mr. Chapman assigns reasons which are sound. I have in previous reports stated that baling out of water from tanks renders it absolutely necessary to employ people in the manner indicated.

(c) A daily average of 6,471 male units on Civil Agency works and of 416 on Public Works Department Agency works were paid for task work during the week ending the 27th ultimo. The decline in numbers is due to the cutting of the *rabi* and the lowering of the rates of wages owing to the fall in the price of the staple food-grains.

(d) Classification seems now thoroughly understood by all officers.

(e) The average rate of wage per male unit for task work on the average of the two weeks was 1 anna 6 pies on Civil and Public Works Department Agency works.

(f) The average rate of wage per male unit for work done irrespective of task on the average of the two weeks was 1 anna 11 pies on Civil Agency, and 1 anna 5 pies on Public Works Department Agency works. Last fortnight the corresponding rates were 1 anna 8 pies and 2 annas 3 pies respectively. The rates paid for this class of labour are too high on Civil Agency works. Rates of course are entitled to 2 pice more than male diggers, but other classes should not be paid so highly for this kind of labour.

(g) The cost per 1,000 cubic feet was, on the average of the two weeks, Rs. 2-7-6 on Civil Agency and Re. 1-14-3 on Public Works Department Agency works. The cost was as much as Rs. 4-0-6 in Siwan, but there the Subdivisional Officer is, I understand, finishing off several tanks, &c., and in the circumstances the rate is not high.

(h) The work done per male unit was, on the average of the two weeks, 38 on Civil Agency and 49 on the Public Works Department Agency works. The rate in Siwan was again as low as 20 cubic feet per male unit. The explanation adduced above probably applies. During the two weeks under review, I have been out on tour, and found more cases of inaccurate or fraudulent measurements, and have suitably dealt with the offenders. The special attention of all Charge Superintendents has been drawn to the matter, and Mr. Maconchy and his staff have been requested to assist in checking measurements.

(i) The statement required by Government Circular No. 34 (Fam.), dated 16th February 1897, is herewith submitted.

(j) Mr. Maconchy, Executive Engineer, took over two works at the close of the period under report. These will be dealt with in the period covered by the next report.

14. SECTION 24 (3).—*Private Agency Works*.—*Gopalganj Subdivision*.—(1) *Hutwa Raj*.—Ten works were open during the week ending the 27th ultimo, employing a daily average of 2,043 male units on task work and of 435 such units on work done irrespective of task. The wages paid for work done irrespective of task and for task work are now lower than on Civil Agency works, and the cost per 1,000 cubic feet has considerably improved, being Rs. 3-1-9 as against Rs. 3-10-10 at the close of the last period under report. The work done per male unit is very low, being 25 cubic feet only, as against the district

average of 38 on Civil Agency works. No explanation is furnished by the Manager or the Charge Superintendent, but it may be that several of the works are tanks nearing completion, and that a good deal of baling out of water is going on. I await explanation. I trust that the Manager has now put an end to fraudulent and inaccurate measurements on the Raj works.

(2) Babu Raj Kishore Narain employs some 100 to 150 people daily on tank work, which he has begun with a Government loan under the Land Improvement Loans Act.

Siwan Subdivision.—About 130 labourers are employed daily on private relief works.

Chapra Subdivision.—There are no private relief works now open.

15. SECTION 24 (4) *Poor-houses.*—(a) There were two Government poor-houses open as before, viz., one at Chapra and the other at Siwan, the average number of persons relieved being 82 and 26 respectively during the week ending the 27th ultimo. The cost per adult unit calls for no comment.

(b) The average number of persons relieved in the four Hutwa poor-houses during the last week under report was 283, as against 352 at the close of the previous period and 454 at the close of the month of February. This is due to the rabi-cutting. The cost per adult unit calls for no remark.

(c) The Manjha poor-house now contains only 23 individuals. The rate per adult unit here also is normal.

16. SECTION 24 (5).—The Subdivisional Officer of Siwan reports 90 and Mr. Chapman of West Sadar subdivision reports 781 persons employed on cotton spinning, etc. In Gopalganj little or nothing is being done in this direction, and I shall not press the matter at present.

17. SECTION 24 (6).—The daily average number of men, women and children in receipt of gratuitous relief for the week ending the 27th ultimo was 4,813, 16,274 and 6,202 respectively, and total 27,319 as against 3,396, 11,441 and 3,582 respectively at the close of the last period under report. I have commented fully on this subject in paragraph 4 above. I am convinced that many really deserving cases were previously unprovided for, and grave dangers thereby incurred.

18. SECTION 24 (7) —Nil.

19. SECTION 24 (8).—*Advances.*—(1) In the Chapra subdivision Rs. 300 and in the Siwan subdivision Rs. 5,350 have been disbursed under the Land Improvement Loans Act new rules for tanks and pukka wells. Under recent orders advances for the latter have been stopped, unless it can be shown that the expenditure distinctly and directly tends to alleviate distress.

(2) Under the Agriculturists' Loans Act Rs. 70 in the Siwan and Rs. 705 in the Gopalganj subdivision have been advanced. Much good can be done by this class of loans in distressed villages among respectable but temporarily impecunious raiyats, who shun Government relief in every shape and who are unable in the current year to both maintain their families, as well as prepare and sow their lands. This subject is receiving my special attention.

20. SECTION 24 (9).—The prescribed statement is submitted.

21. SECTION 24 (10) AND (11) —Nil.

22. (1) *Your Famine Circular No. 1 of 1897.*—The statement is submitted on a basis of such figures as are available.

(2) *Your Famine Circular No. 5 of 1897.*—The jail statistics are herewith submitted.

23. *Your letter No. 290 P.—G., dated 7th—8th February 1897.*—The total numbers (1) on relief works and (2) in receipt of gratuitous relief on the last day of the period under report was 12,449 and 27,427 respectively. These figures are exclusive of the Hutwa and other private agency works.

24. *Indian Famine Charitable Relief Fund.*—I am pushing forward the formation of Circle Committees. They will work in co-operation with the Government Circle Officers, so that operations may not overlap.

25. SECTION 27 (iv) of the Code.—(a) During the week ending the 27th ultimo 22 tanks were being excavated and the gross number of individuals employed was 46,843.

(b) The amount of money advanced for tanks and wells has been indicated in paragraph 29 above.

26. The usual money order statement will follow.

BEPIN BEHARI BOSE,
Manager, Raj Hatwa.

No. 15F., dated Motihari, the 2nd April 1897.

From—D. J. MACPHERSON, Esq., Collector of Champaran,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my report under section 24 of the Famine Code for the second fortnight of March 1897. The figures dealt with relate to the weeks ending on Saturdays the 20th and 27th of that month.

2. During this period the Hon'ble Mr. Glass, Secretary to the Government in the Public Works Department, spent nearly a week in the district, going as far as Ramnagar and Bagaha, where I accompanied him. Inspection work was, however, impeded by heavy rain, quite unusual at this season.

3. Section 24. (1) Area affected.—There has been no real change in the area at present in distress, but some modification of the previous estimate of population is required, when due allowance is made for the area containing little or no population, and the concentration of population in the towns of Bettiah and Motihari, which have a population, roughly speaking, of 25,000 and 13,000, respectively. This town population I class as practically free from distress, as the proportion in receipt of relief is very small—under 2 per cent. I have been in the habit of showing as the area “at present in distress” only that in which relief works are required to afford employment to able-bodied persons; but I beg that it may be borne in mind that throughout the area classed as “slightly affected,” arrangements for the distribution of gratuitous relief have been organized, and such relief is actually being administered to a considerable number of destitute persons unable to work who, in ordinary years, would probably have been supported by private charity. Indeed, some relief of this kind has had to be given even in the areas classed as free from distress, except in about 200 square-miles of thana Adapur, and these, to the aggregate of 152 square-miles, should be added to the area over which relief measures of some kind have extended. I subjoin a statement showing how the estimates of population have been revised with reference to the above remarks.

SUBDIVISION AND THANA.	Area of thana.	Population of thana.	Area con- sisting of hill and jungle and the secure tract peopled by tharus.	Red of river Gan- dak and adjoining dihara lands.	Other areas free from distress.	Area slightly affected.	Area at present in distress.	ESTIMATED POPULATION OF—			TOTAL AREA AND POPULATION TO WHICH RELIEF MEASURES OF SOME KIND HAVE EXTENDED.	
								Area free from distress.	Area slightly affected.	Area at present in distress.	Area.	Population.

(a) Includes Bettiah town (population 25,000).
(b) Ditto Motihari (in ditto 18,000).
(c) Excludes population of Bettiah town.
(d) Ditto of Motihari town.
(e) Ditto of secure area in Adapur thana.

4. The area and population given in the last two columns include 152 square-miles with 79,000 inhabitants, classed as free from distress. Omitting these, the area really affected is 2,593 square-miles, with a population of 1,554,000, and the percentage of persons receiving relief on the 27th February would thus be 10.9, and not 15.33, as shown in the table on the margin of paragraph 68 of your letter No. 687F.G., dated the 8th March 1897. Having regard to the population of other districts, I should think it probable that the affected area in their case comprises the whole area over which relief measures of some kind were necessary, and corresponds therefore, to the 2,593 square-miles dealt with above, and not merely to the 1,865 square-miles for which relief works were actually required. I have in my reports been in the habit of showing as only slightly affected all areas expected to require relief later on until relief works are actually needed in them to give employment to the able-bodied, and in this way the area has gone increasing from time to time. In about a month the whole area still classed as slightly affected, will, it is anticipated, need regular relief works.

5. The total number of persons on relief of all kinds on the last day of the period under review (27th March) was 164,426, of whom 55,285 were men, 60,887 women, and 48,254 children. This amounts to 10·6 per cent. of the population (affected 1,554,000). Of the total number 99,977, or 60·8 per cent., were relief workers, and 64,449, or 39·2 per cent., were gratuitously relieved in poor-houses, kitchens, or at their homes. Of the relief workers, 42,499 were men, 34,475 women and 2,308 children. Of those gratuitously relieved, 12,786 were men 26,412 women, and 25,251 children. The men, therefore, formed 42·5 per cent. of the relief workers, but only 10 per cent. of those gratuitously relieved.

6. *Section 24 (2)(b)—Relief Circles.*—Lieutenants Kaye, 21st Panjab Infantry, and Dalzel, Devonshire Regiment, have joined the district for famine work on the 26th and 30th March respectively. The former has been made Charge Superintendent of Motihari thana, so as to set free the Joint-Magistrate for the multifarious duties he has to discharge. Lieutenant Dalzel has been posted to Bettiah thana, and will assist Mr. Wood, who is being placed in charge of the whole thana under arrangements which have been reported to you demi-officially. Two non-officials have, with your sanction, been appointed as Assistant Charge Superintendents—one, Mr. Blake, being posted to Hardih thana, and the other, Mr. Savi, to Dhaka.

7. The various Circles are all now practically manned. Owing to heavy rain which fell in the second week, of the period underreport, the Indigo Planters who are Honorary Circle Officers, have again had to be busy with their indigo sowings, as extensive re-sowing has been necessary.

8. *Section 24 (2) (a)—General state of the affected tracts—Crop Prospects and Rainfall.*—On the 22nd, 23rd and 24th of March rain fell over all the district, except the extreme north-west. The following fall was recorded at each of the registering stations:—Motihari 1·33 inches, Bettiah 3·47, Barharwa 1·10 and Bagaha 2·3. So heavy a fall over most of the district is altogether abnormal at this season. It was heaviest in the centre of Bettiah Subdivision in a tract stretching from Ramnagar southwards, and extending into part of Gobindganj thana. To the west of that tract the fall was very light. Elsewhere it may be said to have averaged about an inch. In the north-east of Bettiah Subdivision hail also fell, which did much damage to the *rabi* crops and poppy. With this exception, the rain does not appear to have caused any substantial injury to the crops, except indigo, which has had largely to be re-sown. In spite of this, indigo prospects are much better than they were, as there is now ample moisture to bring on the plant. Any damage done to the other crops has been much more than counterbalanced by the good this will do. It will bring on the *rabi* crops where they are backward, and facilitate the ploughing of lands and the sowing of *china* and *kodo* millets, early rice and even maize. It will also be of much benefit to sugarcane recently planted, but this crop is grown only on a limited area in this district. On the whole, it will undoubtedly put heart into the people; but heavy rain at this season is so unusual that they do not profess to foretell what its ultimate effect may be.

Harvesting operations are still backward in this district. They are going on gradually, however, but, as was to be expected, very little labour is being employed beyond what the cultivator's own family can supply.

9. *Section 24 (2) (b): Food-stocks and traffic in food-grains.*—Forms 8 and 9, annexed to this report, show that during the fortnight ending on the 27th March, 47,581 maunds of food-grains were imported by rail into the district, and 286 maunds exported. The corresponding figures for the preceding fortnight were 18,390 and 387 maunds. The net addition to the food-stock of the district has thus been 47,295 maunds, against 18,003 maunds in the preceding fortnight. This continued increase is very satisfactory. No less than 28,313 maunds went to Bettiah, almost all of it being rice and paddy. Motihari imported 8,744 maunds. Eighty-five per cent. of the grain imported was from Calcutta, namely, 34,907 maunds of rice and 4,933 maunds of paddy. The total imports of the district, since the 1st of October, amount now to 1,13,026 maunds as against an export of 54,663 maunds, which took place in the beginning of the cold weather.

10. The Returns from the Frontier registering stations show that 9,536 maunds of food-grains were imported from Nipal during the second half of March, as against 14,341 maunds in the first half. At the same time 150 maunds of *dal* are shown as exported to Nipal.

11. Burma rice appears now to have found its way almost all over the district, but it is not so popular as the local rice, and is consequently sold at a somewhat lower price. The supply of maize appears now to have become nearly exhausted, as in many markets it is not now to be found at all.

12. *Section 24 (2) (c): Prices*—I annex a statement showing the prices of the principal food-grains at Motihari and Bettiah. The price of common rice has risen slightly at Motihari from 8 seers 8 chitaks to 8 seers 5 chitaks per rupee, but at Bettiah it has fallen from 9 seers to 9½ seers. Maize has fallen slightly at Motihari from 9½ seers to 9 seers 13 chitaks, but risen at Bettiah from 10½ to 10 seers. Other prices, for the most part, show a tendency to fall at Motihari, but to rise at Bettiah. In Ramnagar the price of common rice is 8 seers. I have received no report or price-list from the Charge Superintendent of Bagaha. *Rabi* grain of the present harvest is not yet available in the markets. Taking the mean of the Motihari and Bettiah prices, the price of common rice is at present more than 80 per cent. above the average of the last five years at this season, and that of maize, over 125 per cent. The price of rice seems to be about 20 to 25 per cent. higher than it was at this season during the famine of 1874, while the supply of maize, now reported to be exhausted in many places

was at that time said to be sufficient, and even abundant. Considering how stationary ordinary wages are, the high level at which prices have stood for the last two or three months as compared with the normal, is sufficient indication of the acuteness of the distress that would now be prevailing, but for the measures of relief undertaken by Government.

13. *Section 24 (2) (d): Emigration and Immigration of the famished people.*—The immigration of destitute people from the North-Western Provinces into Bettiah Subdivision appears, from all accounts, to have fallen off considerably, but I have not yet received from the Charge Superintendent of Bagaha information I have asked him to give me as to its present extent. The police generally report that the wandering about of destitute people within the district, which at one time they reported as very prevalent, has now practically ceased with the completion of the organization for the relief of distress.

14. In continuation of the information given in paragraph 14 of my report No. 582F., dated 7th March (not February as printed) 1897, for the second fortnight of February, regarding the remittance of money through the Post Office to this district, I may mention here that, during the month of February, Rs. 28,656 were received in this district by 1,721 money-orders from elsewhere. As compared with February 1896, there is an increase of Rs. 3,631 in amount, and of 368 in the number of orders.

15. *Section 24 (2) (e): Condition of cattle.*—The condition of the cattle is, on the whole, satisfactory, and the supply of fodder and water has been improved by recent rain.

16. *Section 24 (2) (f): Public Health.*—The following statement shows the mortality, thana by thana, for the month of February 1897, as compared with the average of the preceding five years:—

	MORTALITY IN FEBRUARY 1897.		AVERAGE MORTALITY IN FEBRUARY FOR THE PRECEDING FIVE YEARS.	
	Number of deaths.	Death-rate per mille for the month.	Number of deaths.	Death-rate per mille for the month.
1	2	3	4	5
Bagaha	537	2.48	126	2.89
Hurdi	540	2.58	788	3.75
Bettiah	911	3.15	771	2.38
Gobindganj	543	3.03	330	1.84
Motihari	427	2.09	397	2.25
Kasaria	394	2.14	578	3.15
Madhuban	249	2.27	223	2.03
Dhaka	426	1.58	463	1.71
Adapur	219	1.30	314	1.79
Total ..	4,246	2.26	4,490	2.41

The death-rate of the district for February was thus only 2.26 per mille as against an average for the last five years of 2.41. The average for the last ten years was only 1.62 per mille, but the registration of vital statistics was put on an improved basis about five years ago, and it is manifest that it was very imperfect before that. In thanas Gobindganj Bettiah, Motihari and Madhuban, the death-rate of February has been higher than during the last five years; but in every case it is considerably under an annual rate of 40 per mille. In Gobindganj thana, the increased mortality is about equally divided between "ferries" and "other causes (unspecified)"; elsewhere it is mainly under the latter head. An inquiry has been ordered with a view to ascertaining whether the increase in these thanas may be connected directly with the prevalence of famine, but the statistics kept by the registering officers do not throw any light on this. No deaths from starvation have been reported during the fortnight.

17. The following statement shows the result of observations on prisoners admitted into the Motihari Jail during the fortnight, as compared with the corresponding period of 1896 :—

Health on admission.	CONVICTS.				UNDER-TRIAL PRISONERS.			
	1897.		1896.		1897.		1896.	
	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.	Number.	Percentage.
1	2	3	4	5	6	7	8	9
Good	5	83.3	5	8.33	16	50.0	30	83.7
Indifferent	1	16.7	1	16.7	11	34.4	5	13.9
Bad	5	15.6	2	5.7
Total	6	100.0	6	100.0	32	100.0	35	100.0
Above standard weight	1	16.6	3	50.0	7	21.9	11	31.4
Of ditto	1	16.6	2	33.3	1	3.1	4	11.4
Below ditto	4	66.8	1	16.7	24	75.0	20	57.2
Total as above	6	100.0	6	100.0	32	100.0	35	100.0

These figures, as in preceding months, show a considerable deterioration as compared with last year, especially in the matter of weight.

18. *Section 24 (2) (g) : Crime.*—The number of burglaries, thefts and the like, reported during the second half of March, was 128, as compared with 90 in the corresponding period of 1896, and no less than 50 of the cases were thefts of food-grain, as compared with only 14. The figures for the first half of the month, which were not received in time for last report, were 171 against only 85 last year, cases of theft of food-grain numbering 54 against 23. The increase in crime is, therefore, very marked. In February there was a dacoity in Motihari thana, in which the dacoits set fire to the house they attacked, and there was a similar case in Ramnagar in March. These cases were, beyond doubt, due to the famine. The general report is that fires in villages have been more frequent and destructive this year than usual, but information was not given to the police that they were otherwise than accidental. They are believed to have been more destructive than usual, because a great many of the men were away on relief works.

19. *Section 24 (3) (a) : Government Relief works.*—Statements D (Form 5) and E (Form 7) enclosed give particulars of relief works open during the weeks ending on the 20th and 27th March. The number of works open at the close of the fortnight was 80, an increase of 2 during the period. Of these 59 were Civil Agency works, namely, 47 tanks, 5 roads, 3 pyries and 4 embankments, while 21 were under the Public Works Department, namely, 4 tanks, 15 roads (including as separate works two sections on each of two roads) and 2 embankments.

20. The subjoined statement shows the principal figures regarding persons on relief during the fortnight under review, as compared with the preceding fortnight :—

Week ending.	Number of works open at close of fortnight.	AVERAGE DAILY NUMBER OF MALE UNITS ON—				Daily outturn of work per male unit.	Cost per 1,000 cubic feet.	DAILY WAGE OR DOLE PER MALE UNIT.		
		Task-work.	Daily wages, irrespective of task.	Gratuitous relief, including dependents (adult units).	Total.			On task work.	On daily wages.	On gratuitous relief.
1	2	3	4	5	6	7	8	9	10	11
						c. ft.	Rs. A. P.	A. P.	A. P.	A. P.
6th March	84,207	5,351	37,473	127,071	24	3 11 8	1 5	1 11	0 9½
13th "	78	92,054	5,219	45,428	143,295	27	3 8 4	1 6	2 1	0 9
20th "	82,580	5,270	47,911	135,768	30	3 5 4	1 5½	1 6½	0 10½
27th "	80	70,747	6,681	40,955	127,283	27½	3 12 5	1 6½	1 9½	0 10

These figures show a great fall in the number of persons employed on relief works. The fall has occurred everywhere except in the Bagaha and Motihari Charges, and it has been very great indeed in South Bettiah. In my last report I noticed that the numbers in the last-named Charge had doubled in a fortnight, and I doubted their accuracy. Special attention has since been given to this Charge, and it has been found that in several of the works there great laxity has prevailed. The worst of these have been closed during the second week, but there are professional Agency works near enough for those really in distress to go to. With the exception of this Charge, where the muster-rolls exaggerated the previous numbers, the decrease appears to have been genuine, and is due to the rain which drew off many to plough their fields, and to the progress of harvesting operations. It will be observed that the outturn of work improved considerably during the first week, but fell again during the second. On Professional Agency works it rose from 29 cubic feet per male unit to 32, but on Civil Agency works, while it rose from 24 to 28 cubic feet in the first week,

it fell to again to 23 cubic feet in the second. This fall was due principally to work being impeded through accumulation of rain-water in pits in tanks, and also to the laxity prevailing in South Bettiah Charge. In Bagaha also the task was found not to be well regulated, and to be too light. The cost per 1,000 cubic feet rose from Rs. 3-5-2 to Rs. 3-7-4 on Professional Agency works during the fortnight, and from Rs. 3-14-10 to Rs. 4-1-0 on Civil Agency works. The difference is fully accounted for by the fact that no less than 47 out of 59 of the Civil works are tanks with long leads and high lifts, while only 4 out of 21 Professional Agency works fall within this category. Two-thirds of the persons on relief works were employed on tanks.

21. The scale of wages has remained the same as that given in paragraph 17 of my report No. 246F., dated the 4th February, for the second half of January, and represents the grain equivalent of the ration at $9\frac{1}{2}$ seers per rupee under section 104 of the Code. The wages paid will be found in the Task and Wages Table annexed to this report. Until *rabi* grain comes into the market freely, it will be impossible to lower the scale; for the present little grain is available, except rice.

22. Section 24 (3) (b): *Relief works designed to assist the water-supply of the country.*—Of the 80 works open on the 27th March 1897, no less than 51 were tanks and three pynes, all designed to improve the water-supply for irrigation and for cattle. Two-thirds of the persons on relief works were employed on these.

23. Section 24 (3) (c): *Private relief works.*—They only work of the kind, specially designed to afford relief to famine labour, is a tank that is being constructed at the expense of the Bettiah Raj. Only a daily average of 28 men 14 women and 1 child were employed on this, the wages amounting to Rs. 53-1-2 and the cost per 1,000 cubic feet to Rs. 2-6-6. The work was being finished off.

24. Section 24 (4): *Poor-houses.*—The following statement shows the daily average number of persons relieved at the poor-houses open during the fortnight, and the cost incurred:—

	DAILY AVERAGE OF—				Cost.	Daily cost per adult unit.	REMARKS.
	Men.	Women.	Children.	Total.			
1	2	3	4	5	6	7	8
<i>Week ending 30th March 1897.</i>							
Motihari	35	30	35	129	Rs. 70 5 1	1 5	
Makhua	31	21	15	57	53 0 10	2 5	
Bettiah	69	55	31	155	72 6 11	1 2	
Ramnagar	51	14	14	79	59 6 9	1 11	
Total	106	120	95	420	255 3 7	1 6	
<i>Week ending 27th March 1897.</i>							
Motihari	44	38	29	115	65 5 8	1 5	
Makhua	25	30	10	64	62 11 7	2 4	
Bettiah	65	40	28	137	61 9 7	1 1	
Ramnagar	54	18	19	91	65 2 3	1 10	
Total	192	126	98	417	255 13 10	1 7	

Comparing the figures with those for the week ending 13th March 1897, given in last report, it will appear that the daily average number of inmates rose during the fortnight by 75. You have enquired why the number in the Bettiah poor-house has gone down so greatly, as compared with the number who were being fed at the Raj expense in the beginning of the month. The reason is that the institution carried on by the Raj was a kitchen at which all who chose could obtain cooked food, and not a poor-house in which people are confined. All sorts of rumours are continually spread to dissuade people from entering these poor-houses, and an idea current at Bettiah was that the inmates were to be sent as emigrants to the Mauritius. At Ramnagar, similarly, an idea got abroad that they were to be sent to the Andamans.

25. Section 24 (5): *Employment given at homes.*—No information has been given by any Charge Superintendent as to the progress made in getting thread spun from cotton by women in receipt of gratuitous relief; but the Charge Superintendent of Govindganj, has applied for a further supply of cotton for this purpose.

26. Section 24 (6): *Gratuitous relief given in the shape of grain and money-doles.*—Three statements in Form 6 are annexed showing the gratuitous relief administered during each of the two weeks covered by this report, and during the fortnight, as a whole. The statement includes also those relieved in poor houses and at kitchens, but these are shown separately. Excluding these, the total number of persons relieved during the first week, was 58,640, of whom 12,040 were men, 23,796 women, and 22,804 children, the cost incurred being Rs. 18,631-6 7. In the second week the number was 60,690, namely, 12,223 men, 25,634 women, and 22,834 children, the cost incurred being Rs. 19,411-8-7. The average dole per adult must cost about 10 pies. The number relieved during the fortnight comprised 54,234 persons relieved under Chapter V of the Famine Code, 5,364 (of whom no less than 4,624

were children) as dependants, and 68 as wanderers. The number on the gratuitous relief list is disproportionately large in the South Dnaka and Gobindganj Charges, being 13,166 in the former and 10,909 in the latter. In Gobindganj, however, Mr. Coupland, who has been paying special attention to testing the lists, reports that though he has had to strike off many who had been admitted by certain Honorary Circle Officers, he found as many omitted from the lists that ought to have been on them. The gratuitous relief lists everywhere still require careful check, and this has to be repeated periodically in the case of those admitted on account of temporary illness or weakness. The percentage of the affected population (1,554,000) in receipt of gratuitous relief of all kinds amounted to 3.9 at the close of the period under report.

27. *Section 24 (b): Kitchens.*—Four kitchens were open during the fortnight, all in the Hardih Charge. The daily average number who received relief at them was 383 in the first week (men 111, women 107 and children 165) and 107 in the second (men 125, women 112, and children 170). The cost was Rs. 209-13-9 and Rs. 223-13-5, respectively, so that the daily average cost per adult unit came to 1 anna 7 pies, which is high. I trust small kitchens will soon be opened at many works, for the purpose of giving those who persist in doing short work the penal ration in the shape of cooked food.

28. *Section 24 i: Loans.*—No fresh loans were given out during the fortnight, but inquiries were completed in respect of a large number of cultivating tenants to whom loans were given out immediately after its close to enable them to till their lands and conserve and purchase seed-grain.

29. *Section 24 (8): Finance.*—I annex a statement showing the expenditure incurred during the period under report. The total comes to Rs. 1,50,998-5, of which Rs. 1,11,980-10-3 were spent on relief works, and Rs. 39,017-10-9 on gratuitous relief of various kinds. In the previous fortnight the expenditure was pretty much the same, namely Rs. 1,52,509-15-3.

30. Monthly Statements A and B (Forms 10 and 11) and the Statement showing task-work exacted are annexed. A map showing the affected tracts is also enclosed.

Total	104	61,279	90	26,142	99,897	61,586											

Columns 10.—Includes 7,933 labourers employed on daily wages, irrespective of task, who have not been classified in columns 6 to 9.

FORM 11.

[See Section 27 (ii) of the Code.]

Monthly Famine Statement B for the four weeks ending Saturday evening, the 27th March 1897.

District.	Maximum number for whom employment on relief works is estimated to be required in case of actual famine.	NUMBER FOR WHOM RELIEF WAS PROVIDED IN LAST PROGRAMME OF RELIEF WORKS.		NUMBER FOR WHOM RELIEF CAN BE PROVIDED BY WORKS REMAINING ON PROGRAMME ON DATE OF REPORT		EXPENDITURE SINCE 1st APRIL 1896.					ADVANCES SINCE 1st APRIL 1896, UP TO END OF MONTH UNDERREPORT.		Revenue suspended.
		On large works.	On small works.	On large works.	On small works.	Date up to which account is made up.	On relief works.	Gratuitous relief.	Land Improvement Loans Act.	Agriculturists' Loans Act.			
1	2	3	4	5	6	7	8	9	10	11	12		
Champan	210,000 for three months.	207,500 for three months.	87,700 for three months.	About 100,000 for three months.	About 100,000 for three months.	27th March 1897	Rs. A. P. 3,85,748 1 0	Rs. A. P. 1,06,738 8 2	Rs. A. P. 300 0 0	Rs. A. P. 38,414 4 0	Rs. A. P. Nil.		

The figures in columns 8 to 10 include 73 miles of the proposed Railway, Baranaga to Bagaha, which would give employment to about 14,150 persons for 3 months. But there are some 37 miles more which do not appear to be entered in the programme including the extension from Baranaga to Shikarpur, which would give employment to about 7,000 persons more or 3 months.

Columns 6 and 7.—The works so far undertaken have been mostly outside the programme, hence the large proportion still unexhausted.

Financial Statement for the two weeks ending 27th March 1897.

Receipts from commencement of operations.	Amount.	Expenditure from public funds during the half-month under report.	Amount.	Balance of funds.	Amount.
1	2	3	4	5	6
	Rs. A. P.		Rs. A. P.	Rs. A. P.	Rs. A. P.

		(e) Ditto in kitchens	438 11 2		
		(f) On other kind of miscellaneous charitable relief		
Total	4,26,014 10 9	Total	1,50,998 5 0	Nil.	

DISTRICT—CHAMPARAN.

Statement showing rates of wages paid on relief works (including *tsal* works) and tasks exacted for the fortnight ending 27th March 1897.

RATES OF DAILY WAGES AND TASKS.												REMARKS.		
DISTRICT.	Man.		Woman.		Big child.		Small child.		Adult male unit.		Grain on which calculated under section 124 of the Fauna Code.		Retail price of the grain in column 12 (number of seers for a rupee).	Rate per 1,000 cubic feet of earth-work.
	Wage.	Task.	Wage.	Task.	Wage.	Task.	Wage.	Task.	Wage.	Task.				
1	3	3	4	5	6	7	8	9	10	11	12	13	14	15
Champan-- Maximum	A. P. 2 0	An able-bodied B class man has to excavate 100 cubic feet in hard clay soil, 130 to 150 cubic feet in medium and 200 cubic feet in soft soil or sand. Average, say, 180 cubic feet	A. P. 1 3	A. P. 1 0	A. P. 6	A. P. 1 0	24 cubic feet both cut and carried.	Maize and common rice.	9 seers and 13 chittaks, and 5 chittaks per rupee.	Rs. A. P. 3 3 9	It is impossible to give particulars of the lead and lift, as there are 50 works in all. No less than 50 of those are tanks with long leads and lifts, and, having regard to this fact, the average lead may be taken at about 150 feet and lift at about 15 feet. The average composition of the gang cannot be stated, as the number of gangs is not shown in the Returns.
Minimum	1 6		1 3	1 0		8						

Columns 5, 7 and 9.—The task of these, and also of adult male carriers, is to carry the quantity shown in column 3, the proportion of carriers to diggers being regulated as far as possible by the lead and lift.

No. 4F., dated Muzaffarpur, the 2nd April 1897.

From—L. HARR, Esq., Collector of Muzaffarpur,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit my half-monthly report for the second half of March 1897. The figures in the returns are for the two weeks ending the 20th and 27th March 1897.

2. SECTION 24 (1) (a)—*Area affected*.—There was no change under this head during the half-month under notice.

3. SECTION 24 (1) (b)—*Number of relief-circles and officers in charge*.—One of the Military Officers promised to this district as a Charge Superintendent has joined, and I hope shortly another will join. I have also appointed several more circle officers and assistant circle officers.

4. SECTION 24 (2) (a)—*General state of the affected tracts*.—The rain which fell recently has certainly benefited the district. It has enabled some sowing of *mung* and *china* to be done, and has improved these crops and the *alna* where these already exist. It will also render possible preparations in the hard and dry *chaur* lands to be made now instead of later on, and this will be of great benefit, as unless these lands are sown early, they have little chance of escaping the floods.

5. SECTION 24 (2) (b)—*Crop prospects*.—The *rabi* crops have nearly been harvested. The average outturn for the district may be put down as below:—

	Annas.			
Wheat	10
Barley	10
Gram	9
Other <i>rabi</i> , cereals and pulses	14

Alna, *mung* and *china* on the ground are doing well.

6. SECTION 24 (2) (c)—*Prices*.—I append two statements—(1) showing the prices at the head-quarters of each subdivision, and (2) those at the head-quarters of each mufassal thana and outpost. The prices were almost stationary, there being a slight improvement in some cases due to the *rabi* crops coming into the market. Rice is still very dear at Sitamarhi. I hope shortly that Burmah rice will be quoted there at cheaper rates than ordinary rice is quoted at present.

7. SECTION 24 (2) (d)—*Food-stocks*.—There is yet no sign of any depletion of food-stock, which, with the help of the *rabi* crops now coming in, will, I hope, meet our requirements for another two or three months at least.

8. SECTION 24 (2) (e)—*Imports and exports*.—Statements in forms 8 and 9 are appended. Total imports during the period under report amounted to 52,292 maunds and exports to 12,831 maunds. We had thus a net import of 39,461 maunds, against 50,649 of the preceding fortnight.

9. I give below the quantity of rice and paddy imported from the places mentioned in paragraph 5 of your circular No. 15—

	Rice.		Paddy.	
Howrah	...	16,051	...	7,511
Calcutta	...	Nil	...	Nil
Sealdah	...	Nil	...	Nil
Kidderpore	...	Nil	...	Nil

The imports were principally from Howrah and Nirmali in Darbhanga.

10. I regret I am still unable to furnish the comparative statement prescribed in paragraph 5 of your circular No. 1 of 1897, as the abstract statement (third item) referred to in paragraph 2 of the circular has not yet been sent to me from your office.

11. SECTION 24 (2) (f)—*Rainfall*.—The following shows the rainfall of the district during the fortnight ending the 27th March 1897:—

Muzaffarpur	...	0.95
Paru	...	0.72
Sitamarhi	...	1.80
Hajipur	...	0.25

There was also some rain on Sunday, the 28th March 1897, amounting to .09 at Muzaffarpur and .7 at Shiuhar. No harm is reported to have been done to the *rabi* crops, which had nearly been gathered before. *Alna*, *mung* and *china* have been much benefited by it. It will also facilitate preparations and sowing in the dried-up *chaur*s.

12. SECTION 24 (2) (g)—*Public health*.—Public health is exceptionally good throughout the district. The statements showing the health of the district prescribed in sections 168 and 174 of the Code and that showing the health in jail, required in paragraph 5 of your circular No. 3 of 1897, are appended.

13. SECTION 24 (2) (h).—*Emigration and immigration of famished people.*—There was no emigration or immigration of famished people.

14. SECTION 24 (2) (i).—*Condition of cattle.*—The condition of cattle continues good.

15. SECTION 24 (3) (a).—*Relief-works.*—The number of relief-works open at the close of the fortnight was as under—

UNDER CIVIL AGENCY.

Sadar subdivision.

Sadar thana	13
Paru „	7
Katra „	7
					— 27

Sitamarhi subdivision.

Sitamarhi thana	8
Belsand „	5
Shihar „	1
Pupri „	4
					— 18

Hajipur subdivision.

Mahua thana	8
Lalganj „	5
					— 13

Total Civil Agency works

... 68

Public Works Department agency works

... 12

Total works under both agencies

... 70

16. The total number of workers on the last day of the fortnight on civil agency works was 19,089. Of these, 17,522 were paid by task and 1,567 by daily wage. The relief-workers on the Public Works Department agency works on the same day were 7,922, of whom 7,842 were paid by task and 580 by daily wage. The total number of workers on both agencies on the last day of the fortnight thus aggregated 24,861 paid by task-work and 2,147 by daily wage, or 27,011 in all.

17. Comparing the present with the previous fortnight, it will appear that the total number of civil agency works rose from 54 on the 13th March 1897 to 58 on the 27th, and on Public Works agency from 8 on the former to 12 on the latter date, whereas the number of labourers on the 27th March were 19,089 under civil agency and 7,922 under Public Works Department agency, against 14,129 and 7,485 respectively on the 13th March. The increase is therefore 5,397. I expect a large increase after the *rabi* harvesting is completed.

18. Expenditure during the two weeks under report on civil agency amounted to Rs. 11,834-10-7 on task-work, Rs. 2,072-0-6 on daily wages, or Rs. 13,906-11-1 in all, and on Public Works Department agency to Rs. 5,854-4-9 on task-work and Rs. 675-8-9 on daily wages, or Rs. 6,529-13-6 in all. The gross expenditure on relief-works under both agencies thus aggregated Rs. 20,436-8-7, against Rs. 20,304-9-9 of the preceding fortnight.

19. Statements in forms 5 (section 26, i) and 7 (section 26, iii) are appended.

20. The statement of the maximum and minimum wages prescribed in Government Circular No. 1F., dated 6th January 1897, is also annexed.

21. SECTION 24 (3) (b).—*Private relief-works.*—Private relief-works are maintained at Pariharpur, in the Sitamarhi subdivision, at the expense of the Maharaja of Darbhanga. A statement showing figures for the fortnight under report is appended.

22. SECTION 24 (4) (a).—*Poor-houses.*—The poor-house at Hajipur was opened during the fortnight under report. The total number of poor-houses in the district thus amounted to 6, against 5 of the previous fortnight. Statistics are given in the statement appended hereto.

The total number of inmates on the 27th March was 281, against 321, on the 13th idem.

23. SECTION 24 (4) (b).—*Private poor-houses.*—Figures for the Darbhanga Raj poor-house will be found in a separate statement hereto appended.

24. SECTION 24 (5).—*Organisation for employment of artisans, &c.*—No such special arrangement for relief of artisans has been made.

25. SECTION 24 (6).—*Gratuitous relief.*—Grain doles are being distributed as before through the agency of circle officers. Money doles are given on the relief-works. A statement in form 6 is appended. The average weekly number of recipients in the second week of the fortnight amounted to 30,594 under civil agency, 680 under Public Works Department agency, or 31,274 in all, against 23,922 and 178 respectively, or 24,100 in all during the week ending the 13th March.

<i>Present fortnight.</i>			
For week ending 20th March 1897	...	166,194	
Ditto 27th " "	...	181,895	
	Total	...	348,089
<i>Preceding fortnight.</i>			
Week ending 6th March 1897	...	163,576	
Ditto 13th " "	...	141,057	
	Total	...	304,633

26. The aggregate number of recipients reduced to adult-units to the term of one day during the fortnight under report amounted to 348,089, against 304,633 of the preceding fortnight as noted in the margin.

27. SECTION 24 (7).—*Kitchens*.—Kitchens have been opened at many of the circle head-quarters, but no separate statistics have been supplied of this form of relief. I am asking the several officers to submit in future a statement in a form similar to that used for poor-houses.

These are principally for feeding children who seem to be neglected by their parents, i.e., children who seem to get an insufficient food-share, though a grain *dole* has been given to them.

28. SECTION 24 (8).—*Loans*.—A sum of Rs. 1,200 was granted as loans under the Land Improvement Act and Rs. 9,562 under the Agriculturists' Loans Act.

29. SECTION 21 (9).—*Financial statement*.—I append a financial statement as far as I have been able to complete it.

The following are also appended—

- (a) Statement in form 10.
- (b) Ditto ditto 11.
- (c) A map of the district in duplicate.

Prices of Food-grains in the district of Muzaffarpur.

 Ditto, Monnohan Byrnes, Belmand.
 Ditto, Hars Boudhu Uas Gupta, Sherbar.

MUZAFFARPUR COLLECTORATE,
The 1st April 1897.

L. HARR,
Collector.

No. 10^{F.S.}_M, dated Darbhanga, the 2nd April 1897.

From—R. W. CARLYLE, Esq., Collector of Darbhanga,
To—The Commissioner of the Patna Division.

I HAVE the honour to submit herewith my tenth half-monthly report for the weeks ending 20th and 27th March 1897.

2. (1a) The area and the portion of the population affected is unaltered since my last report, and I reproduce what I then said on the subject.

“I have no change to report in the area affected, though there is a temporary diminution in the portion of the population affected, as the *rabi* crops are being harvested and this gives much more remunerative employment to those who can obtain it than anything we can give on famine works. The affected area comes to 2,940 square miles.

3. (1b) There are 80 circles with 76 officers in charge.

4. (2a) The harvesting of the *rabi* crops continued during the fortnight under report, and has continued to keep the numbers down. This has also been assisted by the rainfall, which has enabled the raiyats to push on the cultivation of their lands and to sow *moong*, rice (in deep chauris).

4. (2b) As regards the *rabi*, I reproduce the estimates I gave in my last report. I think my last estimate of the *rabi* nearly correct, namely, about 8 annas in Madhubani, 12 annas in the Sadar, and 16 annas in Samastipur. This of course, is allowing for the reduced area under cultivation, and only refers to the food crops.”

5. (2b) The rain has done very much good by enabling the cultivators to prepare the land in good time for the *bhadai* and *aghani* crops.

6. (2c and d) The annexed table show the net import during the fortnight of 58,491 maunds against a net export of 3,365 maunds. Stocks are, I believe, still considerable, and I hear that the late rain induced villagers in some places to begin to part with their hoards. Whether this will continue or not depends on the weather. If it promises well, no doubt a large portion of the grain hoarded up will ultimately be thrown in the market.

7. (2e) Public health continues good.

8. (2f) There is no emigration or immigration of famished people.

9. (2g) The condition of cattle is very fair, considering the time of the year. The rain has done much good in improving the pasturage, such as it is.

10. (3a) There are 134 relief works open on the 27th, attended by 40,009 men, 41,794 women, 21,759 children. Out of these the Public Works Department figures were men 20,329, women 17,882, children 12,944.

11. (3b) The rates of wages are maximum.

The Gazette figures are wrong. The Public Works figures for Madhubani appear to have been reported as. The Madhubani telegram was not quite correct.
R. W. CARLYLE

Full wages.

	As.	P.

Small children	0	3
Infants ...	0	3

Penal.

Men	0	9
Women	0	9
Big children	0	6
Small children	0	3
Infants ...	0	3

12. (3c) I give figures as to numbers employed in Famine Statement D. I also give some figures for the relief works under the Darbhanga Raj. These are not included in any of my statements

The numbers working for the Raj on the 27th were—

Men	10,919
Women	4,393
Children	1,375
Total	16,687

13. (3d) I regret my figures are not yet complete as to other private works, as I have not yet got return from Phulparas and Bahera charges, where I know a large number of private tanks are being dug. The other charges report 59 tanks are being dug; so the total number in the affected area cannot be less, I believe, than 100.

14. (4a) There are poor-houses open at Darbhanga, Singhia, Warisnagar, Madhubani, Phulparas, Benipatti and Khajauli on the 27th. There were 89 inmates on the 27th, namely, 48 men, 26 women, 15 children. The number in the poor-houses is very small at present, but they are useful for bad cases of distress or for those who shirk work. I have little doubt we will have to use them pretty freely before relief operations close to clear our list of persons receiving gratuitous relief who have relations to support them.

15. (4b) The scale of food is that laid down by the Code.

16. (5c) A number of women are employed in spinning cotton and a few in making baskets. The figures I have received are not complete, and I will ask the Charge Superintendents in future to submit special report on the subject every week.

17. (6) Doles, whether in grain or in money, are distributed by the circle officers at various fixed centres. One week's supply is given at a time. Considerably more than half of the expenditure on gratuitous relief consists of grain doles.

18. (7) There are no public kitchens. There are some private kitchens in the Darbhanga Raj.

19. (8) I have given no loans under the Agriculturists' Loans Act. I have given Rs. 1,412-8 to three persons under the Land Improvement Act. They have been given on the security of the landowner's interest on land, and are repayable in five years without interest. I generally give the money in instalments of one-fifth.

20. (a) I submit the usual financial statements.

21. I submit a map of the affected area.

22. I also submit Statements A and B.

23. I have given statements showing in detail the irrigation works. It will be seen more than half the work consists in the excavation of tanks.

24. The amount of work done per male unit has increased both on Civil Agency and on Public Works Department works. I explained in my last report why the Public Works Department figures were necessarily lower than the Civil Agency figures.

Statement showing prices of principal food-crops for the fortnight ending 31st March 1897.

STATISTICAL DEPARTMENT,
7th April 1897.M. FINUCANE,
Secretary to the Government of Bengal.

STATISTICS OF THE SEA-BORNE TRAFFIC OF CALCUTTA
IN FOOD-GRAINS.

No. 984 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPARTMENT,
The 27th April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

The sea-borne import and export traffic of Calcutta in food-grains during the week ending the 14th April 1896 and 1897 is shown in the following statement:—

		8TH TO 14TH APRIL.			
		1896.		1897.	
1		2	3	4	5
<i>Imports.</i>		Cwts.	Mds.	Cwts.	Mds.
From Foreign Ports	1	1
„ Indian „	...	36,938	50,277	182,904	2,48,953
Total	...	36,938	50,277	182,905	2,48,954
<i>Exports.</i>					
To Foreign Ports	...	125,990	1,71,486	70,491	95,946
„ Indian „	...	29,501	40,154	12,295	16,735
Total	...	155,491	2,11,640	82,786	1,12,681

Imports—The different staples comprising the import traffic are shown in the table below, and the figures for the week are compared with those for the corresponding period of last year:—

		8TH TO 14TH APRIL.			
		1896.		1897.	
1		2	3	4	5
<i>Food-grains.</i>		Cwts.	Mds.	Cwts.	Mds.
Rice	...	23,532.	32,030	155,049	2,11,039
Paddy	...	9,478	12,901	19,446	26,468
Wheat
Gram and pulses	...	3,928	5,346	7,957	10,830
Other food-grains, such as jowar, barley, oats, &c.	458	617
Total	...	36,938	50,277	182,905	2,48,954

Imports.—The import of *rice* during the week under report was nearly seven times that of the corresponding week in 1896, viz., 155,049 cwts., against 23,532 cwts. Burmah as usual supplied by far the largest quantity, viz., 112,608 cwts., against 196,738 cwts. in the week ending 7th April 1897. The receipts from Chandbali aggregated 31,665 cwts., against 23,532 cwts. in the week ending 14th April 1896. Of the 19,446 cwts. of *paddy* imported during the week under report, Burma contributed 18,109 cwts., against nil in the corresponding week in 1896. The total imports of *gram* and *pulse* were double those of the week ending 14th April 1896, viz., 7,956 cwts. against 3,928 cwts. Of these quantities, Chandbali contributed 5,435 cwts., against 2,664 cwts., and the Madras ports 2,521 cwts., against 1,114 cwts., respectively.

Exports.—In the following statement the total quantity of each kind of food-grain exported by sea during the second week of April 1897 is compared with the figures for the corresponding period of 1896:—

1	8TH TO 14TH APRIL			
	1896.		1897.	
	2	3	4	5
	Cwts.	Mds.	Cwts.	Mds.
<i>Food-grains.</i>

Total ...	155,491	2,11,640	82,786	1,12,681

The returns again show a falling off in the exports of *rice* to foreign ports, viz., 68,559 cwts. in the period under review, against 111,234 cwts. in the corresponding week in 1896; the quantity exported in the week ending 7th April 1897 was 84,454 cwts. The chief fluctuations in this trade were a decrease of 44,713 cwts. in the shipments to Ceylon and of 24,526 cwts. in those to Hamburg, while Natal, Reunion, and Persia took 15,864 cwts., 7,187 cwts., and 10,630 cwts., respectively, against nothing in the week ending 14th April 1896. There were no exports of *paddy* during the second week of April 1897, against 2,218 cwts. in the corresponding week in 1896. The exports of *gram* and *pulse* fell from 8,565 cwts. in the week ending 14th April 1896 to 1,903 cwts. in the week ending 14th April 1897, the largest decline being in the supplies sent to Mauritius (nil against 5,126 cwts. in the second week of 1896) and to Ceylon (682 cwts., against 2,689 cwts. in the week ending 14th April 1896).

There was again no trade in *rice* with the coast ports. The large decline of 20,039 cwts. in the trade of the week under review as compared with the corresponding period in 1896 was almost entirely due to the exports to the Madras ports having fallen from 19,224 cwts. to only 7 cwts. in the week under report. The variations in the other heads are unimportant and call for no remarks.

Detailed statements showing the sources of supply and the places of destination, both as regards Foreign and Indian ports, are given below.

Statement No. I, showing the Imports of Food-grains into Calcutta from Foreign and Indian Ports during the week ending 14th April 1896 and 1897.

STATISTICS OF THE SEA-BORNE TRAFFIC OF THE MINOR PORTS IN BENGAL IN FOOD-GRAINS.

No. 978 Statistics.—The following memorandum and statements are published for general information.

STATISTICAL DEPT.,
The 27th April 1897.

M. FINUCANE,
Secy. to the Govt. of Bengal.

Memorandum.

THE comparative statements below give statistics of the import and export trade of the minor ports of Chittagong, Narayanganj, Balasore (including both Balasore and Ohandbali), Cuttack and Puri during the week ending 21st March 1897, as compared with the trade of the corresponding period of 1896 :—

	...	{ 1897	...	15,226	15,226	20,725

The rise of 11,240 cwts. in the import trade of Chittagong, which amounted to 11,969 cwts., was chiefly due to the receipts of rice and paddy from Burma, against nil in the corresponding week of 1896. No paddy having been brought there from Chittagong, the imports into Narayanganj showed a falling off of 3,069 cwts.

The export trade of Chittagong fell off by 3,012 cwts. in consequence of absence of despatches of rice to Bombay, which received 3,029 cwts. last year. There were no exports to Foreign ports from Cuttack and Puri, and the trade of those ports also declined by 29,230 cwts. and 5,159 cwts. respectively. Balasore, too, showed a falling off of 91,224 cwts., as there were no despatches of rice and paddy to the Maldives, Madras, and Bombay.

Statement showing the quantities of Food-grains exported from Puri to each Foreign and Indian Port during the week ending 31st March 1897, as compared with the trade of the corresponding period of 1896.

EXPORTS OF FOOD-GRAINS BY THE EAST INDIAN RAILWAY.

No. 967 Statistics.—The following statement shows the quantity of rice and other food-grains exported by the East Indian Railway from Calcutta and Howrah during the period from 1st January to 17th April 1897, both days inclusive, to have been 38,82,697 maunds. The destination of 36,99,152 maunds is specified. A little more than half of this quantity (20,03,085) was carried to the North-Western Provinces and Oudh, a little more than one-fourth (10,06,455 maunds) to stations in Bengal, and the rest (6,89,612 maunds) to other provinces. In the last week of the period 62,534 maunds were exported to the North-Western Provinces and Oudh, and 1,59,426 maunds to Bihar. The exports from Calcutta to Bihar now exceed the exports from Calcutta to the North-Western Provinces.

M. FINUCANE,
Secy. to the Govt. of Bengal.

STATISTICAL DEPARTMENT,
The 26th April 1897.

Statement showing the quantities of rice and other food-grains exported from Howrah and Calcutta (Chitpur, Kidderpur Docks, and Port Trust Railway) by the East Indian Railway from 1st January to 17th April 1897.

COMPARATIVE STATEMENT OF THE PRICES OF FOOD-GRAINS.

RETAIL prices of common rice and other food-grains in the several districts of Bengal and in the neighbouring districts of the North-Western Provinces during the first and second fortnights of March and the first fortnight of April 1897, as compared with the corresponding fortnights of March and April 1896, are published for general information. The latest available prices of common rice in Cachar and Sylhet are also published.

M. FINUCANE,
Secy. to the Govt. of Bengal.

REVENUE DEPARTMENT, the 23th April 1897.

Quantity obtainable for a rupee.

OFFICE OF SANITARY COMMISSIONER FOR BENGAL,

The 24th April 1897.

H. J. DYSON, F.R.C.S., Surgeon-Major,
Sanitary Commissioner for Bengal.

WEATHER AND CROP REPORT.

For the week ending the 26th April 1897.

Burdwan.—Rainfall at Sadar 2·93, Kalna 3·03, Katwa ·61, Raniganj ·13. Paddy lands being prepared. *Aus* being sown. More rain wanted in Katwa and Raniganj. Fodder sufficient. Scarcity of water in some villages. Condition of cattle good. Price of rice in Katwa risen owing to purchases by dealers from Nadia district. Common rice selling as follows:—

			Srs.	c.	
Sadar	9 0 to 12 0	} per rupee.
Kalna	8 0 to 10 0	
Katwa	8 0	
Raniganj	9 8 to 10 0	

Birbhum.—Rainfall at Sadar ·95, Rampur Hât 1·29. Weather hot. The rain has facilitated ploughing, which is continued vigorously. Price of rice at Sadar 9 seers and Rampur Hât 9½ seers per rupee.

Bankura.—Rainfall at Bankura ·17, Vishnupur ·32, Ouda ·19, Maliara ·26, Indas 1·27, Kotalpur ·38, Sonamukhi ·40. Weather extremely hot and occasionally cloudy. More rain wanted. Fodder sufficient. Water insufficient in a few places. Export of rice continues. Price of rice risen—10 seers per rupee at Bankura and 10½ seers at Vishnupur. *Til* crop doing well.

Midnapore.—Rainfall at Sadar ·15, Ghatal ·25. Weather hot. More rain wanted for cultivation. Ploughing going on. *Boro* being harvested at Ghatal. Plantation of sugarcane still continues. *Aus* is still being sown. Cattle-disease reported from Keshpur and Binpur. Fodder and water sufficient. Common rice selling as follows:—

			Srs.	
Sadar	10
Contai	11 to 13
Tamluk	10
Ghatal	10 to 11

Hooghly.—Rainfall at Sadar 1·63, Serampore 1·24, Jahanabad ·63. The rain has done good to sugarcane and vegetables, but injured *boro* paddy. Ploughing continues briskly for *aus* and jute crops. Common rice sells at 9 to 10 seers per rupee.

Howrah.—Rainfall at Sadar ·40. Weather sultry. Agricultural operations at a standstill for want of rain. Fodder sufficient. Want of water reported from parts of Ulubaria. Common rice sells at 8½ to 11 seers per rupee.

24-Parganas.—Rainfall at Sadar ·23, Barasat 1·90, Basirhat 1·75, Diamond Harbour nil. Weather very hot. Prospects of sugarcane improved by the recent rain. Sowing of *aus* and jute commenced. No cattle-disease. Fodder sufficient. Water insufficient. Common rice sells as follows:—

			Srs.	c.	
Sadar	8 to 10 0	} per rupee.
Barasat	8 0	
Basirhat	8 0	
Diamond Harbour	9 6	

Nadia.—Rainfall at Sadar 2·36, Kustia 1·78, Meherpur 3·31, Chuadanga 1·77, Ranaghat 2·69. Rain much facilitated ploughing for and sowing of *aus* and benefited young sugarcane. Sporadic cases of cattle-pox in Chuadanga. Water-supply generally deficient, though improved since last report. Fodder insufficient in places. Common rice sells from 7 to 9 seers per rupee. Latest price of rice where test-works are open is 8 seers per rupee. Numbers on relief on Saturday, 24th April—

		Men.	Women.	Children.	Total.
Relief-workers	...	12,757	2,454	1,873	17,084
Dependants	...	654	105	7,532	8,291

Total					52,433

Murshidabad.—Rainfall at Sadar ·38, Kandi 1·08, Jangipur 1·51. Weather hot. Sowing of *bhadoi* and plantation of sugarcane continue. There were from two to three inches of rain in the south-east of the district, and this has done much good to *bhadoi* and *boro* paddy. Fodder sufficient. Common rice sells as follows:—

			Srs.	
Sadar	8
Kandi	8½
Jangipur	9½

Latest price of common rice where relief and test-works opened is $8\frac{1}{2}$ seers per rupee. Numbers on relief on Saturday, 24th April 1897—

	Men.	Women.	Children.	Total.
Sadar and Kandi—				
Relief-workers ...	1,770	8	188	1,966
Test-workers ...	352	Nil	75	427
Total			...	2,393

Jessore.—Rainfall at Jessore 67, Jhenida 243, Magura 232, Narail 93, Bangaon 179. Weather hot and cloudy with occasional showers. The rain has done much good to the cultivation of paddy, jute and indigo, but more is wanted still. No cattle-disease. Fodder available. Water scarce in places. Common rice sells as follows:—

	Srs.	
Jessore ...	9 to 10	} per rupee.
Jhenida ...	9	
Magura ...	$9\frac{1}{2}$	
Narail ...	10	
Bangaon ...	10 to 11	

Khulna.—Rainfall at Sadar 69, Bagirhat 319, Satkhira 16. Weather very hot. *Boro* doing fairly. Cultivation of *aus* progressing. Common rice sells as follows:—

	Srs.	c.	
Sadar ...	9 to 10	0	} per rupee.
Bagerhat ...	10	1	
Satkhira ...	9	5	

Relief-wages calculated at 10 seers per rupee. Fodder available. Great scarcity of good water. No cattle-disease reported. Numbers on relief—

	Men.	Women.	Children.	Total.
Relief-workers ...	3,564	Nil	357	3,921
Otherwise relieved ...	467	3,303	1,134	5,204
Total			...	9,125

Rajshahi.—Rainfall at Sadar 183, Nator 169, Naugaon 269. Sowing of jute, *aus* and *aman* paddy continues. Damage to *boro* crop by insects reported from Manda, elsewhere the crop is favourable. Fodder available. Scarcity of drinking-water felt in places. Price of common rice ranges between 7 seers 9 chitaks and 9 seers per rupee. Price of rice at relief-works 8 seers per rupee. Numbers on relief on Saturday, 24th April—

	Men.	Women.	Children.	Total.
Test-workers ...	983	Nil	17	1,000

Dinajpur.—Average rainfall 135. Weather seasonable. Sowing of *bhadoi* paddy and jute going on. Condition of cattle good. Fodder and water sufficient. Price of common rice 10 seers per rupee at Sadar, and 9 seers at Thakurgaon.

Jalpaiguri.—Rainfall at Sadar 60, Alipur Duars 293. Weather cloudy and warm. Showers have done immense good to *betri* paddy and to sowing of jute. Fodder and drinking-water sufficient. Average price of common rice $8\frac{1}{2}$ seers per rupee.

Darjeeling.—Rainfall at Sadar 211, Kalimpong 144, Siliguri 77. Weather seasonable. Hills—*Bhutta* coming up; *bhadoi*, *ohota marua*, *bara marua*, *sama*, *kangni*, *phaphur*, and potatoes progressing favourably. Terai—Ploughing for jute and *bhadoi dhan* going on. Sugarcane being planted. Price of coarse rice:—

	Srs.	
Hills ...	8	} per rupee.
Terai ...	9 to 10	

Bhutta sells from 13 to 18 seers per rupee.

Rangpur.—Rainfall at Sadar 243, district average 176. Weeding of *aus* and jute continues. Sowing of *aman* commenced in places. Prospects good. Common rice selling at 7 to $8\frac{1}{2}$ seers per rupee. Fodder and water sufficient.

Bogra.—Average rainfall 252. Sufficient rain all over the district. Sowing of jute and *aus* continues. Fodder and water sufficient. Price of common rice at head-quarters $8\frac{1}{2}$ seers, and in the interior from $6\frac{3}{4}$ to $9\frac{3}{4}$ seers per rupee.

Pabna.—Rainfall at Sadar 1·06, Sirajganj 2·37. Weather very hot. The late rain has enabled the *aus* sowings to be begun. Fodder sufficient. Price of rice 8½ seers per rupee. Numbers on relief on Saturday, the 24th April—

	Men.	Women.	Children.	Total.
Test-workers ...	355	Nil	93	448

Dacca.—Rainfall at Sadar 1·55, Manikganj 2·41, Narainganj 2·80. Weather very hot. Harvesting of *boro* continues. Fodder available. Cattle-disease prevailing in some parts of the Munshiganj subdivision. Price of common rice 8 to 10 seers per rupee.

Mymensingh.—Rainfall at Sadar 3·09, Jamalpur 1·38, Netrokona ·76, Tangail ·60. Weather hot and cloudy. The rainfall in the early part of the week will greatly benefit the young jute and *aus*, and help on sowings which are in progress. *Boro* harvest continues; a 16-anna outturn expected. Price of common rice, 8½ to 12 seers per rupee.

Faridpur.—Rainfall at Sadar 1·43, Goalundo 1·74, Madaripur 3·13. Weather close and oppressive. The recent rain has benefited the paddy and jute sowings, but more rain is wanted. Price of rice 8½ to 10 seers per rupee. Fodder and water sufficient.

Backergunge.—Rainfall ·95. Weather hot. Prospects of crops improved by rain, but still poor. Common rice sells from 8 to 10 seers per rupee.

Tipperra.—Rainfall at Sadar 1·14, Brahmanbaria ·73, Chandpur 1·03. Weather seasonable. *Boro* paddy being out. Sowing of *aus* and *aman* paddy going on. Fodder available. Scarcity of water in many places. Price of rice rising, being 9 seers per rupee in most places and 10 seers at four marts of the district.

Noakhali.—Rainfall at Sadar ·78, Feni ·45. Sowing of *aus* continues. Prospects moderate. Fodder and water not sufficient. No cattle-disease. Price of common rice 8 to 10½ seers per rupee.

Chittagong.—Rainfall ·16. Weather hot. Prospects of *rabi* crops bad. More rain is urgently wanted. Water and fodder sufficient. Rice selling at 10 seers per rupee.

Patna.—Rainfall at Sadar ·95, Bikram ·50, Barh ·37, Bihar ·33, Dinapore ·56. Threshing of *rabi* crops finished. Prospects of sugarcane, millets and vegetables improved by the rain. Castor and *bangra* cotton being collected. Prices stationary. Fodder for cattle sufficient except green fodder in Bihar. Water becoming scarce in Barh and Bihar. Numbers on relief on Saturday, 24th April—

	Men.	Women.	Children.	Total.
Relieved in poor-houses ...	62	41	15	118
Otherwise relieved ...	6	2	Nil	8
Total ...				126

Gaya.—No rain. Sugarcane and *cheena* doing well. Price of Burma rice 9 seers and country rice 8½ seers per rupee.

Shahabad.—Rainfall at Sadar (·21) benefited sugarcane and *cheena*. *Cheena* sowing going on in places. Fodder and water for cattle sufficient except at Bhabua. Price of common rice 8 to 8½ seers per rupee. Latest price of common rice 8½ seers and of pea 10½ seers per rupee at Bhabhua fixes the relief-wages. Numbers on relief on Saturday, 24th April—

Lohardaga.—Rainfall nil. Ploughing continues. No crops on the ground. Rice sells at Ranchi 8½ seers, and in the interior from 6½ to 10 seers per rupee. No report of cattle-disease. Fodder and water sufficient. Grain in stock sufficient for the present.

Palamau.—Rainfall nil. Weather very hot. The little *tera* paddy grown, also sugarcane and *cheena*, doing well. 3 markets selling at below 6 seers against nil last week; 7 markets at 6 seers against 1; 22 markets at above 6 seers, but below 7 seers against 18; 15 markets against 5 at 7 seers; 29 markets against 36 at above 7 seers, but below 8 seers; 9 markets against 15 at 8 seers; 5 markets against 15 above 8 seers, but below 9 seers. Prices of wheat, barley and gram were 8 seers 8½ chitaks, 12 seers 1 chitak, and 10 seers 3 chitaks per rupee, against 9 seers, 13½ seers, and 10½ seers respectively last week. Under the bounty system 900 maunds of Burma rice and 309 maunds of country rice were imported.

Manbhum.—Rainfall at Sadar nil, Gobindpur 34. Weather hot. Only a little sugarcane on the ground. Prospects unchanged. Cattle-disease reported from thanas Raghunathpur, Baghmundi, and Purulia. Scarcity of water reported from Gobindpur and from thanas Raghunathpur, Gourangdi, Jhalda, Chas and Chandil of Sadar. Fodder sufficient at present. Food-supply also sufficient at present. Common rice sells at 9 seers per rupee at Sadar and Gobindpur. Numbers on relief:—

Total				...	8,320

Singhbhum.—No rain. Rice plentiful. Price of rice from 7 to 12 seers per rupee.

General Summary.—There was general rain during the week except in Orissa and Chota Nagpur, where only a few local showers are reported to have fallen. The rain has done good to the sugarcane and other young crops, and has facilitated ploughing and early sowings, which are in progress. The harvesting of spring rice is going on. The water-supply is still deficient in parts, though to some extent improved by the recent rain. The price of rice is reported to have risen in some districts. In the distressed districts the prices of the staple food-grain on which the famine wage is based are—Nadia (common rice) 8 seers, Murshidabad (common rice) 8½ seers, Khulna (common rice) 10 seers, Rajshahi (common rice) 8 seers, Pabna (common rice) 8½ seers, Patna (common rice) 9½ seers, Shahabad (common rice at Bhabua) 8½ seers, Saran (barley) 12 to 14 seers, Champaran (Indian-corn) 9 seers 11 chitaks and (common rice) 8 seers 9 chitaks, Muzaffarpur (Indian-corn) 10 seers and (*rahar*) 13 seers, Darbhanga (common rice) 7½ seers, Bhagalpur (common rice) 8 and 8½ seers and (*marua*) 13 and 15 seers, Sonthal Parganas (rice at Jamtara) 8 to 8½ seers, Puri (common rice) 10 to 12 seers, Hazaribagh (rice) 7 to 9 seers, Manbhum (common rice) 9 seers.

Numbers on relief on Saturday, the 24th April 1897:—

The mean pressure of the seven days Inches 29.708

The average pressure of the corresponding period for 24 years, Surveyor-General's Office 29.745

The total number of hours of bright sunshine Hours 57.5

The maximum possible number of hours of sunshine 89.2

The mean temperature of the seven days 85.9

The average temperature of the corresponding period for 24 years, Surveyor-General's Office 84.5

The extreme variation of temperature 29.0

The maximum temperature 101.4

The highest velocity of the wind in one hour Miles 17

The mean relative humidity % 72

The average relative humidity of the corresponding period for 24 years, Surveyor-General's Office 71

The total fall of rain from 18th to 24th April 1897 Inches 0.23

The average fall of the corresponding period for 24 years, Surveyor-General's Office 0.51

The total fall from 1st January to 24th April 1897 3.54

The average fall of the corresponding period for 24 years, Surveyor-General's Office 4.06

The mean pressure, temperature, &c., are deduced from the traces of the Barograph and Thermograph, and from observations made at 6h., 10h., 16h., and 22h.

The maximum and minimum temperatures are obtained from self-registering thermometers. All the thermometers are verified and the readings have been corrected to a standard constructed and verified at the Kew Observatory. They are exposed under a thatched shed, open at the sides, and are suspended four feet above the ground.

The barometer readings are corrected approximately to those of the standard, Newman's No. 86, formerly at the Surveyor-General's Office.

The hygrometric elements are obtained from Tables III, IV, and V of the official tables computed in the Meteorological Office, and based on Regnault's modifications of August's formula.

The directions and the movement of the wind are taken from the trace of a Beckley's anemograph.

The mouth of the rain-gauge is one foot above the ground.

o, overcast; t, thunder; < lightning; p, passing temporary showers; ☉ dew; ⊕ solar corona.

Abstract of the Proceedings of the Council of the Lieutenant-Governor of Bengal, assembled for the purpose of making Laws and Regulations under the provisions of the Indian Councils Acts, 1861 and 1892.

The Council met at the Council Chamber on Saturday, the 3rd April, 1897.

Present:

The Hon'ble SIR ALEXANDER MACKENZIE, K.C.S.I., Lieutenant-Governor of Bengal, *presiding*.

The Hon'ble SIR CHARLES PAUL, K.C.I.E., Advocate-General of Bengal.

The Hon'ble NAWAB SYUD AMEER HOSSEIN, C.I.E.

The Hon'ble M. FINUCANE.

The Hon'ble C. W. BOLTON.

The Hon'ble W. H. GRIMLEY.

The Hon'ble J. G. H. GLASS, C.I.E.

The Hon'ble C. A. WILKINS.

The Hon'ble H. H. RISLEY, C.I.E.

The Hon'ble RAI DURGA GATI BANERJEA BAHADUR, C.I.E.

The Hon'ble J. PRATT.

The Hon'ble SURENDRANATH BANERJEE.

The Hon'ble A. M. BOSE.

The Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR.

The Hon'ble GURU PROSHAD SEN.

The Hon'ble MAHARAJA BAHADUR SIR RAVANESHWAR PROSHAD SINGH, K.C.I.E., of Gidhaur.

The Hon'ble M. S. DAS.

The Hon'ble A. H. WALLIS.

The Hon'ble SAHIBZADA MAHOMED BAKHTYAR SHAH.

NEW MEMBER.

THE Hon'ble MR. PRATT took his seat in Council.

CONDITION OF RAILWAY PLATFORMS.

THE Hon'ble RAI ESHAN CHUNDRA MITTRA BAHADUR asked—

Has the attention of the Government been called to the condition of the platforms at Sheoraphuli, Bhaddeshwar, and Khana Junction stations, which are all so low that ladies can with difficulty get out of the Railway compartments into the platforms, and from them to get into the train? Is the Government aware that Bhaddeshwar is a great place of trade, and that Sheoraphuli is a junction station for the Tarakeswar Railway, and that hundreds of Hindu ladies have daily to make use of the platform of the Sheoraphuli station? Was there not a petition presented to Mr. R. C. Dutt, then Magistrate of Hooghly, for the raising of this platform? Will the Government be pleased to state how that petition has been disposed of, and also to take steps for the removal of the much felt grievance to which I have called attention?

THE Hon'ble MR. GLASS replied:—

“The attention of Government has not been drawn to the condition of the platforms at Sheoraphuli, Bhaddeshwar and Khana Junction on the East Indian Railway. It has been ascertained that a petition was presented to the Magistrate of Hooghly some time ago urging that the Sheoraphuli platform be raised: the Railway authorities were addressed in the matter by that officer and asked to take steps to remove the grievance, but apparently no reply has yet been given. The Public Works Department of this Government have also recently addressed the East Indian Railway enquiring what it is proposed to do to improve the platforms, but as the Agent has been absent from headquarters no reply has been received. A reply is, however, expected on his return.”

THE Hon'ble MR. RISLEY added some remarks about the condition of the Khana junction platform.

SUBORDINATE JUDICIAL SERVICE.

THE Hon'ble BABU SURENDRANATH BANERJEE asked:—

Will the Government be pleased to state whether the members of the Subordinate Judicial Service who have been appointed Sessions Judges are subject to the same rules as regards leave, travelling and deputation allowances, as Assistant Sessions Judges in Bombay and the Central Provinces?

THE Hon'ble MR. BOLTON replied:—

“The Officers referred to in the Hon'ble Member's first question are members of the Subordinate Judicial Service temporarily appointed to be also Assistant Sessions Judges, and they remain subject to the rules of that service as regards leave and allowances.”

THE Hon'ble BABU SURENDRANATH BANERJEE asked:—

(a) In the rules framed by Government in 1894 for the appointment and promotion of officers in the Judicial Branch of the Provincial Civil Service, and published in the *Calcutta Gazette* of the 14th March, 1894, promotion to grades below that on Rs. 600 a month is said to be given ordinarily according to seniority, subject to fitness and approved conduct, while the right to promotion to the senior grades is reserved to the Lieutenant-Governor by special selection for merit without regard to seniority. Will the Government state whether in any case this right has been exercised by the Lieutenant-Governor, and if not, will His Honour now exercise the right with a view to give encouragement to meritorious officers in the service?

(b) Will the Government state whether there are any fixed rules for the transfer of Subordinate Judicial Officers? If not, will the Government frame such rules subject to such exceptions as any special case may require?

(c) Does priority of registration of the name of a candidate for the Subordinate Judicial Service ensure the appointment of the candidate whose name is thus registered to an acting or permanent Munsifship? If so, will the Government state whether such a rule is observed and appointments are made in accordance therewith?

The Hon'ble Mr. BORTON replied:—

“(a) The right alluded to has been exercised by His Honour.

“(b) There are no fixed rules for the transfer of officers in the Subordinate Judicial or any other Service, and the Lieutenant-Governor sees no necessity for such rules.

“(c) Under the rules for admission into the Judicial Branch of the Provincial Civil Service, priority of entry in the register confers no right of priority of appointment; and a candidate's name must be struck off the register if he fails to obtain an appointment before he attains the age of 29 years. Other things being equal, priority of registration is taken into account; but it is necessary sometimes to make exceptions, and these may result in particular candidates not securing appointments before they reach the age limit.”

ESTATES PARTITION BILL.

The Hon'ble Mr. FINUCANE presented the Preliminary Report of the Select Committee on the Bill to amend the law relating to the partition of estates. He said:—

“As we have made numerous alterations in the Bill, we have presented only a preliminary report, and propose to have the Bill re-published. The principal changes which have been made are that we have lowered the limit of partibility of revenue from Rs. 100 to Rs. 20, and we have re-cast the whole of Chapter V regarding the survey and record-of rights. The Select Committee describe the change made in that Chapter thus:—

“We have re-cast this Chapter. The Bill, as introduced, provided for the making of a complete survey and the preparation of a record-of-rights, including the determination of the status of all tenants and the decision of all disputes by the Deputy Collector, whose decisions were to be deemed to be correct until the contrary was proved and were to be appealable only to the Revenue authorities.

“Under the Bill for amendment of the Bengal Tenancy Act, which is now before the Council Revenue Officers are to be deprived of the power of deciding disputes as to possession, right and title, and their orders are not to have the force and effect of decrees of a Civil Court. We think that still less should powers to decide disputes be given them in partition proceedings.

“The determination and recording of the status of tenants are not necessary for the purpose of apportioning the revenue of estates under partition, and for this reason, and because the proprietors unanimously object to complicating the proceedings by recording the rights of the tenants, we have omitted this status of tenants from the particulars which the Deputy Collector is to record in making a survey.

“We have provided that the Deputy Collector shall make a survey showing the area of land held by each tenant and prepare a record of existing rents (i) as stated by the landlord, (ii) as stated by the tenant, and (iii) as taken for the purposes of the partition. We have also provided that a copy of extracts relating to their holdings containing these particulars shall be given to the tenants. We think these extracts will sufficiently protect them against the risk of having the partition proceedings made use of to their detriment. We have attached no special evidential value to the entries made by the Deputy Collector in the survey papers and record of existing rents. They may be referred to by the Courts as evidence of the contemporaneous admissions or allegations of the parties as to the amount of the rent at the time the record was prepared, and as evidence of what was the Deputy Collector's opinion as to the amount of the rent, and no more. We do not think it necessary for the purposes of the partition, or desirable on general grounds, to empower the Deputy Collector to decide any disputes relating to rent or status in the course of partition proceedings, and have modified the Chapter accordingly.”

"The other amendments made by the Select Committee are purely of a technical nature, and I need not take up the time of the Council in referring to them. The Lieutenant-Governor has ordered the Preliminary Report and the Bill as amended by the Select Committee to be published for the purpose of eliciting opinions."

AMENDMENT OF CERTAIN SECTIONS OF BENGAL TENANCY ACT, 1885.

The Hon'ble Mr. FINUCANE also introduced the Bill to amend sections 30, 31, 32, 52 and 119 and Chapter X of the Bengal Tenancy Act, 1885, and moved that it be read in Council. He said:—

"Sir,—The duty now devolves upon me to move that the Bill to amend sections 30, 31, 52 and 119 and Chapter X of the Bengal Tenancy Act, 1885, be read in Council. This Bill, with a full statement of its Objects and Reasons, has been in the hands of Hon'ble Members for some days back. Hon'ble Members are aware that the discussions which eventuated in the Bengal Tenancy Act began in connection with a small Bill 'to provide for the more speedy realisation of arrears of rent, and to amend the law relating to rent' which was originally suggested by the Hon'ble Kristo Das Pal, and introduced into this Council in 1878. These discussions were carried on continuously from the date of the appointment of the Bihar and Bengal Rent Commissions in 1878 and 1879, throughout the periods of office of two Viceroys, Lord Ripon and Lord Dufferin, and of two Lieutenant-Governors, Sir Ashley Eden and Sir Rivers Thompson, down to 1885 when the Bengal Tenancy Act was passed.

"Discussions which began with a small Bill for facilitating the realisation of arrears of rent and the settlement of rent, in private estates, by Revenue Officers, ended with the Bengal Tenancy Act. There were some who held at the time that Act was under consideration that the land was the absolute property of the zamindars who were, or ought to be, entitled to do as they pleased with it, and, according to them, the Bill which resulted in the Act of 1885 was of a revolutionary and confiscatory character. There were others who held that by the common law and immemorial custom of India the raiyats were, before the permanent settlement, entitled to hold their lands at the *pargana* rates, which were fixed and unalterable rates, that the permanent settlement was never intended to deprive them of that right, but on the contrary that Lord Cornwallis' intention was to secure the raiyats in the possession of their lands at rates as fixed and unalterable as the revenue payable to the British Government by the zamindars themselves. According to these latter authorities the Act was an earnest but not completely successful attempt to restore to the raiyats of Bengal some of those ancient rights of which they had been deprived subsequently to the date of the permanent settlement and were then being deprived. According to those who held this view the Tenancy Bill of 1885, far from being revolutionary or confiscatory, was, on the contrary, inspired by that spirit of true conservatism, which cuts down the parasite so that the tree may flourish. The Act was a compromise between these conflicting views.

"I think it may be truly said, that no Act passed by the Indian Legislature was ever submitted to such prolonged, careful and searching investigation as the Tenancy Act. No Bill was ever more ably defended, on the one hand, by the eminent men who supported it, and none, on the other, was ever so severely criticised and stoutly opposed by those who were not in favour of it. The result of seven years' discussion was, as I have said, the compromise embodied in the Act as it stands.

"Bearing these facts in mind, it will doubtless be felt by the Council, and outside of the Council, that it is no light matter to re-open discussion on any of the fundamental principles then accepted as a settlement of the questions at issue, and strong reasons will naturally be expected to justify the adoption of such a course.

"These reasons it is my duty, and it will be my endeavour, to lay before the Council.

"The literature connected with the Tenancy Act before the date of its passing fills 14 large volumes in the records of the Bengal Secretariat. As

Macaulay said in one of his essays, writing of Dr. Nare's Memoirs of Lord Burleigh, compared with the labour of reading through these volumes, all other labour would be agreeable occupation.

"But I trust that it will not be necessary for Hon'ble Members to undergo this labour in order to master the provisions of this Bill.

"Macaulay goes on to tell of a criminal who was suffered to make his choice between reading the works of a certain historian and the galleys. He chose the history; but when he had gone a certain length and came to read of the war of Pisa, it was too much for him. He changed his mind and went to the galleys. I hope that the literature connected with defects, some real and some, as I think, imaginary, discovered within the past five years in the Tenancy Act, and the literature which may spring up from the introduction of this Bill, may not be to those who in the future may have to study the law and literature of landlord and tenant in Bengal, what the war of Pisa was to Macaulay's criminal.
